Mr. CHILTON. I take it there will be some difficulty, but funds have been successfully transmitted from private sources to those people. I think we will find some way to transmit them if we can get the funds.

Mr. NORRIS. Of course I think it should be known that the people intended to be benefited by these contributions would get them and that there will be no difficulty in the way of the funds reaching them. If it is known that there will be no difficulty in the way of getting it to them the subscriptions will be a great deal more liberal. I asked the question for the purpose of bringing out that idea.

Mr. CHILTON. I will say in reply that there are a great many of these people who live in my State and a great many of them who live in my home city. They are very prosperous people in this country, and funds have been collected in a private way by my neighbors and friends and successfully transmitted to their people in Asia. I do not think there will be any trouble in transmitting the funds if we can raise them.

The VICE PRESIDENT. Is there objection to the consideration of the resolution? The Chair hears none, and the resolution is adopted.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by E. T. Taylor, jr., one of its clerks, announced that the House had passed a joint resolution (H. J. Res. 257) permitting the use of certain hospital facilities belonging to the United States, in which it requested the concurrence of the Senate.

TREATMENT OF INFANTILE PARALYSIS.

Mr. O'GORMAN. Mr. President, this is an emergency measure which has just come from the House. It has reference to the treatment of the plague that is now afflicting New York City and some other parts of the country. It permits the local authorities to make use of certain governmental stations at Ellis Island. I ask unanimous consent for the immediate consideration of the joint resolution.

The VICE PRESIDENT. The Chair lays the joint resolution before the Senate.

The joint resolution (H. J. Res. 257) permitting the use of certain hospital facilities belonging to the United States was read the first time by its title.

Mr. SMOOT. Mr. President, this being an emergency matter, of course I shall not insist upon its taking the regular course, but if it were not for the urgency of it I would insist upon a reference.

The VICE PRESIDENT. Is there objection to waiving the rule which would require the joint resolution to be submitted to a committee? The Chair hears none. The Secretary will read the joint resolution.

The joint resolution was read the second time at length, as follows:

Resolved, etc., That until November 1, 1916, the Secretary of Labor be, and he is hereby, authorized, in his discretion, to utilize the available hospital facilities at the immigration station at Ellis Island, New York Harbor, for the purpose of housing and caring for indisposed persons from the city of New York and vicinity, under such conditions as the Secretary of Labor shall prescribe, but without expense to the Government of the United States; and the State or city of New York, or both, shall compensate the Government of the United States for any and all losses sustained by the Government in the use and occupation of such buildings.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TRADE AGREEMENT ABROAD (S. DOC. NO. 491).

Mr. STONE. Mr. President, I ask the Senator in charge of the Agricultural appropriation bill to allow me a few moments to present a question I deem to be of grave international import, and to ask that certain documents I have on my desk may be printed as a public document.

I have put in as brief form as I could what I desire to say to the Senate, and I should like to have, if I can, the considerate attention of the Senate. What I am about to say relates to Senate resolution 220, which I presented June 29, and which was agreed to on the following day. The resolution relates to the recent economic conference or convention held in Paris.

Mr. BRANDEGEE. Mr. President, will the Senator from Missouri be kind enough to state the number of the resolution which he is discussing? I did not catch it.

Mr. STONE. I am addressing my remarks to Senate resolution No. 220.

Mr. President, all of us are deeply sensible of the horrors incident to the great war in Europe. It would be useless for me to dwell upon that. I do not know, nor do you, how this mighty struggle will eventuate. No doubt we entertain individual opinions as to that, but such opinions are of necessity speculative and uncertain; moreover, it would not be thought to be the proper thing for any of us in this presence and at this time to express an opinion on that subject. All that we can assert is that sometime in the not distant future this stupendous butchery of men—men representing what is of the best in our Christian civilization—must end. To be sure whatever this great neutral Nation of ours may properly do to hasten that end should be done, and no doubt will be done. But my present purpose does not lead me into that consideration. For the present my eye is upon the end of the conflict, whenever and however that end may come. My eye is fixed upon the possible, may I not say probable, consequences of that end upon the well-being of this country. I am for the present confining my vision to our own horizon. Already the great nations engaged in this struggle have, as we know, reached a point of great embarrassment to all of them—financially, industrially, economically. If the war should go on to a bitter end—that is, to a final arbitrament of armed strength and endurance—the embarrassment alluded to will of necessity be enormously increased.

After it is all over what will the party victorious do, or be inclined to do, and in what way may the post-bellum policies of the victorious party affect our country and people? Of late I have been observing various things bearing upon this question. The things I have been observing relate to the possible policies of the victor, whoever that may be, when the doubtful issue of victory has been decided. Whether from the standpoint of the central—Germanic—powers or from the standpoint of the entente allies, it follows inevitably that whatever they have in mind to do is—at least, in large measure—dependent upon the final outcome of the struggle. The defeated party will likely have little to say; the victorious party will have much to say.

Mr. President, ought not we to be giving serious thought and attention to the outline of policies—the tentative, conditional policies—of these combatant nations as these outlines come to us? What does Germany have in mind to do in a commercial way if her arms should compel her enemies to yield? And what will the great powers of the entente alliance have in mind to do if victory should rest in the end upon their banners? I am not for the moment concerned about maps, about territorial changes, about successions to thrones, about governmental autonomies. I have in mind the things that may directly and immediately concern the material welfare of this country in particular, and in a larger sense of this hemisphere in general. It is not my present purpose to discuss these questions at length or with particularity of detail; perhaps we have not yet reached the point where that can be done advisedly. I wish merely to call passing and urgent notice to some of the things that have challenged my thought and attracted my attention.

First, let it be supposed that Germany should be the victor. What would the German policy be with respect not only to her enemy belligerent nations, but with respect to the world at large? Of course I can not answer this question satisfactorily, much less authoritatively. Still some things come to us it is worth while to take note of. Among other things to which my attention has been called is an article written by Gustaf Sioesteen—written in Berlin and printed in a Swedish publication. From that article I wish to make the following significant quotation:

> A commencement of this new economical connection is being made by the negotiations entered on by representatives of Austria-Hungary and Germany concerning the proposed formation of a customs union. Since this union would include 120,000,000 individuals, it must be evident what an immense attraction it must exert on the surrounding smaller nations. Swithzerland and Holland can scarcely escape this attraction, and the Scandinavian countries, it is said, would probably find it to their advantage, together with a liberated Finland, to form a northern customs union, which later, on an independent basis, could enter in close union with the vast "Zollverein" of central Europe.
>
> This "Zollverein" would then include about 175,000,000 individuals. The adhesion of Italy to the vast union would not be inconceivable, and then the combination of the United States of Europe, founded on a voluntary commercial union, would be approaching its realization.
>
> Such a commercial union, embracing various peoples, could only lead to moderation in foreign politics and would be the best guaranty for the peace of the universe. A brisk interchange of commodities, a fruitful interchange of cultural ideas, would result from such a union, connecting the polar seas with the Mediterranean and the Netherlands with the Steppes of southern Russia.

Of course this is not official or in any sense authoritative, but I have some good reason, although I do not feel at liberty to state the grounds of that reason, to believe that it is in some large way expressive of German governmental policy. That is all I care to say at this time on that subject. If true, it is very important.

I turn now to the other side—that of the entente allies. Whatever may be said about the German policy following the war—and as to that, it must be admitted, our information, at least so far as I have information, is somewhat nebulous and uncertain—the allies have given us a more definite cue as to their policy. Some months ago a movement was set afoot for the holding of an economic or commercial conference between the principal nations associated in what is known as the entente alliance. The proposal for such a congress was extensively discussed in Great Britain, France, and other countries. My attention has been called to a discussion had in the British House of Lords concerning this congress antedating the meeting thereof, and I have read various articles expressive of British public opinion relating to the subject appearing in the leading trade and commercial publications of that and other countries. I can not, of course, speak with assurance; but, reading and attempting to digest many of these things, I can not escape the belief that these war-involved and so-called allied nations have in mind a mutual policy to accomplish certain results beneficial to themselves and that may not be in accord with the interests of this country.

Primarily it appears to be the chief mutual purpose of these allied nations to wage a commercial war against Germany after Germany has been defeated on the field of physical combat. As to that there has been no attempt to disguise their purpose; but, as I have gone along reading the various discussions which have come under my notice, I am impressed with the apprehension that there may be, and probably is, a purpose having a larger reach.

There is talk of an international understanding between them that the allied powers, after the war, would work with each other and for themselves as against not only Germany but the balance of the world. There is much talk of fiscal and economical policies looking to that end, the underlying purpose being to aid each other in recouping and rehabilitating themselves. I am impressed with the notion of a purpose and tendency toward a close and somewhat exclusive commercial and industrial union of that character.

I wish to read at this point a brief extract from a speech recently delivered by the Right Hon. William Morris Hughes, the Australian premier and one of the dominating men in carrying forward the British policy. It is a somewhat remarkable thing that a man from far-away Australia, who has reached supreme power in that self-governing colony, should go to London and in the Parliament and on public opinion in the United Kingdom exert an influence that can hardly be second to that of any other man. He must be a man of great force. He was one of the leading men representing the British Empire at this Paris conference. Here is what he said, outlining his view of the general policy of the country for which he spoke—patriotically spoke:

> Then we have to prepare to meet the demand for machinery, ships, goods of all kinds which have either been destroyed by the war or which could not be manufactured during the war. We have to retain our hold on the sea-carrying trade and to dispose of our products in the markets of the world. The central powers have recently entered into a very close economic alliance, and Germany is using all its genius for organization to make it effective. Then, the neutral nations, growing rich while we grow daily poorer, are making great preparations to capture the world's markets and oust us from our position. All these things confront us. We must face them, and we must master them. And I am quite sure we can do so if we but go the right way to work.
>
> The only possible solution of the great problem lies in organization. We must not only put energy into the work, but brains; the best brains of the country. And we must call science to our aid.
>
> The material basis of every industry is its raw material. Without this, industry is helpless. The Paris conference sets out the position in one of its resolutions. Common sense and our own bitter experiences have made us realize how vital to national safety and welfare the raw materials of our basic industries are. We have seen what the control of dyes, tungsten, spelter, and other metals by Germany means to this Nation. It is profoundly true that if one great power controlled practically all the supplies of such things as copper, lead, zinc, tungsten, petrol, rubber, and cotton all the world would be suppliant at its feet.

Perhaps we would have no well-founded right to quarrel with these nations if what is suggested should turn out to be the absolute truth. They have suffered together, and together have seen their vast accumulations wasted, to say nothing of their losses in life and losses in other ways. Perhaps it would be only natural for these nations, being victorious in the war, to turn a cold, icy face to America and all the balance of the

world, crush Germany industrially as well as physically, and join in a common effort to rebuild their shattered fortunes by some form of concerted action without deference to other nations.

Mr. President, I think a policy of that kind would be short-sighted, resulting in retaliatory measures, and that the wounded nations would suffer most if they entered upon a struggle of that kind against the neutral nations of the world who might be most helpful in a time of such dire stress, and when the friendship of strong nations—nations opulent in every way and capable of aiding in every way—should be at the side of all the combatants to aid them instead of being driven into an unwilling enmity against any of them. But their views and ours may not be in accord.

Mr. President, I think this is as far as I care to go into this subject at this time. I shall conclude for the present by asking the unanimous consent of the Senate to print as a public document certain papers I hold in my hand bearing on this general subject, to which I respectfully invite the attention of my colleagues and of the country. I also ask that the remarks I have just made may be printed as a sort of explanatory introduction to this public document and as a part of it.

Mr. President, these papers, to which I have but barely alluded, contain, as I think, a great fund of valuable information to the Senate, to the Congress, and to the country. I should like to have the matter printed in the way I have suggested—as a public document—and I ask that the papers may be printed in the order in which I have arranged them.

Mr. GALLINGER. Mr. President, if the Senator please——

Mr. STONE. I am through.

Mr. GALLINGER. May I ask the Senator if the documents relate to economic questions exclusively and to the apparent purposes of the combatant nations of Europe?

Mr. STONE. Oh, absolutely.

The VICE PRESIDENT. Is there any objection to the request of the Senator from Missouri? The Chair hears none.

Mr. STONE. I understand permission is given to have the document printed.

The VICE PRESIDENT. Yes.

Mr. LODGE. Mr. President, the Senator from Missouri [Mr. STONE], in what he has said, and which has so much interested, as it ought to interest, the Senate, has considered the possibilities of what may happen, first, in the case of the victory of the central powers and, second, in the case of the victory of the allied powers, as they are called. This resolution, however, relates only to the conference said to have been held in Paris. It relates only to the possible action of the allies. I think it extremely desirable that, as the Senator from Missouri himself has said, we should have also any information that can be had from the State Department with relation to the possible action of the central powers.

This resolution should not be confined to what the allied powers intend to do at the close of the war but it should give us every possible information as to what Germany and Austria propose to do, so far as can be learned from the utterances of their public men and from writings of authority, such as that quoted by the Senator from Missouri.

That there is such information about the designs of the central powers is shown by what the Senator from Missouri has read. I think that it is very important that we should know the intentions of both sides, so far as they can be known.

The resolution, it will be observed, deals only with economic arrangements. The Senator from Missouri said that he was not concerned with maps, by which I understood him very properly to mean that he was not concerned with what may be called the political aspects of the war, or with the treaty between Russia and Japan, which has been announced, and which we have reason to understand is a political and not an economic agreement.

I am sure, Mr. President, that we ought to have all the information we possibly can get in regard to every phase of the economic situation. At this time, of course, that situation must be very largely matter of pure speculation. All that we absolutely know is that the greatest war which has ever afflicted mankind has been raging for two years in Europe, and that, whatever its physical and political results may be, such a convulsion can not but bring in its train, when peace comes, enormous economic changes. What the various powers will do when peace comes, whether defeated or victorious, no man can accurately say; but we may be perfectly certain that they will devote every effort to restoring normal conditions, and to bringing back as rapidly as possible—and it will be a slow process at best—sound economic conditions in their respective countries. That they will attempt legislation or agreements for that purpose I think is not an unreasonable inference; but what concerns us in the United States and alone concerns us is to be as well prepared as we can be for a future which necessarily can not be known, but about which we can only guess. We know that the results will be of the most far-reaching character, and beyond that we can only conjecture.

It seems to me, Mr. President, that the only wise course for this country is, so far as possible, to be prepared for any contingency. There are two forms of preparation—what I may call the physical and the economic. I am very deeply convinced of the necessity of such preparation on the physical side as to make the application of force and violence to the United States as remote as possible. I wish such preparation had been begun long ago. It is not too late even now, although much precious time has been lost, and we ought to make every possible preparation for our own defense, both by sea and by land. I believe that we are about to make suitable preparation by sea. I wish I could say the same as to our preparation by land. But the physical preparation is, comparatively speaking, simple. We must have such an armament for defense as will secure our own peace, as will be sufficient to make it apparent to all the world that we are not to be attacked with impunity by anybody, either on our Pacific or our Atlantic coasts. Into this question of physical defense and preparation I do not care to enter further at this moment. When the naval bill is before the Senate I shall venture to say something further upon this point.

Now, as to the industrial situation: We know that the temporary prosperity, so called, due to the vast expenditure of foreign money in this country during the last two years, is wholly artificial and unreal. We know it can not last. The purchases for foreign account are said to be declining already owing to the fact that the allies at least are now largely supplying their own needs. Those vast expenditures by foreign governments in this market will cease, they will cease absolutely on the coming of peace, and we shall find ourselves in a world in which we know this to be certain, that the purchasing power of the nations who have hitherto bought of us largely in normal times will have been immensely diminished. We shall also find ourselves in a world where capital has been destroyed in unheard of amounts, where industry has been paralyzed, and where all the stricken countries will be working in desperation to restore their industrial fortunes. These conditions, at least, we know we shall have to meet.

We shall require to be prepared in this direction also by what is generally referred to as industrial organization. Into the details of this organization of our industries it will be impossible at this moment to enter; but I will say this much, and I say it without any party suggestion, because I think I am stating a general principle, that if we are to meet some of the international combinations which are likely to occur, if we are to be able to meet some of the tariffs which are likely to be imposed, we must remember that the great weapon in our hands is the fact that we have the best market in the world both for import and for export, and that if we keep that weapon sharp and bright, if we hold it with a strong hand, the nations of the world will think twice before they throw that market away or attempt to destroy exports which are essential to their being.

That they will try to close the gates of trade and commerce upon us in many directions I regard as highly probable, although the aim and extent of the effort must remain at present a matter of speculation. But if we are to meet this situation successfully we must be prepared economically and industrially as I believe we should be prepared physically and in arms. To the end the essential thing is so to organize our industries that they will be strong, independent, and ready for the conflict when and if it comes. Certainly in order to organize the industries in order to make them a bulwark and a barricade against the economic struggles we may have to face, the first thing that is necessary is not to cripple but to encourage them. We must try to put them in a condition so that they can stand behind the people and the Government, be able to meet any test, and make the world clearly understand, as we must make them understand in the matter of armaments, that we can not be invaded, either physically or economically, with impunity.

Such, Mr. President, seems to me the true, the vital policy to be followed by this country in both directions. The first obvious step is that we should have all the information that it is possible and proper to give us now or later, not only as to one group of belligerents but as to the purposes and intentions of all the nations now engaged in war.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had, on July 10, 1916, approved and signed the following acts:

S. 1388. An act to authorize the Secretary of the Interior to furnish hot water from the hot springs on the Hot Springs Reservation for drinking and bathing purposes free of cost to the Leo N. Levi Memorial Hospital Association; and

S. 1843. An act to authorize the Secretary of the Interior to acquire certain right of way near Engle, N. Mex.

MESSAGE FROM THE PRESIDENT (S. DOC. NO. 490).

The VICE PRESIDENT. The Chair lays before the Senate a message from the President of the United States, which will be read.

The Secretary read as follows:

To the Senate of the United States:

In response to the resolution of the Senate of June 29, 1916, requesting the President to obtain information as far as possible as to the character, form, and purpose of the agreement or treaty concluded by the allied nations at Paris regarding their future joint and several industrial and commercial interests, I transmit herewith a report of the Secretary of State furnishing the information requested so far as it is now in the possession of the Department of State.

WOODROW WILSON.

THE WHITE HOUSE,
Washington, July 10, 1916.

The VICE PRESIDENT. This is in response to the resolution of the Senator from Missouri. The Chair would inquire whether he desires it to be added to the public document?

Mr. STONE. I have not seen the information conveyed by the President, but I should like to have it incorporated in the document I have asked to have printed, so that it may be in one cover.

Mr. SMOOT. And printed also in the usual way.

Mr. STONE. It can be printed as a separate document and should be, I assume. Is there objection to having it printed in the usual way as a document and at the same time embodying it in the document I have asked to have printed?

Mr. GALLINGER. I will ask the length of the reply.

The VICE PRESIDENT. Apart from the formal part setting out the resolution, which the Chair thinks need not be read, it consists of about 10 pages.

Mr. GALLINGER. I made the inquiry for the reason, and I will defer entirely to the judgment of the distinguished Senator from Missouri in reference to the matter, I thought it would be most interesting to the Senate to have it read. If there are only 9 or 10 pages, it will not take long.

Mr. STONE. If the Senator from South Carolina [Mr. SMITH], who has charge of the Agricultural appropriation bill to-day, and upon whose time we are trespassing, will not object.

Mr. SMITH of South Carolina. I hear considerable requests around me to have it read, and I will yield for that purpose.

Mr. GALLINGER. I think it would be very illuminating in view of the discussion which has taken place this morning.

Mr. BRANDEGEE. Before that is done will the Senator from Missouri let me ask him a question? Would the Senator think it would be inappropriate to have the remarks of the Senator from Massachusetts upon the resolution incorporated in the document as well as the Senator's?

Mr. STONE. Is the Senator addressing me?

Mr. BRANDEGEE. Yes; would the Senator from Missouri object to having the remarks just made by the Senator from Massachusetts in relation to this very subject incorporated in the Senate document, inasmuch as his own remarks have gone in?

Mr. STONE. I certainly would not.

Mr. BRANDEGEE. Then I ask unanimous consent that that may be done.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. GALLINGER. Let the reply to the resolution be read.

The VICE PRESIDENT. The Chair thinks it is not necessary to read the prefatory matter, which simply shows the receipt of the resolution and the response thereto.

Mr. GALLINGER. Simply the matter communicated by the President.

Mr. FLETCHER. I suggest that the whole matter be printed in the RECORD, including the portion not read.

Mr. GALLINGER. All right.

The Secretary read as indicated, and the matter entire is as follows:

To the Senate of the United States:

In response to the resolution of the Senate of June 29, 1916, requesting the President to obtain information as far as possible as to the character, form, and purpose of the agreement or treaty concluded by the allied nations at Paris regarding their future joint and several industrial and commercial interests, I transmit herewith a report of the Secretary of State furnishing the information requested so far as it is now in the possession of the Department of State.

WOODROW WILSON.

THE WHITE HOUSE,
Washington, July 10, 1916.

DEPARTMENT OF STATE,
Washington.

The PRESIDENT:

The undersigned, the Secretary of State, to whom was referred by your direction the resolution of the Senate of the United States dated June 29, 1916, and reading as follows:

"Whereas it has been widely stated in the public press that a conference was recently held in Paris, France, by authorized representatives of several of the Governments of Europe, now engaged in the European war as allies of France, with the object and purpose of arriving at an agreement between them with respect to their future joint and several industrial and commercial interests; and

"Whereas it is also similarly stated that a commercial treaty was entered into at said conference between France, Great Britain, and other allied countries, which treaty it is alleged is now being drafted and is to become operative after the end of said war, with the declared object and purpose of establishing a boycott against the enemies of the high contracting parties to said treaty, both during the war and after the war, and also to promote commercial independence from the central powers; and

"Whereas in a statement relating to said treaty, issued by the British Board of Trade, published in the American press, it is stated, among other things, that 'the allies declare their common determination to insure the reestablishment of countries suffering from acts of destruction, spoliation, and unjust requisition, and decide to join in devising means to secure the restoration of those countries by giving to them a prior claim on raw materials, industrial and agricultural plants and stock, and mercantile fleets, or by assisting them in reequipping themselves in these respects'; * * * that 'the allies are to conserve all their natural resources during the period of reconstruction after the war for common use'; that 'in order to defend their commerce against economic aggression resulting from dumping or any other mode of unfair competition, the allies decide to fix by agreement a period during which the commerce of the enemy powers will be submitted to special treatment and the goods originating in their countries will be subjected to prohibition or to a special régime of an effective character'; * * * that 'the allies' mutual trade is to be fostered in every possible way'; and that 'the above steps are to be put into operation immediately': Therefore be it

"*Resolved*, That the President of the United States be, and hereby is, requested to ascertain and send to the Senate at the earliest practicable moment exact information, so far as that may be possible, as to the precise character, form, and full purpose of this agreement or treaty, especially with the view of disclosing to the Senate whether, and to what extent, neutral nations, especially the United States, may be affected thereby"—has the honor to make the following statement:

Instructions were sent by cable in June last to the American Embassay at Paris to study, in cooperation with the consul general, very carefully the deliberations of the commercial conference to be held in that city by the allies, and to report promptly all information which they were able to obtain.

The department has now received a dispatch from the American Embassy at Paris inclosing, with translation, the recommendations of the economic conference of the allies which sat in Paris from the 14th to the 17th of June, 1916, together with a list of the delegates from the various countries represented. A copy of this dispatch is submitted for communication to the Senate if deemed appropriate.

Respectfully submitted.

ROBERT LANSING.

Inclosures: From France, No. 3311, June 22, 1916, with inclosures.

DEPARTMENT OF STATE,
Washington, July 6, 1916.

[No. 3311.]

PARIS, *June 22, 1916.*

The Hon. SECRETARY OF STATE,
Washington.

SIR: In confirmation of my telegram, No. 1449, of the 20th instant I have the honor to inclose herewith, in copy and trans-

lation, the recommendations of the Economic Conference of the Allies which sat in Paris on the 14th, 15th, 16th, and 17th of June, 1916, together with a list of the names of the delegates from the various countries represented.

These recommendations apply to two separate periods—the period of the duration of the war and the period of reconstruction after the termination of hostilities.

For the first period the recommendations have reference to measures for the prohibition of trade with the enemy countries and for the elimination of the enemy firms in the allied countries.

For the second period the measures adopted are designed to give the allied countries a prior claim on their own natural resources and to prevent the dumping of merchandise of enemy manufacture or origin.

The commission also recommended permanent economic measures for rendering the allied countries economically, industrially, and agriculturally independent and for encouraging trade relations between the allied countries by the improvement of shipping, telegraphic, and postal facilities.

I have the honor to be, sir,

Your obedient servant,

ROBERT WOODS BLISS,
(For the Ambassador).

Inclosures: 1. Copy as above. 2. Translation. 3. List as above.

—

[Translation.]

ECONOMIC CONFERENCE OF THE ALLIED GOVERNMENTS.

The representatives of the allied Governments have met in Paris, Mr. Clementel, minister of commerce, presiding, on the 14th, 15th, 16th, and 17th of June, 1916, for the purpose of fulfilling the mandate which was confided to them by the conference of Paris on March 28, 1916, to put into practice their solidarity of views and interests and to propose to their respective Governments suitable measures for realizing this solidarity.

They perceive that the central powers of Europe, after having imposed upon them their military struggle in spite of all their efforts to avoid the conflict, are preparing to-day, in concert with their allies, a struggle in the economic domain which will not only survive the reestablishment of peace but at that very moment will assume all its amplitude and all its intensity.

They can not in consequence conceal from themselves that the agreement which is being prepared for this purpose amongst their enemies has for its evident object the establishment of their domination over the production and the markets of the whole world and to impose upon the other countries an inacceptable hegemony.

In the face of such a grave danger the representatives of the allied Governments consider that it is their duty, on the grounds of necessary and legitimate defense, to take and realize from now onward all the measures requisite on the one hand to secure for themselves and the whole of the markets of neutral countries full economic independence and respect for sound commercial practice, and on the other to facilitate the organization on a permanent basis of this economic alliance. For this purpose the representatives of the allied Governments have decided to submit for the approval of their Governments the following resolutions:

MEASURES FOR WAR PERIOD.

I.

Laws and regulations prohibiting trading with the enemy shall be brought into accord for this purpose:

A. The allies will prohibit their own subjects and citizens and all persons residing in their territories from carrying on any trade with the inhabitants of enemy countries of whatever nationality, or with enemy subjects, wherever resident, persons, firms, and companies whose business is controlled wholly or partially by enemy subjects or subject to enemy influence, whose names will be included in a special list.

B. The allies will also prohibit importation into their territories of all goods originating or coming from enemy countries.

C. The allies will further devise means of establishing a system of enabling contracts entered into with enemy subjects and injurious to national interests to be canceled unconditionally.

II.

Business undertakings, owned or operated by enemy subjects in the territories of the allies, are all to be sequestrated or placed under control. Measures will be taken for the purpose of winding up some of these undertakings and realizing the assets, the proceeds of such realizations remaining sequestrated or under control. In addition, by export prohibitions, which are necessitated by the internal situation of each of the allied countries, the allies will complete the measures already taken for the restriction of enemy supplies both in the mother countries and the dominions, colonies, and protectorates:

1. By unifying lists of contraband and export prohibition, particularly by prohibiting the export of all commodities declared absolute or conditional contraband.

2. By making the grant of licenses to export to neutral countries, from which export to the enemy territories might take place, conditional upon the existence in such countries of control organizations approved by the allies, or in the absence of such organizations, upon special guaranties, such as the limitation of the quantities to be exported, and supervision by allied consular officers, etc.

TRANSITORY MEASURES FOR THE PERIOD OF THE COMMERCIAL, INDUSTRIAL, AGRICULTURAL, AND MARITIME RECONSTRUCTION OF THE ALLIED COUNTRIES.

I.

The allies declare their common determination to insure the reestablishment of the countries suffering from acts of destruction, spoliation, and unjust requisition, and they decide to join in devising means to secure the restoration to those countries, as a prior claim, of their raw materials—industrial, agricultural, plant, and stock—and mercantile fleet, or to assist them to reequip themselves in these respects.

II.

Whereas the war has put an end to all treaties of commerce between the allies and enemy powers, and it is of essential importance that during the period of economic reconstruction the liberty of none of the allies should be hampered by any claim put forward by enemy powers to most-favored-nation treatment, the allies agree that the benefit of this treatment will not be granted to those powers during a number of years to be fixed by mutual agreement among themselves.

During this number of years the allies undertake to assure each other, so far as possible, compensatory outlets for trade in case consequences detrimental to their commerce should result from the application of the undertaking referred to in the preceding clause.

III.

The allies declare themselves agreed to conserve for the allied countries, before all others, their natural resources during the whole period of commercial, industrial, agricultural, and maritime reconstruction, and for this purpose they undertake to establish special arrangements to facilitate the interchange of these resources.

IV.

In order to defend their commerce and industry and their agriculture and navigation against economic aggression resulting from dumping or any other mode of unfair competition the allies decide to fix by agreement a period of time during which commerce with the enemy powers will be submitted to special treatment, and goods originating from their countries will be subjected either to prohibitions or to a special régime of an effective character. The allies will determine by agreement, through diplomatic channels, the special conditions to be imposed during the above-mentioned period on the ships of enemy powers.

V.

The allies will devise measures, to be taken jointly or severally, for preventing enemy subjects from exercising in their territories certain industries or professions which concern national defense or economic independence.

C.

PERMANENT MEASURES OF MUTUAL ASSISTANCE AND COLLABORATION AMONG THE ALLIES.

I.

The allies decide to take the necessary steps without delay to render themselves independent of enemy countries in so far as regards raw materials and manufactured articles essential to the normal development of their economic activities. These measures will be directed to assuring the independence of the allies, not only so far as concerns sources of supply but also as regards their financial, commercial, and maritime organization. The allies will adopt such measures as seem to them most suitable for the carrying out of this resolution according to the nature of the commodities and having regard to the principles which govern their economic policy. They may, for example, have recourse to either enterprises subsidized and directed or controlled by the Governments themselves or to the grant of financial assistance for the encouragement of scientific and technical research and the development of national industries and resources, or to customs duties or prohibitions of a temporary or permanent character, or to a combination of these different methods.

Whatever may be the methods adopted, the object aimed at by the allies is to increase the production within their territories, as a whole, to a sufficient extent to enable them to maintain and develop their economic position and independence in relation to enemy countries.

II.

In order to permit the interchange of their products the allies undertake to adopt measures facilitating mutual trade relations, both by the establishment of direct and rapid land and sea transport services at low rates and by the extension and improvement of postal, telegraphic, and other communications.

III.

The allies undertake to convene a meeting of technical delegates to draw up measures for the assimilation, so far as may be possible, of their laws governing patents, indications of origin, and trade-marks. In regard to patents, trade-marks, literary and artistic copyright which come into existence during the war in enemy countries, the allies will adopt, so far as possible, an identical procedure to be applied as soon as hostilities cease. This procedure will be elaborated by the technical delegates of the allies.

D.

Whereas for the purpose of their common defense against the enemy the allied powers have agreed to adopt a common economic policy on the lines laid down in the resolutions which have been passed, and whereas it is recognized that the effectiveness of this policy depends absolutely upon these resolutions being put into operation forthwith, the representatives of the allied Governments undertake to recommend that their respective Governments shall take, without delay, all the measures, whether temporary or permanent, requisite to giving full and complete effect to this policy forthwith and to communicate to each other the decisions arrived at to attain the object.

PARIS, *June 17, 1916.*

Have signed these resolutions:

For France: M. E. Clementel, Ministre du Commerce et de l'Industrie; M. G. Doumergue, Ministre des Colonies; M. M. Sembat, Ministre des Travaux Publics; M. A. Metin, Ministre du Travail et de la Prévoyance Sociale; M. J. Thierry, sous-Secrétaire d'Etat de la Guerre (Service de l'Intendance); M. L. Nail, sous-Secrétaire d'Etat de la Marine (Marine Marchand); M. J. Cambon, Ambassadeur de France, Secrétaire général du Ministère des Affaires étrangères; M. A. Masse, Secrétaire Général du Ministère de l'Agriculture; M. J. Branet, Directeur Général des Douanes; M. P. de Margerie, Ministre Plénipotentiaire, Directeur des Affaires Politiques et Commerciales au Ministère des Affaires étrangères.

For Belgium: M. de Broqueville, Président du Conseil, Ministre de la Guerre; M. le Baron Beyens, Ministre des Affaires étrangères; M. van de Vyvere, Ministre des Finances; M. le Comte Goblet d'Alviella, Membre du Conseil des Ministres.

For Great Britain: M. le Marquis de Crewe, Lord President du Conseil privé; M. A. Bonar Law, Ministre des Colonies; M. W. M. Hughes, Premier Ministre d'Australie; Sir George Foster, Ministre du Commerce du Canada.

For Italy: E. Exc. M. Tittoni, Ambassadeur d'Italie à Paris; M. Daneo, Ministre des Finances.

For Japan: M. le Baron Sakatani, Ancien Ministre des Finances.

For Portugal: M. le Docteur Alfonso Costa, Ministre des Finances; M. le Docteur Augusto Soares, Ministre des Affaires étrangères.

For Russia: M. Pokrowsky, Controleur de l'Empire, Conseiller privé; M. Prilejaieff, Adjoint au Ministre du Commerce et de l'Industrie, Conseiller privé.

For Servia: M. Marinkovitch, Ministre du Commerce.

The following persons, who are diplomatic representatives of the allied countries in Paris, have been appointed as a permanent committee of the economic conference:

BELGIUM.

M. G. Peltzer, vice president of the Union Economique Belge.

FRANCE.

M. Denys Cochin, minister of State, president of the committee; M. Gout, minister plenipotentiary, under-secretary of the foreign office; Contre Amiral Amet, vice president of the committee.

ITALY.

Prince Ruspoli, minister plenipotentiary Italian Embassy in Paris; Commandeur del Abbadessa, assistant general director of the customs; Col. Brancaccio.

JAPAN.

Tatsuke, counsellor of the Japanese Embassy in Paris.

GREAT BRITAIN.

Earl Granville, counsellor of the British Embassy in Paris.

PORTUGAL.

M. de Vilhena.

RUSSIA.

Sevastopoulo, counsellor of the Russian Embassy in Paris; Batcheff, commercial attaché at the Russian Embassy in Paris.

SERVIA.

Voulovitch, deputy; Kapetanovitch, deputy.

General secretary: Bosseront d'Angiade, minister plenipotentiary.

The VICE PRESIDENT. Does the Senator from New Hampshire desire the signatures read as affixed by the delegates?

Mr. GALLINGER. I think not, Mr. President. The text is all I desire to have read.

Mr. STONE. Mr. President, I understand that the communication from the President entire will be printed as a separate document and also printed as a part of the document which the Senate has authorized shall be printed in accordance with the request I have made.

The VICE PRESIDENT. Is there objection. The Chair hears none, and it is so ordered.

ENROLLED BILLS SIGNED.

The VICE PRESIDENT announced his signature to the following bills, which had heretofore been signed by the Speaker of the House:

H. R. 3673. An act to establish a term of the United States circuit court of appeals at Asheville, N. C.;

H. R. 8351. An act to accept a deed of gift or conveyance from the Lincoln Farm Association, a corporation, to the United States of America, of land near the town of Hodgenville, county of Larue, State of Kentucky, embracing the homestead of Abraham Lincoln and the log cabin in which he was born, together with the memorial hall inclosing the same, and, further, to accept an assignment or transfer of an endowment fund of $50,000 in relation thereto; and

H. R. 11878. An act to amend section 99 of the act to codify, revise, and amend the laws relating to the judiciary.

AGRICULTURAL DEPARTMENT APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12717) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes.

Mr. REED. Mr. President, I assume that this very important matter that has been before the Senate is now disposed of. If it is not, I do not intend at this time to go on; but if it is, I desire to submit some observations on the pending bill.

Mr. President, I am obliged to leave the Senate this evening, to be absent for two or three days, and therefore am interjecting my remarks at this time in regard to an amendment which I intend to offer to the bill as soon as the pending amendment is disposed of. I am embracing this opportunity to make a few observations which I may not have the opportunity to make if I defer them until a later day.

At the proper time, Mr. President, I shall move to strike from the bill the following language, which is found on page 58:

For all necessary expenses for enforcing the provisions of the act approved March 4, 1913 (37 Stat. L., pp. 847, 848), relating to the protection of migratory game and insectivorous birds, and for cooperation with local authorities in the protection of migratory birds, and for necessary investigations connected therewith, $50,000.

I desire, if I can, to challenge the attention of the Senate to this matter. I undertake to say that it stands alone as an example of the fact that men will insist upon expending the Government's money with full knowledge that they are spending it in violation of the Constitution of the United States and in utter disregard of their duty as Members of Congress.

The so-called Federal game law, when it was advanced upon the floor of the Senate by its author was admitted by him to be of doubtful constitutionality. I remember distinctly a colloquy taking place between that Senator and myself when I inquired, in substance and effect, under what clause of the Constitution the Senator asserted the right of the Federal Government to undertake to interfere with the right of the State over the game wihin the borders of the State. His answer, in substance, was that he was not prepared to discuss that question. I can readily

understand why he should not have been prepared to discuss the question, in view of the settled law of the land as it has stood for many years, and now particularly in view of the decisions of three of the great courts of our country.

Let me say, by way of introduction, that no one is more ready than myself, by all proper and legal means, to protect the game of this country. What I have objected to is an attempt on the part of Congress to take over to itself rights which it does not possess under the Constitution, and by so doing to lead all of those men in the country who believe in the protection of game and who would naturally resort to State legislatures to the belief that their proper forum of remedy is Congress. Thus they have directed their energies to Congress and away from the State legislatures and have wasted years in trying to have Congress do something which, under the Constitution of the United States, it has no power to do.

The worst enemy of law and order is not the man who opposes any remedial legislation, but he who comes forward with some proposition which is unconstitutional, which can not be enforced, but which serves the purpose of convincing the people, who desire a reform or an enforcement of law or remedial legislation, that that remedial legislation is being carried forward. I do not mean that the author of this law had any such purpose in his mind; but, however good his purpose may have been, he three years ago gave to the country the impression that in the Congress of the United States lay the remedy. If it does not lie within the powers of Congress, then three years of valuable time have been wasted, and the longer this farce is enacted and carried on the further we shall be from the passage or the enforcement of laws in the several States that will protect the game of this country.

With that as a preface, let us for a moment examine this law. It has been settled for nearly a century of time that the fish in the rivers and the birds of the air and of the field belong to the State in which they happen to be. There is a line of decisions upon that question running back nearly a century, absolutely unbroken and unchallenged. The present law, if it can be sustained at all, must be sustained upon the theory that all of these cases, all of the opinions of law writers to the effect that the game of a country belongs to the State in which the game happens to be, are to be overturned, reversed, and set at naught.

It is true that some men thought this power could be invoked under the interstate-commerce clause. These intelligent gentlemen had the idea that a bluejay on the western side of the Kansas and Missouri line having eaten an angleworm and flying across the State line into Missouri was engaged in interstate commerce. Some of them entertained the highly intelligent notion that the powers of the Government of the United States could be reached out far enough so that if a bass swallowed a minnow on one side of a State line and swam over into the waters of another State, that fish was engaged in interstate commerce, and ought to be brought within the jurisdiction and control of the Interstate Commerce Commission; but no lawyer ever thought that very seriously or contended for it very earnestly.

Mr. President, whatever may have been the original opinions of these gentlemen, these Hornadays of legislation, it is time now, at least, that Congress cease spending money in the enforcement of this act. I propose to submit to the consideration of the few members of the Senate who are considering this bill—and I do not blame them for getting tired and going away—three decisions of three great courts, all of them squarely holding that the Federal migratory-game law is unconstitutional.

First, I call attention to the case of United States against Shauver, decided by the United States District Court of Arkansas May 25, 1914. An application for rehearing was made on July 9, 1914, and after full argument was denied. The case was appealed to the Supreme Court of the United States.

Mr. THOMPSON. Mr. President, that is the Arkansas case, is it not?

Mr. REED. That is the Arkansas case.

Mr. THOMPSON. The case which is now pending undecided in the Supreme Court of the United States?

Mr. REED. Yes. In that case the court repeatedly announced the doctrine that—

> The wild game within a State at common law belongs to the sovereign, and in this country to the people in their collective capacity, and the State therefore has a right to say when it shall not become the subject of commerce, and in like manner the State has the right to say when it shall be the subject of commerce.

In support of this doctrine the court takes almost half a page of the record to cite by title the cases and authorities sustaining the foregoing doctrine.

Mr. SMITH of South Carolina. Who rendered the opinion?

Mr. REED. Judge Trieber, of the United States district court of Arkansas. I do not intend to take the time of the Senate to read this case. It was put in the CONGRESSIONAL RECORD of June 1, 1914, and will be found at page 9508 of the permanent RECORD.

Mr. President, even before that case had been decided the Department of Justice so doubted the constitutionality of this law that, as I stated upon the floor of the Senate in the debate on this question at a previous session of Congress, that it absolutely refused to bring test cases, even though I brought to it information and stated that responsible citizens were prepared to admit the killing of ducks contrary to the regulations of the board, offered it the names of responsible witnesses to the fact, and tendered it the written affidavits as to the facts. But I proceed with the citation of cases.

Finally, and after a long delay, the Department of Agriculture worked its courage up to the sticking point in another case, and it filed a charge in the United States district court of Kansas. That case is entitled "The United States of America against George L. McCullough." The case was decided by Judge Pollock, who stands among the foremost of the jurists who now adorn the Federal bench. I furnish to the Secretary the manuscript opinion and ask that it may be printed in the RECORD as a part of my remarks.

The VICE PRESIDENT. Without objection, it will be so ordered. [See Appendix.]

Mr. REED. In that decision the court, in language that is clear, by logic that is unanswerable, supported by authorities that are as numerous as those quoted by Judge Trieber in the case to which I have referred, the Shauver case, declares that the game being the property of the respective States the United States Government is without power under the Constitution to interfere with the game laws of the several States or in any manner to impose any penalty upon any citizen for the killing of game. In like manner he holds, as did Judge Trieber, that game flying from one State to the other is not engaged in interstate commerce. He pays that silly argument the compliment of sufficient attention to brush it aside.

I shall not take the time of the Senate to read this opinion. I state its effect; and if the author of the bill, who sits in the Chamber, desires to examine the manuscript or to challenge my statement of the opinion I shall gladly send it to him.

The next case to which I call attention is a decision of the Supreme Court of Maine. That is the case of the State against Sawyer, and was decided by the Supreme Judicial Court of Maine July 21, 1915. In that case a man in Maine was being tried for violating the Maine statute, and the defense interposed was that the killing of game was a subject for Federal control, and that Congress having undertaken to exercise that power its legislation superseded the legislation of the State of Maine. The court said, among other things:

> In considering this question these fundamental and universally admitted principles should be kept in mind, that the Federal Government is one of enumerated powers, possessing such powers only as have been actually granted to it, and that all other powers of legislation, though not enumerated and defined because it was unnecessary and perhaps inexpedient that they should be, were retained by the States and remained in the States after the adoption of the Federal Constitution as before, except so far as they were abridged by it. It must also be admitted as fundamental that before the Federal Government was created the States had the right to exercise almost every legislative power, and among them, undoubtedly, that of establishing laws and regulations for the preservation of the wild game within their borders for the common good of their people, a doctrine which seems never to have been questioned in any jurisdiction.
>
> In State v. Snowman (94 Me., 99, 111; 46 Atl., 815; 50 L. R. A., 544; 80 Am. St. Rep., 380) our court said:
>
> "The fish in the waters of the State and the game in its forests belong to the people of the State in their sovereign capacity, who, through their representatives, the legislature, have sole control thereof and may permit or prohibit their taking."

I omit part of the opinion, because I do not want to take the time to read all of it; but at this point I ask to insert this opinion as a part of my remarks.

The VICE PRESIDENT. Without objection, it is so ordered. (See appendix.)

Mr. REED. I will read a little further:

> The commerce clause authorizes Congress "to regulate commerce with foreign nations, and among the several States and with the Indian tribes." (Const., Art. I, par. 8.) Certainly the passage of wild birds in their flight from one State to another is not commerce between the States. However difficult it may be to define with precision the term "commerce," as used in that clause of the National Constitution, it is undoubtedly limited to the acts of man, and does not include the natural and uncontrolled movements of wild game.

Think of the situation our Interstate Commerce Commission would be in if the passage of wild game from one State to another were declared to be interstate commerce! The first thing we would know we would find some Hornaday, or his mouthpiece, asking the Interstate Commerce Commission to control the flight of wild geese, or to do some other equally preposterous thing.

I read on:

Nor can we perceive any reasonable ground for a contention that the commerce clause confers on Congress power to regulate the taking of wild game within the States. Indeed, it would seem that all possible contention on this score has been already held untenable by the Supreme Court of the United States in several cases where the question has been exhaustively considered. In the case of Geer *v.* Connecticut, supra, the validity of a statute of that State, which prohibited the transportation of game out of the State, was involved. The case was carried to the Supreme Court of the United States on the sole ground that, as the game in question was killed in the State lawfully the statute prohibiting its transportation out of the State was in violation of the commerce clause of the National Constitution. But the court decided otherwise, holding that the wild animal and bird life within a State belongs to the State in trust for the people of the State, and that the State has the authority to legislate for its protection and preservation for the common good, and that such power of legislation embraces game that has been reduced to the possession of an individual by lawfully killing it in the State.

Omitting now part of the opinion, I quote again:

In Judson on interstate commerce, paragraph 11, the author says:
"Thus the wild game within a State, at common law, belongs to the sovereign, and in this country to the people, in their collective capacity, and the State therefore has a right to say that it shall not become the subject of commerce."
Our conclusion, therefore, is that the power to legislate respecting the protection and preservation of wild game within the States was not conferred upon Congress through the commerce clause of the Constitution.
Nor do we find such power in the general welfare clause—

And so forth.

Now, Mr. President, here are three decisions by great courts of record. There have been other decisions that are not reported. I challenge the author of this bill, who sits in the Senate, to name me a single court of last resort which has not declared this law invalid and unconstitutional when the question was raised?

Mr. McLEAN. Mr. President, in answer to the challenge of the Senator from Missouri I will say that no court of last resort has yet passed upon this question. The only court which can pass upon it is the Supreme Court of the United States, in the case which is now pending in that court.

Mr. REED. A court of last resort has passed on it. That is the Supreme Judicial Court of Maine, which is the court of last resort for that State, unless a right under the Constitution of the United States is claimed, which was not the case here. But I change the form of my challenge. I challenge the Senator from Connecticut to name a single court of record that has not declared this law unconstitutional when the question was raised. I am not talking about pleas of guilty in "fake" cases, where it was agreed that the fine would be a nominal sum. Name me a court of record that has decided the law constitutional when the question was raised.

Mr. McLEAN. I will say, in answer to the Senator from Missouri, that a district judge in the State of North Dakota decided the question where it was directly raised, and sustained the law, and overruled the demurrer.

Mr. REED. A district judge?

Mr. McLEAN. Yes.

Mr. REED. Who was he?

Mr. McLEAN. If the Senator will be patient a minute, I will find his name.

Mr. REED. I will be patient, I am always patient. It is a leading trait of my character.

Mr. McLEAN. This law became effective in October, 1913. During the first year of its operation 17, and during the second year 3, cases were tried in the district courts of Oregon, California, South Dakota, Nebraska, Minnesota, Michigan, and Arkansas, which all resulted in convictions. Among these was the case against Alfred N. Shaw in the district of South Dakota, in which the demurrer interposed in behalf of the defendant, attacking the constitutionality of the law, was overruled by Judge Elliott, and a fine of $100 was imposed April 18, 1914.

Mr. REED. What was done with the fine? It was remitted, was it not, in order to save an appeal?

Mr. McLEAN. I do not know about that. I know that the law was sustained by the court.

Mr. REED. There has not been a hundred-dollar fine paid. I am about to show that. Now, the Senator has stated that there is one judge in North Dakota, in a case where there was a demurrer interposed to the indictment, who overruled the demurrer.

Mr. McLEAN. I will say to the Senator from Missouri that the case was tried in South Dakota, not North Dakota.

Mr. REED. Very well. The Senators from those two States can settle between themselves which one of them is to admit that this judge holds court in his State.

Mr. STERLING. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from South Dakota?

Mr. REED. I do.

Mr. STERLING. I can inform the Senator that Judge Elliott is the United States district judge for the district of South Dakota, and is a very able and distinguished Federal judge.

Mr. REED. Is the Senator familiar with this case?

Mr. STERLING. I am not familiar with it.

Mr. REED. Is there any report of it anywhere?

Mr. STERLING. I have not seen a report of the case.

Mr. REED. Does the Senator know whether or not the fine was ever paid?

Mr. STERLING. I do not know as to that. I know none of the circumstances of this particular case, but I do know Judge Elliott very well.

Mr. REED. Mr. President, it goes without saying that the Agricultural Department is making as good a report as it can make. I hold in my hand the report of the solicitor for that department for 1914. I show you now the result of the expenditure of $50,000 of the people's money:

Thirty-eight cases were reported to the Department of Justice for prosecution.

I have seen that law violated 38 times in a minute, or, at least, in five minutes. It has been violated not 38 times in 1914—if it be a law at all, which it is not—but it has been violated 38,000 times any day when the shooting was good in any State of this country.

Thirty-eight cases were reported to the Department of Justice. Let us see what came out of that.

Two cases were pending at the close of the preceding year.
A total of $55 in fines was assessed.

That would not have paid for the cartridges or bacon, to say nothing of the wet goods, that one well organized band of hunters would carry out with them for a single day's shooting or a week's shooting at most.

I read on:

In one case $10—

Ah, when we get all the machinery of this mighty Government at work we draw blood.

In one case $10, in another $20, and in a third $25. Grand juries refused to indict in six, the statute was held unconstitutional in four, and two were dismissed without action. Twenty-five cases were pending at the close of the year.

And for that we spent $50,000, and the author of this bill wants $50,000 more, and Hornaday wants $50,000 more, the Biological Survey wants $50,000 more. Instead of coming here to Congress and telling us, as it ought, that there is no use of appropriating any money under this act until its sponsors have been satisfied by the final decree of the Supreme Court of the United States they come here asking more money. Men of that kind are not fit to be in charge of the Government's business.

Now, reading from the report of the solicitor further, at a different period in 1914:

The act of Congress of March 4, 1913, became fully operative throughout the United States on October 1, 1913, by the approval by the President of regulations adopted by the Department of Agriculture fixing closed seasons. Prosecutions for violations of the act were instituted in 14 cases, of which 13 resulted in convictions—

Now, let us see what kind of convictions they were—

in 7 of which fines were imposed aggregating $140, and in 6 of which sentences were suspended. The prosecution of Alfred M. Shaw, in the district of South Dakota, which resulted in a plea of guilty and the imposition of a fine of $100, the court overruled the defendant's contention that the law is unconstitutional.

Mr. President, I know there has not been a decision of the constitutionality of the law. Here was a plea of guilty first interposed, and then a demurrer, and, of course, there could be no real decision of the question.

Mr. SMITH of Georgia. Could not a demurrer have raised it?

Mr. REED. It could have, but after the man had pleaded guilty it could not.

Mr. SMITH of Georgia. No; but the demurrer might have raised the constitutional question, and that might have been decided, and the act having been held constitutional he simply pleaded guilty.

Mr. REED. He pleaded guilty instead of pleading not guilty and saving his point and going on.

Mr. SMITH of Georgia. I am not obligating myself by the suggestion to enter into the constitutional discussion.

Mr. REED. No; I understand.

In United States *v.* Shauver (214 Fed., 154), a demurrer to the indictment, on the ground that the act is unconstitutional, was sustained. Motion on behalf of the Government for a rehearing was pending at the close of the year.
Regulations under the migratory-bird law, prepared by the Biological Survey, which is in charge of the administration of the act, were examined and aid was given by this office in putting them into final form.

Mr. President, that is the enforcement during two years of the time this law was in effect—seven pleas of guilty and fines set aside in six of them; and $50,000, and then another $50,000, $100,000, expended for this magnificent result.

Now, I call attention to the report of 1915. I read from the report of the Secretary of Agriculture, page 245:

Under the Federal migratory-bird law, approved by the President March 4, 1913, the regulations fixing close season on migratory game birds were prepared and promulgated October 1, 1913, and amended October 1, 1914.

They promulgated them October 1, 1913, and amended them the next year.

During the year—

Now, listen—

During the year the number of district inspectors was increased from 15 to 17.

So we had 15 inspectors during each of these two years, in one of which they got seven pleas of guilty with an agreement that the fines would be set aside in six of them, not one-half of one plea of guilty or one conviction for each inspector. But that is not all. The inspectors were increased from 15 to 17—

And the warden force from 172 to 196.

They got six pleas of guilty with an agreement that the fines would be set aside.

Cooperation with the game departments of most States has resulted in the better enforcement of State laws and Federal regulations. Since the law went into effect 470 alleged violations have been reported by district inspectors and Federal wardens, but in many cases the evidence was too meager to justify prosecution.

Mr. President, on any day when the ducks are flying a blind man can guide himself from lake to lake and swamp to swamp by the drum beat of the guns, if I can mix up a metaphor in that way.

The evidence was not sufficient. There were 470.000 violations of this law that year, if it be a law, and its author knows it is not a law as he sits there smiling.

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER (Mr. SHAFROTH in the chair). Does the Senator from Missouri yield to the Senator from Connecticut?

Mr. REED. I yield.

Mr. McLEAN. I appreciate the kindly reflections on my opinion in regard to this case.

Mr. REED. I am complimenting the Senator's intelligence by ascribing to him an opinion that is in accordance with the law.

Mr. McLEAN. I have stated several times on the floor of the Senate that, in my opinion, the law is constitutional.

Mr. REED. I have not heard the Senator ever go that far.

Mr. McLEAN. At the last session the Senator from Missouri, it will be remembered, attacked the law most violently and asserted several times that there was no respectable lawyer in the country who believed for a minute that the law is constitutional. Since that time the Supreme Court has had the case and it has been argued there. They held it up for some months and ordered it returned to the docket for reargument. So the Senator from Missouri must now admit that some of the justices of the Supreme Court of the United States believe the law is constitutional.

Mr. REED. I do not admit anything of the kind.

Mr. McLEAN. I think that is the opinion of Senators outside of the State of Missouri who are respectable lawyers.

Mr. REED. Oh, if the Senate please, the Senator who undertakes to say that the Supreme Court of the United States is divided upon this question is assuming a good deal. As I understand the matter, questions of this character, involving directly the constitutionality of an act of Congress, are never decided except by a full bench, if the court has any reasonable ground to expect a full bench; and a vacancy having occurred upon the bench after argument, the case was carried over. I may be in error about that, but that is the opinion I entertain.

But let us follow on. Since the Senator wants me to withdraw what I intended as a compliment, I will withdraw it:

Since the law went into effect 470 alleged violations have been reported by district inspectors and Federal wardens—

Over 200 of these gentlemen—

but in many cases the evidence was too meager to justify prosecution; 53 cases have been referred to the Department of Justice for action, fines were imposed in 12 cases, 9 cases were dismissed, and the remainder are still pending. In two United States district courts the law has been held unconstitutional: (1) In the eastern district of Arkansas, May, 1914, in the case of United States *v.* Harvey C. Shauver, charged with violating regulation No. 9; and (2) in the district of Kansas, on March 20, 1915, in the case of United States *v.* George L. McCullagh, charged with violating the same regulation.

Mr. President, where is the enforcement of the law? All that we have expended, I believe $100,000 up to date, has been with this result: The law is habitually disregarded in every county of the United States. It is obeyed only by those people who prefer not to incur the possibility of arrest even under an unconstitutional act. The Department of Justice and the Department of Agriculture have repeatedly refused to make cases with the evidence before them. Instructions have been sent to district attorneys not to bring any indictment in these cases. That is a fact which is well known to the author of this bill.

Mr. McLEAN. Mr. President, the Senator from Missouri challenges me frequently. I do not desire to interrupt him and I would not except for the statement which he makes, the latest being that I know the law is not enforced in any county in the Union. He is entirely mistaken. The law is enforced in a very large portion of the Union as I shall undertake to show after the Senator has concluded his remarks. I do not care to interrupt him.

Mr. REED. I am surprised that the Senator will make that statement. I read from the report, in connection with the Senator's statement:

That the violations reported by no means approximate the number that have occurred is to be expected and is due to the impossibility, in many cases, of procuring evidence sufficient to convict. Inspectors and wardens appointed under authority of this law have no power of arrest or search, and hence many violators escape. A further difficulty is that the limited number of inspectors necessitates unduly large districts, some of them difficult of effective patrol.

* * * * * * *

Notwithstanding many violations of the regulations in different sections of the country, the law was generally observed by sportsmen.

I know if that gentleman means to say that it receives support from the ordinary hunter he made a statement that is absolutely untrue, because the facts are not at all as he states them. But he admits enough himself to show the nonenforcement of the law in the language which precedes it.

Mr. McLEAN. The Senator knows that the number of prosecutions brought under criminal statutes are no indication of the degree that is it enforced. Men commit burglary and theft and there are a great many cases prosecuted. Anyone who is disposed to argue, as is the Senator from Missouri, could easily show to the Senate that the law against burglary and larceny is not enforced. But we all know that a great many law-abiding people in this country have respect for the law and when they know what it is they do not rush to their constituents and advise them to break it.

On the contrary, they are advised obedience to the law until its constitutionality is tested. I do not know what state of society we would have in this country if we did take the course followed by the Senator from Missouri. I fancy it would resemble somewhat the conditions now existing in Mexico.

Mr. REED. Mr. President, we will come to a condition like that in Mexico when men who step into the Senate Chamber and hold up their hands to Almighty God and swear they will support the Constitution of the United States and protect it can be found in sufficient numbers in the Senate to say that a majority are willing to disregard that Constitution and pass laws and insist upon appropriating money to enforce laws that are in violation of the fundamental law of our country, the Constitutiton of the United States. We will never come to the condition of Mexico while men stand on the floor of the Senate to defend the Constitution of the United States. But the Senator from Connecticut would rather be successful in legislating for one blue jay that flew across a State line than he would to protect the ark of the covenant of the liberties of our people; that is, the Constitution. He would rather take the advice of Hornaday than he would take the opinion of courts of last resort or great courts of record.

I invite the gentleman any time he wants to discuss the question of anarchy to give consideration to that variety of anarchist who marches under a blood-red flag as an open violator of the law and who defies all law, and that other class of men who, charged with the high responsibility to protect the Constitution, do not hesitate in the very Halls of Congress to trample it under their feet.

Now, Mr. President, so much for that digression. We had Mr. Nelson, of the Biological Survey, before the committee. He gave his testimony. He has gone over it with a pencil and changed practically every sentence in it. Among other things, the Senator from New York [Mr. WADSWORTH] asked him if the Biological Survey enforced the law in New York. Mr. Nelson answered:

As far as it can be done. We are working under the orders of the Attorney General, you know. We are not independent.

Senator WADSWORTH. What are his orders in respect to conflict with the New York law?

Mr. NELSON. I would not say orders; but the suggestion from the Attorney General's office is that we do not start proceedings.

Then this gentleman took that language and changed it:

Mr. NELSON. So far as I am aware, the United States Attorney General issued no instructions concerning New York.

I say frankly, I think a little investigation of Mr. Nelson is quite as important as any other job Congress may have before it. If that was the only correction or change in his testimony I would not comment on it, but the manuscript is replete with changes equally radical. He continues in the same paragraph from which I read:

If they have proceedings they have to be started through the Attorney General's office, and they do not want to start anything while this law is pending in the Supreme Court.

A square declaration that there were no proceedings in New York. I suppose that is one of the States in which the Senator from Connecticut claims the law is being enforced. But Mr. Nelson changed that phrase, and he made it read:

Court proceedings must be instituted through the United States Attorney General's office.

And he cut out all the rest of it.

Senator WADSWORTH. Have you referred any cases in New York prior to his request?

Mr. NELSON. No; I do not think we referred any cases.

He changes that:

No; I don't think we have referred many cases, but—

He continues—

I think we have cases. We have hundreds of cases that we have been gathering, that our inspectors have gathered from various parts of the country.

He changes that to—

I think we have a number from the States—

And so forth.

I read that because it points to the fact that even this Biological Survey has found in regulations made by it a square conflict with the laws of the State of New York and have not dared to proceed in that State.

That brings me to one other topic that I propose briefly to discuss, because it is another phase of the unconstitutionality of this act. The act contains the following clause:

The Department of Agriculture is hereby authorized and directed to adopt suitable regulations to give effect to the previous paragraph—

That is, the one prohibiting the killing of game—

by prescribing and fixing closed seasons, having due regard to zones of temperature, breeding habits, times, and line of migratory flight, thereby enabling the department to select and designate suitable districts for different portions of the country.

And now notice:

It shall be unlawful to shoot or by any device kill or seize and capture migratory birds within the protection of this law during said closed seasons.

That is the close season fixed by the Agricultural Department.

Any person who shall violate any of the provisions or regulations of this act shall be fined not more than $100 or imprisoned not more than 90 days, or both.

Now, let us stop and examine that provision. The Congress of the United States does not undertake to say it shall be unlawful to kill wild geese in the State of Connecticut between the 1st day of March and the 30th day of March or any other period that it may specify, but Congress undertakes to say that it shall be unlawful to kill wild geese or other game when what is indefinitely described as the Agricultural Department says it shall be unlawful. This lawmaking power does not say when it shall be lawful and when it shall be unlawful, but this lawmaking power undertakes to confer the right upon the Agricultural Department, whatever that may mean in law, to say when it shall be lawful and when it shall be unlawful. It is as plain a delegation of legislative power or attempt to delegate it as ever was made.

Under that law as we have passed it let us see what will happen. A sovereign citizen in the State of Kansas represented by my friend Senator THOMPSON, living within that sovereign State, goes out to shoot ducks on the 1st day of March. He is on the Kansas side of the line. I go out to shoot ducks on the same day on the Missouri side of the line. We read the act of Congress and we find there is no place where Congress has said that you shall not shoot ducks in Kansas on that day or that you shall not shoot ducks in Missouri on that day, and we each shoot a duck. I do not know whether my friend from Kansas could hit one or not, and I do not know whether I could or not, but let us assume that we could and did. We are haled into court, and what is the charge? That on, to wit, a certain day each of us shot a duck in violation of what—a law of the United States? Before you can show that either one of us killed a duck in violation of any law, you have to show that the Agricultural Department said that you could not shoot a duck at a certain time. Accordingly we find that the Agricultural Department printed an order, in which it said that on the first day of that particular month you should be sent to jail if you shot a duck on the Kansas side of the line; but upon the Missouri side of the line it said you had an open season. Accordingly my friend goes to jail and I go free. He goes to jail, why? Because Congress said you should not shoot ducks on that day in that place? No; but because three or four little whippersnappers down here in the Agricultural Department, who would need a guide to get them around over a good-sized Kansas farm, said that you should go to jail if you shot birds on that day. To that absurd and ridiculous length have we gone in the legislation of this country!

Mr. THOMPSON. Mr. President——

Mr. REED. Now, if my friend from Kansas wants me to get him out of jail, I will pause long enough to let him out.

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Kansas?

Mr. REED. Yes, sir.

Mr. THOMPSON. Mr. President, instead of going to jail I would simply step over to Missouri, where I would have a right to shoot.

Mr. REED. And when you got over there, if anybody arrested you on an order of the Agricultural Department instead of under a law of this country, I would get out a writ of habeas corpus and keep you out of jail.

Mr. THOMPSON. I would be glad of that.

Mr. REED. But let me show you to what extent this absurdity has gone. Congress abdicated its power to say when and where it should be a crime for a citizen to do a certain act, and has undertaken to turn it over to that vague and indefinite thing called the Agricultural Department, for such is the language of the law, that the Agricultural Department shall prescribe the seasons, fix the times, and so forth. It transpired, however, that when the matter got into the Department of Agriculture it was turned over to some gentlemen, known as the Biological Survey. Just what this Biological Survey is or may be "deponent sayeth not," for he has neither knowledge nor information sufficient to form a belief. All I have ever seen of it is a gentleman named Nelson, who finds it necessary to correct his testimony to an extent I have not hitherto witnessed.

But what does Brother Nelson do? What does the Biological Survey do? The car of moral progress and reform is in full head; change is the order of the day. It has finally penetrated the Agricultural Department. So that dignified body proceeds to organize an advisory board and turn over to that advisory board the right to make these regulations. It is true Brother Nelson tried to avoid that conclusion, but I shall show you enough of his evidence to convince you that that is exactly what they have done. Let us see. Mr. Nelson was on the stand, but our economical Agricultural Committee have not printed his evidence. I do not know why.

Mr. SMITH of Georgia. I think it is printed.

Mr. REED. No; it is not in the Senate hearings.

Mr. McLEAN. I suggest to the Senator from Missouri that probably the reason it was not printed is that the Agricultural Committee was considered a poor place to test the constitutionality of an act of Congress.

Mr. REED. Mr. President, I suppose they would also consider that committee a poor place in order to find out how the money heretofore appropriated had been expended and how the money asked to be appropriated was to be expended, according to the logic of the Senator from Connecticut. That is what we were investigating; that is what the Agricultural Committee had a right to inquire into. I do not blame the Senator from Connecticut or any other sponsor of this law for not wanting any of this testimony printed, but it is going to be printed. I ask leave to have it printed as a part of my remarks.

Mr. SMITH of Georgia. Mr. President, I do not think the Senator wants all of that testimony printed. I was under the impression that it had already been printed by the Agricultural Committee. We will direct the clerk of the Agricultural Committee to have it printed at once. I wanted it printed, and I shall endeavor to have it done.

Mr. REED. Very well; that is satisfactory to me.

Mr. SMITH of Georgia. I think that would be better than to put the testimony into the CONGRESSIONAL RECORD.

The PRESIDING OFFICER. Does the Senator from Missouri ask for the insertion in the RECORD of the testimony to which he refers?

Mr. REED. I am content with the statement which is made by the Senator from Georgia [Mr. SMITH]. I knew he would want to do the right thing.

Mr. SMITH of Georgia. I thought it had been printed. I supposed that of course it had been printed.

Mr. REED. Now, let us see. Dr. Nelson is on the stand. They are most of them doctors down there.

Mr. SMITH of Georgia. What is he doctor of?

Mr. REED. I do not know what he is doctor of; but judging by the way he testifies and afterwards changes his testimony, I hardly think he is a doctor of divinity. I am now reading from some of his testimony:

Senator REED. What is your name?
Dr. NELSON. E. W. Nelson, Assistant Chief of the Biological Survey.

Now, we have gone from the Chief to the Assistant Chief of the Biological Survey.

Senator REED. Is that the bureau of the Department of Agriculture that has charge of the enforcement of the game laws?
Dr. NELSON. Yes, sir.
Senator REED. Who actively has charge of that bureau of the department?
Dr. NELSON. Mr. George E. Lawyer has charge of that work.

Dr. Nelson has made some changes in his testimony at this point, but I pay no attention to the changes. I am following the text.

Senator REED. Have you down there what is known as an advisory council?
Dr. NELSON. The advisory council consists, I think, of 15 gentlemen. After the migratory-bird law was passed and the administration of it placed under the Department of Agriculture in the Biological Survey, which handles all Federal matters relative to birds and game—it was suggested that in making the regulations it would be a good plan for the Secretary to name a number of prominent gentlemen from various parts of the country, who, after the Biological Survey had presented a set of proposed regulations, should go over and consider those regulations, and would express their opinion to the Secretary as to whether those regulations were, in their opinion, practicable or not; in other words, merely to get a little wider expression of opinion than would be afforded by the decision of the bureau.

You will note, when you read that fairly, that Congress put this authority in the Department of Agriculture, and the Department of Agriculture turned it over to the Chief of the Bureau of the Biological Survey, and he, in turn, turned it over to Dr. Nelson.

Then they make out some regulations, and do what? They submit those regulations to a board of outside gentlemen to pass upon. It is the court of review, and it is to tell them—and I use the language of the witness—whether the regulations are practicable or not. It is the final judge. Of course, the matter comes back in a manner and form to the Biological Survey or the Department of Agriculture, which issues the mandate.

So these gentlemen in New York and this Biological Survey determine when I can shoot a duck in Missouri without going to jail, and when you shall go to jail if you do shoot one!

Now, who are this advisory council? Dr. Nelson got out a list and read. The names are as follows:

John B. Burnham, New York, chairman; Clark MacAdams, St. Louis; W. L. Finley, Portland, Oreg.; F. W. Chambers, Salt Lake City, Utah; E. H. Forbush, Boston; Edward C. Bradford, Wilmington, Del.; Dr. George B. Grinnell, New York; Dr. William T. Hornaday, New York; Marshall McLean, New York; T. Gilbert Pearson, New York; George Shiras, Washington, D. C.; Gen. John C. Speaks, Columbus, Ohio; William P. Taylor, Berkeley, Cal.; John H. Wallace, Montgomery, Ala.; Clinton M. Odell, Minneapolis.

Now, you will notice that this advisory board is scattered all over the United States of America. This testimony continues:

Senator REED. Now, let me ask you this question: Has this advisory board, scattered, as it is, all over the United States, ever held a meeting?
Dr. NELSON. Yes, sir.
Senator REED. Where?
Dr. NELSON. In New York.
Senator REED. When?
Dr. NELSON. They have held a number of meetings; I could not give you the dates.
Senator REED. About how many?
Dr. NELSON. Well, I could not tell you as to the number.
Senator REED. Who paid their expenses?
Dr. NELSON. No one has; they pay their own expenses. The Government never paid them a dollar.
Senator REED. Why did they come to hold this large number of meetings?
Dr. NELSON. Did you say why?
Senator REED. Yes.
Dr. NELSON. With respect to questions that come up for discussion in regard to the migratory bird law, and other things that information is desired upon, as being gentlemen of knowledge on the subject and experience.
Senator REED. What was their opinion asked upon?
Dr. NELSON. It was recently asked on the new regulations. They have been asked principally as to the regulations which have been proposed or put out.

That is why they held these meetings; that is why they came together. It was to decide the question as to when the regulations shall show that it is illegal to shoot game in Tennessee or any other State and when it is not. This self-constituted board—do I state that too broadly? Wait a minute and I think I can furnish convincing evidence.

But we do not stop there. This law-making power, before it decides, goes out and consults the hunters; and we have another referendum. It tries to agree with the hunters as to what time will be satisfactory to them, and if they do not agree and the hunters are a little obstreperous when dealing with such a self-constituted board, then it punishes the hunters by putting in a time that is especially obnoxious to them. Here is a little of that:

Senator REED. Particularly the advisory board, I suppose.
Dr. NELSON. Now I will come to that in a moment, Senator. My proposition, and the one that the Biological Survey offered to the Middle West, would give them the full shooting season to themselves and give them a month in the spring from the 10th of February to the 10th of March. That was the offer we sent to the men placed out West, who talked with different organizations there, etc., and quite a number of people were rather inclined to accept them, but a majority of them wanted until March 31. After Mr. Holthaus and other agitators—

And, by the way, Mr. Holthaus has done more for the protection of game in the State of Missouri than all the Hornadays and all the Nelsons ever born of woman. He has been a perfect crank for the protection of game, if you can call a man a crank who has proceeded intelligently and effectively to protect the game.

After Mr. Holthaus and other agitators who were claiming——

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Connecticut?

Mr. McLEAN. I will not ask to interrupt the Senator if he does not care to be interrupted.

Mr. REED. I am perfectly willing to be interrupted.

Mr. McLEAN. I should like to ask the Senator if the open season on waterfowl in his State does not extend until the 1st of May, or did until very recently?

Mr. REED. I can not answer that.

Mr. McLEAN. I think that is the case.

Mr. REED. I think the game law in Missouri on ducks—I do not speak of waterfowl generally, because there is a difference as to waterfowl—ends on the 1st day of April.

Mr. McLEAN. If the Senator will yield for just a moment further, I think that must be a very recent amendment, if that is the case. I know that when I looked up the law of that State I found it was permissible to shoot ducks up to the 1st of May, after the ducks had mated and were hatching their eggs.

Mr. REED. That does not at all meet the proposition that I am making, that Mr. Holthaus has been an earnest advocate of the protection of game and one of the most earnest advocates of game protection in the West.

Mr. HARDWICK. Mr. President——

Mr. REED. I yield to the Senator from Georgia.

Mr. HARDWICK. I want to ask the Senator this question: What constitutional right or power has the Congress of the United States to establish game laws throughout the country?

Mr. SMITH of Georgia. The Senator from Missouri has been discussing that question.

Mr. HARDWICK. I have just come into the Chamber.

Mr. REED. I have put into the RECORD the decisions of two Federal courts and of the Supreme Court of Maine to the contrary.

Mr. HARDWICK. The Senator does not believe that it has any such power?

Mr. REED. Oh, no; but I am now discussing the other question, that, even assuming that there is such power, we have attempted to delegate it.

After Mr. Holthaus and other agitators—

Says Dr. Nelson—

who were claiming what we think is unreasonable, rejected the offer of any compromise, then the Biological Survey thought it was useless to continue this proposition for the spring months' shooting, and let the regulations remain just as they were.

They go out and offer compromises with a few game shooters, and they get together with the game shooters and together determine when it shall be legal and when it shall be illegal for me to shoot game. Absurdity can not run further than this thing has proceeded. And when these men refuse to compromise, then they proceeded to punish them. Here Dr. Nelson says:

The Biological Survey thought it was useless to continue this proposition for the spring months' shooting, and let the regulations remain just as they were, because apparently we would succeed in getting not only the continued attacks from that section but also bring upon our backs the attacks of other people who were opposed to any spring shooting whatever. There is a very great number of sportsmen * * * opposed to any spring shooting.

I omit part of his answer, because it is not important here.

Senator REED. Now, let us stop here. We are getting along pretty fast. You had complaints from the Middle West, particularly by agitators like Mr. Holthaus, and you concluded something ought to be done, perhaps; and so you went out there and tried to come to some kind of agreement with Mr. Holthaus and some of these other people, did you?
Dr. NELSON. Yes, sir.

Here is the board to which the Agricultural Department undertook to delegate the power that Congress undertook to delegate to it to say when it shall be legal and when it shall not be legal

for a citizen of the United States to do a particular act, going out West to come to an agreement with a man named Holthaus, whom they describe as an agitator; and if they had come to an agreement with Mr. Holthaus the time when it would have been illegal would have been a different time than it is now. I have no doubt the constitutional authority from Connecticut will find no difficulty in that proposition.

Senator REED. And they would not agree to be satisfied unless you gave them until March 31—

That is, extend the time of the shooting—

That is right, is it?

Dr. NELSON. Yes, sir; they demanded that.

Senator REED. And thereupon you concluded that as they would not agree to be satisfied unless you gave them until March 31, you would not make any change in the regulations at all?

Dr. NELSON. Because they absolutely refused to consider it.

He has changed that to "our proposition." In other words, they went out to bargain with men as to when there should be a law and when there should not be a law—as to when an act should be a crime and when it should not be a crime.

Senator REED. In other words, in determining a zone under the law, when it would be and when it would not be criminal to shoot, you went out and consulted with a man whom you denominate as an agitator, and because you could not agree with him you refused the relief that otherwise would have been given; and that is the way the Agricultural Department is enforcing this law?

Dr. NELSON. I think, Senator, you are putting that a little unfairly. The point was that if those people were absolutely honest and rejected that and refused to accept what we had suggested——

Senator REED. What did they have to do with accepting or rejecting anything when you had a sworn duty to perform?

Dr. NELSON. We were trying to get on some satisfactory footing, and, furthermore, the proposed regulations that we were suggesting were merely to be considered at hearings and subsequently changed. They are to have 90 days in which they are to be considered and changes made in them. Those were not final regulations and were not considered to be such when we put them out.

Senator REED. But they were final enough so that for the time being they undertook to make an act criminal which otherwise would not be criminal.

Dr. NELSON. I beg your pardon. Those regulations are merely put out tentatively under the law for 90 days and are not to be put in force in any way.

So we have another peculiar thing. Congress undertakes to delegate a power to the Agricultural Department, whatever that is; the Agricultural Department undertakes to delegate the power to the Biological Survey, whatever that is; the Biological Survey undertakes to delegate it to an assistant, whoever or whatever he is; the assistant sends some unnamed representatives out West to consult with people, whoever they may be, and then they propose to put out regulations which are only to be of an experimental character for 90 days, and are not to be enforced during the 90 days. If there is anything that can be devised or thought of that comes further from the making and enforcing of a law than that, I do not know what it is.

At the expiration of 90 days any changes that are thought advisable may be made in the hearings. We advertise and ask for hearings as to whether we shall change them. We have already decided to make one change in the proposed regulations. That went to New York. These proposed regulations themselves were referred—

Now, let us see whether they have not turned this over to the advisory committee—

These proposed regulations themselves were referred to the advisory committee and the advisory committee came back with the recommendation that we grant that month in the spring to the Middle West, and we accepted that recommendation, and that recommendation is now in the proposed regulations.

Who said, then, when it should be lawful or unlawful to shoot ducks? A board gathered from all parts of the United States and sitting in New York, a board of private citizens, the moving spirit of which is Dr. Hornaday, hunter of monkeys and skinner of orang-outangs, for pay, likewise slanderer of the Senate, insulter of courts, and the author of a libelous document which he has circulated among Senators.

The Biological Survey had no feeling about the matter one way or the other—

I continue to read from Dr. Nelson—

and when the advisory board advised that they thought it would be well to put that in, then we said all right, that we were perfectly willing to do so.

Who wrote the law, or the alleged law, for us in Missouri? The advisory board. Who is the advisory board? A self-constituted body of private citizens, only one of whom lives in Missouri, so far as I know, and I think he only moved back there recently, and probably is the best man on the board at that. Dr. Nelson continues:

The only reason we left it out was that the Middle West appeared to absolutely reject it, and we are ready to put it in, and it is in the proposed regulations.

I summed up this gentlemans' position in a question, which I will read:

Senator REED. Then, if I understand you, being charged with the duty under the law of making these various districts in such manner and form that it would give effect to this bill, carrying out the terms of the bill which provide for the protection of these birds, you went out and consulted with the agitators and they did not behave just to suit you, and you concluded you would do nothing. Their misbehavior or failure to agree with you was sufficient reason for your not going on and making these districts, as it was your duty to do under the law and as you would have done if they had agreed to them, and then, after that the advisory committee advised you nevertheless to go on and change your regulations, because the advisory committee advised it, and you did change them.

If that be not a complete demonstration of the fact that this board abdicated whatever powers it ever may have had, if any it had, then I do not know how demonstration can be made.

There is a lot more of this testimony along this line. I do not pause to read it. I call attention simply to one matter.

Mr. Holthaus testified:

This is a statement made to me by Dr. Nelson: The bureau had decided to permit duck shooting in the Middle West States from February 10 to March 10, but Dr. Hornaday refused to give his approval to the change, so I made a trip to New York to confer with Dr. Hornaday on the matter, and I had Dr. Hornaday dine with me, and after our conference the doctor agreed to permit shooting of ducks in the Middle West States from February 10 to March 10.

Why, here is the state of facts now. Let me sum it up. Under the Constitution of the United States, under the structure of our Government, the game of the country belongs to the respective States in which it happens for the time being to be found. In violation of the Constitution of the United States Congress undertakes to usurp a power it does not posses and to assume control of the game. That, I repeat, is the decision of two Federal courts, of the Supreme Court of Maine, and in principle it is the decision of several cases decided by the Supreme Court of the United States, and it is in harmony and consistent with an unbroken line of decisions found in the various States.

The second step: Congress, having undertaken to usurp this power of the States, undertakes in turn to transfer to that vague and indefinite thing known as the Agricultural Department the right to say when it shall be legal and when it shall be criminal to shoot wild game.

Step 3: The Agricultural Department assigns this task to the Biological Survey, whatever that may be.

Step 4: The Chief of the Biological Survey turns it over to the assistant chief.

Step 5: The assistant chief or the Biological Survey or the Agicultural Department or somebody else organizes an advisory board.

Step 6: The agents, now, of the Agricultural Department are sent out to agree with hunters and sportsmen as to when it shall be lawful and when it shall not be lawful under the laws of the United States to shoot game.

Step 7: Having failed to arrive at a satisfactory agreement, the Biological Survey proceeds to determine when and where it shall be legal and when and where it shall be criminal to shoot game, especially basing its decision in the Middle West upon the fact not of the equities of the case, but upon the circumstance that the game shooters have not been willing to agree.

Step 8: Having prepared its decree as to when and where it should be lawful to shoot game, the Biological Survey goes into consultation with an advisory board consisting of private citizens, and upon the suggestion of the advisory board substitutes the opinion of the advisory board for the opinion it had previously formed.

Step 9: Before the opinion of the advisory board could be accepted and made the law of the land it was necessary to consult Dr. Hornaday. Thereupon the Assistant Chief of the Biological Survey goes to New York, has Dr. Hornaday come in to dinner, and lays the matter at the feet of that eminent man—that gentleman whose book, Ninety Days in the Jungles, written by himself, describes the special delight that is to be found in shooting female orang-outangs as they flee with their babes in their arms, and the ecstasy that thrills the heart of the sportsman as he tears the skin from the bodies of these half-human things. So at his proud feet the right is finally laid to say when it shall be legal and when it shall be illegal to kill birds. His consent being granted, his approval, his order being gained, the ipse dixit arrived at in this circumlocutory manner becomes a law; and because the Assistant Chief of the Biological Survey had a dinner with Dr. Hornaday in New York, and Dr. Hornaday granted his gracious consent to a certain order, it is now a crime or it is not now a crime for a citizen of the United States to kill game at a certain time or place.

Mr. President, three great courts have declared this law unconstitutional. There has been collected, I think, up to date, a total of about $140 in fines. I do not believe it was that much, for nearly all the fines were remitted. We have a horde of men out over the country parading around and pretending they are going to enforce a law which they have no idea of attempting to enforce. We are asked to squander another $50,000. We have

spent, I believe, $100,000 up to this date. The only arrest that was ever made in connection with this law in the State of Missouri was when their game warden out there was arrested for a crime not related to the hunting of wild birds. I protest against the carrying of that clause in the bill, and I move to strike it out.

APPENDIX.

In the district court of the United States for the district of Kansas, first division.

United States of America, plaintiff, *v.* George L. McCullagh, defendant. No. 4197—Criminal.

MEMORANDA OF DECISION ON DEMURRER TO INFORMATION.

The information filed against defendant in this case reads as follows:

"Comes now Fred Robertson, United States attorney for the district of Kansas, leave of court having first been obtained, and by authority and direction of the Attorney General gives the court to understand and be informed, upon the oath of A. S. Rickner, a Federal game warden for the United States Department of Agriculture, that in the county of Cherokee, in the third division of the district of Kansas, and within the jurisdiction of this court, one George L. McCullagh did then and there, on or about the 2d day of April, 1914, unlawfully, knowingly, and willfully shoot and kill 40 migratory wild ducks in violation of the rules and regulations for the protection of migratory birds adopted by the United States Department of Agriculture and approved by the President of the United States and promulgated and made public October 1, 1913, said rules and regulations having been made, published, and declared by authority of the act of Congress approved March 4, 1913; and this he, the said George L. McCullagh, did contrary to the form of the statute in such cases made and provided and against the peace and dignity of the United States of America."

It is thus seen the sole offense charged by the information against defendant lies in the fact that he killed wild ducks on April 2, 1914, a date falling within the open season for such game as provided by the laws of the State.

The act of Congress on which this prosecution is based is as follows:

"All wild geese, wild swans, brant, wild ducks, snipe, plover, woodcock, rail, wild pigeons, and all other migratory game and insectivorous birds which in their northern and southern migrations pass through or do not remain permanently the entire year within the borders of any State or Territory shall hereafter be deemed to be within the custody and protection of the Government of the United States, and shall not be destroyed or taken contrary to regulations hereinafter provided therefor. The Department of Agriculture is hereby authorized and directed to adopt suitable regulations to give effect to the previous paragraph by prescribing and fixing closed seasons, having due regard to the zones of temperature, breeding habits, and times and line of migratory flight, thereby enabling the department to select and designate suitable districts for different portions of the country; and it shall be unlawful to shoot or by any device kill or seize and capture migratory birds within the protection of this law during said closed seasons, and any person who shall violate any of the provisions or regulations of this law for the protection of migratory birds shall be guilty of a misdemeanor and shall be fined not more than $100 or imprisoned not more than 90 days, or both, in the discretion of the court. The Department of Agriculture, after the preparation of said regulations, shall cause the same to be made public, and shall allow a period of three months in which said regulations may be examined and considered before final adoption, permitting, when deemed proper, public hearings thereon, and after final adoption shall cause the same to be engrossed and submitted to the President of the United States for approval: *Provided, however,* That nothing herein contained shall be deemed to affect or interfere with the local laws of the States and Territories for the protection of nonmigratory game or other birds resident and breeding within their borders nor to prevent the States and Territories from enacting laws and regulations to promote and render efficient the regulations of the Department of Agriculture provided under this statute."

To this information defendant demurs.

The question presented by the demurrer involves alone the constitutional validity of the act.

In ruling this question certain fundamental principles so firmly established in the laws of this country as to become truisms must be borne in mind. As the act assailed on constitutional grounds expresses the deliberate action and intent of a coordinate branch of government, it must be either upheld and enforced or its invalidity must be made to appear so clearly as to be beyond all question of doubt.

Our National Constitution is one of purely delegated powers. When the validity of an act asserted to have been passed in pursuance of power thereby conferred on Congress is challenged in due form and proper manner, as in this case, the plaintiff must point to some provision therein found which either in express terms or by necessary implication authorizes and sustains the act. When the Government engages her citizens in litigation in her courts the cause of each is entitled to and must receive at the hands of the court the same fair and just consideration and judgment. It is neither the purpose nor the desire of Government that any of her citizens shall in any manner be interfered with in the exercise of any right, except such interference be for the common good and in pursuance of lawful authority.

In the present case the Government asserts the power by Congress exercised in the passage of the act challenged is found in either what is commonly called the general welfare clause, subsection 2 of section 3, Article IV, of the Constitution, which reads as follows:

"The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State."

Or to be authorized by the commerce clause, which reads:

"To regulate commerce with foreign nations and among the several States and with the Indian tribes."

It is quite evident the thought in the mind of Congress which gave rise to the passage of the act in question, and the common good thereby sought to be accomplished, was the preservation of the migratory bird life of the country from extermination, as has in past been the lot of some species of its wild game animals and birds. However, no matter how laudable the purpose of Congress in the passage of the act in question may have been or how great the ultimate end sought thereby to be attained for the common good, such end does not justify the means employed if it be found on examination to lie beyond constitutional bounds. In such event the only proper course lies in amendment of the Constitution.

There can be no doubt but that a uniform system of laws on the subjects of marriage and divorce in this country would terminate many serious evils and accomplish inestimable good. Had Congress the power to so legislate, a few comparatively simple provisions would accomplish this much desired result. However, this has been neither done nor attempted by Congress. The same may be said of many subject matters of legislation under our system of government lodged in the State but denied to the Nation. As then the will of Congress to accomplish the much desired result, without the power of accomplishment, will not suffice, no matter how great the exigencies of the case or how impotent the powers of the States to protect may be; therefore those provisions of the Constitution relied upon by the plaintiff in this case to confer the power on Congress attempted to be exercised by it in the passage of this act in question must be examined in the light of reason and authority controlling here before a determination of the question presented can be reached.

In so far as the commerce clause is concerned, it does not appear much reliance is placed thereon by the plaintiff in its briefs and argument, and this, no doubt, for the reason contention on this score would seem to have been foreclosed by the Supreme Court in such exhaustive decisions as to leave nothing more to be said on this head, as reference to a few leading cases will show. In the case of Geer *v.* Connecticut (161 U. S., 519), it appears the State of Connecticut had enacted a statute for the protection of wild game of that State. Among other provisions, the act prohibited, under penalty, the transportation of game out of the State. Geer, a citizen of Massachusetts, went into the State of Connecticut and there had in his possession wild grouse taken in compliance with the privilege to so do accorded by the laws of the State. Having the game so taken in his possession, he was proceeding, contrary to the provisions of the act under which it was taken, to carry it as his individual personal property out of the State, for which offense he was tried, convicted, and sentenced under the laws of the State. The case was carried to the Supreme Court on the sole ground as the grouse had been lawfully taken in the State of Connecticut, in pursuance of her laws, in face of the commerce clause of the National Constitution the State of Connecticut was without power to prevent him as owner of his individual personal property from carrying it in interstate commerce. In an exhaustive review of this question, as shown by the opinion delivered by Mr. Chief Justice White, certain principles were laid down as the settled law of the land: (1) The wild animal and bird life present in a State is the common heritage of all the people of that State; the title thereto is vested in the State, not in its sovereign capacity but in trust for all the people of the State; (2) the extent of the personal or individual right which anyone may acquire in such game by the act of lawfully taking and reducing to his exclusive possession is not absolute in its nature, as is the like taking and possession of such goods and chattels as grain, fruits, vegetables, domestic animals, etc., but constitutes a mere qualified right in the taker to use or dispose of it in such manner as the laws of the State may admit. Hence, it was there held Geer had no right under the commerce clause of the National Constitution to carry the grouse out of Connecticut in violation of her laws. In other words, it is there held the power of the State over game within its territorial limits is not terminated by the act of the individual in reducing it to his exclusive and lawful possession, but, on the contrary, the power of the State follows the game into the hands of the lawful exclusive possessor, and in the assertion of its title held therein in trust for all the people of the State it may so control its use and disposition as to absolutely forbid and prohibit its coming under the protection and control of the commerce clause of the National Constitution. And the reason for the rule is apparent. If the State, either by its laws or in the absence of prohibitive laws, once permits game to come under authority of the commerce clause of the National Constitution, then all State control or authority thereover of necessity must cease to exist and its trust title for the common good of all the people of the State be cut off and destroyed.

Hence, by the very force of logic itself it must follow, if Congress by the simple fact of the exercise of its claimed legislative power expressed in the act in question has drawn into national custody and under the protection and control of national laws the migratory wild-bird life named in the act, by the same token it has not alone, without the expressed consent of the States, deprived them of the title under which they have heretofore held that portion of such life as comes within their borders in trust for all the people of the State, but the same being now under the protection of the Constitution and laws of the Nation, migratory game birds have become the subject of interstate commerce, and the case of Geer *v.* Connecticut is no longer applicable thereto.

The power of the States by their laws in the protection of their trust title for the common good of all the inhabitants of the State to exclude wild bird and animal life lawfully reduced to the exclusive possession of the individual from the operation of the commerce clause of the National Constitution, as was held in Geer *v.* Connecticut, supra, has been uniformly maintained by the courts of this country. (Martin *v.* Waddell, 16 Pet., 367; Smith *v.* Maryland, 18 How., 71; Manchester *v.* Massachusetts, 139 U. S., 240; Lawton *v.* Steele, 152 U. S., 133; The Abby Dodge, 223 U. S., 166; United States *v.* Shauver, 214 Fed., 154.) It is thus clear no reliance whatever may be placed by the plaintiff on the commerce clause of the Constitution to uphold the act in question.

Does the act find any basis for its support in what is called the general welfare clause of the Constitution above quoted? It is to be noted the purpose of that provision is to guarantee to the Federal Government the power to dispose of and regulate by law or rule its territorial domains and all other property or property rights held by it. If therefore it may be justly said the General Government has either a property right or a proprietary interest in things farræ naturæ, such as the migratory wild game birds here in question, then its power to enact the law in controversy is sustained thereunder, otherwise not.

As has been seen, the basic principle on which the decision of Geer *v.* Connecticut, supra, rests is that the exclusive title and power to control the taking and ultimate disposition of the wild game of this country resides in the State, to be parted with and exercised by the State for the common good of all the people of the State, as in its wisdom may seem best. Following the decision in that case, there came before the Supreme Court the case of Ward *v.* Race Horse (163 U. S., 504) in which the facts, briefly stated, were as follows: Race Horse was a member of the Bannock Tribe of Indians, living on the Fort Hale In-

dian Reservation in Idaho. By article 4 of a treaty duly consummated between the United States and his tribe in 1868 it was provided, as follows:

"The Indians herein named agree, when the agency house and other buildings shall be constructed on their reservations named, they will make said reservations their permanent home, and they will make no permanent settlement elsewhere, but they shall have the right to hunt upon the unoccupied lands of the United States so long as game may be found thereon, and so long as peace subsists among the whites and Indians on the borders of the hunting districts."

By act of Congress thereafter passed a Territorial form of government was provided for the Territory of Wyoming. This act provides as follows:

"Nothing in this act shall be construed to impair the rights of persons or property now pertaining to the Indians in said Territory, so long as such rights shall remain unextinguished by treaty between the United States and such Indians."

Wyoming was admitted as a State of the Union in 1890. In July, 1895, the legislature of that State passed an act regulating the killing of game within the State. Thereafter, in October, Race Horse killed elk in Uinta County, in that State, on public lands of the United States, as he was authorized to do under the treaty made between the United States and his tribe, but in violation of the act of the Legislature of the State of Wyoming. Being prosecuted under the law of the State, he justified his conduct under the provision of the treaty with his tribe above quoted. He was convicted and sentenced under the State law. His application for discharge on a writ of habeas corpus being denied him, he appealed to the Supreme Court. Both the State law and the treaty being in full force at the time he killed the elk the question presented was which should yield, the law of the State or the treaty of the Government with his tribe made by virtue of express authority of the National Constitution? Mr. Chief Justice White, delivering the opinion of the sourt, said:

"The power of a State to control and regulate the taking of game can not be questioned. (Geer *v.* Connecticut, 161 U. S., 519.) * * *

"The argument now advanced in favor of the continued existence of the right to hunt over the land mentioned in the treaty, after it had become subject to State authority, admits that the privilege would cease by the mere fact that the United States disposed of its title to any of the land, although such disposition when made to an individual would give him no authority over game, and yet that the privilege continued when the United States had called into being a sovereign State, a necessary incident of whose authority was the complete power to regulate the killing of game within its borders. This argument indicates at once the conflict between the right to hunt in the unoccupied lands within the hunting districts and the assertion of the power to continue the exercise of the privilege in question in the State of Wyoming in defiance of its laws. * * *

"The power of all the States to regulate the killing of game within their borders will not be gainsaid, yet if the treaty applies to the unoccupied land ot the United States in the State of Wyoming that State would be bereft of such power, since every isolated piece of land belonging to the United States as a private owner, so long as it continued to be unoccupied land, would be exempt in this regard from the authority of the State."

It was there held the simple fact of the admission of Wyoming into the Union as a State, possessing like and equal unrestricted control over the wild-animal life within her borders, authorized the legislature of the State, in the exercise of such plenary power of control, to prohibit and make criminal the doing of an act guaranteed by solemn treaty of the Government to Race Horse as a member of his tribe.

To the fact that the title and exclusive power of control over wild game coming within the borders of a State of this country resides in the State and not in the Nation the following cases bear indisputable proof: Geer *v.* Connecticut, supra; Ward *v.* Race Horse, supra; Phelps *v.* Racey (60 N. Y., 10); In re Deininger (108 Fed., 623); The Abby Dodge, supra; Commonwealth *v.* Savage (155 Mass., 278); Organ *v.* State (56 Ark., 270); State *v.* Geer (61 Conn., 144); State *v.* Northern Pacific Express (58 Minn., 403); State *v.* Rodman (58 Minn., 393); American Express Co. *v.* People (133 Ill., 649); Ex parte Maier (103 Cal., 476); People *v.* Collison (85 Mich., 105); State *v.* Heger (194 Mo., 707); State ex rel *v.* Warner (197 Mo., 650); State *v.* Weber (205 Mo., 36); State *v.* Repp (104 Iowa, 305); Bering Sea Arbitrators' Decisions (32 Am. L. Reg., 901).

The precise question here involved was presented to and considered by the District Court of the United States for the Eastern District of the State of Arkansas in the case of the United States *v.* Shauver (214 Fed., 154); in which case Judge Trieber, in an able and exhaustive opinion, arrived at the same conclusion here reached.

The act challenged is believed to be the single instance in the entire legislative or judicial history of this Nation or the composing States in which a contrary view has been expressed.

Unless a departure, as radical in theory as it is important in its effects, is to be made from fundamental principles long established by our laws and long acquiesced in by our people, the act in question must be held incapable of support by any provision of the organic law of our country. If the act in question shall, on any ground or for any reason, be upheld and enforced, it must surely follow the many laws of the separate States of this Union must hereafter be held inoperative, for there can be no divided authority of the Nation and the several States over the single subject matter in issue with either safety to the Nation or security to the citizen. And this for the reason although a power of control be delegated by the Constitution to the National Government, still such power may be exercised by the States until Congress acts. But so soon as Congress, in pursuance of its delegated power, occupies the field, all State laws become automatically suspended and inoperative. (Sturges *v.* Crowninshield, 4 Wheat., 122; Ogden *v.* Saunders, 12 Wheat., 213; Boyle *v.* Zacharie, 6 Pet., 348; Cook *v.* Moffatt et al., 5 How., 295; The Bank of Tennessee, etc., *v.* Horn, 17 How., 157; Baldwin *v.* Hale, 1 Wall., 223; Baldwin *v.* Bank of Newbury, 1 Wall., 234; Gilman *v.* Lockwood, 4 Wall., 409; Crapo *v.* Kelly, 16 Wall., 610; Sherlock et al. *v.* Alling, administrator, 93 U. S., 99; Gloucester Ferry Co. *v.* Pennsylvania, 144 U. S., 196; Smith *v.* Alabama, 124 U. S., 465; Nashville, etc., Railway *v.* Alabama, 128 U. S., 96; Cole *v.* Cunningham, 133 U. S., 107; Geilinger *v.* Philippi, 133 U. S., 246; Brown *v.* Smart, 145 U. S., 454; Butler *v.* Goreley, 146 U. S., 303; Gulf, Colorado, etc., Railway *v.* Heffey, 158 U. S., 98; Reid *v.* Colorado, 187 U. S., 137; Southern Ry. Co. *v.* Reid, 22 U. S., 424; Nor. Pac. Ry. *v.* Washington, 222 U. S., 370; Second Employers' Liability Cases, 223 U. S., 1.)

In Smith *v.* Alabama, supra, Mr. Justice Matthews, delivering the opinion of the court, said:

"The grant of power to Congress in the Constitution to regulate commerce with foreign nations and among the several States, it is conceded, is paramount over all legislative powers which, in consequence of not having been granted to Congress, are reserved to the States. It follows that any legislation of a State, although in pursuance of an acknowledged power reserved to it, which conflicts with the actual exercise of the power of Congress over the subject of commerce, must give way before the supremacy of the national authority."

In Second Employers' Liability Cases, supra, Mr. Justice Van Devanter, delivering the opinion of the court, said:

"True, prior to the present act the laws of the several States were regarded as determinative of the liability of employers engaged in interstate commerce for injuries received by their employees while engaged in such commerce. But that was because Congress, although empowered to regulate that subject, had not acted thereon, and because the subject is one which falls within the police power of the States in the absence of action by Congress."

Not only is this true, but the argument of necessity, so strongly urged on the part of the Government at the hearing, to preserve the migratory bird life of the country from extinction, would seem to the thoughtful mind more fanciful than real, and for this reason: The several States, as has been seen, possess the most absolute and plenary power of control over the subject matter of wild animal and wild bird life within their territorial domains it is possible to either conceive or to grant. In the exercise of this unlimited power, the States acting together may beyond all question prohibit absolutely and unconditionally the taking of any such wild life in any part of this country, either temporarily or for all time. Hence, it turns out, the argument of necessity for action on the part of the Government arises not so much from any want of power to control on the part of the several States as from dissatisfaction as to the manner in which such plenary power possessed by the several States is exercised. It is quite obvious differences of opinion and difficulties of the nature involved are inherent in the very form and structure of this Government, subject to change or correction, however, only in the manner prescribed by its founders.

It follows, the demurrer to the information must be sustained. It is so ordered.

The same order will enter in cases No. 4196, United States *v.* Savage, and in No. 4198, United States *v.* Sapp, which cases were submitted with that under consideration.

JOHN C. POLLOCK, *Judge.*

KANSAS CITY, KANS., *March 20, 1915.*

(Indorsed:) No. 4197, memorandum of decision on demurrer to information. Filed March 20, 1915. Morton Albaugh, clerk.

UNITED STATES OF AMERICA, *District of Kansas, ss:*

I, Morton Albaugh, clerk of the district court of the United States of America for the district of Kansas, do hereby certify the within and foregoing to be a true, full, and correct copy of memoranda of decision on demurrer to information in the suit of United States of America *v.* George L. McCullagh, case No. 4197, in said court.

In testimony whereof I have hereunto set my hand and affixed the seal of said court, at my office in Topeka, in said district of Kansas, this 9th day of April, 1915.

[SEAL.]

MORTON ALBAUGH, *Clerk.*
By T. L. CAMPBELL, *Deputy Clerk.*

Supreme Judicial Court of Maine. July 21, 1915.

STATE V. SAWYER.

1. GAME—STATUTES—CONSTRUCTION.

Act of Congress of March 4, 1913, chapter 145, 37 Statutes, 847 (U. S. Comp. St., 1913, par. 8837), declaring that all migratory and insectivorous birds shall be deemed within the custody and protection of the Government of the United States, and shall not be destroyed or taken contrary to regulations provided for and providing for regulations of the taking of such game, purports to exclusively regulate the matter and deprive the States of control over such game.

2. COURTS—STATE COURTS—JURISDICTION.

While the Federal Supreme Court has the authority to make the final determination of the question of the constitutionality of an act of Congress, the State courts may, where the enforcement of a State statute depends upon the constitutionality of a Federal law, determine the question.

3. GAME—STATUTES—VALIDITY.

As the States retained all powers not granted to the Federal Government, the States, as sovereignties, have the exclusive right to regulate the taking and capturing of wild game, unless such right is conferred upon the Federal Government.

4. COMMERCE, WHAT CONSTITUTES.

The commerce clause of the Constitution, giving Congress the right to regulate commerce with foreign nations, among the several States, and with the Indian tribes, does not warrant act of Congress of March 4, 1913, purporting to regulate the killing and taking of migratory and insectivorous birds within the several States; the killing or taking of such birds not being an act of "commerce."

5. GAME—WILD GAME—REGULATIONS.

Nor does the general welfare clause, declaring that Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States, for wild game is not property belonging to the Federal Government.

6. ARREST—SERVICE OF WARRANT—AUTHORITY OF FISH WARDEN.

Accused, who was charged with unlawfully shooting ducks from a point in the open sea near an island within the jurisdiction of the State, can not complain that the warrant against him was directed to and served by a fish warden, for Laws 1913, chapter 206, paragraph 45, declares that the general supervision of the sea and shore fisheries is extended to islands and to game and birds found thereon, and that such department shall have charge of the enforcement of laws relating to sea and shore fisheries and fish wardens, who are empowered to enforce all laws relating thereto, and have the same power to serve criminal process as sheriffs.

Report from supreme judicial court, Hancock County, at law.

Chester Sawyer was convicted in municipal court for violating the game law and he appealed. On report. Judgment affirmed.

Argued before Savage, C. J., and Spear, Cornish, King, Bird, and Hanson, JJ.

Herbert L. Graham, county attorney, of Bar Harbor, for the State. George A. Hadlock for respondent.

King, J. The respondent was tried before the Bar Harbor municipal court and found guilty of shooting two migratory game birds or wild ducks on Sunday, October 4, 1914, in violation of a provision of the fish and game laws of the State of Maine. He appealed, and the case is reported to this court on an agreed statement of facts. The alleged offense was committed while the respondent was in a boat on the open sea one-fourth of a mile from Bakers Island, which forms a part of the town of Cranberry Isles, Hancock County, Me.

It is not contended that the respondent did not violate a law of the State prohibiting the killing of wild ducks, for Sunday is a closed time, when it is unlawful to hunt, kill, or destroy game or birds of any kind, under the penalties imposed therefor during other closed seasons (chap. 206, P. L., 1913, par. 50), and there is an annual closed season on all varieties of ducks from January 1 to August 31 of each year, with a specified penalty for its violation (sec. 45, chap. 206, supra). Now is it contended, as we understand the agreed statement, that the place where the act was committed is not within the State of Maine, for it was only one-fourth of a mile from an island "within its jurisdiction." It is claimed, however, that any power which the States had to make and enforce laws and regulations concerning the killing of migratory game birds became suspended and inoperative by reason of the act of Congress of March 4, 1913, and the regulations thereunder. That act contains the following provisions:

"All wild geese, wild swans, brant, wild ducks, snipe, plover, woodcock, rail, wild pigeons, and all other migratory game and insectivorous birds which in their northern and southern migrations pass through or do not remain permanently the entire year within the borders of any State or Territory, shall hereafter be deemed to be within the custody and protection of the Government of the United States, and shall not be destroyed or taken contrary to regulations hereinafter provided therefor.

"The Department of Agriculture is hereby authorized and directed to adopt suitable regulations to give effect to the previous paragraph by prescribing and fixing closed seasons, having due regard to the zones of temperature, breeding habits, and times and line of migratory flight, thereby enabling the department to select and designate suitable districts for different portions of the country, and it shall be unlawful to shoot or by any device kill or seize and capture migratory birds within the protection of this law during said closed seasons, and any person who shall violate any of the provisions or regulations of this law for the protection of migratory birds shall be guilty of a misdemeanor and shall be fined not more than $100 or imprisoned not more than 90 days, or both, in the discretion of the court.

"The Department of Agriculture, after the preparation of said regulations, shall cause the same to be made public, and shall allow a period of three months in which said regulations may be examined and considered before final adoption, permitting, when deemed proper, public hearings thereon, and after final adoption shall cause the same to be engrossed and submitted to the President of the United States for approval: *Provided, however*, That nothing herein contained shall be deemed to affect or interfere with the local laws of the States and Territories for the protection of nonmigratory game or other birds resident and breeding within their borders, nor to prevent the States and Territories from enacting laws and regulations to promote and render efficient the regulations of the Department of Agriculture provided under this statute."

In pursuance of the authority of the act, the Department of Agriculture adopted suitable regulations, which have been approved by the President, one of which fixes a closed season on wild ducks in Maine between December 16 and September 1 next following.

If Congress had the power to control and regulate the killing of migratory game birds within the State, and if, in the exercise of that power, it has made regulations that are exclusive of or in conflict with the State regulations, then the Federal regulations must be regarded as supreme and to have suspended the power of the State to make and enforce regulations respecting the same subject matter.

The Federal act provides that wild ducks and other specified migratory game birds "shall hereafter be deemed to be within the custody and protection of the Government of the United States, and shall not be destroyed contrary to the regulations hereinafter provided for." This language indicates a legislative purpose that the Federal regulations were to be exclusive. And this idea seems to be further indicated in the provision:

"That nothing herein contained shall be deemed to affect or interfere with the local laws of the States and Territories for the protection of nonmigratory game or other birds resident and breeding within their borders, nor to prevent the States and Territories from enacting laws and regulations to promote and render efficient the regulations of the Department of Agriculture provided under this statute.

We do not, therefore, feel inclined to hold in this case that the Federal regulations as to migratory game birds, if valid, are not to be regarded as exclusive of and in conflict with the State regulations which the respondent violated. Accordingly, it becomes necessary, we think, to consider whether the act of Congress of March 4, 1913, and the regulations thereunder adopted are valid as against the State regulations for the preservation of wild ducks within its borders.

Notwithstanding the well-recognized principle that the authority to make a final and controlling determination of the question of the constitutionality of an act of Congress is in the Supreme Court of the United States, and for that reason a State court does not ordinarily assume the consideration of such question; nevertheless, if, as in this case, before that question is finally decided by the Supreme Court, the enforcement of a State law depends upon whether Congress had power, under the Constitution, to pass an act, the effect of which is to suspend the State law, then it becomes the duty of the State court to act in accordance with its own decision of that question until such time at least as it may be otherwise finally determined by the supreme tribunal.

In considering this question, these fundamental and universally admitted principles should be kept in mind that the Federal Government is one of enumerated powers, possessing such powers only as have been actually granted to it, and that all other powers of legislation, though not enumerated and defined because it was unnecessary and perhaps inexpedient that they should be, were retained by the States and remained in the States after the adoption of the Federal Constitution as before, except so far as they were abridged by it. It must also be admitted as fundamental that before the Federal Government was created the States had the right to exercise almost every legislative power, and among them, undoubtedly, that of establishing laws and regulations for the preservation of the wild game within their borders for the common good of their people, a doctrine which seems never to have been questioned in any jurisdiction.

In State *v.* Snowman (94 Me., 99, 111; 46 Atl., 815; 50 L. R. A., 544; 80 Am. St. Rep., 380), our court said:

"The fish in the waters of the State and the game in its forests belong to the people of the State in their sovereign capacity, who, through their representatives, the legislature, have sole control thereof and may permit or prohibit their taking."

This doctrine is recognized by all the American courts and has had the uniform approval of the Supreme Court of the United States whenever the question has been considered by it. In Geer *v.* Connecticut (161 U. S., 519; 16 Sup. Ct., 600; 40 L. Ed., 793), the leading case perhaps on the subject, Mr. Justice White, now the Chief Justice, learnedly analyzed the principles upon which this doctrine rests and exhaustively reviewed the precedents in which it is securely established. And it would be needless, indeed, to cite here the many authorities supporting this unquestioned principle that the States, prior to the formation of the National Legislature, had the power to make laws and regulations for the protection and preservation of the wild game within their borders.

Has that power been granted to the Federal Government? If so, it must be found in either what is called the commerce clause or the general-welfare clause of the Federal Constitution.

The commerce clause authorizes Congress "to regulate commerce with foreign nations and among the several States and with the Indian tribes." (Const., art. 1, par. 8.) Certainly the passage of wild birds in their flight from one State to another is not commerce between the States. However difficult it may be to define with precision the term "commerce," as used in that clause of the National Constitution, it is undoubtedly limited to the acts of man and does not include the natural and uncontrolled movements of wild game. Nor can we perceive any reasonable ground for a contention that the commerce clause confers on Congress power to regulate the taking of wild game within the States. Indeed, it would seem that all possible contention on this score has been already held untenable by the Supreme Court of the United States in several cases where the question has been exhaustively considered. In the case of Geer *v.* Connecticut, supra, the validity of a statute of that State, which prohibited the transportation of game out of the State, was involved. The case was carried to the Supreme Court of the United States on the sole ground that, as the game is question was killed in the State lawfully the statute prohibiting its transportation out of the State was in violation of the commerce clause of the National Consitution. But the court decided otherwise, holding that the wild animal and bird life within a State belongs to the State in trust for the people of the State, and that the State has the authority to legislate for its protection and preservation for the common good, and that such power of legislation embraces game that has been reduced to the possession of an individual by lawfully killing it in the State; or, in other words, that, in view of the peculiar nature of such property and its ownership by the State for the benefit of all its citizens, the State may prohibit its transportation out of the State, although lawfully killed wihin the State, because such a prohibition may tend to restrict its lawful killing within the State and the better preserve it for its own people. And it was there held that while game, taken lawfully, might be considered a subject of commerce within the State where taken, it did not become the subject of interstate commerce within the commerce clause of the Federal Constitution. See also New York ex rel. Silz *v.* Hesterberg (211 U. S., 34; 29 Sup. Ct., 10; 53 L. Ed., 75), where it is held that a statute of New York prohibiting the possession of certain game during closed time did not violate the commerce clause of the Federal Constitution. In Judson on Interstate Commerce, paragraph 11, the author says:

"Thus, the wild game within a State, at common law, belongs to the sovereign, and in this country to the people, in their collective capacity, and the State therefore has a right to say that it shall not become the subject of commerce."

Our conclusion, therefore, is that the power to legislate respecting the protection and preservation of wild game within the States was not conferred upon Congress through the commerce clause of the Constitution.

Nor do we find such power in the general-welfare clause, which reads as follows:

"The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States, and nothing in this Constitution shall be construed as to prejudice any claim of the United States, or of any particular State."

We have already hereinbefore pointed out, as the universally accepted doctrine, that the ownership of wild game, so far as it is capable of ownership, is in the States for the benefit of all their people in common. It follows, therefore, that Congress acquired no power under the general-welfare clause to make regulations concerning wild game, because wild game is not "property belonging" to the United States. And we need here only repeat what has been before said in substance, that the basic principle on which all the decisions of both the State and Federal courts upholding the State game laws rest is that the State is the owner of the wild game within its borders, and that principle has been consistently adhered to.

The question of the constitutionality of the act of March 4, 1913, and the regulations thereunder, has been directly considered in two recent cases in the Federal courts, viz, United States *v.* Shauver (D. C.) (214 Fed., 154), decided by the district court for the eastern district of Arkansas, and United States *v.* McCullagh (D. C.) (221 Fed., 288), decided by the district court for the district of Kansas. In each of those cases, in an exhaustive opinion, the court reaches the same conclusion here reached, that Congress has not the power to regulate the taking of migratory game birds within the States, and that therefore the act of March 4, 1913, is unconstitutional. In each of those cases the respondent was prosecuted in the Federal court for a specific violation of the Federal regulations.

Our conclusion, therefore, is that the power of the State of Maine to enact laws and regulations for the protection and preservation of wild game within her borders, including migratory game birds, was in no way suspended or abridged by the act of Congress of March 4, 1913, and the regulations adopted thereunder, and that the provision of the game laws of the State of Maine which the respondent violated was operative and enforceable against him.

There is no merit in the respondent's suggestion that, because the warrant against him in this case was directed to a fish warden and served by him, the proceedings were defective. Fish wardens are empowered by statute to "enforce all laws and the rules and regulations relating to sea and shore fisheries, arrest all violators thereof, and prosecute all offenses against the same; they shall have the same power to serve criminal processes against such offenders, and shall be

allowed the same fees as sheriffs for like services; they shall have the same right as sheriffs to require aid in executing the duties of their office."

Section 45 of chapter 206, Public Laws, 1913, reads as follows:

"The general supervision of the department of sea and shore fisheries as heretofore fixed by law is hereby extended to embrace all the islands in the sea within the jurisdiction of the State, the deer and other game and birds found thereon, and said department shall have charge of the enforcement of the laws relating to all ducks, shore, and other birds on the seacoast of the State 1 mile inland, including all bays and inlets so far as the tide ebbs and flows, except the Kennebec River above the city of Bath."

We entertain no doubt that the fish warden, to whom the warrant against the respondent was directed, and by whom it was served, had ample authority conferred upon him by statute to act in the premises.

Judgment of lower court affirmed.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Texas [Mr. SHEPPARD].

Mr. REED. I have made another motion.

The PRESIDING OFFICER. Only one motion can be pending at a time.

Mr. SHEPPARD. There is no objection to mine, I believe.

Mr. SMITH of Georgia. Yes; there is. I desire to make the point of order upon the amendment of the Senator from Texas that it is general legislation and can not be attached to an appropriation bill.

The PRESIDING OFFICER. Does the Senator from Texas desire to be heard upon the point of order?

Mr. SHEPPARD. I realize that the amendment is subject to the point of order, but it carries no appropriation, and I did not think it would meet with objection. The Secretary of Agriculture has no power at present to accept the lands that might be donated for these purposes.

Mr. SMITH of Georgia. And I am opposed to his accepting any, Mr. President. I think it is a State function, and not a national function. If parties in the States wish to give a little piece of land to be used for game in the State, I am opposed to putting the National Government in charge of those little reserves.

It is entirely a State matter, and I object to it because I am unwilling to see the Secretary of Agriculture embark in local rather than in general work. At least, that is my view of it at present without further study; and on its face, as the legislation is general and objectionable, I felt that the proper thing for me to do—representing the committee for the first time today—was to make the point.

Mr. SHEPPARD. I wish to say to the Senator that there are 40 or 50 of these reservations in existence already, and the amendment involves no new policy.

Mr. SMITH of Georgia. Those, I think, are reservations where the Government already owned the land, and they fell to the Government by necessity. If we now go further and adopt this general plan of accepting anything that is tendered anywhere, it will be hard to tell where we would stop. I would rather it should not be attached to the bill at this time.

Mr. SHEPPARD. I say to the Senator that I shall endeavor to bring this amendment before the committee and shall endeavor to show him that it is proper and desirable.

Mr. SMITH of Georgia. I may not object to it then; but it just comes to me now, with the responsibility on me, I feel I must object.

The PRESIDING OFFICER. The point of order made by the Senator from Georgia is sustained.

Mr. McCUMBER. Mr. President, what amendment is before the Senate now?

The PRESIDING OFFICER. The amendment of the Senator from Missouri [Mr. REED] is before the Senate at the present time. It will be stated.

The SECRETARY. On page 58, it is proposed to strike out lines 3 to 10, both inclusive.

Mr. GALLINGER. Let the language be read.

Mr. SMITH of Georgia. Mr. President, the motion of the Senator from Missouri, as I understand it, is to strike out the appropriation for the enforcement of the migratory-bird law; and to that I will address myself only for a moment.

It is hardly necessary for me to say that I will not defend Dr. Hornaday. Some little time ago he made some remarks about the Senate and members of the Finance Committee of the Senate which were entirely untrue. I do not say that he did not think they were true when he made them, but they were utterly false and unjust, and I joined in the not entirely favorable view of the Senator from Missouri about the accuracy of Dr. Hornaday's publications. Nor shall I defend Mr. Nelson, whom the Senator from Missouri calls Dr. Nelson.

I think he has been in the Biological Survey a good long time, but one thing he has recently done has not commended itself to me; but I do not intend to discuss that now. I think he, in an effort to get a man of his choice into the work, utterly disregarded the civil-service rules and perpetrated a violation of them for which he might well be criticized.

But, Mr. President, that is not the question that confronts us. I shall not discuss the constitutionality of this migratory-bird law. I shall not meet the Senator from Missouri and defend it. The Senate passed it. The House passed it. The President approved it. It stands upon our statute books, until repealed, as one of the laws of this country, and we put the Agricultural Department to work enforcing it. It was their duty to enforce it as best they could. We spent $50,000 one year and $50,000 the next year. They have an organization by which they are seeking to enforce this law, partly by criminal prosecutions, much more, I think, by persuasion. It may be that they will accomplish more by persuasion than by cirminal prosecution. It may be the part of wisdom to rely upon persuasion. But one of those criminal prosecutions, decided against the Government, has been carried to the Supreme Court of the United States, and the constitutionality of this act is now pending before the Surpeme Court of the United States. It was argued some months ago, and, as I understand it, the court, after hearing argument not before a full bench, subsequently determined not to pass upon the question without a full bench. It is generally supposed that that means that those who heard the question were divided in their view with reference to it. At any rate, the Supreme Court of the United States has the constitutionality of this legislation before it and has postponed decision that it may be considered, as I am advised, by a full bench; and it is confidently expected that a decision will be reached and announced in the early fall.

Now, the Agricultural Department has made an organization to enforce the law. It has an organization composed of men most of whom have had two years' experience; and the question which was before the Committee on Agriculture and Forestry, we thought, was not the constitutionality of the law, not what we would prefer the law to be. We felt that the proper course was to follow the action of the House and continue this appropriation, without undertaking at this time to pass in detail upon the legislation, and await the decision of the Supreme Court of the United States, which would come in a few months. We did not think we ought now to go into a constitutional investigation of the legislation passed several years ago—I think three years ago—and break up an organization that had been created, as the result of the act of Congress, by the Department of Agriculture. We thought we ought to let the organization go on, and furnish the funds to keep it going a few months longer, if not permanently, and await the action of the Supreme Court of the United States.

That was the line of thought which influenced the committee.

Mr. REED. Let me ask the Senator if there was not another line of thought which influenced the committee—that the committee had stricken out this item a year ago and Congress finally put it back in the bill, and the committee felt that that was a sort of instruction?

Mr. SMITH of Georgia. I believe that is true also. I think the Senate put it back in. I think the committee struck it out or reduced it greatly at one time, and the Senate put it back in. But there was more reason to keep it in now than even then, for now we have the organization in existence, and we are soon to have a decision as to the constitutionality of the law; and, of course, if it is held unconstitutional the work will stop, and the balance of the appropriation will be turned back into the Treasury.

Mr. REED. Mr. President, before the Senator takes his seat, let me ask him another question. When we are dealing with an organization that in three years' time has had about half a dozen cases decided on pleas of guilty, and then has had the fines remitted in all of those cases but three or four, does the Senator think the disorganization of that kind of an organization would be very much of a calamity to the United States?

Mr. SMITH of Georgia. Why, Mr. President, the very best organization that could be made for the enforcement of a criminal law would be the organization which secured compliance with the law without criminal indictments.

Mr. REED. Oh, but the Senator knows this law has not been complied with.

Mr. SMITH of Georgia. To what extent this organization has succeeded in inducing recognition of the law without indictments I can not say. I do not think we can measure the efficiency of their work by the number of criminal prosecutions they were compelled to institute. I really believe this is true about the organization: I think, pending the decision of the Supreme Court, it has largely been engaged in an effort to induce game wardens to cooperate with Government officials and induce recognition of and compliance with the law, rather than to enforce it through criminal procedure. I think that is true.

Mr. REED. Does not the Senator know that the enforcement of the law up to this time has been something worse than a farce? I say to the Senator that in my State, and in that part of the State of Kansas with which I am at all familiar, in that

whole section of the country, while at first men drew back from doing anything that apparently was prohibited by the Federal Government, as soon as they understood the question they began to exercise their right and to conform to the State law, and the State law of Missouri is a hundred times better than the decrees of this court. Now, why should we continue to pay out this $50,000? Of course, it is only $50,000, and $50,000 is a very small trifle in the Senate of the United States, but with this horrible record, how can the Senator ask us to go on paying out money under a law he knows is unconstitutional?

Mr. SMITH of Georgia. No; I do not know it.

Mr. REED. Well, the Senator believes it.

Mr. SMITH of Georgia. I have never expressed my opinion in favor of its constitutionality, but I have found often that I was mistaken in thinking a law was unconstitutional, when it turned out under the decisions of the Supreme Court of the United States that it was constitutional. I have somewhat modified my original views of what made a law unconstitutional. A part of our Constitution creates the Supreme Court of the United States to adjudicate those questions finally. I recognize the wisdom of that provision in the Constitution, and I recognize my own error when they hold differently from the way I might have held.

I wish to answer the Senator just a little further, if I can. I had finished all I wanted to say. I do not know that the law is disregarded everywhere. I have not a knowledge myself of the condition in all of the States. I had understood that in a great many of the States the game wardens of the States, in cooperation with Government officials, had induced quite a respect for the law, and that it was being recognized and obeyed in many parts of the United States. I naturally understand that in a State where the United States district court judge held it unconstitutional the impression would exist that the law was unconstitutional and there would be quite a disposition to disregard it entirely.

Mr. REED. I call attention in this connection to a statement which the testimony shows was made by Mr. W. F. Bancroft, administrative assistant to the Bureau of Biological Survey, as follows:

> I tell you now frankly we can not enforce the Federal law and we know we can not enforce it. The law, as far as enforcement at this time is concerned, is a farce. We have about 500 cases on file in the bureau, but the Department of Justice has given us orders that no more cases will be taken up for prosecution until the Supreme Court renders a decision as to the constitutionality of the law.

I put in that statement because here is a gentleman who ought to know whether the law is being enforced or not.

I want to say at this point, since the question was asked by the Senator from Connecticut [Mr. McLEAN] about the laws of Missouri, and asked rather in a way to intimate that we did not protect game there, that I have here the game laws of Missouri, and I just want to read one section, which will show that game birds are protected in that State to a remarkable degree:

> No person shall take, capture, or kill by any means whatever any game birds, except the following game birds, between the following dates:
>
> Wild turkey, November 1 to December 31—

That is a 60-day period.

> Quail, from November 1 to December 31—

That was, until the last legislature met, limited, I think, to 20 days for several years. The birds multiplied, and it was extended to 60 days.

> Ducks, geese, and brant, January 1 to April 30 and September 15 to December 31—

A regulation absolutely in conformity to the seasons of the State, and one that absolutely cuts off the killing during the time the birds are mating or nesting.

> Snipe, January 1 to April 30 and September 15 to December 31 of each year.
>
> Plover, September 1 to December 31 of each year.
>
> Doves, September 1 to December 31 of each year.
>
> Any person who shall violate any of the provisions of this section shall, upon conviction thereof, be punished by a fine of not less than $25 nor more than $50 for each offense, and an additional fine of $5 for each bird injured, killed, or possessed.

There are to be found in the act a great many other regulatory and prohibitive provisions—the killing by nets, the destroying or getting of certain kinds of animals by baits or hooks or other devices. So that, taken all in all, our general assembly, composed of men from every part of the State, knowing the habits of the birds, have passed a most stringent game law, and to the passage of that law I gave my earnest and hearty approval. I do not care how much more stringent the law may be made, but I want the people of my State to have the right to attend to their own business, and I want the people of my State who know the habits of game in that State and the season when game mate or when birds nest to have the right to regulate their affairs in their own way without interference by Dr. Hornaday or a board of gentlemen who live in other States.

I call attention to the fact that when I asked Dr. Nelson what experience he had had in Missouri he answered that he had hunted ducks in Alaska or had investigated Alaska, I have forgotten which. I want every other State to have the same rights that Missouri has, those rights which the Constitution of the United States gives them, and I do not want Congress to pass this bill paying $50,000 to violate the constitutional rights of the States and of the people thereof.

Mr. McLEAN. Mr. President, I am very glad that the Senator from Georgia, who is on the Agricultural Committee, has given to the Senate the reason why the committee reported in favor of this appropriation this year. The Senate will remember that last session the committee cut the appropriation down to $10,000, and the Senate restored it to $50,000.

I think the Senator from Georgia has stated all that need be said in favor of this appropriation. I do not care to debate it, as I am anxious to get a vote upon it. The Senate will remember that the Senator from Missouri, last year and the year before, attacked the law on the ground that it was unconstitutional. He said then that no respectable lawyer believed for a minute that it was constitutional. But since that time the question has gone to the Supreme Court of the United States in the Arkansas case. It was argued there, and, of course, every single argument the Senator has adduced here in opposition to the law was presented to the Supreme Court by the attorneys for the duck shooters. Mr. Underwood, of the Department of Justice, prepared a brief in support of the law. It seems to me a very strong brief. He laid very little stress upon the interstate-commerce clause. I have Mr. Underwood's brief here. I do not care to have all of it printed in the RECORD, and I do not want to take the time of the Senate to read it, because I do not think this is the place to test the constitutionality of the law, but I will ask unanimous consent to have printed in the RECORD four or five pages of the brief upon which Mr. Underwood bases his opinion that the law is constitutional under section 3 of Article IV of the Constitution, which provides that "Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States."

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

ARGUMENT.

The sole question presented in this case is the constitutionality of the act. The Government maintains that it is authorized by paragraph 2, section 3, Article IV, and paragraph 3, section 8, Article I, of the Constitution.

I.—THE MIGRATORY BIRD LAW IS AUTHORIZED BY THE SECOND PARAGRAPH OF SECTION 3 OF ARTICLE IV OF THE CONSTITUTION, WHICH PROVIDES: "THE CONGRESS SHALL HAVE POWER TO DISPOSE OF AND MAKE ALL NEEDFUL RULES AND REGULATIONS RESPECTING THE TERRITORY OR OTHER PROPERTY BELONGING TO THE UNITED STATES."

That the ownership of wild game is in the sovereign is a legal principle founded entirely on interpretation given to the common law. In no instance does it rest on any statute or other written declaration of the sovereign.

In this case the question is what sovereign owns the migratory wild life in the United States, whether the Nation as a whole or the several States. On account of the peculiar dual nature of our Government, decisions other than our own are not very helpful in determining conflicts between Federal and State rights and powers. Therefore the decisions of foreign courts will not assist us except in establishing the principle that such ownership is in the sovereign, a conclusion reached by the courts of all nations. (Geer *v.* Connecticut, 161 U. S., 519.)

The question of ownership of wild game has arisen in this country only in cases which did not involve claim of ownership in the United States Government or the distinction between migratory animals and those local to a particular State. In several cases the courts have referred to these questions, but in each instance expressly declined to pass on them, leaving them open for future determination, as was done by this court in the cases of The Abby Dodge (223 U. S., 166) and Manchester *v.* Massachusetts (139 U. S., 240).

The question presented in this case, therefore, is an original one involving the nature and source of property rights, and this decision, being the first of its kind, must declare the common law determining such rights, and may do so upon principle, uninfluenced by supposed authority.

"* * * The first statement presents the principle as certainly as the last. Multiplication of declarations merely adds certainty. For, after all, the common law is but the accumulated expressions of the various judicial tribunals in their efforts to ascertain what is right and just." (Kansas *v.* Colorado, 206 U. S., 46, 97.)

The question involved being justiciable and necessarily one of common law, the court in this case must declare "what is right and just" in this particular matter, based upon present-day conditions.

"Constitutional provisions do not change, but their operation extends to new matters as the modes of business and the habits of life of the people vary with each succeeding generation." (In re Debs, 158 U. S., 564, 591.)

Let us, then, examine this common-law principle of the sovereign's title to animals *feræ naturæ* and endeavor to apply it to present conditions in the United States, keeping in mind that the people is the sovereign.

Animals *feræ naturæ* are common property, belonging, by the law of nature, in common to all citizens of the sovereignty. This has been recognized from time immemorial, not only by common-law writers but also by the civilians.

"Like recognition of the fundamental principle [common ownership] upon which the property in game rests has led to similar history and identical results in the common law of Germany, in the law of Austria, Italy, and, indeed, it may be safely said in the law of all the countries of Europe. (Saint Joseph Concordance, vol. 1, p. 68.) The common law of England also based property in game upon the principle of common ownership, and therefore treated it as subject to governmental authority. (Geer *v.* Connecticut, 161 U. S., 519, 526.)

"Thus it appears by the common law that a property in those living creatures which, by reason of their swiftness or fierceness, were not naturally under the power of man, was gained by the mere caption or seizure of them, and that all men had an equal right to hunt and kill them. (Vol. 4, Bacon's Abridgement, Title 'Game,' p. 435.)

"Whilst the fundamental principles upon which the common property in game rests have undergone no change, the development of free institutions has led to the recognition of the fact that the power or control lodged in the State, resulting from this common ownership, is to be exercised, like all other powers of government, as a trust for the benefit of the people, and not as a prerogative for the advantage of the Government as distinct from the people, or for the benefit of private individuals as distinguished from the public good. Therefore, for the purpose of exercising this power, the State, as held by this court in Martin *v.* Waddell (16 Pet., 410), represents its people, and the ownership is that of the people in their united sovereignty. (Geer *v.* Connecticut, 161 U. S., 519, 529.)

"Here [in the United States] the sovereign power is in the people, and the principle, founded upon reason and justice, obtains, that by the law of nature every man, of whatever rank or station, has an equal right of taking, for his own use, all creatures fit for food that are wild by nature, so long as he does no injury to another's right." (Sterling *v.* Jackson, 69 Mich., 488.)

The property being common to all citizens, each has the same right to its enjoyment. That this right may be safeguarded and rendered available to all the common law vests the title to animals *feræ naturæ* in the Government, in trust for the people, "in order to protect them from undue destruction so that the right of the common owners, the public, to reduce to possession may be ultimately efficaciously enjoyed." (Ohio Oil Co. *v.* Indiana, 177 U. S., 190, 210.)

The only reason or purpose subserved by so placing the title is that the common property may be protected and controlled. If there is no government which has power to protect there is no reason for a trustee, and the title, as well as the beneficial ownership, may well rest in the people. The Government's title, therefore, to animals *feræ naturæ* has its source in and depends upon its ability to protect and control same for the benefit of all. This being true, the common law in case of conflict will uphold the title of that Government which has the superior power to protect and control such property for the benefit of its common owners.

Let us apply this principle to our peculiar system of governments within a government.

The State, in contradistiction to the United States, has for the benefit of and in trust for its people ownership of all wild animals remaining permanently within its territorial limits. Having entire control over such animals, the State can protect and conserve them by its laws for all of its people. From this power of control and protection the common law, as interpreted by both Federal and State courts, has deduced State ownership of animals *feræ naturæ*.

In the case of migratory wild life, however, the several States have not such control or power over same as renders possible its protection by the States for the benefit of the people. While such animals are on other territory than their own they have absolutely no power over them and can not enter into treaties with other governments for their protection or even make agreements concerning the same among themselves without consent of Congress. For the greater part of the time a particular State has, therefore, because of express provisions of the Constitutiton, no power to control or protect migratory wild life. The Federal Government alone can protect and regulate at all times animals *feræ naturæ* remaining permanently within the limits of the United States yet migrating over several States, and is also the only Government which can enter into treaties with foreign countries where such animals migrate beyond the limits of the United States. Therefore, by reasoning from this exclusive power analogous to that which vests title to local game in the State, the common law should declare ownership of migratory birds to be in the United States as trustee for all the people.

* * * "There is a domain which the States can not reach and over which Congress alone has power, *and if such power be exerted to control what the States can not it is an argument for, not against, its legality.*" Its exertion does not encroach upon the jurisdiction of the States. (Hoke *v.* United States, 227 U. S., 308, 321.) Italics ours.

"Our dual form of government has its perplexities, State and Nation having different spheres of jurisdiction, as we have said; but it must be kept in mind that we are one people, and the powers reserved to the States and those conferred on the Nation are adapted to be exercised, whether independently or concurrently, to promote the general welfare, material and moral." (Hoke *v.* United States, 227 U. S., 308, 322.)

"The genius and character of the whole Government seem to be that its action is to be applied to all the external concerns of the Nation, and to those internal concerns which affect the States generally, but not to those which are completely within a particular State, which do not affect other States, and with which it is not necessary to interfere for the purpose of executing some of the general powers of the Government." (Gibbons *v.* Ogden, 9 Wheat., 1, 195.)

This common-law interpretation of property rights fits in with our constitutional system of enumerated powers. When the Constitution of the United States was ratified a new and distinct sovereignty and people were created. This new Government emanated from the people, and not from the States as such.

"Its powers are granted by them and are to be exercised *directly on them and for their benefit.* * * * It is the Government of all; its powers are delegated by all; it represents all and acts for all." (McCulloch *v.* Maryland, 4 Wheat., 316, 405.) Italics ours.

By ratifying the Constitution the people expressly delegated to the Federal Government the exclusive right to protect wild life by treaties with foreign nations, and at the same time withdrew from the States the right without the consent of Congress to make among themselves agreements for such purpose, thus vesting in Congress the ultimate control and protection of same. By thus stripping the States of all power to protect migratory wild life for the greater part of the time, and expressly granting such power to the Federal Government, the people, by necessary implication from these express grants and the nature of the property, changed their trustee and vested the title to all migratory animals feræ naturæ in the Federal Government in trust for themselves, the people of the United States and the common owners of such animals.

By analogous reasoning this court seems to have upheld the constitutionality of a statute enacted for the protection of Indians.

"The power of the General Government over these remnants of a race once powerful, now weak and diminished in numbers, is necessary to their protection as well as to the safety of those among whom they dwell. It must exist in that Government, because it never has existed anywhere else, because the theater of its exercise is within the geographical limits of the United States, because it has never been denied, and because it alone can enforce its laws on all the tribes." (United States *v.* Kagama, 118 U. S., 375, 384–385.)

The principle announced in the Kagama case has been repeatedly upheld, and the above excerpt has been quoted with approval by this court in the following cases: United States *v.* Sandoval (231 U. S., 28, 46), Tiger *v.* Western Investment Co. (221 U. S., 286, 312), Lone Wolf *v.* Hitchcock (187 U. S., 553, 566, 567), Cherokee Nation *v.* Southern Kansas Ry. Co. (135 U. S., 641, 655), United States *v.* Thomas (151 U. S., 577, 586), Stephens *v.* Cherokee Nation (174 U. S., 445, 486).

In this connection see also the opinions in Downes *v.* Bidwell (187 U. S., 244)—especially the concurring opinion, page 287—and Jones *v.* United States (137 U. S., 202).

The total extinction of three species of birds, including the prolific carrier pigeon, which formerly existed in enormous numbers, as well as the appaling decrease in other species, until now only approximately 10 per cent of their previous number exists (Appendix, p. 35), show the impotency of State protection. The following excerpt from a report to the Legislature of Ohio in 1857 shows how incredible to the legislators of that time would have been the prophecy that the last of these "myriads" would die in 1914, caged as a curiosity in a zoological park. Yet such has been the fate of this now extinct bird:

"The passenger pigeon needs no protection. Wonderfully prolific, having the vast forests of the North as its breeding grounds, traveling hundreds of miles in search of food, it is here to-day and elsewhere to-morrow, and no ordinary destruction can lessen them or be missed from the myriads that are yearly produced."

On the other hand, the remarkable increase since the passage of the migratory bird law, reported by the officials of 40 States of the Union, show the efficiency of Federal protection and control. (See Appendix, p. 35.)

The doctrine that the United States own migratory wild game is not contrary to existing authority. In the cases cited to establish the claim that wild game belongs exclusively to the several States, we find that in each either the animals were local to the particular State, as in the cases involving the taking of oysters and sponges, or the question of their migratory character was not raised.

Furthermore, we find that the decisions of this court have expressly left open the question of ownership and regulation of migratory wild life by the Federal Government.

"Again, in Manchester *v.* Massachusetts (139 U. S., 240), in upholding a statute of the State of Massachusetts, regulating the taking of menhaden in Buzzards Bay, the doctrine of the case just cited was expressly reiterated. True, further in that case, probably having in mind the declaration made in the opinion in the McCready case, that fish running within the tidewaters of the several States were subject to State ownership 'so far as they are capable of ownership while so running,' the *question was reserved as to whether or not Congress would have the right to control the menhaden fisheries.* But here also for the reason that the question arising relates only to sponges growing on the soil covered by water *we are not concerned with the subject of running fish and the extent of State and National power over such subject.*" (The Abby Dodge, 223 U. S., 166, 174–175.) (Italics ours.)

From the above quotation, in which all of the pertinent decisions of this court were referred to, it will be seen that the court, in their latest expression on the subject, took pains to say that this question had not been decided and would be left open for future determination.

But even had the courts decided that migratory animals were subject to State jurisdiction, nevertheless such decisions would still not be hostile to the present argument. Until the enactment of this law Congress had not assumed control over the subject, and it was therefore entirely within the police power of the several States to pass laws for the protection of wild game until Congress should act.

* * * "But there is no occasion to consider the power of the United States to regulate or control, either by treaty or legislation, the fisheries in these waters, because there are no existing treaties or acts of Congress which relate to the menhaden fisheries within such a bay. * * * And the subject is one which a State may well be permitted to regulate within its territory, in the absence of any regulation by the United States. * * * If it [the Federal Government] does not assert by affirmative legislation its right or will to assume the control of menhaden fisheries in such bays, the right to control such fisheries must remain with the State which contains such bays. (Manchester *v.* Massachusetts, 139 U. S., 240, 264, 265, 266.)

"Aside from the authority of the State derived from the common ownership of game and the trust for the benefit of its people which the State exercises in relation thereto, there is another view of the power of the State in regard to the property in game which is equally conclusive. The right to preserve game flows from the undoubted existence in the State of a police power to that end, which *may be none* the less efficiently called into play, because by doing so interstate commerce may be remotely and indirectly affected. (Kidd *v.* Pearson, 128 U. S., 1; Hall *v.* De Cuir, 95 U. S., 485; Sherlock *v.* Alling, 93 U. S., 99, 103; Gibbons *v.* Ogden, 9 Wheat., 1.) Indeed, the source of the police power as to game birds (like those covered by the statute here called in question) flows from the duty of the State to preserve for its people a valuable food supply. (Geer *v.* Connecticut, 161 U. S., 519, 534.)

"While the State can not, under cover of exerting its police power, directly regulate or burden interstate commerce, a police regulation which has real relation to the proper protection of the people, and is reasonable in its terms, and does not conflict with any valid act of Congress, is not unconstitutional because it may incidentally affect interstate commerce." (Savage *v.* Jones, 225 U. S., 501, headnote 7.)

In the Geer case the court held that the State has the power to protect wild game subject to its jurisdiction by the exercise of the police power and also by virtue of its common ownership of such game. It is not claimed in this argument, however, that the United States have the right to protect migratory wild birds by the exercise of a general police power independent of the ownership or authority granted by the Constitution, such as was declared, in the Kansas-Colorado case, not to exist in the Federal Government; but it is maintained that the United States have such power by virtue of their ownership of migratory birds as trustee for all the people of the United States. It is a question of ownership of property and not of extending the power to "make all needful rules and regulations respecting the territory" of the United States to embrace "legislative control

over the States." The act merely provides "needful rules and regulations" respecting property of the United States within the territory of the several States, a power daily exercised by the Federal Government.

While there are many features of this case that appeal to the esthetic and one longs to see upheld a law that will conserve for the future the fascinating creatures which charm us with their song and beauty, amaze us by their marvelous skill and wonderful flight, or delight us in the chase, nevertheless, the case is not here because of these features, but because property rights of great economic value are involved, the property in birds which afford annually a food supply valued at millions of dollars (Appendix, p. 36), and which by their policing of the air save our forests, our animals, and our crops.

"It was clearly shown that the economic aspect was twofold. The game birds yield a considerable and an important amount of highly valued food, and if given adequate protection will be a constant valuable asset. The insectivorous migratory birds destroy annually thousands of tons of noxious weed seed and billions of harmful insects. These birds are the deadliest foe yet found of the boll weevil, the gypsy and brown-tailed moths, and other like pests. The yearly value of a meadow lark in a 10-acre field of cotton, corn, or wheat is reckoned by experts at $5. The damage done to growing crops in the United States by insects each year is estimated, by those who have made the matter a special study, at about $800,000,000." (House committee report on migratory bird bill, 49th Cong. Rec., pt. 2, p. 1485.)

Excerpts from official publications of the Department of Agriculture, and treatises of ornithologists of recognized authority, quoted in the appendix (pp. 23–34), show how great is the insect peril and how dependent we are upon the migratory insectivorous birds for protection against it.

Migratory birds, therefore, being property of the United States, Congress, by virtue of the authority granted by the Constitution to "make all needful rules and regulations respecting the territory or other property belonging to the United States," may pass any laws it may deem proper for the protection of same, though such laws may have the quality of police regulations. (Hoke *v.* United States, 227 U. S., 308, 323.)

"All the public lands of the Nation are held in trust for the people of the whole country." (United States *v.* Trinidad Coal Co., 137 U. S., 160.) And it is not for the courts to say how that trust shall be administered. That is for Congress to determine. (Light *v.* United States, 220 U. S., 523, 537.)

The General Government doubtless has a power over its own property analogous to the police power of the several States, and the extent to which it may go in the exercise of such power is measured by the exigencies of the particular case. (Camfield *v.* United States, 167 U. S., 518, 525.)

Mr. McLEAN. The Senator from Missouri has assailed this law, as I have said, at two previous sessions of Congress and his position is decidedly weaker to-day than ever before, because the Supreme Court instead of repudiating the law at once as he prophesied held it under consideration for some months and then ordered it returned to the docket for reargument, the fair presumption being that the court was divided. The law will be argued probably next autumn, but it is doubtful if a decision will be reached before February, and this gives another entire season for the enforcement of the law.

The Senator from Missouri insists that the law is not enforced, and bases his statement upon the paucity of prosecutions and the smallness of the fines. We all know that this is no criterion to go by, law-abiding citizens and respectable sportsmen will recognize and obey a Federal statute.

I know there is in Missouri a very strong association of sportsmen. Sometimes I think the Senator from Missouri is not as hostile to this law as his statements would indicate. I know it is reported that these sportsmen have hounded and vexed the Department of Agriculture, and it is possible that they have annoyed the Senator from Missouri, and he has felt it to be his duty to do what he could to secure a longer open season in his State for these duck butchers. I know that the Secretary of Agriculture extended the season in Missouri from February 1 to the middle of March, which I think was a mistake. I do not think that any waterfowl should be shot after the 1st of March. They mate the latter part of February, the eggs form in March. The Senator from Missouri insists that his State is very careful in its protection of the game. Of course no one who is familiar with the subject will for a minute concede that ducks should be killed as late as the 30th of April, which is the law in Missouri at the present time, I understand.

I want to say most emphatically that the remarks of the Senator from Missouri have demonstrated one thing and, I think, one thing only, and that is that unless the Federal Government protects the migratory useful birds they will be exterminated in a very few years. The Senator from Missouri called our attention to the fact that during the last season guns could be heard like the rolling of a drum, in his State, and I assume from his view of the law those guns were rolling in the close season; that they were in the hands of these men who did not believe the law was constitutional and therefore defied it, and so——

Mr. REED. Mr. President——

Mr. McLEAN. We find that unless we have Federal regulation the jealousies of the sportsmen in the several States, their eagerness to kill everything that is living before it is killed in an adjoining State, will soon result in the extermination of birds unless there is intelligent Federal protection.

Mr. REED. The Senator has seen fit to criticize the Missouri game law. I should like to ask the Senator if he ever hunted in Missouri?

Mr. McLEAN. No; I have not.

Mr. REED. Did you ever hunt in that general neighborhood?

Mr. McLEAN. No; I have not hunted in Missouri.

Mr. REED. Do you know anything about the seasons out there except what you see in the almanac?

Mr. McLEAN. I will say to the Senator from Missouri that I have given great attention to this subject for something like 30 years. I think I have hunted in most of the States of the Union. I have observed the habits of waterfowl very closely. I have belonged to a great many game clubs in my day, but I belong to none of them now, because I realized several years ago that unless the sportsmen assisted in the protection of the game it would very soon be exterminated. I know that in no State of the Union can waterfowl be killed in April without destroying embryo flocks of birds that may return in the fall. I know they are hardly fit to eat in the spring. I know that the only pleasure that these duck butchers get is in seeing a bird fall to the water and bleed to death.

Mr. REED. Mr. President, the Senator has made a statement that he knows certain things to be true of certain States. He has never shot a gun in Missouri; he has never hunted in that neighborhood. He lives up in Connecticut, a very nice little State, where they have an entirely different variety of duck from what we have in our part of the country; they come from a different section of the world. I say to the Senator it is a rare thing to find the ponds, the little lakes, in the State of Missouri open until about the 1st of April, and that when he states these ducks are not good to eat in the month of April he never was more mistaken about anything in his life. He is absolutely talking about a matter relating to the State of Missouri that he is not conversant with, just as I am not conversant with the seasons or the game life of his State except in the most general way. I do know——

Mr. McLEAN. Mr. President, the Senator has discussed this question for more than two hours. I think I will have to decline further interruption.

Mr. REED. I thought the Senator had yielded the floor.

Mr. McLEAN. No; I had not yielded the floor.

Mr. REED. Very well; let me finish my sentence as an act of courtesy. I do know that the ducks that frequent the coast are, generally speaking, of a different variety from those that come into the great interior of the country. What I object to is the Senator from Connecticut undertaking to regulate the business of Missouri. I do not want, on the other hand, to regulate the business of Connecticut.

Mr. McLEAN. I am trying to leave the regulation of the shooting seasons in Missouri to Congress and the Supreme Court. The Senator from Missouri is trying to substitute his opinion for that of Congress and the Supreme Court.

I want to say to the Senator from Missouri that I do know something about the subject, I think, and I want to say to him that the sportsmen in his State are making a fatal mistake in their opposition to this law. They shoot at these birds when they are going south in the autumn; they shoot at them when they are returning to their nesting places in the spring. This means extermination.

If the Senator's friends in Missouri who are so anxious to butcher the few birds that are left will exercise a little patience and assist in the effective protection of the migratory waterfowl, it is my belief and it is the belief of ornithologists of this country who know more about it than I do, that waterfowl will in a few years be cheaper in the markets of the country than beef or poultry. My purpose in trying to save the birds is not in the interest of the millionaire sportsmen in Missouri who have put up this contest against this law in order that they may kill birds at any season of the year. My purpose is, and my hope is, if the law is enforced, that the time will come when the game birds will be within the reach of the humblest families in the country, and not confined solely to the rich man's table.

Mr. REED. Mr. President, the Senator referred to the millionaire sportsmen of Missouri. I want to ask him what he knows about it. There are not enough millionaires in Missouri to kill the ducks that would light on a half-acre pond in one flight if they were all present.

Mr. McLEAN. My information is——

Mr. REED. Your information comes from Hornaday; mine is correct.

Mr. McLEAN. I think my information is very correct.

Mr. President, the Senator from Missouri says this law is inoperative. I think the proof of the pudding is in the eating. I have reports here from nearly all the States in the Union as to

the effect of this law upon the increase of birds. Of course, the Senator knows that the principal purpose of the law is to protect the insectivorous birds. The other day when the item in the Agricultural appropriation bill was before the Senate appropriating money for the purchase of seed the Senator discussed at length the value of a grain of wheat. I think he stated that any new variety of wheat of exceptional productive quality was worth more than all the gold mines in the country. Now, one purpose of this law is to provide a bird that will save that grain of wheat from destruction by insects when it sprouts out of the ground. The estimated loss per annum to agriculture by reason of the ravages of insects is estimated at something like $800,000,000 a year. If the birds will save 10 per cent of that, I think it is good economy to remain loyal to this law.

I do not want to take the time of the Senate to read these reports. They come from all over the Union. Here is one from Kansas relating to water fowl signed by the Federal warden and State fish and game warden:

MIGRATORY WILD FOWL—KANSAS—INCREASE.

The waterfowl were more plentiful than I have seen them in a great many years and everyone had good shooting. If conditions were such each and every year in the future there would be no kick among sportsmen for the spring shooting.

In connection with spring shooting, I can say that general appearances this year would show anyone of a large increase since the migratory-bird law went into effect.

W. C. Tegmeier, Federal warden and State fish and game warden, to bureau, June 2, 1916.

I ask unanimous consent to have these reports put in the RECORD.

Mr. REED. I object.

Mr. McLEAN. They are all very short.

The PRESIDING OFFICER (Mr. THOMPSON in the chair). Is there objection?

Mr. REED. I am going to object to printing them if they are bulky. If they are short I do not object.

Mr. McLEAN. There are not more than a dozen lines in any one of them.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. REED. I should like to ask who collected these reports before consent is given.

Mr. McLEAN. They are largely reports made by the Federal game wardens and State game commissions in the several States.

Mr. REED. To whom?

Mr. McLEAN. To the Secretary of Agriculture.

Mr. REED. Very well, I shall not object.

The PRESIDING OFFICER. Without objection, the reports will be printed in the RECORD.

The matter referred to is as follows:

MIGRATORY WILD FOWL—INDIANA—INCREASE.

"There have been more waterfowl in Indiana this spring than for a number of years past, judging from reports that have come from various sources to this department."

E. C. Shireman, fish and game commissioner, Indianapolis, to bureau, May 29, 1916.

MIGRATORY BIRD LAW—INDIANA—APPROVAL.

"In regard to my opinion as to whether the migratory bird law is a beneficial measure for the protection of our wild fowl, I wish to say that I have always been in favor of Federal control of our migratory birds. I think the reasons for Federal control of our migratory birds are too obvious to call for any proof."

E. C. Shireman, State game and fish commissioner, Indianapolis, to bureau, May 29, 1916.

MIGRATORY BIRD LAW—NEBRASKA—APPROVAL.

"I am very much in favor of the migratory bird law as a beneficial measure for the protection of birds."

Gust Rutenbeck, chief deputy, game and fish commission, to bureau, Lincoln, June 9, 1916.

MIGRATORY WILD FOWL—NEBRASKA—INCREASE.

"We have more waterfowl all over the State, as well as in the city of Lincoln, at the present time than we have ever had to my knowledge. The number of waterfowl in this State at the present time, as compared with the number during the period preceding the enactment of the Federal law is from 50 to 75 per cent greater."

Gust Rutenbeck, chief deputy, game and fish commission, to bureau, June 9, 1916.

MIGRATORY WILD FOWL—OHIO—INCREASE.

"I have no hesitancy in saying that wild waterfowl have increased since the migratory law went into effect, and this is the common opinion. Personally there is no question but what the prohibition of spring shooting is the chief factor in accounting for the increased flight."

John C. Speaks, chief warden, Columbus, to bureau, June 5, 1916.

MIGRATORY BIRD LAW—OHIO—APPROVAL.

"I favor the migratory law as a beneficial measure, but feel some amendments and corrections should be made. * * * However, there is also a considerable number of hunters who feel that spring shooting should be prohibited."

John C. Speaks, chief warden, Columbus, to bureau, June 5, 1916.

MIGRATORY BIRD LAW—CALIFORNIA—PRACTICAL WORKING.

"* * * I will say that I believe the enforcement of these regulations is working wonders for waterfowl in California, especially in the northern district, comprising 22 northern counties of the State."

F. M. Newbert, president fish and game commission, Sacramento, to bureau, June 1, 1916.

MIGRATORY BIRD LAW—CALIFORNIA—APPROVAL.

"I am heartily in favor of any law beneficial to our waterfowl."

F. M. Newbert, president fish and game commission, Sacramento, to bureau, June 1, 1916.

MIGRATORY WILD FOWL—CALIFORNIA—INCREASE.

"Breeding and nesting ducks show a large increase over previous years before the Federal and State laws became effective."

F. M. Newbert, president fish and game commission, Sacramento, to bureau, June 1, 1916.

MIGRATORY BIRD LAW—DELAWARE—APPROVAL.

"I have been a most earnest advocate of Federal protection for migratory birds ever since the subject first began to receive consideration, and naturally am deeply solicitous about the decision of the Supreme Court of the United States of its constitutionality." "This law has undoubtedly done much to protect and preserve our migratory birds, especially in the matter of abolishing spring shooting, and would do much more for Delaware than it already has were it not flagrantly violated by numerous shortsighted and irresponsible offenders."

Hon. Edw. G. Bradford, jr., president board of game and fish commissioners, Wilmington, Del., May 29, 1916.

MIGRATORY BIRD LAW—WEST VIRGINIA—APPROVAL.

"According to my own observation there has been a noticeable increase of the migratory waterfowl throughout the State of West Virginia, and I am of the opinion that this has been brought about largely by the abolition of spring shooting and the enforcement of the migratory bird law. It is a matter of comment throughout the whole State of West Virginia that birds of all kinds are increasing at a very rapid rate, and I am of the opinion that we have two or three times as many birds in West Virginia as we had three or four years ago. I am heartily in favor of the provisions of the migratory bird law and believe that it is doing much good throughout the State of West Virginia."

J. A. Viquesney, State forest, game, and fish warden, Belington, W. Va., May 31, 1916.

MIGRATORY BIRD LAW—PENNSYLVANIA—APPROVAL.

"I approve the prohibition of spring shooting everywhere in the United States, and I believe that in time good results will appear from such prohibition."

Charles B. Penrose, president board of game commissioners, Philadelphia, to bureau, June 1, 1916.

MIGRATORY BIRD LAW—PRACTICAL WORKING—MONTANA.

"I am pleased to report that we feel that the migratory bird law has been a success. It is beneficial in that it cuts out much spring shooting, giving us a much better local hatch of ducks, and in a general way we feel that the migratory bird law is the correct system under which migratory birds may be cared for."

J. L. De Hart, warden, Helena, to bureau, May 31, 1916.

MIGRATORY WILD FOWL—CONNECTICUT—INCREASE.

"It is certainly an unquestioned fact, one that can not be disputed, that since the enactment of this law there is an increase in the migratory birds, especially in ducks, and I attribute the result obtained to the sunrise and sunset law as well as the spring shooting. The black ducks have shown a very decided increase and are nesting along our shores in previously unheard-of numbers, and if this law continues in force for a few years Connecticut will undergo a very radical change for the better."

John M. Crampton, superintendent, State board of fisheries and game, Hartford, to bureau, June 5, 1916.

PRACTICAL WORKING OF MIGRATORY BIRD LAW—WYOMING.

"Although the State of Wyoming can not be compared with many other States with respect to having proper conditions necessary for the breeding waterfowl, yet we are well pleased with the migratory bird law as passed by the Federal Government and believe it very essential if we are to preserve and increase our present supply."

Nate P. Wilson, State game warden, to bureau, June 5, 1916.

MIGRATORY BIRD LAW—SOUTH CAROLINA—APPROVAL.

"The abolition of spring shooting has beyond doubt increased the number of birds, though I am frank to say that the Government laws have not been strictly enforced or obeyed. I am heartily in favor of the migratory bird law, knowing that this law is a beneficial measure for the protection of our disappearing wild fowl."

A. A. Richardson, chief game warden, 1308 Palmetto Bank Building, Columbia, S. C., May 29, 1916.

MIGRATORY BIRD LAW—TENNESSEE—PRACTICAL WORKING.

"You are advised that, in my opinion, a proper enforcement of the law would be very beneficial to all the States."

W. D. Howser, State warden, Nashville, to bureau, May 29, 1916.

MIGRATORY BIRD LAW—NEW JERSEY—APPROVAL.

"All of our wardens from the waterfowl sections tell us in strong terms of a great increase in birds, and that there are thousands of birds now where they have not been for years. This is, without question, due to the protection afforded the birds by the Federal migratory bird law, and the increase began after the first year's enactment of the law. The factor which has contributed most to the multiplication of the waterfowl is undoubtedly the abolition of spring shooting, and I do not appear to have words enough to express my feelings in regard to the benefit of the law as a beneficial measure for the protection of our wild fowl, which had been rapidly disappearing.

"The good effects of the law in producing a greater supply of birds has been so manifest that our board deemed it not necessary to go into detail as to data on the increase."

Also gives some statements as to birds nesting in greater numbers and places where they had not done so for years.

Ernest Napier, president fish and game commissioners, Trenton, N. J., May 31, 1916.

—

MIGRATORY WILD FOWL—NORTH DAKOTA.

"We figure that the waterfowl, and, in fact, all the migratory birds, have increased about 50 per cent in the past few years.

"Waterfowl has increased wonderfully during the period of the enactment of the Federal law. The abolition of spring shooting has increased the number of waterfowl, and we find them nesting and making their habitat in almost any location desirable at the present time, and attribute this to the abolition of spring shooting. They do not seem to fear mankind and one can approach them almost anywhere."

J. T. Purcell, secretary game and fish board, Fargo, to bureau, June 2, 1916.

—

MAGRATORY BIRD LAW—NORTH DAKOTA—PRACTICAL WORKING.

"* * * Will say that my experience has been that the migratory bird law has certainly improved conditions in this State. We find that a larger majority of migratory birds stop over in our State since they are not molested during the hatching period, consequently have a greater number at all times."

J. T. Purcell, secretary game and fish board, Fargo, to bureau, June 2, 1916.

—

MIGRATORY WILD FOWL—MAINE—INCREASE.

"In my opinion the prohibition of spring shooting has tended to materially increase the number of birds in this State."

Harry B. Austin, Augusta, commissioner, to bureau, June 8, 1916.

—

MIGRATORY BIRD LAW—MAINE—PRACTICAL WORKING.

"I would say that the Federal regulations on migratory birds have been generally satisfactory in this State. While local criticism of some features has been offered, on the whole the people of this State generally feel that there is no doubt but what the supply of waterfowl has materially increased during the past two seasons."

Harry B. Austin, Augusta, to bureau June 8, 1916. Commissioner of inland fisheries and game.

—

MIGRATORY WILD FOWL—TEXAS—INCREASE.

"From my observation I feel safe in saying that since these laws have been in effect the waterfowls have increased to a great extent, and it is my opinion that our best citizens are also in favor of this law."

Will W. Wood, game and oyster commissioner, Austin, to bureau June 2, 1916.

—

MIGRATORY BIRD LAW—TEXAS—PRACTICAL WORKING.

"I take pleasure in saying that, in my opinion, the migratory bird law is a benefit in protecting and preserving the wild fowls which inhabit our State at different seasons of the year."

Will W. Wood, game fish and oyster commissioner, Austin, to bureau June 2, 1916.

—

MIGRATORY BIRD LAW—MONTANA—APPROVAL.

"I am decidedly in favor of the migratory bird law as a beneficial measure for the protection of our disappearing wild fowl. The word 'disappearing' as applied to ducks in this State is incorrect since the Federal migratory bird law has been in force. The birds are really increasing in number."

E. P. Mathewson, chairman game and fish commission, Anaconda, to bureau June 1, 1916.

—

MIGRATORY WILD FOWL—MONTANA—INCREASE.

"Since the migratory bird law has been in effect there is a wonderful increase in the number of ducks hatching in this State and in the number in the fall flight from the North.

"* * * The abolition of spring shooting has tended wonderfully to increase the number of birds."

E. P. Mathewson, chairman Montana Game and Fish Commission, to bureau June 1, 1916.

—

MIGRATORY WILD FOWL—WISCONSIN—INCREASE.

"We do know, however, that reports from all over the State where waterfowl congregate during the spring of the year show that during the spring of the present year more waterfowl, particularly ducks and geese, were seen than in many years during the past. Here at Madison more ducks were found in our surrounding lakes during the month of March than have been seen for the past 10 or 15 years."

R. S. Scheibel, secretary conservation commission, Madison, to bureau, May 29, 1916.

—

MIGRATORY BIRD LAW—PRACTICAL WORKING—WISCONSIN.

"We beg to advise you that in our opinion the practical working of the migratory bird law and the regulations thereunder are working out to the best possible advantage in the State of Wisconsin."

R. S. Scheibel, secretary State conservation commission, Madison, to bureau, May 29, 1916.

—

MIGRATORY BIRD LAW—KENTUCKY—APPROVAL.

"The Kentucky commission is in favor of the migratory bird law for the conservation of our decreasing wild fowl, but it will be impossible to enforce this law or to secure the support and cooperation of the representative sportsmen of Kentucky until this matter is passed upon by the Supreme Court o the United States."

J. Quincy Ward, executive agent game and fish commission, Frankfort, to bureau, May 31, 1916.

—

MIGRATORY WILD FOWL—KENTUCKY—INCREASE.

"As to increase of birds due to the abolition of spring shooting, will say that there is evidently an increase, which would be greater if the law was enforced. Under present conditions migratory game birds are now only protected where there is a strong sentiment for the game laws, which is usually in territory adjacent to larger cities."

J. Quincy Ward, executive agent game and fish commission, Frankfort, to bureau, May 31, 1916.

—

MIGRATORY BIRD LAW—PRACTICAL WORKING—ARIZONA.

"I will say without reservation that the migratory bird law is surely bringing the desired results, considering the slight degree to which it has been enforced. When its constitutionality is no longer questioned, when the various States have made their laws to conform to it, and when there is provision made for its better enforcement there can be no question but what the beneficial results will be more noticeable."

G. M. Willard, State game warden, Phoenix, to bureau, May 31, 1916.

—

MIGRATORY WILD FOWL, ARIZONA—INCREASE.

"* * * I have heard many comments of hunters that clearly indicate that the influx of waterfowl was much greater last fall and winter than for several years past, and we can attribute such conditions only to the effects of the migratory bird law."

G. M. Willard, State game warden, Phoenix, to bureau, May 31, 1916.

—

MIGRATORY BIRD LAW, GEORGIA—APPROVAL.

"Since entering upon the duties of this office I have just as heartily as were possible cooperated with the Federal wardens in this State, and directed all of my appointees to give to the migratory birds, whether game or not, the best possible protection. The result has been very satisfactory, and I am pleased to report that there is a very strong and rapidly growing sentiment in this State favorable to the protection of migratory birds, and I predict as time passes there will be not only no conflict between this department and your department but most hearty and sympathetic cooperation.

"I am entirely in sympathy with the efforts made by the Federal Government to protect the migratory birds, and do not underestimate the worth of their efforts to my own State and, of course, to other States."

Chas. S. Arnow, game and fish commissioner, Atlanta, May 30, 1916.

—

MIGRATORY WILD FOWL, GEORGIA—INCREASE.

"The abolition of spring shooting has tended to greatly increase the number of birds, and if these regulations are generally enforced on the entire coast there is no question but that the result will be a great and rapid increase in such birds."

Chas. S. Arnow, game and fish commissioner, Atlanta, May 30, 1916.

—

MIGRATORY BIRD LAW, RHODE ISLAND—PRACTICAL WORKING.

"I am glad to say that in my opinion, and in that of almost everyone I talk with (and I take pains to get the views of others), the law is a most salutary one and in this State is working well. * * * To just what extent the abolition of spring shooting has increased the number of birds, I could not say, but that it has done so there can be no question."

George G. Phillips, commissioner of birds, Greene, R. I., June 17, 1916.

—

MIGRATORY BIRD LAW, RHODE ISLAND—APPROVAL.

"Of all the measures for the protection and increase of birds, I believe the abolition of spring shooting the most important. I am most emphatically in favor of the migratory bird law. It did not come soon enough, and needs to be strengthened in some directions rather than weakened."

George G. Phillips, commissioner of birds, Greene, R. I., June 17, 1916.

—

MIGRATORY BIRD LAW—UTAH—APPROVAL.

"I am heartily in favor of the migratory bird law. It is a very beneficial measure and should have the full support of every State in the Union. It not only protects the waterfowl but the migratory song and insectivorous birds. No commissioner or set of sportsmen in any State should do other than uphold and sustain it."

Fred W. Chambers, Salt Lake City, commission of fish and game, to bureau, June, 1916.

—

MIGRATORY WILD FOWL—UTAH—INCREASE.

"In making my trips through the marshes this season I have noticed a splendid increase in every section of the State, due especially to the enforcing of the State law as well as the Federal law by the wardens. The abolishing the spring shooting is an excellent thing and tends to increase the birds everywhere."

F. W. Chambers, State game commissioner, Salt Lake City, to bureau, June, 1916.

—

MIGRATORY WILD FOWL—ARKANSAS—INCREASE.

"However, apparently this spring there were more ducks of different kinds in this part of the country and they appeared to stay longer than usual, but whether or not this apparent increase in number is attributable to the fact that they were not disturbed and came out more in the open and remained longer or whether there were greater numbers was not fully demonstrated.

"The abolition of the spring shooting undoubtedly has a tendency to increase the number of birds to some extent, but I am of the opinion that the bag limit provided for by the Arkansas law, and the prohibition of allowing hunters to sell birds will have a greater tendency to decrease the kill than anything else if properly enforced."

D. G. Beauchamp, chairman, game and fish commission, Paragould, to bureau, May 29, 1916.

—

MIGRATORY BIRD LAW—ARKANSAS—APPROVAL.

"I am most assuredly heartily in favor of the migratory bird law as a beneficial measure for the protection of the migratory fowls, and would very much dislike to see it abandoned, but would like to see the law passed on at an early date by the Supreme Court and declared constitutional and strictly enforced with such minor modifications as might be necessary to meet the approval of the sportsmen and also conserve the birds.

"I hold myself ready at all times to cooperate with your department."
D. G. Beauchamp, chairman, fish and game commission, Paragould, to bureau, May 29, 1916.

MIGRATORY BIRD LAW—VIRGINIA—APPROVAL.

"We feel that the regulations of the migratory bird law has worked to the great benefit of this State and should remain just as it is with possibly some slight changes as to the open hunting periods. * * *
"I am of the opinion if the migratory bird law were abolished that many species of our migratory birds would soon be wiped out by the hunters, whose numbers are continually increasing."
M. D. Hart, Richmond, to bureau, May 30, 1916.

MIGRATORY BIRD LAW—LOUISIANA—APPROVAL.

"I am pleased to say that the members of our commission who have made a study of the waterfowl here in Louisiana are to a unit in agreeing that the assistance this law gives the State authorities in bringing about an observance of our law is more than satisfactory. * * *
"This commission is decidedly in favor of the migratory bird law, and I believe that all of the right-thinking sportsmen and market gunners believe as we do. * * *
"We do believe that in a few more seasons that there will be even more evidence, based on actual conditions, to prove that the Federal migratory bird law is a most beneficial measure for our game and other birds."
M. L. Alexander, president Conservation Commission of Louisiana, New Orleans, La., May 31, 1916.

MIGRATORY BIRD LAW—MICHIGAN—APPROVAL.

"This department is thoroughly in accord with the provisions of the migratory bird law and regulations thereunder promulgated by the Federal department. We trust this law will be held constitutional, as it has had a good effect in this State in protecting migratory birds, as well as waterfowl. There is a noticeable increase in both of these different species in this State, and we are sure that the restraining hand of the Government under this provision will continue to be more beneficial each year in preserving the wild life protected by the same."
W. R. Oates, commissioner game, fish, and forest-fire department, Lansing, Mich., June 1, 1916.

MIGRATORY BIRD LAW—OKLAHOMA—APPROVAL.

"I am certainly in favor of the migratory bird law, but I don't think our season here for spring shooting is sufficient."
John Chenowith, State fish and game warden, Oklahoma City, to Bureau, May 30, 1916.

MIGRATORY BIRD LAW—MARYLAND—INCREASE.

"The general opinion is that there were more wild fowl in Maryland waters last year than for some time, and this is to be accounted for, in my judgment, in two ways—increased protection and the abolition of spring shooting."
James P. Curley, State game warden, Baltimore, to Bureau, May 31, 1916.

MIGRATORY WILD FOWL—VIRGINIA—INCREASE.

"The supply of waterfowl and the song and insectivorous birds from all the responsible information I can gather shows a very satisfactory increase.
"The stopping of spring shooting thus shortening the open hunting seasons at the height of the migration is undoubtedly a potent factor in the increase."
M. D. Hart, Richmond, to Bureau May 30, 1916.

MIGRATORY BIRD LAW: PRACTICAL WORKING—MARYLAND.

"So far as my observation goes, and from such information as I have been able to obtain, the Federal law has worked well and is a great factor in protecting our migratory birds."
James P. Curley, State game warden, Baltimore, to bureau, May 31, 1916.

MIGRATORY BIRD LAW: PRACTICAL WORKING—WASHINGTON.

"* * * The fact that we have changed our State law to conform to the Federal law is the best answer as to whether or not we consider the Federal migratory bird law a beneficial measure."
L. H. Darwin, State game warden, Seattle, to bureau, June 2, 1916.

MIGRATORY WILD FOWL: INCREASE—VERMONT.

"I feel that there is a noticeable increase in both the waterfowl and song and insectivorous birds, and when I say 'waterfowl' I am not able to comment much upon anything except the wild ducks, which were very abundant last season and which are very abundant this spring. I have always attributed the increase—and I think the sportsmen do—to the protection afforded by the migratory bird law, which means also the abolition of spring shooting, and as a result the wild ducks were more abundant last fall. I see no other reason for it than the protection afforded by the migratory bird law."
J. W. Titcomb, commissioner fisheries and game, Lyndonville, to bureau, June 7, 1916.

MIGRATORY BIRD LAW: PRACTICAL WORKING—NORTH CAROLINA.

"I think, however, that the law has been generally beneficial, especially that part of it which prohibits spring shooting."
Dr. R. H. Lewis, president Audubon Society of North Carolina, letter to bureau, June 7, 1916.

MIGRATORY BIRD LAW: APPROVAL—NORTH CAROLINA.

"On the whole it is my opinion that migratory bird law is a beneficial measure and should be continued."
R. L. Harris, president Audubon Society of North Carolina, to bureau, June 1, 1916.

MIGRATORY BIRD LAW—ALABAMA—APPROVAL.

"By reason of the fact that birds know no State lines and by reason of the further fact that the State statutes for the protection of birds of the migratory variety vary so widely, scarcely a semblance of protection of these migrants can be had unless a migratory-bird law remains upon the statute books and is vigorously enforced. To repeal it or to modify it to any appreciable extent would be a distinct backward step and likewise an invitation for the wholesale destruction and slaughter of the migratory wild life of the continent."
John H. Wallace, jr., commissioner department of game and fish, Montgomery, Ala., May 29, 1916:
"I am confident that the abolition of spring shooting has been a controlling factor in increasing the numbers of these birds."

MIGRATORY BIRD LAW—COLORADO—APPROVAL.

"Personally I am heartily in favor of the closing of all spring shooting; but, unfortunately, the sportsmen and the legislature of this State do not agree with me."
W. B. Fraser, game and fish commissioner, Denver, to bureau, June 5, 1916.

Mr. McLEAN. I also submit the following:

THE ATCHISON GLOBE,
Atchison, Kans., June 12, 1916.

Dr. W. T. HORNADAY,
Director Zoological Gardens, New York City, N. Y.

DEAR SIR: As a sportsman and as an ardent duck shooter who has followed the game consistently for the last 15 years, I wish to register this protest against the proposal to extend the open season in the spring later than March 10. The advisory board has been extremely liberal to the Middle West shooters, and their fight against the appropriation for the enforcement of the law is not indorsed by a majority of the sportsmen in this part of the country.
We read in the St. Louis Globe Democrat that Missouri has a good law and that it protects the game. I live across the river from Missouri. For 15 years I have hunted nearly every fall and nearly every spring, and I have yet to see a Missouri game warden.
Wild ducks are sold openly in the Kansas City and St. Joe hotels. Young ducks and old ducks are slaughtered all summer long on the Missouri lakes; and if there ever was a joke, it is the system of game protection as practiced from Kansas City to St. Joe in the lakes along the river bottom.
If the United States Senate does not allow that meager appropriation for the enforcement of the Federal law, I am satisfied that in a very few years our waterfowl will be practically exterminated and our song birds will be greatly lessened in numbers.
Those who desire to shoot all during March insist the birds do not mate early in the spring. This is not true. I have personally observed wild mallards in the act of mating in the first week in February.
W. F. Bancroft, of the Biological Survey, was a visitor in Atchison on March 14 of this spring. He accompanied me on a trip to several of the Missouri lakes in this vicinity, and I showed that 80 per cent of the wild ducks on those lakes were mated and paired off.
We saw all species of ducks common to this section, from the bluewing teal to redheads and mallards, and 80 per cent, putting it conservatively, were mated.
I write this letter to let you know that conditions in the Middle West have been grossly misrepresented by selfish shooters, and that a great wrong will be done if the United States Government is not permitted to protect our rapidly vanishing waterfowl. We have good shooting here, both in the fall and in February and the first week in March. A later season than this is unthinkable.
Sincerely, yours,

EUGENE A. HOWE,
Editor Atchison Globe.

Mr. President, there is another reason why I think this appropriation should be made. It seems to me that it is a controlling reason. The Senate will remember that more than two years ago a resolution was adopted requesting the President of the United States to negotiate treaties with foreign countries for the protection of migratory birds. I am happy to state to the Senate that a treaty with Great Britain, after many delays, has been approved, and I expect it will be in the Senate very soon. Our request to Great Britain to approve this treaty was based upon our good faith in the enforcement of this law, and it seems to me to be incredible that the Senate having originated the request will at this time make a "mere piece of paper" of the very statute upon which the treaty is based. Of course, I do not know what the terms of the treaty are, but it is fair to assume that the United States agrees to enforce the regulations of this law in substance, and Great Britain on her part agrees to enforce similiar and suitable regulations in the Dominion of Canada.

It seems to me that it is folly to go into the discussion of the constitutionality of this law at this time. While I think it is constitutional, while I believe it will be held constitutional, yet it seems to me that in any view of the case we are in good faith bound to support this law until the Supreme Court renders its decision because of our negotiations with Great Britain. If the treaty is ratified the courts will unquestionably have power to enforce its provisions and Congress will have power to enact any supplementary legislation that may be necessary.

Mr. REED. Does the Senator hold that a treaty can abdicate the Constitution of the United States?

Mr. McLEAN. The treaty will not abdicate the Constitution. I do not think it is worth while to enter into a discussion of the treaty at this time. I know that former Senators Root and Heyburn before they left the Senate had no question about the authority of Congress to enforce the provisions of a treaty with Great Britain protecting migratory birds.

Mr. REED. If that were true, all that we would need to do to annul the Constitution of the United States, adopted by the respective States and the people thereof, would be for the President and one branch of Congress, to wit, the Senate, to negotiate a treaty with a foreign Government.

Mr. McLEAN. That is the view of the Senator from Missouri. Eleven foreign States now protect their migratory birds by treaty. We have in the past entered into treaties with Great Britain for the control of fisheries. The cases in the United States Reports, of Ware against Hylton, Third Dallas, down to the present time, make it very clear, I think, that the courts and Congress will have the power to enforce the provisions of this treaty if it is ratified, as I sincerely hope it will be.

The PRESIDING OFFICER. The question is on the motion of the Senator from Missouri to strike out the language from the bill which will be read.

The SECRETARY. On page 58 it is proposed to strike out lines 3 to 10, inclusive, in the following words:

For all necessary expenses for enforcing the provisions of the act approved March 4, 1913 (37 Stat. L., pp. 847, 848), relating to the protection of migratory game and insectivorous birds, and for cooperation with local authorities in the protection of migratory birds, and for necessary investigations connected therewith, $50,000.

Mr. GALLINGER. There are Senators absent who desire to be present when the question is voted upon, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hardwick	McLean	Smith, Ga.
Bankhead	Hitchcock	Martin, Va.	Smith, S. C.
Borah	Hollis	Martine, N. J.	Smoot
Brady	Hughes	Nelson	Sterling
Brandegee	Husting	Norris	Swanson
Bryan	James	O'Gorman	Thomas
Chamberlain	Johnson, Me.	Oliver	Thompson
Chilton	Johnson, S. Dak.	Overman	Tillman
Clapp	Jones	Poindexter	Townsend
Clark, Wyo.	Kenyon	Pomerene	Underwood
Cummins	Kern	Ransdell	Vardaman
Curtis	La Follette	Reed	Wadsworth
du Pont	Lane	Shafroth	Warren
Fletcher	Lewis	Sheppard	Weeks
Gallinger	Lippitt	Sherman	Williams
Gronna	Lodge	Simmons	
Harding	McCumber	Smith, Ariz.	

Mr. KERN. I desire to announce the unavoidable absence of my colleague [Mr. TAGGART]. He is paired with the Senator from Vermont [Mr. PAGE]. This announcement will stand for the day.

Mr. TOWNSEND. I desire to announce the absence of my colleague [Mr. SMITH of Michigan]. He is paired with the junior Senator from Missouri [Mr. REED]. This announcement may stand for the day.

The VICE PRESIDENT. Sixty-six Senators have answered to the roll call. There is a quorum present. The question is on the amendment of the Senator from Missouri to strike out lines 3 to 10, inclusive, on page 58.

Mr. McLEAN. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CATRON (when his name was called). I am paired with the Senator from Oklahoma [Mr. OWEN] and during his absence I withhold my vote.

Mr. CHILTON (when his name was called). I announce my pair with the Senator from New Mexico [Mr. FALL] and withhold my vote.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE], who is not at present in the Chamber. I therefore withhold my vote.

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "nay."

Mr. WALSH (when his name was called). I inquire whether or not the Senator from Rhode Island [Mr. LIPPITT] has voted?

The VICE PRESIDENT. He has not voted.

Mr. WALSH. I have a pair with that Senator, which I transfer to the Senator from Oklahoma [Mr. GORE] and vote "yea."

Mr. WILLIAMS (when his name was called). I have a standing pair with the senior Senator from Pennsylvania [Mr. PENROSE], but I understand that if he were present he would vote "nay" on the pending proposition. Intending to myself vote "nay" thereon, I consider myself released from the pair on this particular amendment. I vote "nay."

The roll call was concluded.

Mr. LIPPITT. The Senator from Montana [Mr. WALSH], with whom I am paired, being present, I vote "nay."

Mr. GRONNA (after having voted in the negative). I ask if the senior Senator from Maine [Mr. JOHNSON] has voted?

The VICE PRESIDENT. He has not.

Mr. GRONNA. I transfer my pair with that Senator to the Senator from California [Mr. WORKS] and will let my vote stand.

Mr. CURTIS. Mr. President, I am requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Maryland [Mr. SMITH];

The Senator from Vermont [Mr. PAGE] with the Senator from Indiana [Mr. TAGGART]; and

The Senator from Utah [Mr. SUTHERLAND] with the Senator from Arkansas [Mr. CLARKE].

The result was announced—yeas 8, nays 52, as follows:

YEAS—8.

Borah	Hardwick	Overman	Thomas
Bryan	James	Reed	Walsh

NAYS—52.

Ashurst	Harding	Martine, N. J.	Smith, Ga.
Bankhead	Hitchcock	Nelson	Smith, S. C.
Beckham	Hollis	Norris	Sterling
Brady	Hughes	O'Gorman	Swanson
Brandegee	Husting	Oliver	Thompson
Chamberlain	Jones	Poindexter	Tillman
Clapp	Kenyon	Pomerene	Townsend
Cummins	La Follette	Ransdell	Underwood
Curtis	Lane	Shafroth	Vardaman
du Pont	Lippitt	Sheppard	Wadsworth
Fletcher	Lodge	Sherman	Warren
Gallinger	McCumber	Simmons	Weeks
Gronna	McLean	Smith, Ariz.	Williams

NOT VOTING—35.

Broussard	Goff	Myers	Shields
Catron	Gore	Newlands	Smith, Md.
Chilton	Johnson, Me.	Owen	Smith, Mich.
Clark, Wyo.	Johnson, S. Dak.	Page	Smoot
Clarke, Ark.	Kern	Penrose	Stone
Colt	Lea, Tenn.	Phelan	Sutherland
Culberson	Lee, Md.	Pittman	Taggart
Dillingham	Lewis	Robinson	Works
Fall	Martin, Va.	Saulsbury	

So Mr. REED's amendment was rejected.

Mr. THOMPSON. Mr. President, in connection with the amendment just voted on, I desire to have inserted in the RECORD a letter from the former fish and game warden of Kansas, Prof. L. L. Dyche, now deceased.

Prof. Dyche was one of the greatest zoologists and naturalists this country has ever produced. He was professor of zoology and curator of birds and mammals of the Kansas University for 20 years. He made 23 scientific expeditions and hunted all over North America, including Greenland and the Arctic regions, resulting in securing for the University of Kansas the largest and finest collection of large North American mammals in the world. He was State game and fish warden of Kansas from 1909 until his death about a year ago. In that capacity, as one of his last official acts, he wrote me this letter concerning the value of the migratory-bird law.

The VICE PRESIDENT. Without objection, permission to do so will be granted.

The letter referred to is as follows:

STATE OF KANSAS,
FISH AND GAME DEPARTMENT,
ON THE KANSAS FISH CAR ANGLER NO. 1,
Oberlin, Kans., April 22, 1914.

W. H. THOMPSON,
Senate Chamber, Washington, D. C.

MY DEAR SENATOR: I am aware that the appropriations for enforcing the Federal migratory-bird law are in danger of being cut off. I do hope that you can see your way clear to give your hearty support to a decent bill making appropriations for the enforcement of this law. The great mass of Kansas people, practically all the farmers, are in favor of it. The law has been generally respected in our State, for we are a law-abiding people. In some localities there have been some violations by thoughtless or ignorant persons. The law is a good one and if enforced will save from extermination many valuable birds and make water fowls more plentiful in a very few years. Nothing but a Federal law can protect the migratory birds with fairness to all the people of the various States. Kansas wants to be fair and be treated fairly in this matter. All the real sportsmen that I have met, and I have been pretty well over the State this spring, seem to favor the Federal law and think it is a good thing. Some false reports have been circulated about the law, which did some damage and caused some violations. Very few people take exceptions to the law when they understand it. I favor the law because I believe that it is a good one. Song and insect-eating birds should not be killed at any time. Game birds have been reduced in numbers until many species that were common a few years ago are rare now. They should not be killed in the springtime when they are mating and going to their breeding grounds. Better protect them in the spring and kill them in the fall when they are young and good to eat.

Very sincerely, yours,

L. L. DYCHE,
State Fish and Game Warden.

Mr. JOHNSON of South Dakota. Mr. President, if I am in order, I desire to call up an amendment to the pending bill which I offered last week, and I now ask for action upon it.

The VICE PRESIDENT. The amendment proposed by the Senator from South Dakota will be stated.

The SECRETARY. On page 104, at the end of section 4, it is proposed to insert the following:

Provided, That any corn or grains of any kind that is sold and graded at the home market under this act for interstate shipment may be regraded at any intermediate or terminal point, and if the grade there given shall be higher than the grade given at the local home market, the seller shall have the benefit of the higher grades given and shall receive the amount of additional price he should have received had his grain been given the correct grade at his home market, and said difference in price shall be paid him upon demand by the purchaser of his grain after it shall be determined by the grade established at the intermediate or terminal point that he was entitled to a higher grade than that given him at his home market.

Mr. GALLINGER. Mr. President, may I ask the Senator from South Dakota a question?

Mr. JOHNSON of South Dakota. Certainly.

Mr. GALLINGER. The Senator's amendment provides that grain may be graded at an intermediate point, and if the grading is higher than at the initial point the highest grade shall govern. I ask the Senator what will happen if the grain is graded at a lower figure at the intermediate point? What then?

Mr. JOHNSON of South Dakota. Mr. President, that would be a question for the one who bought the grain at a certain grade to determine. If the grain was graded at a lower grade at the terminal, the producer who shipped it would have to abide by it.

Mr. President, I had intended to discuss this question at some length, for I believe it of the greatest importance to the grain grower, but I shall not do so and shall now only take a short time on the subject.

I am very deeply interested in the bill reported from the Committee on Agriculture and Forestry, of which this subject forms a part. I have the honor to be a member of that committee, and these matters were discussed in the committee.

Mr. SMITH of South Carolina. Mr. President, if the Senator from South Dakota will allow me merely to make a suggestion in a few words as to what seems to be the difficulty in the settlement of this matter, I desire to state that we had this same difficulty in reference to the grading of cotton. I should like to have the Senator from South Dakota and the Senator from North Dakota both see if this is not really a solution of the question which we are now striving to settle, namely, to have the Government establish standard grades for grain, create a court of appeal to determine in case of dispute whether or not the grain is of a certain standard, furnish the different States with a set of the standard samples in as many places as grain is assembled for shipment, and allow the several States to determine in what manner they shall proceed in putting into effect the standard grades. It is like fixing a standard of 36 inches as a yard. We do not prescribe in a particular case what a yard shall be; but whenever you sell anything for a yard, it must be 36 inches in length. The State determines the procedure. So, in case the buyer or the seller is dissatisfied with the grading he can take his sample and submit it to the proper Federal authority, and whatever they determine it to be under the standard, let that be settled as the price of the standard grain so determined at the date of the sale.

I wish to say to the Senator that we have also what is known as the fertilizer-inspection law in my State. Manufacturers of fertilizer under that law manufacture fertilizer and send it out after having marked on the bag or the container the contents of the chemicals which enter into it. Each manufacturer sends out his fertilizer as he sees fit and prints on the bag its contents. If I, a buyer of that fertilizer, have reason to believe that it does not come up to the standard, I go and, in the presence of a notary public, or other duly qualified officer, make complaint, He takes out a sufficient amount to determine its chemical analysis, and sends it to Clemson College for a decision of the question; and at the college the value is determined.

It seems to me, as to the settlement of this seemingly vexed question, it would be sufficient for the buyer and the seller to agree upon the Government fixing a standard or standards for grain, and then allowing each State to put that standard into effect as it saw fit. Then, upon dissatisfaction either upon the part of the buyer or the seller, a sample of the grain in dispute should be taken and sent to the proper authorities in order to have the question decided and the settlement made according to that sample. It seems to me that would be the simplest possible way of solving this seemingly very vexed question. If the Senator from South Dakota [Mr. JOHNSON] will allow me, I should like to ask the Senator from North Dakota if that proposition does not meet his approval?

Mr. GRONNA. Mr. President——

The VICE PRESIDENT. Does the Senator from South Dakota yield to the junior Senator from North Dakota?

Mr. JOHNSON of South Dakota. Yes.

Mr. GRONNA. I will say that, so far as I am personally concerned, I should be very well pleased with the suggestion made by the Senator from South Carolina [Mr. SMITH]; and I can assure him that I shall have no objection to any bill that will permit the Federal Government to standardize grain and which will then permit people to transact business in their own way, ultimately allowing an appeal to the Secretary of Agriculture. I certainly shall have no objection to that proposition; in fact, that is what I have been trying to do; to amend the bill which was reported from the Committee on Agriculture and Forestry, so as to make it conform to the idea suggested by the Senator from South Carolina.

Mr. SMITH of South Carolina. Mr. President, if the Senator from South Dakota will allow me further, I desire to state to the senior Senator from North Dakota [Mr. MCCUMBER] that in our State, under the State-inspection act for fertilizer, it does in miniature just what this proposition would do in reference to grain from a Government standpoint. It works most admirably, and there are no hardships connected with its operation, because there is an impartial court to determine disputed questions. No matter where grain might originate in the United States, so long as it is kept in its integrity and separately from other grain—no matter where such grain may be found, if its identity is established and either the buyer or the seller is dissatisfied with the grading, he could submit a sample of the grain to the proper authority; and, upon a decision of such authority, the price of the grain would be fixed according to the sample on the day on which the transaction took place.

Mr. SHAFROTH. Mr. President, if the Senator from South Dakota will yield to me, I desire to state that there is a provision in this bill which, it seems to me, covers the situation exactly. It is part of section 4, and reads as follows:

That there is hereby established in the Department of Agriculture a board of grain appeals. Such board shall consist of five members, to be appointed by the Secretary of Agriculture. The salaries of the members of this board shall be —— per annum.

The amount is not fixed here—

The board of grain appeals shall, under such rules and regulations as the Secretary of Agriculture may prescribe, pass on all appeals which may be taken from the inspection and grading of grain by inspectors licensed under this act.

Then, there is also a provision that where there has been an appeal to the State authorities there can be an appeal taken from the State authorities to the board created under this bill. That provision reads:

But in States where there have been established systems of grain inspection with State boards of appeals, appeals shall be considered only from the findings of such State boards of appeals.

In other words, if a shipper applies to the State board of appeals and gets a decision there he still has the right of appealing to the board of appeals of the Department of Agriculture.

The board of appeals shall also, under the direction of the Secretary of Agriculture, pass on the qualifications of applicants for license under this act.

It seems to me, Mr. President, that that provision fully covers the ground both as to the purchaser and the seller if either shall be dissatisfied. If a man ships grain which he has inspected at the home market, it goes to another market, and there it is reinspected, and if he is dissatisfied with the reinspection, he has the right of appeal to this board of appeals; and consequently, if on appeal the grain is graded higher, the farmer is entitled to the difference in price, and he unquestionably should have it; and if it is found that on inspection the grain has been graded too high at the point of shipment there is necessarily involved the right of having the true grade established, the farmer to remit whatever the court of appeals might determine the excess price to be.

Mr. SMITH of South Carolina. Mr. President, it seems to me that the argument of the Senator indicates that we would have a duplicate standard of grading. I gave an illustration a moment ago in connection with the conduct of the fertilizer business in my State and also in connection with cotton grading which I think can be applied to the grain business. Let the Government establish uniform standards, furnish them to the several grain States, and then allow the States to decide the methods by which they will enforce conformation to the standard. Then, under whatever rule or regulation it may be found wise to adopt, if the buyer or the seller is dissatisfied, let him be allowed an appeal to the proper authorities, and let them decide the grade of the grain according to the particular sample furnished. If the law were framed to work along that line there would be no duplication.

As I understand, under this provision there will be a State system of inspection, and if the seller or the purchaser is dissatisfied he can appeal to the Federal authorities. The plan which I suggest is to have uniform standards fixed and samples

to be furnished to the several States for the guidance and benefit of all concerned, whether buyers or sellers.

It is somewhat similar to the question of measures. If a merchant measures and sells me a yard of goods, that yard must be 36 inches. If I am dissatisfied with his measure, I may have an appeal to the authorities who determine standards, weights, and measures.

It seems to me that the whole matter may be simplified by fixing uniform standards, promulgating such standards, and then allowing the several States to put them into operation as they see fit, with a final appeal to those who fix the standards.

Mr. SHAFROTH. Mr. President, the difficulty with the position of the Senator is that there are Members of this body who believe that the inspection system provided by the States from which they come is the most perfect inspection system in the world, and therefore they do not want to surrender it.

Mr. SMITH of South Carolina. Let there be the State inspection—and I do not care how rigid it may be—but let the standard of comparison be uniform.

Mr. SHAFROTH. That would be the case under the provisions of this bill, for whenever the grain enters into interstate commerce it must conform to the standards fixed by the United States Government, unless the shipper concludes to ship without reference to a grade.

Mr. SMITH of South Carolina. Certainly; I think that would be understood.

Mr. GRONNA. Mr. President——

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from North Dakota?

Mr. JOHNSON of South Dakota. I yield.

Mr. GRONNA. Mr. President, I am very glad that the Senator from Colorado [Mr. SHAFROTH] has called attention to the provision read by him. The amendment to which he has directed attention was adopted, I believe, on Friday or Saturday last, and I think that it will fully take care of what the Senator from South Carolina [Mr. SMITH] has suggested. The grain would have to be graded according to the Federal standards, which would be uniform; but in States where they have State inspection, if the buyer or the seller were dissatisfied with the inspection he could appeal, first, to the State board of inspection, and then he could appeal to the board of appeals, and ultimately, if he were still dissatisfied, as a final resort, he could appeal to the Secretary of Agriculture, who, under the provisions of this measure, would have the right to appoint an appeal board at that particular place. I believe the language just read by the Senator from Colorado is comprehensive and efficient; and if it is not, then we ought to amend it.

If the Senator from South Dakota will allow me further, I will say that so far as I am concerned I should be very glad to vote for his amendment. I am not so sure that it would be workable, because he knows when grain goes to the terminal market it is mixed with other grain. Of course, where it is shipped in carload lots to a terminal before it loses its identity it would be possible to reinspect it and then to give the shipper of the grain the benefit if it should be determined that the grain should be graded higher. I shall be very glad to vote for the amendment offered by the Senator from South Dakota.

Mr. JOHNSON of South Dakota. Mr. President, the Senator from North Dakota [Mr. GRONNA] has well answered the Senator from South Carolina [Mr. SMITH].

Now, as to the question of the Senator from Colorado [Mr. SHAFROTH], I wish to say that in section 6, on pages 104 and 105, there is a provision that if the shipper is not satisfied with the grading that he receives at the terminal he may appeal to the Secretary of Agriculture. Now, let us see what that means to a man who ships his own grain. Suppose he wanted to ship a carload from South Dakota or from North Dakota. He has to ship that grain without Federal inspection at home. He does not know anything about what grade he is going to get until the grain reaches the terminal point and is there graded. Then, if the grade given is not satisfactory to him, he must serve notice and take an appeal to the Secretary of Agriculture. He must also put up a certain amount of money—whatever may be required by the Secretary of Agriculture. This is a question that is most important to the grain raisers in my section of the country, and I believe of every State in the Union that raises grain. The shipper would have to wait for a week or, perhaps, two weeks; he would have to pay storage; and he would have to wait all of this time to find what his grade was before he would know what quality he had. Mr. President, that is the very reason why I introduced this amendment.

I do not believe there is a Senator in the Chamber who would not like to have the farmers and grain growers of his State able to drive into the market and have his grain graded and sold, if he wanted to do so, and to know right then and there what he was selling. I know that is the desire of the grain growers in my section of the country; and I speak advisedly. I have stood at a bank counter window for 10 years and paid for all grain that three or four elevators in my town have bought during all of that time, and I have heard more complaints, and more just complaints, about the grading of the grain than about any other subject, not excepting the price paid.

This provision for an appeal, which the Senator from Colorado cites, is found in section 6, page 104, and it reads as follows:

SEC. 6. That whenever standards shall have been fixed and established under this act for any grain and any quantity of such grain which has been sold, offered for sale, shipped, or delivered for shipment in interstate or foreign commerce shall have been inspected and a dispute arises as to whether the grade as determined by such inspection of any such grain in fact conforms to the standard of the specified grade, any interested party may appeal the question to the Secretary of Agriculture, and the Secretary of Agriculture is authorized to cause such investigation to be made and such tests to be applied as he may deem necessary and to determine the true grade.

Mr. President, this bill makes it possible to have a Government grain inspector in every town in the United States and in every village in the United States without one dollar's expense to this Government. It provides that, upon application and showing of qualifications, any man may become an inspector. That is clear. Now, what I should like to make possible would be that very thing, that every town in the United States where grain is bought and handled might have a Government inspector under this bill, and that that inspector or grader should have a check upon him somewhere. You will not find many grain graders under this bill who would be appointed who would be any more honest than the rest of us. That is the general complaint. If a grain grader were appointed out in the State of Minnesota or North Dakota under this act and he knew while he was grading grain that there was going to be a check on his grade at the other end, he would have to know his business as a grain grader before he would apply and receive such an appointment, and he should know the business, and know it well.

There is not a bit of reason why a man in any of the country places of the grain-producing States should not be just as well qualified and just as competent to grade grain as any one of the graders at the eastern terminal points, and, Mr. President, that is my object in presenting this amendment. I have not a selfish motive in the world regarding it. I want to make this bill popular with the people all over the United States, because I think it is a good bill, and I do not know any way in which I could help to do that more than by this process of providing a grain grader at every station that applied for it and having a check on him at the other end of the line or the terminal point.

Mr. McCUMBER. Mr. President——

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from North Dakota?

Mr. JOHNSON of South Dakota. I do.

Mr. McCUMBER. May I ask the Senator if I fully understand the purport of his amendment? If I understand it correctly, he desires to secure for the farmer bringing a load of grain to an elevator, which, we will say, is graded as No. 2, and when that same grain is shipped to the terminal it is graded as No. 1, the benefit of that No. 1 grade. Is that correct?

Mr. JOHNSON of South Dakota. Mr. President, that is my exact object—to give to the producer the specific grade and advantages that his grain calls for.

Mr. McCUMBER. Mr. President, let me call the Senator's attention to another feature of that case. The farmer, of course, will bring in but a single load at a time. If his grain was graded No. 2, it would be put into a bin with other grain that was graded No. 2, and then if the whole bin was shipped out holding, say, 1,000 or 1,500 bushels and it graded No. 1, how would you know it was that particular farmer's load that gave it the No. 1 status? Perhaps the other grain might have brought it up to that standard.

I can see the purpose of the Senator, but I confess I fail to see how it could be carried out and carried into effect so far as the individual farmer is concerned.

Mr. JOHNSON of South Dakota. Mr. President, there is no possible way in which grain could be graded or regraded as specific grain after it is mixed up with other grain, but my purpose is this: I want to protect the farmer that comes to town and has a carload of grain to ship. I want to protect him in two ways. I want to protect him in order that he may get the grade he is entitled to right there, and I want to protect him so that he may get away from the middleman if he wants to and ship his own grain and know what grade he has to ship.

Mr. McCUMBER. Mr. President, may I again interrupt the Senator?

Mr. JOHNSON of South Dakota. Certainly.

Mr. McCUMBER. I assume that under the course of business the farmer who ships a carload of grain will have nothing to do with the elevator man at all. There will be no necessity for his dealing with him. He, of course, would ship his own grain, and would accept whatever was received from the terminal. I do not understand that even under this bill as it is construed by those having it in charge it would be necessary for that farmer to have his carload of grain graded before he shipped it into another State. Therefore, it would make no difference to him who was the inspector at that particular place. Am I not right in that?

Mr. JOHNSON of South Dakota. It would make this difference, Mr. President. He would ship that grain, or he would sell it, as he saw fit. If he sold the grain to an elevator man there he would know just exactly what grade he had to sell on; and if he shipped it himself he would know what grade he had to sell on, unless his grade was changed at his terminal point; but under this amendment this would be a rare occurrence.

It would not only do that for men with a carload lot, but it would do it for the smaller men. Two or three men might band together and bring in a carload of grain and have it graded and shipped; and I think it would be a step in the right direction. I believe it would give justice to the fellow who does the work, the fellow who produces the grain; and I believe this bill is lame in that respect, or I certainly would not have introduced this amendment.

Mr. McCUMBER. Will the Senator tell me why either one farmer, or three farmers together, or any number, shipping a carload of grain to a terminal, would want it inspected in the State of its origin? They would sell it at the terminal at whatever the terminal inspection showed it was entitled to receive.

They could not sell it from its home-inspection certificate. Inasmuch as there are no inspectors, except, possibly, under this bill, there will be provision made for every elevator man being made a Government inspector if the bill is changed. Even then I would hardly give it the construction that the farmer would be compelled to submit his carload of grain to his competitor to give it a grade; and if he would not, then I can not see that there is any necessity whatever for any initial grading by him.

Mr. JOHNSON of South Dakota. Mr. President, in answer to that, I will say that the farmer would not be compelled to do either one thing or the other, but would have his choice. It seems to me that it would free the farmer, or the man who produces the grain, to act for his best interests, as he is certainly entitled to do.

Mr. President, we have heard a great deal of talk in the last few months about preparedness for defense. I want to say to you that the basis of preparedness is your agriculturist. You could not do without the producer. He produces everything that we use, everything that we wear, everything that we eat, and everything that we have ever had. He produces food, and food makes life, and life makes government. Without the producer you would have no life, and without life you would have no government. If there is anything in the world, as I look at it, that should have our closest attention and our best consideration, it is the man that grows the foodstuffs of the world. I want to throw every safeguard around him that I possibly can.

I shall vote for this bill whether this amendment is accepted or not, because I realize that it will do a great deal of good to our country. I could enumerate in various ways the great help that it would be; but if this bill is passed in its present condition, without giving the farmers of the country a chance to haul their grain into market, and to grade that grain, and to know what grade they have, and then take their choice of selling or shipping, you are going to have a good deal of dissatisfaction, and that is the only thing I am trying to avoid.

Mr. President, I was much astonished the other day to hear upon the floor of this Chamber a statement made by the Senator from Minnesota, I believe, or by the Senator from South Dakota—I am not sure which—that this Government had spent over $700,000 in the last 10 years on grain grading, and the only Federal grade that they have been able to establish is that of corn. They have not been able to establish grades on wheat, nor on oats, nor on any small grain. But in taking it up with the Department of Agriculture, they advise me that they expect to be able to establish a Federal grade on those very necessary things in a short time, and I hope they will; and I hope the Senate will take into consideration the advantages which, as I see it, this amendment carries to the bill, and that they will vote for this amendment. There is not one dollar of appropriation asked. There is nothing except to open the gates wide to the men that produce, and give them a chance to put their grain into the markets of the world through any channels they desire, and to know at home what grade and thereby sell to advantage.

Mr. SHAFROTH. Mr. President, the Senator's amendment is, of course, intended to be a safeguard in the interest of the farmer. I am sure that is his object, and it is a very commendable object; but the Senator wrote this amendment before the adoption of the amendment of the junior Senator from North Dakota [Mr. GRONNA]. That amendment, offered by the junior Senator from North Dakota, and accepted and made a part of the bill, it seems to me does away with the necessity of adopting the provision proposed by the Senator from South Dakota. In other words, it provides for a system of appeals, so that there can be no difficulty whatever. The difficulty of shipment and of having an inspector at the point where the farmer brings his grain is not provided for in the amendment offered by the Senator from South Dakota. What the Senator from South Dakota has provided is a rule of compensation, namely, that in the event that the result of the appeal is to the effect that the grade is higher at the terminal point than at the lower point, then there shall be a compensation made to him. Now, that necessarily follows from the amendment which has already been adopted and which was offered by the Senator from North Dakota [Mr. GRONNA]. That being the case, it seems to me this amendment is unnecessary.

The Senator from South Dakota says he wants an inspector at every point. This amendment of his does not provide for that.

Mr. JOHNSON of South Dakota. Mr. President, the bill provides for it, though.

Mr. SHAFROTH. No; the bill does not provide that there shall be an inspector at every point. The bill permits the Secretary of Agriculture to appoint or to license such numbers of inspectors as he may deem proper, and he is evidently going to take the inspectors that are now operating under the State law; but as to the appointment of new inspectors, I doubt very much whether any of them will be appointed.

In other words, the very system which the Senator commends so highly was up for consideration in this body a year ago, and it was turned down because it was thought that it was too big an undertaking at this time; that there would be too many inspectors in the United States; and while they might not be paid their salaries out of the Treasury of the United States, yet the supervision that would be needed and the number of officers that would be required, would make a very heavy burden upon the part of the United States.

The amendment of the Senator from North Dakota [Mr. GRONNA] provides specifically for appeals, and provides exactly the line of conduct that would follow the shipment of grain to a terminal point. If it were given a higher grade there than at the lower point, the farmer would get the amount of money that was due. It would also, if it were given a lower grade, compel a deduction from the amount which the farmer had already received, or which it was contracted he should receive. That is fair, because if you are going to have appeals you must not have the appeal all on one side, with no right whatever as to the party that won the decision before the inspectors below.

For that reason, Mr. President, it seems to me that the amendment of the Senator from South Dakota should be rejected.

Mr. JOHNSON of South Dakota. Mr. President, as I understand the amendment of the Senator from North Dakota, it does not cover the question at issue at all. The thing I am trying to do is to provide for inspection at home. His amendment provides for an appeal. The bill also provides for an appeal.

The VICE PRESIDENT. The question is on the amendment of the Senator from South Dakota. [Putting the question.] The Chair is in doubt.

Mr. JOHNSON of South Dakota. I call for a division.

The VICE PRESIDENT. Those in favor of the amendment will rise. [A pause.] Those opposed will rise. [A pause.] The amendment is agreed to.

Mr. SHAFROTH. Mr. President, I ask for the yeas and nays on that question. I think this amendment negatives the provision of the bill.

Mr. McCUMBER. It is too late after it is adopted; is it not?

Mr. SHAFROTH. Very well; I will not call for the yeas and nays, then.

The VICE PRESIDENT. The Chair has ruled that a Senator has two rights—one to call for a division and one to call for the yeas and nays. The Senator can reserve it for a vote in the Senate.

Mr. McCUMBER. Mr. President, the amendment which I offered on Saturday was temporarily withdrawn by my col-

league because it came up during my absence, as he did not desire to have it acted upon at that time. I now offer the same amendment, with the addition that I have included in that amendment a portion of the second proviso of section 4 of the bill, which provided as follows: It is the third proviso now:

That any such grain sold, offered for sale, or consigned for sale by any of the grades fixed therefor in the official grain standards may, upon compliance with the rules and regulations prescribed by the Secretary of Agriculture, be shipped in interstate or foreign commerce without inspection from a place at which there is no inspector licensed under this act—

I struck out the words "inspector licensed under this act," because my substitute does not have anything to do with inspectors, and changed the wording so that it would read:

At which there is no inspection service to a place at which there is no such service, subject to the right of either party to the transaction to refer any dispute as to the grade of the grain to the Secretary of Agriculture, who may determine the true grade thereof.

While I did not think that was necessary, the Senator from Minnesota thought it ought to be retained, and I think my colleague also agreed with that. It certainly can do no harm, and, therefore, I have added it to the end of section 4.

Mr. GRONNA. Mr. President, I suggest to my colleague that that would not, in my opinion, take care of our State, because we ship from a State where there is no inspection to a State where there is inspection. The Senator's amendment takes care of a condition where shipment is made from a place where there is no inspection to a place where there is likewise no inspection, but it does not take care of a condition such as really exists in our State and in many other States, and thus permit grain to enter into foreign and interstate commerce from a State where there is no inspection to a State where there is inspection.

Now, Mr. President, I do not wish to be misunderstood. I do not wish to oppose the amendment of my colleague unless I thought that it would seriously affect the business as it is actually done in our State. I believe the first provision of section 4 in the amendment of my colleague would hamper the business of our State just as much as it did in the original provision of the bill.

Mr. McCUMBER. Mr. President, I will go over that, and we will see if it does. My colleague and myself, of course, want the same thing. I have drawn the substitute for this purpose, and for this purpose only: First, to provide for Federal standardization of grain; second, to provide that all grain which is sold by grades shall be sold by the Federal grades; third, to prohibit the use of the older names of grades in lieu of those fixed by the Federal grades; fourth, to provide the proper penalty for disobedience of the provisions of the act.

I do not intend to go any further than that, and I do not intend to interfere with the present system in the slightest degree; and under the provisions of section 4, as I am going to make clear to my colleague, we can ship just exactly as we do to-day. I do not interfere; I do not touch upon that subject. My section 4 simply provides that when it is sold by a standard it must conform to that standard. It does not provide that it shall be sold by any standard whatever. You can ship it from my State or from any other State without its being certified or without its being inspected.

Mr. GRONNA. Mr. President, will my colleague yield to me?

Mr. McCUMBER. Certainly.

Mr. GRONNA. I call attention to the language used by the Senator:

That whenever standards shall have been fixed and established under this act for any grain, thereafter all such grain entering into interstate and foreign commerce and bought or sold by grade shall conform in quality and character—

The Senator does not refer to the standard, but refers to the quality and character of the grain. Now, then, suppose No. 1 grain is bought at my home town. It enters into interstate commerce and is sold as No. 2. It is a violation of section 8 of the Senator's amendment, which provides a penalty of a thousand dollars fine or a year's imprisonment. Now, I know that my colleague does not wish to incorporate that in the law.

Mr. McCUMBER. Why, no. I have changed that entirely. Now, let us see if it does. Let us take section 4 just as I have written it, and if I have not written that clearly enough I am willing to have it modified so that it will read just exactly as I intend:

That whenever standards shall have been fixed and established under this act for any grain thereafter all such grain entering into interstate or foreign commerce and bought or sold by grade shall conform in quality and character to the standard so fixed—

In other words, if you are selling No. 2 United States northern grade, it shall conform to the standard fixed by the department for No. 2 northern grade, and to no other standard. That is all it says, and that is all it is intended to mean.

And established for such grade.

That is all that this section provides. Now, I will read it again:

That whenever standards shall have been fixed and established under this act for any grain, thereafter all such grain entering into interstate or foreign commerce, and bought or sold by grade, shall conform in quality and character to the standard so fixed and established for such grade.

In other words, if the Federal Government shall have a standard known as "United States No. 2 northern," and provided that United States No. 2 northern shall weigh at least 58 pounds to the measured bushel, and shall be clear and of good color, then anyone selling grain for No. 2 United States northern standard must sell a grain that will measure up 58 pounds, clean, and so forth, whatever the standard may mean. That is all there is in it. If you do not sell by any grade, you can ship as you have a mind to. I mean, you can ship without grading at all, if you so desire, under this.

As I say, the first provision is:

That the standards so fixed and established shall be known as the official grain standards.

And when you have adopted the official grain standards, and sell by those grain standards, your quality and character must measure up to those standards. In other words, neither the Minneapolis board of exchange nor any other board of exchange could make a different character or quality conform to the United States standard of No. 1 or No. 2, whatever the case may be.

Mr. GRONNA. Mr. President, is it not true that the shipper would not know what the grade was until the Minneapolis board fixed the standard?

Mr. McCUMBER. Why, certainly.

Mr. GRONNA. He would not know what the real standard was.

Mr. McCUMBER. Yes.

Mr. GRONNA. Now, then, suppose an elevator man takes grain into his elevator. There is foreign matter in it, we will say, to the extent of 5 or 10 pounds to the bushel. Suppose he cleans that grain and it is shipped out as clean grain. He has bought the grain as No. 2, but he has cleaned it—had it, so to speak, in a hospital, and improved it—and he ships it out as No. 1. Does the Senator believe that the provisions of his amendment would be violated if it were shipped out as No. 1?

Mr. McCUMBER. Why, certainly. The provision would be violated if grain was taken in as No. 2 and by a mere cleaning process was shipped out as No. 1, because under the rules in the State of Minnesota they would take out the dockage and then give the balance of the grain whatever grade it was entitled to. The only point I am trying to make by this language is that when the standards are adopted, then the grain entering into interstate commerce must adopt the United States grades; that is all.

Mr. GRONNA. But, Mr. President, if my colleague will allow me further, the Senator knows that Minnesota is the only State in the Union, I believe, that has adopted a dockage system. Now, neither the Senator nor I knows what kind of a system will be adopted.

It has been argued on this floor by several Senators that if there are 2 pounds of dirt or 2 pounds of foreign matter in a bushel of wheat, instead of grading that wheat whatever the wheat actually was and docking the foreign matter, it ought to be reduced in the grade. Now, neither of us knows what the system is going to be, so I think the Senator ought to strike out the words "in quality and character" and simply refer it to the grade.

Mr. McCUMBER. Well, "quality and character" means the description. In other words, I can not strike out those words without impairing the true meaning. If we are speaking of No. 1 hard wheat, and require that it shall be Scotch fyfe, for instance, that is the character. The quality would mean how much it weighs to the measured bushel. If the Government standard for No. 1 hard should declare that it should be Scotch fyfe weighing not less than 60 pounds to the measured bushel, be of good color, and free from smut, and so forth, then it must measure up to that quality; that is all.

Mr. STERLING. Mr. President, how would the Senator enforce any Government standard at all unless the seller by grade were required to have the wheat which was sold conform in quality and character to the Government grade?

Mr. McCUMBER. It could not be done, of course.

Mr. STERLING. It seems to me that the junior Senator from North Dakota, the colleague of the Senator who has the floor, if he is in favor of Government standardization at all,

must be in favor of a requirement that will cause the dealer to conform to the grade thus established.

Mr. GRONNA. If the Senator asks me that question, I will tell him very briefly how it should be done. I am not even a cornfield lawyer, and I dislike very much to go up against two eminent lawyers; but the facts are that if you are going to permit anyone to ship grain out of a State where there is inspection, it is not necessary to say in that language that it must conform in quality and character to any specific grade.

Mr. STERLING. Yes; but——

Mr. GRONNA. If the Senator will pardon me until I finish the sentence, all that would be necessary would be to say that it shall conform to the standards adopted by the Federal Government.

Mr. STERLING. Mr. President, the Government, in fixing a certain standard, has determined it from the quality and the character of the grain, and has based the standard upon that.

Mr. GRONNA. The trouble with the Senator from South Dakota is that he confuses the Federal Government with the man who buys the grain in the first instance.

Mr. McCUMBER. Mr. President, I think it is as clear, at least, as I can possibly draw it, that if you are going to sell your grain by grade, it must conform to the Government's standard for that grade in quality and character.

That is all I mean to say there—that you can not sell it by some other kind of a grade. You can not sell it by grades fixed in Milwaukee or in Superior under the present plan or in Chicago under another system. That is what we are trying to get rid of, so that you shall adopt the Government system and sell it by their grade in quality; that is, when you are selling by a grade, simply that it shall conform. This does not say that you can not ship it unless it is graded before or that there is any necessity for grading at all when you are shipping it; only that whatever grade it is sold by must be the United States standard, and not any other standard. That is all it is intended to mean.

Then I go on to make that more definite:

That no person shall in any certificate or in any contract or agreement or sale or agreement to sell by grade, either oral or written, involving or in any invoice or bill of lading or other shipping document relating to the shipment or delivery for shipment in interstate or foreign commerce of any grain for which standards shall have been fixed and established under this act describe or in any way refer to any of such grain as being of any grade other than a grade fixed therefor in the official grain standards of the United States.

Then we have the next provision, which follows, and which the Senator from Minnesota seems to think necessary to cover those cases where you would ship from a place where there is no inspector in one State to a place where there is no inspector in another. I do not think it is necessary to inspect at all there, or to even take an appeal different from what you would take in other cases, because, so far as I know the trade in such cases, if the parties differ, each of them would send a sample of that grain to the State's department for certification, and that certification would govern certainly in Minnesota, and, so far as I know, in other cases. But the Senator thinks that we ought to have this in:

And provided further, That any such grain sold, offered for sale, or consigned for sale by any of the grades fixed therefor in the official grain standards, may, upon compliance with the rules and regulations prescribed by the Secretary of Agriculture, be shipped in interstate or foreign commerce without inspection from a place at which there is no inspection service—

As there would be in my State—

to a place at which there is no such service—

As it would be in some places if you desire to ship it away from the great terminals—

subject to the right of either party to the transaction to refer any dispute as to the grade of the grain to the Secretary of Agriculture, who may determine and certify the true grade.

And the rules are provided.

That is the substance of the changes which have been made. The balance of the amendment is practically the same as that which is in the bill at the present time.

I want to get rid of connecting the Federal Government with any responsibility for the appointment of employees at the great terminal elevators to do the inspection, and unless you provide for Government inspection entirely and substitute Government inspectors the Government is forced to give the certificate to these employees of the boards of trade at the several cities, and in the end that would be far more dangerous than it would be to allow it to run as it is and allow an appeal from the action of the inspectors at such place as the Secretary of Agriculture would designate. I hope within another year, if we can not get it done at this session, I shall be able to demonstrate the necessity of the Government going further than the mere fact of standardization and supervision, but in addition to that to do the inspecting itself.

Mr. STERLING. Of course the Senator does not intend to prevent the sale of grain by sample.

Mr. McCUMBER. Oh, no; there is a provision that you may sell by sample or sell in any way you wish. All I want to provide is that if you are going to sell by grade you must sell by the Government's standardization, and outside of that I do not want to interfere with the present proposition.

Mr. STERLING. There is a distinct provision for sale by sample.

Mr. McCUMBER. It says here when it is sold by grade it will have to conform, and so forth. That would necessarily imply that in other cases it does not need to be sold by grade, because that of itself indicates that this law shall apply only to cases where the sale is made by grade.

Mr. STERLING. I just had in mind the place in the substitute where the expression "by grade" occurs, and I thought in order to clear up any doubt in regard to it that might exist a second proviso to the one the Senator has already added to section 4 might be quite appropriate, simply saying—

And provided further, That nothing herein contained shall prevent a sale by sample or type.

Mr. McCUMBER. I will accept that if the Senator will offer it.

Mr. STERLING. I will offer it.

Mr. McCUMBER. I will accept it as an amendment to my amendment.

Mr. STERLING. I have not written it out, but I suggest as another proviso to the proviso in the fourth section suggested by the Senator from North Dakota——

Mr. McCUMBER. At the end of section 4.

Mr. STERLING. Yes; to add the following words:

And provided further, That nothing herein contained shall prevent the sale or shipment or delivery for shipment of grain by sample or by type.

Mr. McCUMBER. I accept that amendment. I offer the substitute as now amended.

Mr. SHAFROTH. Mr. President, before that is done, I should like to make an explanation in regard to the amendment of the Senator from North Dakota [Mr. GRONNA], which he and I have agreed to and which was accepted by the committee.

On page 6 of the reprint of part B, at line 5, strike out the word "five" and insert "three," so that it would make the board consist of three members instead of five.

The Secretary read as follows:

Such board shall consist of three members, to be appointed by the Secretary of Agriculture.

Mr. SHAFROTH. And there is a blank in line 3, which we thought ought to be filled by inserting $3,000.

The SECRETARY. So as to read:

The salaries of the members of this board shall be $3,000 per annum.

Mr. SHAFROTH. That is right.

Mr. NELSON. I will say to the Senator from Colorado that $3,000 a year is exactly what we pay the members of our board of grain appeals in Minnesota.

Mr. SHAFROTH. They are not employed all the year around, and I think it is a fair salary for them. That will be accepted, then without objection.

Mr. NELSON. That will be an amendment to the committee bill as amended. The Senator from North Dakota offers a substitute for that.

Mr. SHAFROTH. Yes; I want to discuss the substitute just a few moments, or, rather, I want to contrast the substitute and the bill with the amendments which have been agreed to.

As we have stated before, the distinction between the substitute offered by the Senator from North Dakota [Mr. McCUMBER] and the bill as now amended lies in the fact that that which is contained in the bill now with the amendments provides for a grading of the grain and a Federal supervision, which consists of the United States Government licensing the men who are already in the business now and who do the grading now under State law. The amendment offered by the Senator from North Dakota provides simply for the standardization and punishment for shipments when they ship grain otherwise than according to the United States standards. There is no supervision upon the part of the Federal Government, but a right of appeal to the Federal Government. The right of appeal exists in both cases. Consequently the real difference between the two provisions is that the provision as it is now contained in the bill provides for supervision and the substitute offered by the Senator from North Dakota does not provide for supervision.

Mr. President, it seems to me that the advantages are in favor of the provisions contained in the bill now. We determined a year ago that we could not have Federal inspection at all these points and that is not attempted by anyone now, I understand, in injecting an mendment in the bill. No matter

how desirable it might be, it is evidently deemed that it is not practicable to present it now. Consequently the question is whether we want Federal supervision or not. We all want Federal grading. That seems to be recognized as being proper by all, and the question is whether we shall have no supervision on the part of the Federal Government except the right of appeal, or whether we shall have cooperation with the State authorities, which would be indicated by licensing under a Federal license the people who grade the grain now and thereby making cooperation between the Federal Government and the State government which does not exist now, and which would not exist, in my judgment, under the substitute offered by the Senator from North Dakota.

Mr. McCUMBER. May I ask a question right here?

Mr. SHAFROTH. Yes, sir.

Mr. McCUMBER. I know we want to arrive at a clear understanding.

Mr. SHAFROTH. Yes; that is what I am anxious to do.

Mr. McCUMBER. The only supervision we would have directly would be through the appeal and also through the fixing of standards. I would assume necessarily that under the provisions of the bill the Secretary of Agriculture would furnish sufficient agents, and so forth, to see whether the standards were being lived up to by the several departments. Under either bill there would be that supervision. Let me ask the Senator is there anything in the bill which would compel the employment by a board of trade or chamber of commerce of anyone to whom the Government might issue a license to do the inspecting?

Mr. SHAFROTH. No; I do not think so, not under the bill now.

Mr. McCUMBER. On the other hand, is it not true then that the only one who would receive the inspector's license would be those who were employed by the boards of trade and chambers of commerce, and so forth, and who are presented by them to the department for license?

Mr. SHAFROTH. It just simply maintains the same system that exists now.

Mr. McCUMBER. Yes.

Mr. SHAFROTH. And licenses the same parties that do the grading now under State law.

Mr. McCUMBER. Then it is admitted, is it not, that the Government by granting a license to anyone would not insure the employment of that person by any of these departments?

Mr. SHAFROTH. No.

Mr. McCUMBER. On the other hand, the several exchanges, and so forth, could secure the licensing of all their employees.

Mr. SHAFROTH. No; I think this——

Mr. McCUMBER. Unless, of course, they would fail in some kind of an examination.

Mr. SHAFROTH. I think the bill contemplates that there shall be a Federal inspector at the 35 or 40 principal markets of grain in the United States.

Mr. McCUMBER. It does not say so, does it?

Mr. SHAFROTH. No; it does not; but it can be done unquestionably under the bill. I have not any doubt about that.

Mr. McCUMBER. I should like it very much better if the bill would really provide that. There is no grading provided for it or anything of the kind.

Mr. SHAFROTH. The Senator believes in inspection at every point by a Government inspector, and that we thought could not be presented. I think I voted for the Senator's bill a year ago.

Mr. McCUMBER. I am certain the Senator did.

Mr. SHAFROTH. Nevertheless, we are now trying to get something as a compromise, and it seems to me we can not go to the extent of employing inspectors at every point. I know the Senator from Oklahoma believes that under this bill you can have a Federal inspector at each of the points where are the great markets for grain, and that is going to be a decided check.

Mr. McCUMBER. Would the Senator have any objection to an amendment of the bill that would directly provide that there should be a Government inspector at each one of the great terminals who would have authority to inspect and supervise the inspection at those places?

Mr. SHAFROTH. I must say that, personally, it suits me to have that, but I would have to confer with my colleague before I could determine upon it. I think that ought to be done.

Mr. McCUMBER. I think so, too.

Mr. SHAFROTH. That is my judgment about it.

Mr. McCUMBER. That is just simply getting one further step.

Mr. SHAFROTH. Just one further step.

Mr. McCUMBER. I hope before the bill passes we will agree upon that and put it in.

Mr. SHAFROTH. Yes; it may be we can; but I want to discuss the differences between the provision now in the bill and the substitute offered by the Senator from North Dakota.

Mr. CUMMINS. Mr. President——

Mr. SHAFROTH. I yield to the Senator from Iowa.

Mr. CUMMINS. Is there anything in the bill that would prevent the appointment of an inspector in a town of, say, 2,000 inhabitants having no board of trade, no State authority behind it?

Mr. SHAFROTH. It is not contemplated that——

Mr. CUMMINS. The Senator from Colorado says it is not contemplated, but it is directly authorized in the bill if the Secretary of Agriculture desires to appoint.

Mr. SHAFROTH. But only $250,000 is appropriated, and consequently it is not supposed that he will have such inspectors.

Mr. CUMMINS. There is nothing appropriated for the payment of inspectors; but if one with a proper recommendation in a town of the kind I have indicated were to apply for a license as a Government inspector, the Secretary of Agriculture could appoint him, could he not?

Mr. SHAFROTH. I am inclined to think he could, but it is not contemplated.

Mr. CUMMINS. And having been so appointed, there could not be a bushel of grain shipped from that town by grade without the inspection of this inspector? Could there be?

Mr. SHAFROTH. Of course the farmer has the option of shipping it without reference to grade.

Mr. CUMMINS. The farmer has long since lost his interest in it; he has sold it to the middleman in my State, at least; but in the case I have suggested, with the appointment of such an inspector, there could not be one bushel of grain shipped to Chicago, for instance, or Minneapolis, without inspection by the local inspector. I assume now that I am stating the correct interpretation of the bill. Does the Senator from Colorado think that is a good plan?

Mr. SHAFROTH. Yes; for the farmer, if he is not satisfied with the grading, or if he does not desire to ship by grade, can ship by inspection or by samples.

Mr. CUMMINS. The farmer does not ship at all in my State; at least, he ships very rarely. He sells to a middleman, an elevator man, and he sells upon a grade. There is nothing in this bill that will prevent him from selling upon a grade, inspector or no inspector, as I shall presently show; but when the middleman comes to ship to Chicago or to any point beyond the State, if there be an inspector in that locality or in that community, his grain must be inspected by that person. Otherwise he ships it under the prohibition of the statute and becomes criminally liable.

The way it would work in my State would be about like this: Here are three elevators in a small town—and a great many towns of the size I have suggested have three elevators—and some one in that little locality would be licensed as a Government inspector. The influences of a little community of that sort the Senator from Colorado well knows. The inspector would be allied socially or industrially or commercially with one or the other of the companies that are operating the elevators—not within the terms of the amendment offered by the Senator from North Dakota, but so that there would be the keenest sort of prejudice against him on the part of the other elevators. Now, does the Senator from Colorado think that a person so appointed, under those circumstances, ought to inspect all of the grain that is shipped from that community?

Mr. SHAFROTH. Well, Mr. President, I feel this way with relation to the measure: The right of appeal is given; the right of inspection is given; consequently at the terminal point the person who is dissatisfied with the inspection can have another inspection. Then an appeal is given to the board established in the Agricultural Department, and all the safeguards are thrown around the transaction to insure a proper administration of the proposed law. For that reason it seems to me that you can not fail, unless you employ Government inspectors absolutely free from any influence whatever, to have as perfect an inspection as you might desire. With this right of appeal, in view of the fact that the Senate has turned down the proposition of complete Federal inspection and has allowed the inspection provided for under this bill, I take it, at the principal points, and has also allowed a regrading at the principal points, it seems to me that all the safeguards that reasonably can be expected are included in the measure.

Mr. CUMMINS. One more question, and I ask it purely for information. Although I have looked at the bill carefully, I am not able to determine the matter. In the case I have

mentioned the grain could not be shipped without the inspection of this inspector, and he would therefore be left to charge for his labor whatever fee or compensation he might think reasonable, would he not?

Mr. SHAFROTH. No. I must say that, according to my understanding of the bill, as to the exact provision—though the extent of authority may be greater than I think it to be—and the understanding of the bill by the Agricultural Committee, the people who are inspecting grain now in every State in the Union, inspections being made by boards of trade in some States and under State regulation in others, are provided with a Federal license. That Federal license, to some extent, ties them to the Federal Government and makes probably a closer connection with the Federal Government in inducing them to adopt the standard established by the Government.

As to the fees of inspectors, whatever may be the fees which prevail in the various places will unquestionably be the fees which will prevail under this proposed law.

There is going to be progression, and there is not any doubt but that new legislation will be enacted. It has, however, been deemed wise not to take the entire inspection system into the hands of the Government at this time. The system, of course, may be perfected in time, but it is not considered to be feasible at present.

Mr. CUMMINS. Mr. President, what the Senator from Colorado has stated as his view of the matter, he undoubtedly holds sincerely; but there is no such limitation in the proposed law. I am speaking about what the law authorizes. If the view of the Senator from Colorado is correct, we might just as well say to the Secretary of Agriculture—if we could do so constitutionally—"Go forward and do whatsoever you think best in this matter." I believe that when a law is passed it ought to be fairly complete and fairly protective and fairly guarded.

I do not intend to enter upon an argument now with regard to this bill; but when the Senator from Colorado shall have concluded, I shall endeavor to point out some of its defects; defects which, in my opinion, have never been considered by the Committee on Agriculture; applications which have never been in the minds of the members of that committee.

Mr. SMITH of South Carolina. Mr. President, if the Senator from Colorado [Mr. SHAFROTH] will allow me just now—for I want to make an observation and to state an idea in conjunction with what the Senator from Iowa [Mr. CUMMINS] who has just taken his seat has said—I desire to say that if this amendment were properly worded, there would be absolutely no use for inspectors anywhere. Establish your Government standards, promulgate at proper points your samples, and then, when grain is bought or sold, if the buyer or the seller be dissatisfied with the grading, he would have a right to take his sample or samples from the bulk of the grain that is under negotiation, send it to the proper authorities, and then, upon whatever they agree as being the Government standard, let that be the final basis of settlement.

We have that character of law in the State of South Carolina, providing for the inspection of fertilizers. The manufacturers manufacture fertilizer, stamp its ingredients on the bag which they send out, and they sell it without let or hindrance. If I, as a purchaser of that fertilizer, have reason to believe that it is not up to the standard, in the presence of an officer I can have an original package of it broken, a certain amount taken out, sent to Clemson College, and there have it analyzed. If it is up to the standard, that ends the matter; but if it is below the standard, the manufacturers of the fertilizer make good the difference.

To have inspectors in the grain business would be exactly like it is in the cotton business. We of the South in that business would not submit to a Government inspector on our platforms deciding as to cotton what was middling, good ordinary, or strict middling; but we have our set of standard samples, and if we believed that a buyer would not agree to the fixing of the proper grades we would appeal to the court established, which fixes the standards, and whatever they determined to be the grade of a certain set of samples we would settle by that.

Mr. SHAFROTH. Mr. President, I now desire to point out the difference between the substitute proposed by the Senator from North Dakota [Mr. MCCUMBER] and the provision of the bill as reported from the Committee on Agriculture and Forestry.

The practical difference between them is simply that the provisions of the bill as reported by the committee provide for supervision. The provisions in regard to grading are the same in the substitute of the Senator from North Dakota as those contained in the bill reported by the committee. The system of appeals provided for is practically the same in each instance, so that all rights are protected in both instances.

As to the supervision over the grain shipped which is given to the Federal Government under the committee bill, that supervision, as I take it, must of necessity involve the employment of supervisors at the principal terminal points, so that they can ascertain whether the grain shipped to the principal market conforms to the standards established. It seems to me that that one difference is practically the only difference between the substitute offered by the Senator from North Dakota and the provision advocated by the Committee on Agriculture and Forestry.

That being the only practical difference between them, it seems to me that supervision should be provided for. There is no doubt that supervision by men employed by the Government at the principal markets or licensed by the Government—and those so licensed would probably be men now engaged in the business of inspecting grain—would be wholesome in the way of insuring that the requirements of the statute with relation to the grades were conformed to. It may be that absolute inspection by the Federal Government will come, and perhaps it ought to come. I voted for such a provision when a grain grading and inspection bill was before the Senate a year or so ago; but, inasmuch as it seems that the House has not considered that suggestion, and inasmuch as the Senate has discarded that provision, thinking that it would involve the creation of a bureau employing many thousands of men, it occurs to me that as between the substitute of the Senator from North Dakota and the provisions of the committee bill the question of supervision is of immense value, and that the licensing of inspectors by the Federal Government would aid materially in securing a conformation to the grades established.

The appointment of such supervisors would establish a connection between the State inspectors and the Federal Government which would make them, at least, try to conform with the wishes of the Agricultural Department in the grading of grain; but no injustice, it seems to me, would be worked under the provisions contained in the bill as reported by the committee, because the right of appeal exists, the right of reinspection exists, and the right of supervision at terminal points exists. That being the case, it seems to me that the provisions in the committee bill are far preferable to the provisions of the substitute offered by the Senator from North Dakota.

The Senator from Wisconsin [Mr. LA FOLLETTE] has called my attention to the fact that we adopted an amendment several days ago which was proposed by the Senator from North Dakota [Mr. GRONNA], to the effect that no person shall be appointed as an inspector who has an interest adverse to that of the seller. That provision reads as follows:

Provided, That no inspector or deputy inspector licensed by the Secretary of Agriculture to inspect or supervise the grading of grain shall during his term of service be interested, directly or indirectly, in the handling, storing, shipping, purchasing, or selling of grain, nor shall he be in the employment of any person or corporation financially interested in the handling, storing, shipping, purchasing, or selling of grain.

Mr. President, the result of that would be that if there are men now acting as inspectors who are interested in buying or handling grain they can no longer act as inspectors or receive certificate or be licensed by the United States Government. It will necessarily compel the employment of disinterested persons. Of course, the State authorities now no doubt employ men who are entirely disinterested, who secure their compensation from fees taxed upon the grain itself at so much per bushel. It seems to me that that provision will prevent any discrimination against persons who might come to a given market and desire to sell their grain there. So, I repeat, that when it is taken into consideration that the right of reinspection exists the right of appeal exists, and in those States where they have a State board of appeals the right to take a further appeal from that board to the Agricultural Department exists, I think it is evident that the provisions contained in the committee bill are as well safeguarded as it is possible to safeguard a measure.

Mr. MCCUMBER. Mr. President, may I ask the Senator a question for information?

Mr. SHAFROTH. Certainly; I yield to the Senator from North Dakota.

Mr. MCCUMBER. Suppose that this bill should become a law and before next October the Secretary of Agriculture should establish standard grades, where would he get inspectors able to stand examination to conduct inspections at Chicago, St. Louis, Kansas City, New York, Baltimore, and New Orleans? In such cities practically all of those who have any knowledge of inspecting grain at all are men who have been employed by the boards of exchange in the several communities. The boards of exchange, of course, are composed of those who are interested in the handling of grain. While such boards may be corpora-

tions, their membership is made up of men who are interested in the buying and selling of grain. Would not the Government therefore be compelled by the necessity of the situation to give certificates to men who had been employed by such boards; and if we put in the bill a provision that such men shall not be employed, then where will the Secretary of Agriculture get them?

Mr. SHAFROTH. Oh, Mr. President, I always believed that the duties of an office do not have to cease absolutely because the person who may perform those duties dies or resigns. There will always be found other men who are capable of performing the same duties. But, outside of that, this provision would not affect a man, although he may have been employed to grade grain by those interested in the handling of grain, if he changes his relation to them and becomes an employee of the Federal Government. It is similar to the condition under the Federal reserve act. We provided in that act that there should be no connection between the members of the Federal Reserve Board and any banking institution.

That did not mean that a man who had occupied a position or was at that time occupying a position as an official of a bank could not resign that position, sever his connection with the bank, sell his stock, and become an officer of the Federal Government. In the same way, if this provision becomes a law, it seems to me that it might be desirable to have some of the men who have been engaged in this business employed, if they sever their relations with corporations or individuals buying and selling grain and become employees of the Federal Government. We can not help but assume that under such circumstances they would give good service to the Federal Government.

Mr. McCUMBER. If the Senator will allow me, he would be absolutely right, provided we had taken over the work of inspection in accordance with the terms of the bill heretofore urged by me upon the Senate. Then, they would be Government employees, and would be paid either by the Government directly or out of fees assessed against the cargo to be inspected. My bill so provided; but I want to call the Senator's attention to the fact that while we use the word "employee," the person employed will receive compensation for his services from some one else. Now, you can hardly say that he was the employee of the Government simply because he had a Government certificate of the right to do certain work. He is, nevertheless, paid by these exchanges and employed by these exchanges; and notwithstanding the fact that he receives from the Government his license to be employed, the employment, even under the provisions of this bill, must be of the persons who have charge of the inspection at the several terminals.

Mr. SHAFROTH. The answer to that is simply this: In the amendment which has been offered by the junior Senator from North Dakota, the colleague of the Senator who has just spoken, there is a provision——

Mr. NELSON. Mr. President, will the Senator yield to me?

Mr. SHAFROTH. I yield to the Senator from Minnesota.

Mr. NELSON. I desire to say to the Senator from Colorado that under our inspection system in Minnesota all the grain inspectors are bonded. They have to give a bond—I think a bond in the sum of $5,000—to the State; and anyone who can show that he has been injured by the work of the inspectors can get the benefit of that bond. They will be authorized to sue, or the State can sue for them, and they will get whatever damages inure to them. They are all bonded officers under our inspection system.

I want to say further to the Senator that under the provisions of section 7 of the bill, while the Federal Government does not pay these men that are licensed, yet they are licensed by the Federal Government, and the bill provides that they can be removed for cause by the department. So whether they are paid by the Federal Government or not I regard them as quasi-Federal officials. There can not be any doubt about that, because no one can act in this capacity if that section 7 remains in the bill until he receives this Federal license; and if these men fail to perform the duties conformably to the law they can be removed, after hearing and trial, by the Government. That is my understanding; so that they are, in that sense, Federal employees.

Mr. SHAFROTH. I thank the Senator for his clear statement of the laws of Minnesota and the operation of the system there, as well as his interpretation of the measure that is before us.

Mr. NELSON. If the Senator will allow me, I want in this connection to state another thing, and that is one defect of your warehouse provision. In Minnesota we not only require all terminal warehouses to obtain a State license and to be bonded, but we require them to carry insurance on all the grain and the contents of their elevators. That insurance inures to the benefit of everybody that has elevator tickets, as we call them, tickets for wheat stored; so that every man who has a ticket for grain stored in one of those terminal elevators has the benefit of the insurance.

Mr. SHAFROTH. Now, Mr. President, to conclude in a few words——

Mr. STERLING. Mr. President, if the Senator will excuse me just a moment, I should like to ask the Senator from Minnesota, if he will permit me, by whom the inspectors are employed in the State of Minnesota under the State-inspection law?

Mr. NELSON. They are appointed by the railroad and warehouse commission.

Mr. STERLING. And by whom are they paid?

Mr. NELSON. They are paid by the State; and we have in connection with it, if the Senator will allow me——

Mr. SHAFROTH. I yield.

Mr. NELSON. We have in connection with our inspection department a branch that we call the weighing department, and we regard that almost as important as the inspection department, for this reason: Lots of times farmers ship their grain to Minneapolis or Duluth, to the terminal point, by carload lots; and under the old system, before we adopted the present system, it frequently happened that a farmer would load up a car with eight hundred or a thousand bushels of wheat, and when it came to the terminal elevators they would report much less, and when he made complaint they would say the car had leaked. We get around that now by having a weighing department that does the weighing before the car is emptied. If the car is emptied either into a mill or into a terminal elevator, it is weighed by a State official, so that the shipper knows exactly that he gets the right and correct weight.

Mr. SHAFROTH. Mr. President, under the explanations that have been made by the Senator from Minnesota, who has thoroughly studied the question of State inspection, a good many of these "ifs" and "ands" that are suggested fall to nothing. The immediate question that is before the Senate now is whether or not the McCumber amendment is a better provision than the provision which is contained in the bill. The difference between them is simply the question as to whether or not the Government shall supervise, both of them requiring a standard, both of them providing for appeals, but the bill as contained in the Agricultural appropriation bill providing that in addition to the grading, in addition to the appeal, in additon to the reinspection, they shall have supervisors, which unquestionably, I believe, will be at the leading markets of the United States. Then, there will be a unity of purpose between the Federal Government and the inspectors that inspect the wheat at the points of shipment. There will be a license and a supervision of them by the Federal Government, which will have a tendency to make them conform to the standards that are adopted, and make them more strict in making the grain conform in all respects to the standards.

Mr. McCUMBER. Mr. President, will the Senator yield to me?

Mr. SHAFROTH. I yield.

Mr. McCUMBER. The Senator on a previous occasion, after I had offered my amendment, suggested an amendment to the original bill which he agreed to—in other words, perfected it. Now, the Senator has stated several times that the bill would allow supervisors or expert men at these several terminals who could assist in the matter of inspection. Will the Senator accept, before a vote is taken upon my amendment, a provision to this effect, at the end of section 4, so as to perfect his bill, so that we will all know that it reads just as he intends it shall mean?

It shall be the duty of the Secretary of Agriculture to appoint one or more expert grain inspectors at each of the important grain terminals in the United States, who shall have authority to inspect or supervise the inspection of grain at the terminal to which he is assigned, and whose duties shall be to secure just and fair inspection and grading, and to see that the grading is made to conform to the standards fixed and established by the Secretary of Agriculture.

Mr. SHAFROTH. I think if the Senator would strike out the word "inspector" in each one of those places, and put in "supervisor," with the powers he has named, I will confer with the other members of the committee and see if we can not accept it.

Mr. McCUMBER. Yes; but you would want an expert grain inspector to do the supervising, would you not? He would not be a very good supervisor unless he was an expert.

Mr. SHAFROTH. No; that is true; but the inspection part of the bill is what the House has avoided. It has avoided the question of inspection, but has provided for supervision.

Mr. McCUMBER. Well, I am willing to change that.

Mr. SHAFROTH. Let me see just a minute. Will the Senator read the amendment again?

Mr. McCUMBER. The way I had it it read:

It shall be the duty of the Secretary of Agriculture to appoint one or more expert—

I will make it read "grain supervisors" there if the Senator desires that. I had it reading in this way:

One or more expert grain inspectors at each of the important grain terminals in the United States, who shall have authority to inspect——

Mr. SHAFROTH. I suggest to the Senator that he strike out the word "inspect" and put in "supervise."

Mr. McCUMBER (reading)—

and supervise the inspection of grain at the terminal to which he is assigned, and whose duty shall be to secure just and fair inspection and grading and to see that the grading is made to conform to the standards fixed and established by the Secretary of Agriculture.

Mr. SHAFROTH. Does that mean that the Senator would withdraw his substitute, then? If this is accepted, will the Senator withdraw his substitute?

Mr. McCUMBER. No; I simply want to perfect this, as the Senator suggested. That would probably be some ground for some Senators voting against my substitute.

Mr. SHAFROTH. Well, I do not know. The Senator from Iowa might come up and demonstrate that that was a very pernicious thing. Consequently, I do not know. It suits my view at the present time. I will say that.

Mr. CUMMINS. Mr. President, the Senator from Iowa would like to know who is to pay the supervisors.

Mr. McCUMBER. Oh, we will have to make provision for it. The Government must pay them.

Mr. SMITH of Georgia. The supervising would be paid for by the department out of the general appropriation for this purpose, I should think.

Mr. SHAFROTH. I do not know. It might be by fee fixed on the grain inspected. I do not think you had better specify the character of the compensation.

Mr. CUMMINS. It seems to me rather a novel procedure to arrange for the appointment of 100 or more men without a word about their salaries or who is to pay their salaries.

Mr. SHAFROTH. Well, there are possibly objections to the provision. I will ask the Senator to read it again.

Mr. McCUMBER. Not a hundred; 30 or 40, I think, would be required.

Mr. CUMMINS. That is a mere estimate. I do not know whether it would be 30 or 40 or 100.

Mr. SHAFROTH. Will the Senator give that language to us as he has it now?

Mr. McCUMBER (reading)—

It shall be the duty of the Secretary of Agriculture to appoint one or more expert grain supervisors, qualified to inspect and grade grain—

That simply gives their qualifications.

Mr. SHAFROTH. Yes.

Mr. McCUMBER (reading)—

At each of the important grain terminals—

Mr. SHAFROTH. Does not the Senator think we had better limit that? He says there are about 35 of them. A town of 10,000 people might come up and say, "Why, we are important," and they might want one there. For that reason it is a little indefinite, unless the Senator should name the cities. If he will name the cities, all right.

Mr. McCUMBER. I think if we adopt this we can fix the number.

Mr. SHAFROTH. Suppose you say "to the number of not exceeding 40."

Mr. McCUMBER. Very well.

Mr. SHAFROTH. Put that in.

Mr. SMITH of Georgia. "At the principal points, not to exceed 40." That creates a standard.

Mr. SHAFROTH. I think the Senator had better make it 35, because that has been talked about in the committee all the time. It has been stated frequently that there are 35 leading markets.

Mr. McCUMBER. We could make it read in this way:

It shall be the duty of the Secretary of Agriculture to appoint one or more expert grain supervisors, not exceeding 40 in number——

Mr. SHAFROTH. That will do.

Mr. McCUMBER (reading)—

qualified to inspect and grade grain, at each of the important grain terminals in the United States, who shall have authority to inspect and supervise the inspection of grain at the terminal to which he is assigned and whose duty shall be to secure just and fair inspection and grading and to see that the grading is made to conform to the standards fixed and established by the Secretary of Agriculture.

Mr. SHAFROTH. Very well, Mr. President.

Mr. CUMMINS. Mr. President, may I ask a question before the Senator takes his seat?

Mr. McCUMBER. Yes.

Mr. CUMMINS. Does the proposed amendment contemplate that there shall be one of these supervisors at each of the terminal markets?

Mr. McCUMBER. Yes; at least one. It says, "one or more."

Mr. CUMMINS. Does it not confine the appointment to one at each place? There are some places where there ought to be more than one.

Mr. LA FOLLETTE. "One or more," he says.

Mr. McCUMBER. I say "one or more"—"at least one."

Mr. CUMMINS. "At least one"—yes.

Mr. McCUMBER. "One or more"—that is the way it reads—"expert grain supervisors."

Mr. GRONNA. There can not be more than one at each place, because there are about 35 grain terminals now.

Mr. McCUMBER. It depends on what you call the important ones. We have provided here for 40. At some of them you could have two.

Mr. CUMMINS. Does the limitation of 35 apply to the places, or to the number of inspectors?

Mr. McCUMBER. I suppose it would apply to the number of inspectors. They would have to be distributed at the most important places.

Mr. GRONNA. May I ask my colleague how one man could do the business in a terminal like Minneapolis where on some days they receive a thousand cars?

Mr. McCUMBER. He is not to do the business, under this. He is simply a supervisor; that is all. He is not to do the actual inspecting.

Mr. NELSON. The Senator has the word "inspector" in there.

Mr. McCUMBER. No; I have the word "supervisor."

Mr. NELSON. No; read on.

Mr. SHAFROTH. I would rather have the Senator take out the word "inspection" all the way through, leaving it to read "supervision."

Mr. McCUMBER. I have here simply this language:

And supervise the inspection of grain.

Mr. CUMMINS. I should like to ask the Senator from Minnesota how that would harmonize with the Minnesota law. Could there be a Federal supervisor holding one thing, and a State board of reinspection or appeal holding another?

Mr. NELSON. It would not harmonize with it at all; and what is more, frequently during the grain season we have more than a thousand cars, sometimes 2,000 cars, come into the terminal at Minneapolis or Duluth, all required to be inspected on the same day. What could one Federal man do at each of these places? All he could do would be that if anybody complained of the work of the inspectors of these cars, he might hear them and consider the complaint. But it is wholly unnecessary, because if you adhere to the plan in the original bill, you provide that the grain is to be inspected first by the State system, then by the board of appeals, and finally by an appeal to the Department of Agriculture, in which you establish a board of grain appeals.

If you adopt the provisions of the Senate bill as they have been amended by the amendments of the Senator from North Dakota and others, these men would be simply supernumeraries, that is all. They would not accomplish any effective or rational purpose at all, because in Minnesota, under our inspection laws, the inspectors grade the grain, and then the owner of the grain or his representative can immediately call for a reinspection by two other inspectors, not the ones that passed upon it first; and then, immediately after that, if he is dissatisfied, he can bring the case before the board of grain appeals.

If you will leave that as you have it in the Senate provision, with the amendment proposed by the Senator from North Dakota that you adopted the other day, you will have it amply covered and provided for.

Mr. STERLING. Mr. President, I should like to ask the Senator from Minnesota a question bearing upon this matter. Minnesota having a State inspection law now, I understood the Senator to say the other day that the system of grading which they have there under the law would have to be readjusted to conform to this bill if it becomes a law, and that they would have to have in Minnesota the same standards.

Mr. NELSON. Not necessarily. We would have to have the same standards as to grain entering into interstate commerce, but any grain shipped in the State—from any part of the State to the mills at Minneapolis—would be subject to State inspection and to the State system.

Mr. STERLING. All grain entering into interstate commerce in the Senator's State——

Mr. NELSON. This would apply only to grain entering into interstate commerce.

Mr. STERLING. Exactly. Now, may I ask the Senator, would not the business of a supervisor such as is suggested by the Senator from North Dakota be to supervise or superintend generally the State inspection of grain in interstate commerce? Could not that be done?

Mr. NELSON. That might be; but I can not see what good it would do, because, first, you have a reinspection under our system; then you have a State board of appeals; and then, under the bill as amended, you have an appeal to a Federal board of appeals, and what more do you need?

Mr. STERLING. It occurred to me that such an inspector or supervisor, having the Federal standards in view, might see to it that the inspection in the State conformed thereto.

Mr. NELSON. I regard him as merely a supernumerary officer. It is simply giving places to another set of officials wholly unnecessarily.

Mr. McCUMBER. Mr. President——

Mr. NELSON. I want to say further, before I am through, that I have studied the substitute of the Senator from North Dakota, and, while the provisions of the Senate bill are not entirely satisfactory to me, yet, with the amendments that have been offered by the committee, by the Senator from Oklahoma, and by the junior Senator from North Dakota grafted into it, I think it is a much better law than the substitute of the senior Senator from North Dakota.

Mr. McCUMBER. Mr. President, I think we will make it better before we get through if we give it the same construction.

Mr. NELSON. The trouble is that the Senator from North Dakota has his own grain bill in his head and he can not see anything beyond that.

Mr. McCUMBER. It is quite evident that the Senator from Minnesota can not see anything except the old argument that has been put up year after year in defense of the Minnesota system.

Now, I am not going into a contest with the Senator over the Minnesota system. The Senator from Colorado [Mr. SHAFROTH] declares in a statement made before the Senate to-day that it is expected under the provisions of this bill that there will be a supervisor at each of the great terminals. He says that that is contemplated.

Evidently the Senator from Minnesota does not think so, and there is a disagreement. A great many persons are inclined to vote for it according to the idea that it is better than my substitute, because it does contemplate the appointment of these supervisors. If it contemplates the appointment of these supervisors, let us make that clear and definite. I do not think they will do any harm. I think they can do a whole lot of good even in Minneapolis or Chicago or in any one of the great terminals. It certainly will not do any harm in supervising the inspection of these places to see that they conform to the standard. If this is adopted I will say to the Senator I am willing to withdraw my substitute. If you will provide in your bill just what you say is contemplated, so there can be no possibility of misunderstanding, then there will be no objection on my part to withdrawing my amendment. May I hear from the Senator from Colorado?

Mr. SHAFROTH. How is that?

Mr. McCUMBER. I know the Senator is busy. I stated if the Senator will make his bill conform to what he says is contemplated in the bill, that there shall be a Federal supervisor at each one of these terminals who will supervise the inspection and grading to see that they conform to the standards fixed by the Agricultural Department, I will gladly withdraw my offered substitute.

Mr. SHAFROTH. I should like to ask the Senator whether that requires a salary in the employment which is made. Will the Senator read it so that we may see?

Mr. McCUMBER. Certainly. It does not say here what the salary shall be, but it must be paid by the Government of the United States.

Mr. SHAFROTH. The question is not whether by this supervision they could have a tax——

Mr. McCUMBER. Certainly, just as they are doing now.

Mr. SHAFROTH. For that supervision.

Mr. McCUMBER. If the Secretary of Agriculture should see fit, he could provide for 5 cents or 3 cents more to be paid on a carload to cover the expenses of these supervisors.

Mr. SHAFROTH. I will say that the opinion of the Senator from Minnesota [Mr. NELSON] weighs very much with me, but I believe we ought to solve this problem, and that was the original intention which the bill conveyed. It may be that these are supernumerary employees; but it has to be worked out to some extent in conference and with the understanding that we can deal with it as the conferees think best, all things considered, my opinion being still that the supervisors ought to exist, I would be willing, if the Senator withdraws his substitute, to accept the same.

Mr. McCUMBER. I will do that.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER (Mr. CHILTON in the chair). Does the Senator from North Dakota yield to his colleague?

Mr. McCUMBER. I yield.

Mr. GRONNA. I wish to say to my colleague that I am not opposed to the proposition except in this way: It places a limitation upon the effective work which the Agricultural Department may do. I want to read from the hearings before the House committee on the bill to show how ineffective this proposition is. Mr. Emerson, who I believe was the chief inspector of the Minnesota board of inspection, testified as follows:

> Mr. HAUGEN. If they have the number they know exactly who takes the appeal, do they not?
>
> Mr. EMERSON. No; they do not. That is the list that is in the clerical department of the inspection department. The appeal board have no more idea of who that man is than you have.
>
> Mr. HAUGEN. After all, it would be possible to advise the board of appeal, giving the number of car shipped?
>
> Mr. EMERSON. That is true. You can clear anything of that kind; but, gentlemen, for the month of November we handled 74,400 cars in Minneapolis and Duluth. You can see how nobody could inform the inspection department or the appeal board in regard to the number of cars.

Now, here is what I wanted to call attention to:

> Mr. ANDERSON. How many inspections does the inspector make, ordinarily, in the course of a day?
>
> Mr. EMERSON. Well, under our present system, if a man inspects 85 or 90 cars from daylight to 11 o'clock he has done a big day's work.

Every man who ships grain is interested in that one particular car, and my colleague can readily see, I believe, that it would be a physical impossibility for these few inspectors to supervise as it ought to be supervised, because you place the limitation upon the effectiveness and upon the work that the Department of Agriculture may do. Under the proviso which was introduced the other day and accepted by the committee, providing for a board of appeals in the Agricultural Department, there is the right to appoint as many supervisors as they see fit, and we increased the appropriation from $125,000 to $250,000 for this very purpose. You can readily perceive that it is better to adopt the provision as it is in the bill coming from the committee than the provision offered by my colleague.

I regret exceedingly that I have to oppose it, but it would be ineffective. It would do a lot of harm. The hands of the Secretary of Agriculture would be tied. He could not appoint to exceed 40 men. There are at least 35 terminals, and it would mean only one man at each point.

Mr. McCUMBER. One would think by his argument that my colleague expects that this is to be a sort of a board of appeals. It is to be nothing more nor less than a system of supervision. As I understand the bill, there is no provision for supervision in it. I will candidly say that I do not think the present appropriation in the bill would give inspectors at every one of these points. If it would take only a thousand dollars a year each, and you appoint 40, there is $40,000 for that alone. But the number provided for here is deemed to be adequate, at least as a starter.

If I believed that you had supervisors unlimited under the provisions of the bill who could go to those terminals and do the supervising, I would agree entirely with my colleague. But I do not so construe the law. I am certain the Senator from Minnesota does not construe it that way, because if I understood his argument, we ought not to have these; that they are needless. However, the Senator from Colorado does so construe the law to mean that it at least contemplates that. I am not satisfied with the mere contemplation, and I want to be dead certain that we may get some kind of supervision. I would be glad to put the number at 50 or 100 or any number that would be necessary; but if we find that 40 are not sufficient at the present time, if we can get into the bill something that is definite, something that says there shall be supervisors, and get it in now, though the number be not enough, then when the Secretary of Agriculture comes back and says, "I need more supervisors," we can proceed to give him the extra number. It is on that theory that I am trying to make this definite. Both my colleague and myself agree entirely that we want inspection, and if we can not get inspection we want some method of compelling that the inspection which is provided shall measure up to the United States standards. If we differ at all, it is only in the method by which we are to secure this. I understand now that the Senator from Colorado accepts this amendment.

Mr. NELSON. Let the amendment be voted upon.

Mr. McCUMBER. All right. I withdraw my proposed amendment, this having been accepted.

The PRESIDING OFFICER (Mr. SWANSON in the chair). The Chair hears no objection, and the amendment of the Sen-

ator from North Dakota is withdrawn. The question is on agreeing to the amendment to insert, on page 104, at the end of section 4 of part B, what will be read.

The Secretary read as follows:

It shall be the duty of the Secretary of Agriculture to appoint one or more expert grain supervisors, not exceeding 40 in number, qualified to inspect and grade grain, at each of the important grain terminals in the United States, who shall have authority to supervise the inspection of grain at the terminal to which he is assigned, and whose duty shall be to secure just and fair inspection and grading and to see that the grading is made to conform to the standards fixed and established by the Secretary of Agriculture.

The amendment was agreed to after a division.

Mr. CUMMINS. As I understand it, there is now pending no amendment, and I desire to offer some observations upon the bill itself.

Mr. GRONNA. Mr. President——

Mr. CUMMINS. I yield to the Senator from North Dakota.

Mr. GRONNA. I want to say that I thought the Senate was voting upon the substitute offered by my colleague. I was not in favor of the substitute. I am in favor of the other amendment, and would have voted for it. I voted under a misapprehension.

Mr. SHAFROTH. I will state to the Senator from Iowa that there is no question before the Senate now in relation to this amendment unless a motion to strike out is made.

Mr. CUMMINS. I suppose the bill itself is before the Senate.

Mr. SHAFROTH. Yes.

Mr. CUMMINS. And is open for discussion.

Mr. SHAFROTH. Certainly, and also to a motion to strike out any part of it.

Mr. CUMMINS. Mr. President, I may or may not offer a motion to strike out certain parts of the bill that have been under discussion for the last week or more. Whether I do present such an amendment depends very much upon the information given to me by members of the committee concerning the true meaning and interpretation of those sections which are called in the bill part B. I am very reluctant to prolong the discussion, but I live in a part of the country which will be deeply affected by this measure if it shall become a law, and while I have given some study to it, I am not able to fully understand its application to the business of the State in which I live.

The Senator from Colorado [Mr. SHAFROTH] on Saturday read the resolutions of certain grain dealers' associations and other associations of that general character, and among them one or two emanating from my own State. I believe that I appreciate the sentiment among the grain dealers of Iowa, for I have had some occasion to confer with them respecting the general regulation of the subject. I believe that they are uniformly in favor of Federal grades. They are in favor of these grades because it is hoped that they can be made uniform throughout the country. I have some doubt personally whether there can be uniform grades established in all kinds of grain; that is to say, whether any standard that may be established with regard to a particular kind of grain can be made applicable to all parts of the United States. But I yield my doubt in that respect to what seems to be the deliberate judgment of those who are far better acquainted with the subject than am I.

I therefore favor that part of the bill which confers upon the Secretary of Agriculture the authority to establish uniform grades throughout the United States. I do not think, however, that the grain dealers throughout the country have adequately studied the bill so far as inspection is concerned. I might favor Federal inspection, although I would come to that conclusion with extreme reluctance, largely because I fear that we are creating a Federal machine so tremendous in its proportion, so comprehensive in its operation that one of these days it will break down simply because it is so unwieldly and so difficult to operate.

I think I am not known as an illiberal interpreter of the Constitution, and I have not been upon the side of those who have sought to limit Federal functions within narrow bounds, but sometime or other we must halt in the policy of recent years in constantly adding to Federal power, in constantly creating new Federal functions. Whenever it becomes necessary and it is within our constitutional rights we ought to do it, but it ought clearly to appear that there is an evil to be remedied, serious in its character, widespread in its scope, before we undertake to substitute the Federal power for the State or the local authority.

I do not pass upon that question so far as Federal inspection is concerned. I have been somewhat inclined toward that plan, and it may very well be that when the question arises I will be found on the side of those who favor complete Federal inspection, eliminating entirely the State authority from the grading and inspection of grain.

But there are certain things with regard to this hybrid which is now presented, which ought to be further investigated and more fully explained. This is an attempt to combine Federal and State authority in the inspection of grain, which I fear is destined to complete failure. I do not believe we can combine the Federal authority and the State authority and produce satisfactory results. In discussing this matter and in asking the questions which I intend to ask, I shall, mentally at least, be applying this bill to the business of my own State, for I am more familiar with that than with the course of trade in any other State. I intend to analyze the bill, and I intend to do it with some care, for as yet the provisions of this measure have not been analyzed. The debate has raged around the inspection of grain at terminal points, and has not been devoted to the situation in a section of country like my own.

Passing sections 1, 2, and 3, I come to section 4; and what I have to say with regard to the matter is not in any manner modified by the amendments which have already been adopted. With most of those amendments, especially those that have been offered by the Senator from North Dakota [Mr. GRONNA], I am in entire sympathy; I think they very greatly improve the provisions of the bill. Section 4 provides:

SEC. 4. That whenever standards shall have been fixed and established under this act for any grain, no person thereafter shall ship or deliver for shipment from any State, Territory, or District—

That is now changed to interstate or foreign commerce; but it means the same thing—

to or through any other State, Territory, or District, or to any foreign country, any such grain which is sold, or offered for sale, by grade unless the grain shall have been inspected and graded by an inspector licensed under this act and the grade by which it is sold, or offered for sale, be one of the grades fixed therefor in the official grain standards of the United States.

Mr. STONE. Mr. President——

The PRESIDING OFFICER (Mr. OVERMAN in the chair). Does the Senator from Iowa yield to the Senator from Missouri?

Mr. CUMMINS. I do.

Mr. STONE. The Senator from Iowa is telling us about what section 4 contains. I should like to vote for or against this provision before I leave the Chamber. Does the Senator mean to go through the bill by sections at this stage of the proceedings?

Mr. CUMMINS. What is the purpose of the Senator's question?

Mr. STONE. It concerns my personal convenience. If the purpose of the Senator from Iowa is to go through the bill by sections, I——

Mr. CUMMINS. I expect to refer to some three sections of the bill; but while I would be very glad to inform the Senator from Missouri for his own convenience, I do not recognize his right to ask me what I intend to do.

Mr. STONE. I was merely making a polite request for information. If the Senator from Iowa means to go through the bill by sections, I would be glad if he would tell me; and, if he does not—either one way or the other—I would be very much obliged to him.

Mr. CUMMINS. I can not hear the Senator from Missouri.

Mr. STONE. I said if the Senator from Iowa could tell me whether his purpose was to go through this bill by sections and to discuss them, or whether he had one or two matters or more to discuss, it would be a source of great personal convenience to me to know. The Senator need not answer the question I propound; but he would oblige me if he will do so. Of course I mean it in the utmost courtesy. If he can tell me his purpose I shall be obliged to him.

Mr. CUMMINS. I expect to review some three sections of this bill and to point out how I think they would affect the business of my own State. I shall probably require three-quarters of an hour, or possibly an hour, to accomplish the end I have in mind.

Mr. STONE. I am very much obliged to the Senator.

Mr. CUMMINS. If the Senator from Missouri has any desire to take up any other matter, I should not interfere with his pleasure.

Mr. STONE. I have none.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Kansas?

Mr. CUMMINS. I yield.

Mr. CURTIS. I desire to ask a question in reference to section 4 in its amended form, and I should like the judgment of the Senator from Iowa upon it. I desire to know whether or not the inspection must be before the grain is shipped?

Mr. CUMMINS. Under section 4 the inspection must be before the grain is either offered for shipment or shipped. There are exceptions to that section to which I intend to refer.

Mr. CURTIS. Mr. President, I intended to offer an amendment to provide that the inspection shall be before the sale, but I understood the amendments which had been agreed to covered that point.

Mr. CUMMINS. I think not. Mr. President, this general prohibition is against the sale or the consignment for sale or the offering for sale by grade.

Mr. TOWNSEND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Michigan?

Mr. CUMMINS. I do.

Mr. TOWNSEND. Do I understand the sale referred to to be the sale by the farmer who raises the wheat or the sale by the middleman?

Mr. CUMMINS. I am coming to that. I had intended to ask the distinguished chairman of the committee what his view was upon that question, for I think it is a very vital one. I will again read from section 4, and I will read it in the language in which it is now found:

> No person thereafter shall ship or deliver for shipment in interstate or foreign commerce any such grain which is sold, offered for sale, or consigned for sale, by grade unless the grain shall have been inspected and graded by an inspector licensed under this act.

If this prohibition stood unmodified it would paralyze the grain business of this country, and, of course, in my State it would be utterly impossible to transact our affairs. There are certain exceptions in the bill, but before I go to them I assume—and I ask the attention now of the members of the committee—whether the words "ship or deliver for shipment" mean either the delivery or the offer of delivery of the grain to a common carrier for transportation beyond the State? If I am wrong in that assumption I shall be glad if the Senator from Colorado or the Senator from Georgia will correct me at this time.

Mr. SHAFROTH. Mr. President, will the Senator kindly indicate the exact line and page to which he is referring?

Mr. CUMMINS. In the reprint it is found on page 3, line 8. I repeat that the prohibition is against the shipment or delivery for shipment of any grain without inspection, and that the transaction here prohibited is the shipment by or delivery for shipment to a common carrier of grain to be transported beyond the State in which the transaction occurred. Is that the construction which the Senate committee places upon this language?

Mr. SHAFROTH. Mr. President, it seems to me that that is true as to all shipments where the grain is sold by grade.

Mr. CUMMINS. I am speaking only of the shipments in which the grain is sold by grade, because the prohibition relates to that kind of shipments alone.

Mr. SHAFROTH. The right of the farmer, of course, or of any person, to ship the grain by sample or for inspection is preserved in the measure.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from North Dakota?

Mr. CUMMINS. I yield to the Senator from North Dakota.

Mr. GRONNA. I stated the other day, Mr. President, that I feared that the provision would go much further than has been indicated by the Senator from Colorado. When a farmer takes his grain to an elevator he sells it or delivers it for shipment, and I think that, instead of the language applying to delivery to a common carrier, it applies as well to the producer. That is one of the reasons why I was opposed to this provision.

Mr. CUMMINS. Mr. President, the question just suggested by the Senator from North Dakota is one of the questions which has perplexed me with respect to this bill. I instance now the course of affairs in my State: A farmer produces corn. He gathers it at the proper time and stores it in a crib on his own farm in order to cure it or dry it so that it will bear storage in an elevator after being shelled, to be ready for transportation. In that situation oftener than otherwise the farmer sells the corn. He sells it before it is shelled and sells it upon a grade which he believes and which the buyer believes will be finally attained by the corn and for delivery at a certain time. At that time the farmer either shells the corn himself and hauls it to his home market for delivery to the person who has bought it or he transports it in the ear to the home market, and the buyer shells it and either stores it in an elevator or loads it in a car for immediate transportation to Chicago or some other great market.

My doubt with respect to this matter—and it perplexes me a great deal, because, if answered in one way, it would be ruinous to the people of my State—is whether the sale by the farmer to the middleman is covered by the proposed law, and I should like to know before I vote for the measure or against it whether the transaction which I have meagerly described is a transaction within the terms of this measure? The farmer sells his corn either shelled or unshelled; of course, he sells it by the bushel, and a bushel of corn is a certain weight of corn. He sells it upon a grade, believing that the corn will finally reach that grade after being cured. He sells it to a middleman. He does not know whether the middleman intends to send it to Chicago, to be sold upon the Chicago Board of Trade, or whether the middleman intends to send it to Cedar Rapids, to be converted into starch in one of the factories there; but the middleman may, and in many cases does, when the time comes to ship the corn beyond the State. Now, will the Senator from Colorado or the Senator from Georgia or some other Senator who has become familiar with this bill tell me, so that I can assure the men in my State whether the transaction between the farmer and the middleman is covered or is affected by the proposed law? I should like to hear before we have gone much further just to what extent the measure is expected to go.

Mr. SHAFROTH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Colorado?

Mr. CUMMINS. I yield.

Mr. SHAFROTH. If the Senator desires an answer with respect to that, I will say that my construction is that it does not cover the transaction which the Senator has described. In the first place, the transaction is between the farmer and the purchaser of the grain at his home market; the farmer does not know whether it is going to go into interstate commerce at all. The farmer does not sell it upon grade; he sells it by the wagonload, or, as the Senator says, in the cob or shelled, and it seems to me that that character of transaction is not intended to be covered by the provisions of the bill.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Kansas?

Mr. CUMMINS. I yield to the Senator.

Mr. CURTIS. But what if a farmer in Kansas under this provision attempted to ship to Kansas City, Mo., a carload of grain to be sold? This provision contains the words "or consigned for sale" and surely he would come under the provision.

Mr. SHAFROTH. Certainly he would; but that is not the provision to which the Senator from Iowa has referred.

Mr. CUMMINS. I quite agree to that; that is not the case I put to the Senator from Colorado.

Mr. SHAFROTH. The case which the Senator from Kansas puts, it seems to me, clearly would come within the operations of this provision.

Mr. CUMMINS. Mr. President, I believe that the interpretation of the Senator from Colorado is correct. In my opinion a sale by the farmer to the middleman, absolute in its terms, with no power on the part of the farmer to direct the course of the grain after it is sold, without any specific knowledge that the grain is to go into the channels of interstate commerce, would not be governed by the proposed law, and he might sell it by grade without committing an offense even though such a sale is not excepted. There are, however, lawyers who differ radically from me in that respect; and I for one am not willing to leave an important subject of that kind in the uncertainty in which we find it in the bill.

But I proceed now one step further. I will come presently to the exceptions that are proposed in the bill. We have already had the case of the farmer who has produced the grain and who has sold it to the middleman. He may sell it to the middleman before it is grown. There are very many instances in the agricultural business of my State in which the corn grower sells his corn before it is matured.

Mr. SMITH of South Carolina. Mr. President——

The PRESIDING OFFICER (Mr. OVERMAN in the chair). Does the Senator from Iowa yield to the Senator from South Carolina?

Mr. CUMMINS. I do.

Mr. SMITH of South Carolina. Mr. President, having the bill in charge at this time, I wish to ask the Senator if it will be agreeable to him to have an executive session now and to continue his remarks in the morning?

Mr. SMITH of Georgia. Mr. President, I hope we will go on now.

Mr. CUMMINS. It is perfectly agreeable to me if the bill is laid aside.

Mr. SMITH of South Carolina. I move, then, that the Senate proceed to the consideration of executive business——

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Colorado?

Mr. SMITH of South Carolina. Let me finish what I had started to say. I move that the Senate proceed to the consideration of executive business, and that afterwards it take a recess to meet to-morrow morning at half past 11 o'clock.

The PRESIDING OFFICER. The question is on the motion of the Senator from South Carolina.

Mr. THOMAS. I hope that motion will not prevail.

Mr. SMITH of Georgia. So do I. I hope we will go on with this bill to-day.

The PRESIDING OFFICER. The Senator from Colorado has the floor.

Mr. THOMAS. We met here this morning at 11 o'clock, and we have been doing so for several days. We must get through at some time if we are to complete our duties and go home. I can see no reason why we should lay aside this very important bill and take up executive business now, when we can just as well take it up at some other time. I hope the Senate will stay here for some time yet, and I hope that we will meet to-morrow at 11 o'clock and hold our sessions until later in the evening. I shall oppose this motion.

Mr. SMITH of South Carolina. Mr. President, there are several Senators who have given notice in good faith that they desire to have something to say on certain provisions of the bill. It is now 15 minutes to 6 o'clock. I have been requested to ask for an executive session. I now repeat my motion that the Senate proceed to the consideration of executive business, and that when a recess is taken it be until half past 11 o'clock to-morrow morning, to comply with a promise that was made in good faith to those who have left the Chamber.

Mr. OLIVER. Mr. President——

Mr. SMITH of Georgia. I think we will make a mistake if we do not go on with this bill until 7 o'clock to-night.

Mr. CUMMINS. Until what time?

Mr. SMITH of Georgia. Until 7 o'clock. I should like to go on until 9 o'clock.

Mr. SMITH of South Carolina. The Senator would not have a quorum if he did so.

Mr. SMITH of Georgia. I do not know what may happen to-morrow. I do not know how many more speeches will be made. I thought we were nearly ready to vote on this matter.

Mr. SHEPPARD. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator from Texas will state his point of order.

Mr. SHEPPARD. Debate is out of order on a motion to proceed to the consideration of executive business.

Mr. SMITH of Georgia. I think that is true; but it was accompanied also with a motion to take a recess.

The PRESIDING OFFICER. The question is upon the motion of the Senator——

Mr. McCUMBER. I make the point of order that two separate motions have been made.

Mr. SMITH of South Carolina. Then I move that the Senate proceed to the consideration of executive business.

Mr. McCUMBER. Before that is done, will the Senator agree to have the bill reprinted?

Mr. SHEPPARD. A point of order, Mr. President.

Mr. McCUMBER. I would like to have the grain-grades section as it has been amended reprinted.

Mr. SHEPPARD. I insist on the point of order—that debate is out of order on this motion.

The PRESIDING OFFICER. The question is on the motion of the Senator from South Carolina, that the Senate proceed to the consideration of executive business.

Mr. THOMAS. I call for the yeas and nays.

The yeas and nays were not ordered.

Mr. McCUMBER. I ask for a reprint of part B as amended, being the so-called grain-grades section of the pending bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION.

Mr. SMITH of South Carolina. I renew my motion.

The PRESIDING OFFICER. The question is on the motion of the Senator from South Carolina, that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 15 minutes spent in executive session the doors were reopened.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by E. T. Taylor, jr., one of its clerks, announced that the Speaker of the House had signed the following enrolled bills and joint resolution:

H. R. 16287. An act granting the consent of Congress to the county of Sumter, or to the county of Dooly, both of the State of Georgia, acting jointly or separately, and their successors and assigns, to construct a bridge across the Flint River;

H. R. 16641. An act granting the consent of Congress to Julian B. McCurry, A. G. McCurry, P. W. Walton, and J. J. Fretwell to construct a bridge across the Savannah River; and

H. J. Res. 257. Joint resolution permitting the use of certain hospital facilities belonging to the United States.

PETITIONS AND MEMORIALS.

Mr. PHELAN presented a petition of the State Water Problems Conference, of Modesto, Cal., praying for the enactment of legislation to provide for the reclamation of arid lands and authorizing Government aid therefor, which was referred to the Committee on Irrigation and Reclamation of Arid Lands.

Mr. CLAPP presented a memorial of the Daytons Bluff State Bank, the City Bank, the Peoples Bank, the Commercial State Bank, the St. Paul Bank, the Ramsey County State Bank, the Citizens State Bank, the Western State Bank, the Snelling State Bank, the Twin City State Bank, the Security State Bank, the St. Anthony Park State Bank, the Merriam Park State Bank, the Great Northern State Bank, and the Produce Exchange Bank, all of St. Paul, in the State of Minnesota, remonstrating against the enactment of legislation to establish a branch banking system in the United States, which was referred to the Committee on Banking and Currency.

Mr. GALLINGER presented a petition of the New Hampshire State Letter Carriers' Association, praying for the enactment of legislation to grant pensions to employees in the Postal Service, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of Storer Post No. 1, Department of New Hampshire, Grand Army of the Republic, of Portsmouth, N. H., praying for the enactment of legislation to grant increased pensions to widows of veterans of the Civil War, which was ordered to lie on the table.

Mr. FLETCHER presented a memorial of sundry citizens of Plant City, Fla., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

REPORTS OF COMMITTEE ON MILITARY AFFAIRS.

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which was referred the bill (H. R. 16699) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1917, reported it with amendments and submitted a report (No. 651) thereon.

Mr. CHAMBERLAIN. I am directed by the Committee on Military Affairs, to which was referred the bill (S. 2525) to place Bernard A. Schaaf on the retired list of the Army, to report adversely thereon and to ask that the bill be postponed indefinitely.

The PRESIDING OFFICER. The bill will be postponed indefinitely.

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which was referred the bill (H. R. 8267) to place Bernard A. Schaaf on the retired list of the Army, reported it without amendment and submitted a report (No. 653) thereon.

THE COASTWISE TRADE (S. DOC. NO. 492).

Mr. FLETCHER, from the Committee on Printing, reported the following resolution (S. Res. 226), which was considered by unanimous consent and agreed to:

Resolved, That the report submitted by the Interstate Commerce Commission on May 11, 1916, entitled "Corporate Interests of Railroads in Vessels or Steamship Lines Engaged in the Coastwise Trade of the United States," in response to Senate resolution No. 364, adopted May 16, 1914, be printed as a Senate document.

WAGES OF RAILROAD EMPLOYEES (S. DOC. NO. 493).

Mr. FLETCHER, from the Committee on Printing, reported the following resolution (S. Res. 227), which was considered by unanimous consent and agreed to:

Resolved, That the report submitted by the United States Board of Mediation and Conciliation on May 15, 1916, on "The Effects of Arbitration Proceedings upon Rates of Pay and Working Conditions of Railroad Employees," in response to Senate resolution No. 181, adopted May 3, 1916, be printed as a Senate document.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TAGGART:

A bill (S. 6597) granting an increase of pension to Frank T. Bolton; and

A bill (S. 6598) granting a pension to Arthur Franz (with accompanying papers); to the Committee on Pensions.

By Mr. JONES:
A bill (S. 6599) granting an increase of pension to William H. Thompson; to the Committee on Pensions.
By Mr. O'GORMAN:
A bill (S. 6600) granting a pension to Frances I. Wallace; to the Committee on Pensions.
By Mr. OLIVER:
A bill (S. 6601) for the enlargement of the post-office building at Pittsburgh, Pa.; to the Committee on Public Buildings and Grounds.
By Mr. LEA of Tennessee:
A bill (S. 6602) for the relief of John Patrick; to the Committee on Military Affairs.
By Mr. OLIVER:
A joint resolution (S. J. Res. 150) to authorize the Secretary of the Treasury to accept from the city of Pittsburgh certain lands in exchange for other lands of equal area (with accompanying papers); to the Committee on Mines and Mining.

AMENDMENT TO MILITARY ACADEMY BILL.

Mr. O'GORMAN submitted an amendment providing that the present manager of the cadet store shall on his own application after 40 years' service as clerk, superintendent, and manager be entitled to be placed on the retired list of the Army with the pay of a retired pay clerk, Quartermaster Corps, of the same period of service, intended to be proposed by him to the Military Academy appropriation bill (H. R. 16699), which was ordered to be printed and, with the accompanying paper, ordered to lie on the table.

CLAIMS ATTORNEYS.

Mr. JONES submitted an amendment intended to be proposed by him to the bill H. R. 3690, repealing certain sections contained in the urgent deficiency act approved December 22, 1911, which was referred to the Committee on the Judiciary and ordered to be printed.

AMENDMENT OF FEDERAL RESERVE ACT.

Mr. OWEN. Mr. President, I desire to give notice that to-morrow morning I should like to call up the amendments to the Federal reserve act, which have been pending for two months now. I hope the Senate may permit me to dispose of the matter to-morrow morning, during the morning hour. I hope that when the session concludes to-day it will be by an adjournment, rather than by a recess.

RECESS.

Mr. SMITH of South Carolina. I move that the Senate take a recess until 11.30 o'clock to-morrow morning.
The motion was agreed to; and (at 6 o'clock p. m. Monday, July 10, 1916) the Senate took a recess until to-morrow, Tuesday, July 11, 1916, at 11.30 o'clock a. m.

To be second lieutenants with rank from June 13, 1916.

CORPS OF ENGINEERS.

Cadet John Howard Wills.
Cadet Raymond George Moses.
Cadet Wilhelm Delp Styer.
Cadet John Woodman Fraser.
Cadet Charles Holmes Cunningham.
Cadet Dwight Frederick Johns.
Cadet William Arthur Snow.

Cadet Thomas Dewees Finley.
Cadet William Hamilton Britton.
Cadet Elroy Sandy Jackson Irvine.
Cadet Notley Young Du Hamel.
Cadet Wilburn Henry Henderson.
Cadet Robert George Guyer.
Cadet Edward Clark Smith.
Cadet Robert Allen 3harrer.
Cadet Ludson Dixon Worsham.
Cadet Edward Goring Bliss.
Cadet Ralph Gillett Barrows.
Cadet Holland Luley Robb.
Cadet Frederick Walker Bonfils.
Cadet Robert Reese Neyland, jr.
Cadet William Morris Hoge, jr.
Cadet Stanley Lonzo Scott.
Cadet Tattnall Daniell Simkins.

CAVALRY ARM.

Cadet James Knox Cockrell.
Cadet William Spence.
Cadet John White Rafferty.
Cadet De Rosey Carroll Cabell, jr.
Cadet Ralph Irvine Sasse.
Cadet William Ewen Shipp.
Cadet William Hieatt Cureton.
Cadet Fay Brink Prickett.
Cadet Calvin De Witt, jr.
Cadet James Mitchell Crane.
Cadet Lucien Samuel Spicer Berry.
Cadet Victor William Beck Wales.
Cadet Joseph Merit Tully.
Cadet Pettus Harvey Hemphill.
Cadet Hugh Mitchell.
Cadet Robert Le Grow Walsh.
Cadet Clarence Scott Maulsby.
Cadet George Sidney Andrew.
Cadet Roland Paget Shugg.
Cadet Spencer Albert Townsend.
Cadet Craigie Krayenbuhl.
Cadet Arthur Marion Jones.

FIELD ARTILLERY ARM.

Cadet Stanley Eric Reinhart.
Cadet Dean Hudnutt.
Cadet Louis Emerson Hibbs.
Cadet Jesse Frank Tarpley, jr.
Cadet Horace Logan McBride.
Cadet Hamilton Ewing Maguire.
Cadet Ray Corrigan Rutherford.
Cadet William Roscoe Woodward.
Cadet Alfred King King.
Cadet Henry Crampton Jones.

COAST ARTILLERY CORPS.

Cadet Albert William Draves.
Cadet Benjamin Sloan Beverley.
Cadet Frederick James Williams.
Cadet Carl Lee Marriott.
Cadet James Arthur Pickering.
Cadet Hugh Allen Ramsey.
Cadet Willis McDonald Chapin.
Cadet Robert Bruce McBride, jr.
Cadet Paul Vincent Kane.
Cadet Carl Smith Doney.
Cadet James de Barth Walbach.
Cadet Richard Mar Levy.
Cadet Weir Riché.
Cadet Ellicott Hewes Freeland.
Cadet James Cornelius Ruddell.
Cadet Joseph James O'Hare.
Cadet William George Patterson.
Cadet Frank Clark Scofield.
Cadet Ferdinand Francis Gallagher.
Cadet Barrington Lockhart Flanigen.

INFANTRY ARM.

Cadet Latham Loomis Brundred.
Cadet Leslie Thomas Saul.
Cadet Charles Augustus Bayler, jr.
Cadet Fred Beele Inglis.
Cadet Richard Parker Kuhn.
Cadet John Alexander Street.
Cadet Sidney Herkness.
Cadet William Earl Chambers.
Cadet Warner William Carr.
Cadet Thomas Lyle Martin.
Cadet Geoffrey Prescott Baldwin.
Cadet John Bennington Bennet.
Cadet Kenneth Macomb Halpine.
Cadet William Rosser Wilson.
Cadet Raymond Potter Campbell.
Cadet Richard Clarke Birmingham.
Cadet Felix Rosseter McLean.
Cadet John Edward Martin.
Cadet Paul Barrows Parker.
Cadet William Edgerton Morehouse, jr.
Cadet Thomas Green Peyton.
Cadet Joseph Hamilton Grant.
Cadet Arthur Monroe Ellis.
Cadet Maurice Levi Miller.
Cadet Junius Henry Houghton.
Cadet Abram Vorhees Rinearson, jr.
Cadet Benjamin Anthony Yancey.
Cadet Douglas Jenkins Page.
Cadet James Nephew Caperton.
Cadet Charles Compton Smith.
Cadet Harrison Herman.
Cadet George Joseph Newgarden, jr.
Cadet John David Miley.
Cadet William Edwin Coffin, jr.
Cadet John Forest Goodman.
Cadet Spencer Atkins Merrell.
Cadet William Worth Dempsey.
Cadet Robert Kenneth Whitson.
Cadet Otto Frederick Lange.
Cadet Harland Leslie Mumma.
Cadet George Hollenbeck Blankenship.
Cadet Alexander Mathias Weyand.
Cadet Walter David Mangan.
Cadet Robert Rau Duncan McCullough.
Cadet Elon Albert Abernethy.
Cadet Nelson Bateman Russell.
Cadet Henry Parker Blanks.

Cadet Bartlett James to be second lieutenant of Infantry, with rank from June 29, 1916.

MEDICAL RESERVE CORPS.

To be first lieutenants with rank from June 29, 1916.

WITHDRAWALS.

Executive nominations withdrawn July 10 (legislative day of July 7), 1916.

John F. Stunkel to be postmaster at Leesburg, in the State of Florida.
W. F. L. Merrill to be postmaster at Hazleton, in the State of Iowa.
J. P. Delaney to be postmaster at Sea Isle City, in the State of New Jersey.
Alfred P. Hinton to be postmaster at Columbus, in the State of Texas.

HOUSE OF REPRESENTATIVES.

MONDAY, *July 10, 1916.*

The House met at 10 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Lord, deliver us, we pray Thee, from the demon of selfishness, the root of all evil, and fill our souls with a love so deep, so broad, so strong that we shall be impelled to practice the golden rule, the highest, noblest attainment Heaven has set for man, without which peace on earth, good will to man shall never come; without which the kingdom of God shall never be fulfilled. Hear us, O God our Father, and help us to fulfill the law and the prophets by the grace revealed in the Holy One of Israel. Amen.

The Journal of the proceedings of Saturday, July 8, 1916, was read and approved.

LEAVE TO EXTEND REMARKS.

Mr. MEEKER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an article written by the gentleman from Minnesota [Mr. SCHALL].

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD by printing an article by the gentleman from Minnesota [Mr. SCHALL]. Is there objection?

There was no objection.

FUNERAL OF SOLDIERS WHO DIED AT CARRIZAL, MEXICO.

Mr. BENNET. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk, providing for the appointment of the Union and Confederate veterans of the Civil War, and of the Spanish War veterans who are Members of the House, to be a committee to attend the funeral at Arlington of the officers and men of the Tenth Cavalry who died at Carrizal, Mexico.

The SPEAKER. The gentleman from New York asks unanimous consent for the present consideration of a resolution which will be reported by the Clerk.

The Clerk read as follows:

House resolution 297.

Resolved, That the Members of the House who are Union and Confederate veterans of the Civil War, and the Members of the House who are veterans of the Spanish-American war, be, and they are hereby, elected a committee for the purpose of attending at Arlington Cemetery, as a mark of respect on the part of this House, at the funeral of the officers and men of the Tenth Cavalry who died at Carrizal, Mexico.

The SPEAKER. Is there objection?

There was no objection.

The resolution was agreed to.

ONE-CENT LETTER POSTAGE.

Mr. BRITT. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of a 1-cent rate for letter postage by inserting a list of organizations favoring such postage.

The SPEAKER. The gentleman from North Carolina [Mr. BRITT] asks unanimous consent to extend his remarks in the RECORD on the subject of 1-cent letter postage. Is there objection?

There was no objection.

REVENUE.

The SPEAKER. The House automatically resolves itself into the Committee of the Whole House on the state of the Union for the further consideration of the revenue bill, with the gentleman from Illinois [Mr. FOSTER] in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 16763) to increase the revenue, and for other purposes.

Mr. KITCHIN. Mr. Chairman, we have some amendments that we desire to offer this morning.

The CHAIRMAN. The gentleman from North Carolina offers an amendment which the clerk will report.

The Clerk read as follows:

Amendment by Mr. KITCHIN on behalf of the committee: Page 4, line 17, after the word "corporation," insert a comma and the following: "which stock dividend shall be considered income to the amount of its cash value."

Mr. KITCHIN. Mr. Chairman, this was suggested at a meeting of the full committee by the gentleman from Ohio [Mr. LONGWORTH], to make certain the status of stock dividends, and I think it is unanimously recommended by the committee.

Mr. STAFFORD. Mr. Chairman, is this to cure the inequality that was pointed out by the gentleman from Kentucky [Mr. SHERLEY]?

Mr. KITCHIN. No; this is not that one. We will get to that later.

Mr. STAFFORD. What is the real purpose of this amendment?

Mr. KITCHIN. This is to make it certain that when stock dividends are issued, the cash value of those dividends shall be considered as a part of the income.

Mr. STAFFORD. May we have the amendment reported once more, Mr. Chairman?

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

The amendment was again read.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina.

The amendment was agreed to.

Mr. KITCHIN. Mr. Chairman, I present another amendment.

The CHAIRMAN. The gentleman from North Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. KITCHIN: Page 5, line 2, after the word "be," insert a colon and the following:

"*Provided*, That where the income is to be distributed annually or regularly between existing heirs or legatees the rate of tax and method of computing the same shall be based in each case upon the amount of the individual share to be distributed."

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina.

The amendment was agreed to.

Mr. KITCHIN. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from North Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 8, line 25, after the word "made," insert a comma and the following: "but with respect to timber purchased prior to March 1, 1913, a reasonable allowance, not in excess of the fair cash value of such timber on March 1, 1913."

Mr. KITCHIN. I will say, Mr. Chairman, that that amendment is suggested by the minority members of the committee. We think it is a fair and proper amendment. I will say further to the gentleman from Michigan [Mr. FORDNEY] that we have the same amendment to offer in two other places.

Mr. FORDNEY. Wherever those same words appear?

Mr. KITCHIN. Yes.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina [Mr. KITCHIN].

The amendment was agreed to.

Mr. KITCHIN. I offer the following amendment.

The CHAIRMAN. The gentleman from North Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 11, line 10, after the word "made," insert a comma and the following: "but with respect to timber purchased prior to March 1, 1913, a reasonable allowance, not in excess of the fair cash value of such timber on March 1, 1913."

Mr. KITCHIN. That is the same amendment in another place?

Mr. FORDNEY. Yes.

Mr. LONDON. Mr. Chairman, will the gentleman kindly explain the reason for this?

Mr. KITCHIN. The constitutional amendment providing for an income tax went into effect on March 1, 1913, and we think that the value at that time, and not what was paid for it perhaps 10 or 15 years before the constitutional amendment took effect, should control.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina.

The amendment was agreed to.

Mr. KITCHIN. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from North Carolina offers another amendment, which the Clerk will report.

The Clerk read as follows:

Page 13, line 24, after the word "residence," insert "or has his principal place of business."

Mr. KITCHIN. I will say that this is in the present income-tax law and was omitted at this point. We want to restore it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina.

The amendment was agreed to.

Mr. HILL. I would like to ask the gentleman from North Carolina if this gives the option to the taxpayer, or does it give the option to the Government?

Mr. KITCHIN. It gives it to the taxpayer. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from North Carolina offers the following amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 30, line 6, by striking out the colon and all of the matter beginning with line 7 down to and including the word "*Provided,*" in line 16, and insert a comma and the following: "but with respect to timber purchased prior to March 1, 1913, a reasonable allowance not in excess of the fair cash value of such timber on March 1, 1913; and in the case of insurance companies the net addition, if any, required by law to be made within the year to reserve funds and the sum other than dividends paid within the year on policy and annuity contracts: *Provided,* That no deduction shall be allowed for any amount paid out for new buildings, permanent improvements, or betterments, paid to increase the value of any property or estate, and no deduction shall be made for any amount of expense of restoring property or making good the exhaustion thereof for which an allowance is or has been made: *Provided further*"——

Mr. KITCHIN. This puts in the stumpage amendment, and in the print, on page 30, we have in the no-deduction clause the insurance reserve. That should be ahead of the no-deduction provision. They want to be just transferred. It was a mistake in printing.

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. KITCHIN. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from North Carolina offers a further amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 32, line 4: After the word "*further*" and the comma strike out all the matter, beginning with the word "That," down to and including the word "collateral," in line 8, and insert "That in case of indebtedness wholly secured by property collateral, tangible or intangible, the subject of sale or hypothecation in the ordinary business of such corporation, joint-stock company, or association as a dealer only in the property constituting such collateral or in loaning the funds thereby procured."

Mr. KITCHIN. I will say to the gentleman from Wisconsin [Mr. STAFFORD] that that is the Sherley proposition.

Mr. STAFFORD. Does that cover the entire proposition as to taxing them twice?

Mr. KITCHIN. Yes.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. KITCHIN. Mr. Chairman, I offer the following further amendment.

The CHAIRMAN. The gentleman from North Carolina offers a further amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 34, line 7: After the word "made" strike out the colon and all the matter down to and including the word "contracts," in line 16, and insert a comma and the following: "but with respect to timber purchased prior to March 1, 1913, a reasonable allowance, not in excess of the fair cash value of such timber on March 1, 1913; and in the case of insurance companies the net addition, if any, required by law to be made within the year to reserve funds and the sum other than dividends, within the year on policy and annuity contracts: *Provided,* That no addition shall be allowed for any amount paid out for new buildings, permanent improvements, or betterments made to increase the value of any property or estate, and no deduction shall be made for any amount of expense of restoring property or making good the exhaustion thereof for which an allowance is or has been made.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was considered and agreed to.

Mr. KITCHIN. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 55, line 12, strike out "sixty" and insert "ninety."

Mr. KITCHIN. I will say to the gentleman from Michigan that this is in accordance with the suggestion made to change it from 60 to 90 days and give a year and ninety days.

The question was taken, and the amendment was agreed to.

Mr. KITCHIN. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, on page 61, line 23: After the word "ore" insert "or copper concentrates."

Mr. STAFFORD. Mr. Chairman, I desire to ask a question as to the amendment just adopted, changing the time when the penalty should attach to those in default of paying inheritance taxes from 60 to 90 days. Do I understand that the person obligated to pay the tax is given a year and 90 days in which to do so?

Mr. KITCHIN. Yes, sir.

Mr. STAFFORD. What is the idea in granting an additional 90 days to the year in which they have to pay the taxes?

Mr. KITCHIN. Because in several of the States in the settling up of an estate they have a year and three months. In other words, they have 15 months in some States in which to settle and in which claims against the estate can be filed.

Mr. STAFFORD. Under this provision the executor or administrator has the privilege of paying the amount at any time without an order of the court.

Mr. KITCHIN. Yes, at any time.

Mr. STAFFORD. So the gentleman is granting additional time of 30 days before penalty attaches?

Mr. KITCHIN. But if he pays within a year he gets 5 per cent discount.

Mr. STAFFORD. I understand. The gentleman is just extending the time 30 days more?

Mr. KITCHIN. Yes.

Mr. McLAUGHLIN. Will the gentleman yield further?

Mr. KITCHIN. I will.

Mr. McLAUGHLIN. It often happens there is difficulty in settling estates and collecting the assets of the estate, and of course until the assets have been collected one can not tell whether the bequests that have been made and inheritances to be received will be available to be paid in full or not. Would it not be advisable to have a proviso saying that on the certificate of the judge of the court—I have the wording in mind—that the condition of the estate is such that the exact amount can be determined?

Mr. KITCHIN. We have that provision further on in the bill just exactly carrying out the gentleman's idea; so that at any time after the administration begins the administrator can pay what he thinks will be the proper or sufficient amount, and if he pays too much the Commissioner of Internal Revenue will pay it back without red tape.

Mr. STAFFORD. I call the gentleman's attention to lines 15 to 22, page 55, which cover that matter.

Mr. KITCHIN. That is correct.

Mr. MANN. Will the gentleman yield for a question in that connection?

Mr. KITCHIN. Yes.

Mr. MANN. The inheritance tax runs against the value of real estate?

Mr. KITCHIN. Yes; the whole estate, real, personal, mixed.

Mr. MANN. Suppose an estate consists almost exclusively or exclusively of real estate. It may take some time to sell the real estate and pay the taxes.

Mr. KITCHIN. Yes. The smallest estate that is taxed under this bill after paying all debts must be over $50,000 net, as an exemption of $50,000 is allowed, and I imagine that the executor or administrator of such an estate could borrow money enough to pay taxes without trouble.

Mr. MANN. I do not know under what authority the gentleman thinks the administrator could go out and borrow money to pay taxes.

Mr. KITCHIN. In every State in the Union they can do that. They would do it in order to make the 5 per cent premium or discount, if such an estate had no cash on hand.

Mr. MANN. What security would he give?

Mr. KITCHIN. Any executor or administrator, if the estate is worth over $50,000 net, can go out and get enough to pay the 1 per cent tax.

Mr. MANN. I do not imagine he could do anything of the kind.

Mr. GREEN of Iowa. Will the gentleman yield further?

Mr. KITCHIN. I will.

Mr. GREEN of Iowa. I think the suggestion made by the gentleman from Michigan [Mr. McLAUGHLIN] is rather better than the form provided in the bill. Now, in the bill it is provided that the question of delay shall be determined by the collector. In my opinion it would be much better for the judge of the court to determine whether the estate was in condition to make payment in the manner the gentleman from Michigan suggested.

Mr. KITCHIN. I think it is a great deal more convenient and a great deal less expensive to an administrator by permitting the collector to determine the question of delay than for him to go into court. We considered that and thought this was a good deal more convenient to the taxpayer and a great deal less expensive than going to the court for a determination in the matter.

Mr. GREEN of Iowa. There would not be any expense involved——

The CHAIRMAN. The time of the gentleman has expired.

Mr. KITCHIN. I think it had better remain like it is in the bill.

Mr. ELSTON. Will the gentleman yield?

Mr. KITCHIN. I will.

Mr. ELSTON. In connection with this estate tax, I would like to ask the gentleman a question. On page 53, lines 8 to 14, there is a clause to the effect that any transfer made by the decedent——

Mr. KITCHIN. What page?

Mr. ELSTON. Page 53, lines 8 to 14, inclusive.

Mr. KITCHIN. Now, in what line?

Mr. ELSTON. Lines 8 to 14, inclusive, beginning with the word "any." The gentleman will notice that any part of the decedent's estate that is transferred within four years prior to his death is presumed to be subject to tax, whether his death is imminent at the time of the transfer or not. Any property that may be given, we may say, to a daughter on her marriage or by gift to the wife within four years of decedent's death, although the transfer is made during full and perfect health and not in contemplation of death, is presumed to be taxable if there is not a full consideration in money or money's worth.

Mr. KITCHIN. If it is a gift four years before his death, there is a presumption that it is given or transferred in contemplation of death. I will say that two-thirds of the States that have an inheritance tax have substantially similar provisions, and if we did not have that provision in the gentleman can see what great fraud could be perpetrated upon the estate-tax law.

Mr. ELSTON. I differ with the gentleman about that. This changes the presumption and is a departure from the usual provisions in the laws of the States.

Mr. KITCHIN. It is to be presumed, unless the contrary be shown.

Mr. ELSTON. How is the contrary to be shown? By a quiet title suit on the part of the transferee?

Mr. KITCHIN. Just exactly like any deed or conveyance presumed to be fraudulent unless shown to the contrary.

Mr. ELSTON. Let me present one great difficulty to the gentleman in this connection. This will cloud every title that is transferred by any decedent without a money consideration, or the equivalent of it, because there is no possibility of telling whether or not the grantor will die four years thereafter; and any transfer made by any man living, without the consideration of money, or money's worth, will be presumed to have the Federal inheritance-tax lien upon it, and it will require a quiet title to clear the property of this cloud.

Mr. KITCHIN. The gentleman has not read the section.

Mr. ELSTON. I have read the section. I say that it clouds every title that is transferred after the passage of this act.

Mr. KITCHIN. If it is given away within four years before the death of the donor it is simply presumed to have been given in contemplation of death, unless the contrary is shown; that is, such presumption may be rebutted.

Mr. ELSTON. I say that, so far as I can recollect, it is entirely contrary to any collateral inheritance-tax law in any State statute. The State laws do not militate against a gift or any kind of transfer for a good consideration. As this clause stands it will cloud every title transferred after the law goes into effect.

Mr. KITCHIN. Making the statement that this provision is contrary to the inheritance-tax law of every State is evidence that the gentleman is unacquainted with the inheritance laws of the States.

The CHAIRMAN. The amendment offered by the gentleman from North Carolina [Mr. KITCHIN], on page 61, has not been adopted.

Mr. HAYDEN. I would like to have the amendment reported.

The CHAIRMAN. The Clerk will again report the amendment.

The Clerk read as follows:

Page 61, line 23, after the word "ore," insert "or copper concentrates."

Mr. HAYDEN. I would like to inquire of the chairman the purpose of the amendment.

Mr. KITCHIN. This is considered to cover copper in rock that is not in ore and which ought to be taxed.

Mr. HAYDEN. I am opposed to the entire tax.

Mr. KITCHIN. We will reach that later.

Mr. STEPHENS of Texas. Mr. Chairman, I desire to make this suggestion: I think it would be proper to change it in this way, "for every person smelting or concentrating copper ore."

Mr. KITCHIN. We have had that up, but we thought that this was the proper way to put it.

Mr. STEPHENS of Texas. It may be technically correct. They have smelting plants and concentrating plants.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina [Mr. KITCHIN].

The question was taken, and the amendment was agreed to.

Mr. KITCHIN. Mr. Chairman, I send the following amendments to the desk.

The CHAIRMAN. The Clerk will report the first amendment.

The Clerk read as follows:

Amend, on page 84, by striking out all of lines 24 and 25 and, on page 85, strike out lines 1, 2, and 3, and insert:

"Manufacturers of cigarettes shall each pay at the rate of 3 cents for every 10,000 cigarettes or fraction thereof."

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina.

Mr. STAFFORD. I would like to have the gentleman explain whether this reduces the tax which the manufacturers of cigarettes are obliged to pay under existing law or whether it increases it?

Mr. KITCHIN. It increases it in this way: Under the existing law there is a flat license tax. Under that the small fellows paid at the rate of 20 or 25 cents—and sometimes more—per 10,000, but the biggest fellows only paid at the rate of about one-third of a cent for every 10,000.

I will give you an illustration. Liggett & Myers, who make 7,000,000,000 cigarettes a year, under the present law pay only $2,496 as a flat tax, which would only equal about a third of a cent for every 10,000. Under this bill they would pay about $21,000.

Mr. STAFFORD. Will the gentleman from North Carolina inform the House whether the manufacturer of cigarettes—the small manufacturer—will pay a higher rate than under the existing law by reason of these new provisions?

Mr. KITCHIN. The small manufacturer would pay a lower rate and the large manufacturer would pay a higher rate under the pending bill than under the present law.

Mr. STAFFORD. Under the present law where the annual sales do not exceed 2,000,000 they pay $24 a year, while under the proposed law they would pay 25 cents for every 10,000 cigarettes?

Mr. KITCHIN. No; it would be less for the small fellows; only 3 cents per 10,000 under the proposed bill. All manufacturers would pay at same rate for 10,000.

Mr. STAFFORD. Would that be a greater amount than under the existing law?

Mr. KITCHIN. That would be less for the small fellows, who make a relatively small quantity.

Mr. STAFFORD. Then is it the idea that these small cigarette manufacturers need encouragement and should not be taxed?

Mr. KITCHIN. No; that is not the purpose. It is to equalize the taxation. Now they pay 25 cents and over, while the big ones pay only from one to one-third of a cent per 10,000. Does the gentleman object to that?

Mr. STAFFORD. I am opposed to having their taxes reduced from the present rate. Now, one further question. What is the total amount estimated that will result from the large manufacurers as compared with the existing revenue?

Mr. KITCHIN. It will be from $30,000 to $40,000 more from the large manufacturers.

Mr. STAFFORD. Thirty thousand, not thirty million?

Mr. KITCHIN. Yes.

Mr. STAFFORD. A great amount.

Mr. KITCHIN. We are collecting from them over twenty millions in addition to the proposed tax. This is simply a license tax.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from North Carolina.

The amendment was agreed to.

Mr. KITCHIN. Mr. Chairman, I send up another amendment.

The CHAIRMAN. The gentleman from North Carolina offers another amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 89, in line 3, by striking out the word "other."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from North Carolina.

The amendment was agreed to.

Mr. KITCHIN. Mr. Chairman, I send to the Clerk's desk the following amendment.

The CHAIRMAN. The gentleman from North Carolina offers another amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 89, line 10: After the word "title" and the comma insert "and provided for in the paragraphs in the act of October 3, 1913, which are hereinafter specifically repealed by section 402," and a comma.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from North Carolina.

Mr. STAFFORD. Mr. Chairman, will the gentleman kindly give some explanation on that?

Mr. KITCHIN. Yes. In this proposed bill medicinals would be only 15 per cent, and by that change it would throw it back to the 25 per cent ad valorem rate, as the law is now.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from North Carolina.

The amendment was agreed to.

Mr. MAGEE. Mr. Chairman, I move to amend by striking out the last word on page 51, line 10.

The CHAIRMAN. The gentleman from New York moves to strike out the last word.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and the Speaker having resumed the chair, a message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had approved and signed bills and joint resolutions of the following titles:

On July 6, 1916:

H. R. 14303. An act making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes.

On July 8, 1916:

H. R. 228. An act to amend the United States homestead law in its application to Alaska, and for other purposes;

H. R. 6923. An act to authorize the construction, maintenance, and operation of a bridge across Little River at a point where the line between townships 12 and 13 north, range 8 east, crosses said river;

H. R. 7256. An act providing for the refund of duties collected on certain tobacco cuttings;

H. R. 7430. An act for the relief of William Foglio;

H. R. 9615. An act to reimburse certain Indians for labor done in building a schoolhouse at Queets River, Quiniault Indian Reservation, in the State of Washington;

H. R. 10849. An act granting the consent of Congress to Ashley County, Ark., to construct a bridge across Bayou Bartholomew;

H. R. 10925. An act authorizing Ashley County, Ark., to construct a bridge across Bayou Bartholomew;

H. R. 12362. An act granting the consent of Congress to the Dallas & Southwestern Motorway Co. to construct a bridge across the Brazos River in the State of Texas;

H. R. 12954. An act for the establishment of Northport, Chopaka, and Laurier, in the State of Washington, as ports of entry for immediate transportation without appraisement of dutiable merchandise;

H. R. 13715. An act granting the consent of Congress to C. M. Simpson, Z. T. Hedges, J. C. Hackney, and Mark Brown to construct a bridge across Bayou Bartholomew, Ashley County, Ark.;

H. R. 14484. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war;

H. R. 14630. An act to quiet title in certain citizens to certain lands lying within the meander line on the St. Francis River, and being parts of lots and tracts of land lying in Craighead County, Ark.; and

H. R. 15347. An act to amend existing laws relating to the use of alcohol, free of tax, by scientific institutions or colleges of learning.

REVENUE.

Mr. MAGEE. Mr. Chairman, am opposed to this bill. The several subjects bunched together therein should be considered upon their merits in separate bills. This bill is a hodgepodge of ill-considered legislation, the most of which ought to be relegated to the political junk heap. [Applause on the Republican side.] I am especially opposed to the transfer tax upon estates. That source of revenue ought to be left to the several States. No such emergency exists as can justify the Federal Government in committing itself to such method of taxation.

The report of the committee states that 30 States have laws imposing inheritance taxes both upon direct and collateral heirs, and that 12 other States have laws imposing inheritance taxes upon collateral heirs. One of the 30 is New York. The report further states that the inheritance-tax laws of the various States have never been a source of large revenue. This statement may seem true to the party in power, that has during this session of Congress voted millions upon millions of dollars from the Public Treasury for projects not pressing or experimental, and not having anything to do with the question of preparedness. However, as concerns New York, and as we view it, the inheritance-tax law is a source of large annual revenue. The net amount of such tax for the year ending September 30, 1915, was $8,263,893.67, and for the year ending September 30, 1914, $11,162,478.40.

The total expenditures of New York for the year 1914 amounted to $116,893,469.95, and for the year 1915, $94,902,371.71. The material difference in expenditures for the two years is accounted for in an increased expenditure in 1914 for canal and highway purposes.

While a Federal transfer tax upon estates would not be in New York legally double taxation, yet it would be, as a matter of fact, double taxation, and create a condition that eventually would probably result in depriving the State of such source of revenue. The property of the people can not be confiscated, and the Federal Government should not attempt to exercise its sovereign power in taxation unnecessarily, and to the great detriment and embarrassment of the States.

The report of the committee estimates that for the year ending June 30, 1917, the revenue from this source will be $17,000,000. By June 30, 1917, existing conditions are likely to be entirely changed and laws then in force may be amply sufficient to provide all revenue required. Further, if this sum is deemed necessary, it can be provided in other ways.

The committee estimates that $125,000,000 will be needed to meet expenses occasioned by the Mexican situation. Since March 4, 1913, we have had two wars with Mexico. [Laughter on the Republican side.] The cause of the first war was Huerta's refusal to salute the flag. We attacked and captured Vera Cruz, with a loss of some 19 men, and at an expenditure of millions of dollars. Finally, after making the city sanitary, upon the demand of the de facto President of Mexico we evacuated Vera Cruz and our forces came home. But I have not heard yet that Huerta saluted the flag.

The cause of the second war was the attempt of our Government to catch a bandit with an army. It is proverbial that an army "crawls upon its stomach," and it is not apparent to the average mind how an army could catch a bandit. I do not know how many men we have lost, or how many millions of dollars have been expended in this second expedition; but it looks as if this war terminated at Carrizal, where our brave troopers were ambushed and shot to pieces. Happily, it looks now as if the two contending Governments will have a love feast, resulting in the American troops backing out of Mexico.

As substantially all American property and money in Mexico have been already confiscated, it is now proposed, if one can rely upon the press, that Americans be again encouraged to put additional money into Mexico for further confiscatory purposes. [Laughter.]

Thus it will be seen that the $17,000,000 desired could probably under existing conditions be saved from the estimated amount for the Mexican situation, or, if desired, be included in any proposed bond issue.

If a protective tariff should be enacted, probably six times $17,000,000 could be raised in one year, paid by foreigners, to the great relief of our own heavily burdened taxpayers. [Applause on the Republican side.] However, you can hardly expect protection from the Democratic Party. You can not cause a leopard to change its spots any more than you can make a whistle out of a pig's tail or a silk purse out of a sow's ear. [Laughter.]

This bill proposes to repeal some of the stamp taxes now in force under the concurrent resolution extending the stamp-tax act to December 31, 1916. The people are accustomed to these taxes, and if additional revenue is needed, this act should remain in force temporarily. However, it seems to me that you are bent upon such repeal because you think it politically expedient to do so.

Thus no substantial reason exists for the Federal Government entering upon the policy of taxing estates. Furthermore, there may be grave doubt as to whether such an enactment would be constitutional.

Subdivision 4 of section 9 of Article I of the Federal Constitution provides:

> No capitation or other direct tax shall be laid unless in proportion to the census or enumeration hereinbefore directed to be taken.

The sixteenth amendment to the Federal Constitution provides:

> The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States and without regard to any census or enumeration.

The State of New York has always borne her full burden in large expenditures for the public benefit. The State is now completing the Barge Canal at a cost of some $130,000,000, which will be of great benefit to the country at large. New York City is a great gateway for immigration into this country, and the State pays the cost for the maintenance of the alien insane

within its borders, an expense that ought to be borne by the Federal Government. The average net cost per year to the State for the maintenance of the alien insane for the last four years is $2,602,634.

So I urge that you leave to the States, as sources of revenue to meet their ever-increasing expenditures, the taxation of estates. If you persist in a continuation of this kind of legislation you soon will find New York as rock-ribbed Republican as Pennsylvania. [Applause on the Republican side.] When you consider that of the money raised by the Government by direct taxation, New York alone pays materially more than one-third thereof, it is apparent that the State is overburdened with governmental taxation and the raising of funds for distribution in other States.

From the Dominion to Pennsylvania, from Lake Erie to Montauk Point, the cry goes forth, "Give us a legislative rest." [Applause and laughter on the Republican side.]

Mr. COX. Mr. Chairman, this is the best revenue measure ever reported to Congress, barring none. It is the first successful attempt to make wealth bear its just and proportionate burden of taxation. It is full of patriotism, and stamps its authors as men of unquestioned ability and integrity. It should command the earnest and loyal support of every Member of the House, without regard to politics, creed, or religion; but when the roll is called few will be the names of the Republicans who will support it. Many Members on that side of the Chamber are unable to give a satisfactory reason why they oppose it, but, like the gentleman from Michigan [Mr. FORDNEY], who labored for one and a half hours explaining his objections to it, finally summed up his arguments by saying, "It is a Democratic measure, and that is enough to justify me to vote against it." In looking over the long list of wise constructive measures passed during this administration the gentleman from Michigan is the one stalwart of stalwarts who has never voted for a single one of these measures. All that the gentleman from Michigan wants to see is the word "Democrat" written into a measure and he immediately lines up against it. [Laughter.] My friend from Connecticut [Mr. HILL], for whom I have great affection, should give his earnest and loyal support to the measure as it now stands. At the opening of Congress last December he was early upon the floor in his logical and forceful way telling the House and the country of the direful conditions soon to befall us unless Congress acted promptly in increasing the rates of duty upon dyestuffs. I listened to his speech with rapt pleasure and attention, and the facts adduced by him convinced me of the justness of his cause, and from that day until this I have ardently believed Congress should increase the rates of duty upon dyestuffs in order to keep our manufacturing plants going in this country which use dyestuffs. The gentleman is a member of the Ways and Means Committee, and he and his colleagues on the committee have reported in this bill a provision increasing the rates of duty on dyestuffs giving all the protection needed, and perhaps more. Yet the gentleman launches into an attempted vehement criticism of the bill. He argued long and loud the nonnecessity of legislation of this kind, produced a lot of ancient history and figures to prove the unsoundness of his logic, all of which the country to-day is not interested in at all. I wonder whether or not his real objection to the bill is not bottomed upon the fact that the bill imposes a small tax upon munitions of war, at least 50 per cent of which is manufactured in New England, and a very large part of which is manufactured in the gentleman's own State—Connecticut. [Laughter.]

The rates of duty upon munitions of war are exceedingly low. They could have been much higher, and the country would have unanimously approved of it. The gentleman from Connecticut went into voluminous statistics endeavoring to show the failure of the Underwood bill, both as a revenue producer and failing to protect the laboring men of the country. In the course of his remarks he said 69,000 freight cars were idle in the spring of 1914, and that a large number of people were maintained at public expense, one of these places being maintained in his own town, a thing unheard of prior to that time. Elaborately he undertook to place all these conditions at the door of the Underwood tariff, holding it and it alone responsible for conditions existing at that time. But the gentleman from Michigan and the gentleman from Connecticut are not the only false prophets sitting upon that side of the Chamber. [Laughter.] Three years ago these false prophets filled columns upon columns of the CONGRESSIONAL RECORD prophesying the awful and frightful conditions which would overtake and swallow up the country in a perfect holocaust if the Underwood bill became a law, but out of their own mouths they stand dumbfounded and confused to-day by the indisputable facts following the enactment of the Underwood bill into law.

If the Underwood bill was the sole cause of business depression three years ago, it is equally fair to give it credit for bringing about the unequaled and unexampled prosperity in the country to-day.

Mr. Chairman, in my judgment the people are too busy to-day to either review or study past conditions; they are not giving a rap about what happened 100 years ago, 50 years ago, 20 years ago, or even 3 years ago; they are too busy at work at the present time. [Applause on the Democratic side.] What is going on now? What are the people doing? Is labor universally employed, or is there an army of unemployed labor throughout the land? What is the outlook for to-morrow or the future? These are questions confronting the American people to-day. The people are more interested to-day in trying to fill orders than they are in past history.

Long ago I was taught "Beware of false prophets who appear in sheep's clothing but inwardly are ravening wolves." [Laughter.]

I would advise these false prophets not to live in dreams of the past, not to have nightmares about past events, not to see ghosts and hobgoblins of a century ago, but to live in the present, observe things round and about them to-day as they really are, and in the language of Judge Gary and the late lamented James Hill, "Don't talk; go to work."

How many freight cars are now idle in the United States? Not one. For months and months every seaport terminal in the United States, and every sidetrack leading to every seaport has been gorged with freight cars for 50 miles distant awaiting their turn to unload goods produced on American farms and in American mines, mills, and factories for both home and foreign trade. Under the tremendous volume of business done under the Underwood bill transportation systems on land and on water have completely broken down; railways are unable to handle the freight and passenger traffic; two bills are on the calendar awaiting their turn to be enacted into laws to study the railway transportation traffic with a view of facilitating both internal and external commerce. How many idle men are there in the United States to-day? In every city on every billboard, almost at every street crossing, including the city of the gentleman from Connecticut, are all kinds of signs and ads, "All kinds of men wanted for all kinds of jobs." Every man and woman in the United States who wants to labor has a job with the best wages ever paid, with full dinner pails, working shorter hours, in better sanitary conditions than were ever known in the history of the American Government under the highest protective tariff ever passed by Congress. For months every big daily paper in Boston, New York, Philadelphia, Chicago, and all the other cities carry the following ads: "Five thousand carpenters wanted; 10,000 construction men wanted; 50 000 brick and stone masons wanted at the highest wages ever known." The call is for all kinds of labor, skilled and unskilled. The anthracite coal fields of Pennsylvania are calling them; the bituminous coal fields of Ohio, Indiana, Illinois, and Kentucky are calling them; the wheat fields of Kansas, Nebraska, the Dakotas, Minnesota, Illinois, and Indiana are sending up the same signals of distress, calling for laborers in the fields at the rates of $3 per day and board. [Applause on the Democratic side.]

Mr. CLINE. Will the gentleman yield?

Mr. COX. For a brief statement.

Mr. CLINE. The New York World on Sunday contained 48 columns of solid type of advertisements "Help wanted."

Mr. COX. That is the story, the same story, from the Atlantic to the Pacific. More laboring men have bought and paid for homes under the Underwood bill than during any similar time under the highest protective tariff ever known in the country. More laboring men have bought and paid for automobiles during the existence of the Underwood bill than was ever known in the history of this industry. Never in the history of the American steel industry was this business so thriving as it is to-day. Orders for steel for home consumption are to-day being sold 18 months in advance.

Every steel mill in the United States able to make a pound of steel is running at full capacity, many of them double shifts, some of them treble shifts, and yet unable to supply the American demand for steel. The big coal operators throughout the Nation are now, and for several months past have been, making five-year contracts for full delivery of their output. With every bank in the United States—Federal, State, private, and trust companies—bursting with gold, cheap money, cheap interest on long-time investments, with banks seeking opportunities to make investments not only at home but abroad, American capital is going to South America seeking investments as never before in the history of the Western Hemisphere. It is no time for calamity howling or criticism by either the gentleman from Michigan or the gentleman from Connecticut, or anyone else. [Ap-

plause on the Democratic side.] The people are too busy at work to take any counsel of the past whatever. Never did a President utter a more truism than did President Wilson in his message to Congress prior to the enactment of the Underwood bill, when he said:

> The time has come for us to unshackle commerce, free it, and let it reach to the remotest corners of the earth.

Congress, acting upon the wisdom of his advice, enacted the Underwood bill into a law, and American commerce is now flowing to every corner of the earth, bringing home products not produced here, and which our people must have in order to make them prosperous. To-day, under the Underwood bill, 100,000,000 people stand up and testify as a unit to prosperity unequaled and unheard of through all the history of the past. The necessity for this legislation is apparent to all. Had it not been for the abnormal increases of the Army and Navy, both of which were supported by Republicans and Democrats, there would be no necessity for the increased income-tax rates, no necessity for the inheritance tax, or even a tax upon munitions of war. The current revenues would easily have met the ordinary expenditures of the Nation. At the close of the current year, June 30, there was a balance in the general fund of the United States Treasury of $170,000,000, the largest balance at the close of any fiscal year for the past 20 years except one. And yet our Republican friends say, "Failure, failure." Not one of them believes it, but it is the old campaign cry of the past. [Applause on the Democratic side.]

The Army appropriation bill for last year carried $101,000,000. The bill as reported to the Senate this year carries $325,000,000, an excess of $225,000,000 over last year. The naval bill last year carried an appropriation of $151,000,000. This year the bill as it passed the House carried an appropriation of upwards of $272,000,000, and as reported to the Senate this year it carries $322,000,000, an excess this year over last of $171,000,000, making a necessary increase in appropriations of these two items alone of approximately $400,000,000.

The appropriation bill for fortifications last year carried an appropriation of $8,000,000; this year $34,000,000, an increase of $26,000,000 over last year.

These are abnormal and unexpected appropriations, throwing an additional strain on the Treasury in appropriations for the defense of our country of more than $425,000,000. These increased appropriations have to be met. The bills must be paid, money must be raised, and it can only be raised by taxation, and the question must be met, How is this money to be raised? Shall it be raised by taxing the necessities of life, increasing the burdens of the poor, or shall the money be raised by compelling wealth to stand its equitable proportion of this vast increase in appropriations? The Democratic members of the Ways and Means Committee have patriotically met the issue and submit the bill under consideration. The issues are made up, the line of cleavage between the two parties is well defined. The Democratic Party, following the modern progressive, humane course, is asking that the wealth of the country be not ruinously taxed, but that it be taxed in order that it pay its just dues. [Applause on the Democratic side.] The Republican Party, adhering to its old worn-out and threadbare arguments, contend that everybody should be taxed—the weak, the poor, the lowly, the humble, the wage earners—not in proportion to his wealth but in proportion to his consumption of the necessities of life, and equally contend that this measure will impose undue and burdensome hardships upon those who through class legislation have grown wealthy beyond the dreams of avarice. The Republican Party says, "Tax everything, from the swaddling clothes in which the babe is wrapped to the shroud in which it is finally buried." The Democratic Party answers and says, "Tax the swollen fortunes of the immensely wealthy and death-dealing missiles of munitions of war." [Applause on the Democratic side.]

Mr. Chairman, on this issue alone the Democratic Party submits the issue with sublime confidence that the people at the next November election will indorse its course and return the Democratic Party to power from the White House to the Congress of the United States. To meet this increased burden of taxes the Ways and Means Committee proposes three methods to raise the money—first, to increase the rate of tax; second, to impose an inheritance tax; third, to place a tax on munitions of war. Under the increased income tax it is proposed to raise $107,000,000 additional revenue, under the inheritance tax it is proposed to raise $17,000,000 this year, and under the tax on munitions of war it is proposed to raise $71,000,000; under the item of miscellaneous taxes it is proposed to raise $2,000,000, making a total of $197,000,000 to be raised under this bill, not upon the wealth of the Nation but upon those best able to pay. No patriotic man or woman can oppose an increased income-tax rate. Any man with a net income of $3,000 per year ought to be willing, without a murmur or protest, to readily pay the increased income-tax rate imposed upon him in this bill. Why should not inheritances be taxed? What sound logic or reason can be made against it? It is not within the ability of any human being in the short course of one human life to amass a fortune of $100,000,000, much less a fortune eight times this amount, if recent reports of newspapers can be believed, unless he has been favored by special legislation inuring to his direct and immediate benefit and of which he has been quick to avail himself. Fortunes of this magnitude have never been worked out by the individual brain of man. They have been worked out through a combination of brains taking advantage of special legislation and special conditions to the injury of the many. It is not fair, nor is it just, in either morals or reason, to transmit to posterity these abnormal fortunes. [Applause on the Democratic side.] Instead of benefiting posterity it does it a positive injury; instead of benefiting the immediate recipients it does them a positive wrong. It breeds up in this country a class of unproductive men and women without energy, without initiative, without knowing any of the hardships or toils of life. It makes them consumers instead of producers. It throws additional burdens upon the producers of wealth which is unjust. No person should be permitted to transmit to his or her posterity fortunes amounting to $100,000,000. A large part of it should be taken by the Federal Government in the way of inheritance taxes and put in the Treasury of the United States, and to this extent relieve the toiling masses of taxation. I recently observed in the press of the passing away of a prominent lady in New York, leaving a fortune estimated from $80,000,000 to $100,000,000, and at this very moment the dread disease of infantile paralysis is raging like a fire in New York City among the poor, underfed, underclothed, undercared-for people. It is unjust, un-American, and undemocratic to let such tremendous fortunes as this be transmitted to her heirs without an inheritance tax laying its hands upon a part of her estate.

The proposed tax on munitions of war is a most just, wise, and humane tax. The idea of taxing the necessities of life, food, raiment, medicine, shelter, and letting deadly and dangerous missiles of war go untaxed, as they have gone in the past, is contrary not only to the principles of our form of government, but is inhuman, unbelievable, unthinkable. [Applause.] My one regret is that the tax is not high enough upon this item, even though Hudson Maxim, president of one of the munitions of war trusts, may characterize legislation of this kind as a crime. But I would prefer taxing the output of Hudson Maxim and the Du Pont Powder Trust than to tax the necessities of life. The idea of taxing sugar, clothing, medicines, and permitting revolvers, powder, dynamite, swords, and sabers to go untaxed to me is unthinkable, uncomprehendable, and, if I had my way about it, a tax upon munitions of war would bear a very large part of the burden of taxes in this country. I would tax them to the limit, and see to it that the bills were promptly paid. [Applause on the Democratic side.]

Mr. Chairman, strenuous objection has been waged against this bill by the able gentlemen from New England, Mr. HILL, of Connecticut, and Mr. GILLETT, of Massachusetts. Strenuous objections have been waged against it by the gentleman from Pennsylvania [Mr. MOORE] and by the gentleman from Illinois [Mr. MADDEN] and many others. They have argued the unjustness of the income tax, the inheritance tax, the tax upon munitions of war. They have sought to raise sectionalism; they have placed figures in the CONGRESSIONAL RECORD showing that a large part of the income tax is paid by these four States; but let me remind these gentlemen that the cotton fields of the South, the wheat fields of the West and Northwest, the corn belt of the great Mississippi Valley, our mines and ore beds of the West, worked by the hand of labor, have poured into these States raw materials which have produced the wealth in these States, and instead of making a sectional argument defending their States against payment of this income tax they should be proud of it, and instead of these States condemning this legislation through their respective Members in the House they should commend the measure by showing their patriotism, that while they are in favor of putting our country in a state of preparedness they are not only willing but anxious to stand their part of the cost. The gentleman from Chicago, Mr. MADDEN, as well as others, have criticized the Democratic Party not only for its incompetency but for its extravagance. The gentleman from Chicago, Mr. MADDEN, says we could have saved $255,000,000 by practicing economy, and to make up this item he says we appropriated $20,000,000 for a nitrate plant, and yet the gentleman voted for it. He says we have appropriated $75,000,000 for good roads. In this he is mistaken. Only five millions will be appropriated

this year for this purpose, and yet the gentleman voted for the bill when it passed the House last January.

He says we have thrown away $11,000,000 for the building of an armor-plate factory, and yet the gentleman voted for it. [Applause on the Democratic side.] It is hardly fair for any Member of this House to criticize the Democratic Party for making appropriations when he by his vote has assisted in doing it.

The gentleman further says that we have levied $44,000,000 upon the Treasury to pay the salaries of 30,000 useless places created outside the civil service. In this criticism the gentleman may be correct. I know nothing about it; I express no opinion upon it; but the gentleman is willing to retire postal employees at the age of 65 years upon a pension of $600 per year, a thing which I am not in favor of doing. The Republican Party should quit voting for Democratic measures or quit criticizing them. [Applause on the Democratic side.]

Mr. Chairman, one of the most important provisions in this bill is the tariff commission. More good will eventually flow to the people as a result of this legislation than any other item in it. The people have made up their minds not to have any more tariff tinkering in Congress if they can avoid it. This tariff-commission bill does not go as far as I would have it go, but it establishes the principle and definitely commits the party to it. I give it my earnest support. I firmly believe that in less than 10 years Congress will invest this commission with quasi judicial powers, enabling it to fix maximum rates of duty upon goods imported into this country. [Applause on the Democratic side.] Of course the argument will be made that such a law would be unconstitutional. The same argument was made from 1870 to 1887 that Congress did not have the constitutional power to create an Interstate Commerce Commission with power to fix maximum rates on railroads, but public opinion never stopped; it never ceased; it fought its way to Congress until Congress finally bowed to the will of public opinion, created an Interstate Commerce Commission, gave it power to fix rates, and no one would to-day feel like repealing it. The same constitutional grant gives Congress power to clothe this commission with quasi judicial power to fix the maximum rate of duty upon goods imported into the country. Then, and not until then, will this ever-troublesome question of tariff be taken out of politics. The Republican Party declared for a tariff commission in 1912 and in 1916 in their platform. For the past four years this has been one of their cardinal doctrines. This was their promise four years ago, and is their promise to-day. Will the apostles of high protection fulfill this promise by voting for this tariff commission when the roll is called, or will they repudiate it? Here is your time to redeem your promises. Here is the time to make good. But when the roll is called there will not be a dozen Republican Members of this House vote for this tariff commission, although it is one of their solemn promises in their platform this year. Talk about parties changing positions and repudiating platform pledges, the Republican Party is to-day swapping horses faster than old Dave Harum ever did in his palmiest days. [Applause.]

Mr. Chairman, this bill is going to become a law, and it will be a law forever. [Applause on the Democratic side.] No party in the future will have the temerity to repeal a single paragraph in it. The party that repeals it will at the ensuing election be relegated to the political limbo of the "has beens." [Applause on the Democratic side.] Mr. Chairman, notwithstanding the criticism heaped upon the head of President Wilson, he will be elected this fall by a greater victory than four years ago. He has been criticized, ridiculed, held up to contempt and scorn more than any President in the long life of our Nation, except Washington and Lincoln, but amidst this cruel and pitiless storm of criticism, calm and serene, he has stood aiding in every way possible to work out the world-wide problems of democracy. No President since the day that Jefferson's pen fell from his matchless hand has any President been charged with such responsibility and no President since the days of Lincoln has discharged his duties with such fidelity to duty as has President Wilson. [Applause on the Democratic side.] He has been criticized by a muckraking press, by campaign orators on the stump for not going to war with some one somewhere, some place, but has he made a mistake in refusing to go to war and in keeping our country at peace? The blood-soaked battle fields of Europe answer back this criticism and say, "No mistake; no mistake." Thank God Almighty that we do not have millions of weeping wives and mothers and wailing orphan children with arms as long as eternity and fingers as bony as death, with faces grim visaged and determined, pointing to President Wilson and saying, "You did it," as they are now pointing to every king, emperor, czar, and sultan of Europe to-day.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COX. I ask for two minutes more.

The CHAIRMAN. The gentleman from Indiana asks for two minutes more. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object, I would like to inquire whether the majority has finished offering amendments.

Mr. KITCHIN. So far as I know now we have.

Mr. MOORE of Pennsylvania. It enters into the question of extension. I have no objection.

Mr. COX. Thank God he has found a way to avoid war with Mexico; that instead of sending our soldiers to that grief-stricken nation to die and to kill the starving peons, he is about to find a way to put the starving peon to work. If the Republican Party in the coming campaign chooses to pitch their battle upon their criticism of President Wilson's failing to go to war, we will meet them on this argument in every home of the land. In every home on election day, whether in States having woman suffrage or not, there will be a wife—a mother—pleading the cause of Woodrow Wilson, because of his peace policy, because their husbands and their sons have not been sent as fodder to the cannon mouths. The Democratic Party invites an open discussion of this issue in the coming contest. Even the wealth of the Nation has and will rejoice at his peace policies, because he has kept us out of war and made it possible for men to continue the peaceful pursuits of life at a time when half the world is on fire. "Peace hath her victory no less renowned than war." Beat President Wilson in the coming contest! You can not touch the hem of his garment, and ere the ides of November roll around, a wireless message will be flashed to every home between the seas, "We have met the enemy, and they are ours." [Applause on the Democratic side. Laughter on the Republican side.]

Ah, you can laugh now, but let me tell you it is the man that laughs last who laughs best. If you want to laugh because millions of men are being slaughtered in Europe to-day, if you want to laugh because Wilson refuses to spill the blood of our American boys, we will meet you on that issue. [Applause on the Democratic side.]

On our splendid record of prosperity at home and peace abroad we submit our cause to the judgment of the people in the coming contest. In the election of 1910 the people decreed that the Republican Party was incompetent and unfit to handle the business affairs of our Nation. They followed this victory up in 1912 with an overwhelming victory, which crushed all opposition, and in the coming contest the people stand ready to repeat the same thing again. [Applause on the Democratic side.]

The CHAIRMAN. The question is on the amendment of the gentleman from New York to strike out the last word.

The amendment was rejected.

Mr. HILL. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Connecticut offers the following amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. HILL: Strike out the whole of the text under "Title V—Dyestuffs," on page 87, and following and substitute in lieu thereof:

"TITLE V.

"TO PROVIDE REVENUE FOR THE GOVERNMENT AND TO ESTABLISH AND MAINTAIN THE MANUFACTURE OF DYESTUFFS.

"SEC. 400. That on and after the day following the passage of this act, except as otherwise specially provided for in this act, there shall be levied, collected, and paid upon the articles named herein when imported from any foreign country into the United States or into any of its possessions, except the Philippine Islands and the islands of Guam and Tutuila, the rates of duties which are herein prescribed, namely:

"DUTIABLE LIST.

"First. All products produced in commercial quantities through the destructive distillation of coal or otherwise, such as benzol, toluol, xylol, cumol, naphthalin, methylnaphthalin, azenaphten, fluoren, anthracene, phenol, cresol, pyridin, chinolin, carbazol, 5 per cent ad valorem.

"Second. All the so-called 'intermediates,' made in whole or in part from the products referred to in paragraph 1, not colors or dyes, not specially provided for, 3½ cents per pound and 15 per cent ad valorem.

"Third. All colors or dyes, including natural alizarin and indigo, and all color salts, color acids, or color bases, made, in whole or in part, from products referred to in paragraphs first and second, 7½ cents per pound and 30 per cent ad valorem.

"FREE LIST.

"Fourth. Acids: Acetic or pyroligneous, arsenic or arsenious, chromic, fluoric, hydrofluoric, hydrochloric or muriatic, nitric, phosphoric, prussic, silicic, sulphuric or oil of vitriol, and valerianic.

"Fifth. Coal tar, crude, pitch of coal tar, wood or other tar, dead or creosote oil.

"SEC. 401. That paragraphs 20, 21, 22, and 23 of Schedule A of section 1 of an act entitled 'An act to reduce tariff duties and to provide revenue for the Government, and for other purposes,' approved 9 o'clock and 10 minutes post meridian, October 3, 1913, and paragraphs 387, 394, 452, and 514 of the 'free list' of section 1 of said act, and so much of any heretofore existing law or parts of law as may be inconsistent with this act, are hereby repealed.

"SEC. 402. Whenever an impartial tariff commission shall hereafter have been created and established by law, it shall be the duty of such commission to investigate the rates of duty provided herein and their adaptation to the purposes and objects specified in the title hereof, and report the facts and their findings based thereon to the Ways and Means Committee of the House of Representatives and the Finance Committee of the Senate."

Mr. HILL. Mr. Chairman, now that the political fireworks have all been exploded, I would like to ask the members of the House to get down to a plain matter of business very seriously affecting this country not only industrially, but in the way of national defense as well. The arrival of the German U-boat at Baltimore this morning marks a very significant situation in the history of the world. It means several things. First, that the mastery of the seas hereafter will be equally under the control of the small nations as well as of the great naval powers of the world. It means another thing; it means the beginning of a renewed attempt on the part of Germany to continue the monopoly of the dyestuff production of the world as she had it on the 1st of August, 1914, and it means also a renewed attempt to strengthen her strangle hold upon the defensive power of every nation in the world in the production of high explosives.

Now, if the rates of duty which are prescribed in this bill will prevent that, I am for the rates of duty in this bill if they will also develop the science of organic chemistry in the United States. If they will not, I want to appeal to you as practical business men and as patriotic citizens of this country to do that thing which will relieve this Nation from monopoly control by any power in the world—I do not care whether it is Germany, Great Britain, or Japan, for all have started in this industry since the war began.

We ought not to be left in a position where we have not one single particle of capacity or ability to produce the high explosives which are incidental to modern warfare as the whole world was left up to the 1st of August, 1914.

Now, I want to take a few minutes of time to show you why I think these duties will not do that thing.

Mr. FESS. Will the gentleman yield?

Mr. HILL. Certainly.

Mr. FESS. Does not this raise another question as to whether there is such a thing as an effective blockade?

Mr. HILL. It absolutely raises the question, and ought to give us very serious thought as to the naval outfit that we propose to make, whether we go to building 1 battleship that will cost $25,000,000 or 16 or 20 harbor or over-sea submarines that can go anywhere in this world. [Applause.] That is the serious question. [Applause.] But it is a question that I do not want to discuss now.

The proposition which I offer provides for 7½ cents duty on the finished dyestuffs instead of 5, as proposed by the majority, and for 3¾ cents specific duty on intermediates instead of 2½ cents, and then at the end I submit the whole question to an impartial tariff commission. Now why do that? Because it is essential that work should be begun promptly.

Last January men came before the Committee on Ways and Means and one of them said he would put $5,000,000 into the development of his plant if such protection was given. Another said he would put $2,000,000 in at once and more as fast as he could if this protection was given. Since then another has come to me and said they would immediately put in $20,000,000, and another from the Pacific coast has told me they are prepared to put $15,000,000 into a plant to develop products of coal distillation and oil distillation on the Pacific coast. It ought to have been done last December within 24 hours after the bill was introduced. France has done it, Japan has done it, England has done it, Russia has done it, while we have been quibbling over 2½ cents a pound [applause on the Republican side], and to-day they are ready not only to supply the industrial products to their own people into which dyestuffs and chemicals enter as constituent parts but to meet competition in the cotton trade of the world where we can not meet it now.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HILL. I would like to have a little more time, I would like to have at least 15 minutes.

Mr. KITCHIN. Mr. Chairman, I would like to say there is no objection on this side of the Chamber to the gentleman having as much time as he may desire.

Mr. HILL. I assure the gentleman I will not trespass upon his courtesy.

The CHAIRMAN. Is there objection to the request of the gentleman? [After a pause.] The Chair hears none.

Mr. HILL. Mr. Chairman, I have never taken this matter up from the beginning as a political question. The chairman of the committee will bear me out in that I brought it to him as a commercial proposition and said to him, "If you will evolve a better plan than this, I will support your plan. If you can not evolve a better plan than this, I want the House to support a plan, not of mine—I did not evolve it—but that of 10,000 chemists in the United States of America made before the beginning of this session of Congress by more than a year." When this war broke out these gentlemen from all over the country, North, South, East, and West, foresaw the serious problem that was sure to arise, and the New York section appointed a committee composed of the following gentlemen: Bernard C. Hesse, a free trader, avowed, open, and aboveboard, and he so informs me; J. J. Herreshoff; H. A. Metz, a former Democratic Member of this House, president of the American Chemical Co., a German manufacturer as well as a manufacturer of the United States; I. F. Stone, president of the New York Aniline & Chemical Co.; D. W. Jayne; J. Merrett Matthews, chemical expert for the textile industries of the United States, cotton, woolen, and so forth; and Allen Rogers.

They were appointed as a committee to find out what was necessary, not from the political side of it but what was necessary from the practical side, to determine how we could best meet the crisis which they knew was coming. After careful investigation they made a long report, which I have not time to read, but I will read the conclusion:

That a 30 per cent duty on some coal-tar dyes for over 30 years has not produced a real coal-tar dye industry in this country.

Your committee submits its conclusions, as follows:

"To prevent the unfair underselling alleged to be practiced by foreigners in this country, the adoption of an effective antidumping clause.

"The so-called coal-tar 'intermediates,' which are the basis of the coal-tar chemical industry, inclusive of explosives, medicinals, and dyestuffs, should be assessed one-half of whatever the finished dyes are taxed for tariff purposes; all coal-tar dyes without exception to be taxed alike, namely, 30 per cent ad valorem and 7½ cents per pound specific."

I am glad to say the medicinals have now been included in this measure, upon amendment offered by the gentleman from North Carolina. A year passed by, and I wrote to the chairman of this committee, when I found that this report had been made and presented to the House a year before by a Democratic Member from New York and no attention paid to it. I then introduced it as a bill, and wrote to Dr. Hesse and asked him if there was any reason for changing their opinion. Their reply was to this effect:

This committee herewith unanimously reaffirms its belief that the rates proposed in this report of November, 1914, are the lowest—

Now, understand, gentlemen, this man was a freetrader who wrote this report. He does not hesitate to say so, and I want to call your attention to the fact that when he was asked before the committee if these were the lowest rates that would provide for the development of this industry, his reply was—I quote it, substantially—

I do not look at it as an industrial proposition but as a matter of national equipment.

Every other consideration should be wiped off the slate in comparison with the overwhelming importance of this side of the question. [Applause.] But, they say:

The committee herewith unanimously reaffirms its belief that the rates proposed in its report of November 4, 1914, are the lowest at which a self-contained, complete, independent coal-tar chemical and dye industry can be created in this country, and which at the same time offers a legitimate incentive to legitimate capital for a legitimate effort to produce these goods in this country. Whether capital will avail itself of this advantage or not this committee expresses no opinion.

I call as my next witness to the insufficiency of these duties Mr. Herman Metz, whom many of you know, a German manufacturer himself and an American manufacturer as well.

I have a circular in my pocket, received yesterday from him, dated July 6, offering German dyes. Is it not significant that a shipload of 750 tons arrived yesterday? When Mr. Metz was before the committee I asked this question:

Mr. Metz, as a manufacturer, importer, and dealer, you have twice stated in writing that the provisions of this bill are necessary to establish an independent and permanent industry in this country if the country wishes to establish it.

Mr. METZ. Yes, sir.

Mr. HILL. It is not too high, but that it is high enough.

Mr. METZ. That is the minimum.

Mr. HILL. That is the minimum?

Mr. METZ. On anything less you will be off, anyway. I do not know whether that is high enough.

Mr. TOWNER. Will the gentleman yield?

Mr. HILL. Yes, sir.

Mr. TOWNER. Will the gentleman state, in that connection, what would be the ultimate cost, if the final consumer had to pay every particle of this, for 1 yard of cloth?

Mr. HILL. About one-thirtieth of 1 cent per yard is the lowest figure I have seen; and I have seen it stated as high, in some cases, as one-tenth of 1 cent per yard. The probable fig-

ure is one-thirtieth of a cent, and on blue denim for overalls it will be about a cent per pair for the indigo.

Mr. TOWNER. So that if every cent was paid by the ultimate consumer it would not be appreciable or would not be considered in the final price.

Mr. HILL. This country has lost more because of the German monopoly since the 1st day of August, 1914, than all of the extra cost that could possibly accumulate in a century. Furthermore, the point about the case that I want to urge upon your attention is that the duty placed too low will add to the amount which the gentleman says, but if placed high enough to develop the domestic competition, will wipe it out in 30 days. [Applause on the Republican side.]

Mr. SABATH. Will the gentleman yield for a question for information?

Mr. HILL. Certainly.

Mr. SABATH. What were the duties under the Payne-Aldrich bill?

Mr. HILL. I do not want to discuss it.

Mr. SABATH. I would like to know.

Mr. HILL. They were 30 per cent. They had been an average of 30 per cent, except that they were 25 per cent in 1894, ever since 1882. I do not want to make any comparison between this and the other bills.

Mr. SABATH. What are the duties in the bill now pending presented by you?

Mr. HILL. Thirty per cent, and 7½ cents a pound.

Mr. SABATH. We have been increasing it?

Mr. HILL. For 30 years we have been trying to develop the industry, with little or no success.

Mr. BURNETT. The purpose, of course, of this is to get the dyes in this country?

Mr. HILL. To make them in this country.

Mr. BURNETT. Suppose that this tariff does not induce the construction of factories. Is there any provision in your amendment or in your bill by which a board can then change the rates so that they will make it?

Mr. HILL. There is no committee amendment. I will stop and explain right there. May I ask the attention of the chairman of the committee? The question involves a statement which I did not wish to make. I want to refer to the question of the gentleman from Alabama [Mr. BURNETT]. Practically the suggestion was made to gentlemen who appeared before the Ways and Means Committee in January, and who had offered to enlarge their plants to provide for the estimated dyestuff demands of the United States, for a lower rate of duty, and I submitted that proposition to them by request. They felt that they had committed themselves, two of them, to the expenditure of $7,000,000 immediately, $5,000,000 on the part of one of them and $2,000,000 on the part of another. I happen to know that one of them contemplated $20,000,000. The reply I got from one of the gentlemen was substantially this:

My board of directors have decided to back me up in the proposition that I made, but they will not consent to even my carrying that out if the rate of duty is reduced, because the industry can not be developed at any lower rate of duty.

Let me read you an extract from a letter in regard to a conference that was held later:

I note with interest copy of your letter to Dr. Beckers, and for your information I may tell you that it was I who was asked to serve on this committee; but as I refused to go on account of the press of business, Dr. Beckers was appointed in my stead. Aside from this, however, I felt that Mr. KITCHIN fairly understood my position in the matter to the effect that the rates mentioned in the bill were the very smallest that would suffice to build up the industry, and really I did not see that there was any use of spending any more time in arguing the matter. Furthermore, as you know, I positively refused, and still refuse, to agree to any reduction of duties at any specified time, but was and am perfectly willing to leave this matter in the hands of some competent and nonpartisan tariff commission.

He knew that the bill of Mr. RAINEY was then pending. He says:

I want you to understand that I am as firmly convinced as ever that the rates mentioned in your bill are the lowest that will establish this industry in the United States, and I have never so much as intimated to anybody, by word of mouth or otherwise, that anything less would do the trick, and I believe that Mr. KITCHIN, Mr. PRATT, etc., thoroughly understand my position.

Now, what was the proposition? He says, substantially: "I will put $2,000,000 into this industry, to be expended immediately, not waiting for a final decision, and if you will give me assurance that these rates shall be prescribed; and after I have spent my money and put it in, and the Congress then provides for a tariff commission, as they say they will, I ask that you submit this whole proposition to the tariff commission for determination whether these rates are too low or too high"; and he said to me that he would abide by that decision, as, of course, he would have to if Congress said so, but he would have put in his $2,000,000 in advance, and Dr. Beckers would have put in his $5,000,000 in advance and would have accepted afterwards the decision or recommendation of an impartial, nonpartisan tariff commission. Could anything be fairer?

Mr. ALLEN. Will the gentleman yield?

The CHAIRMAN (Mr. SABATH). The time of the gentleman has expired.

Mr. KITCHIN. I thought the gentleman had indefinite time.

The CHAIRMAN. The Chair was informed——

Mr. KITCHIN. I ask unanimous consent that the gentleman may have time to conclude his remarks.

Mr. ALLEN. Will the gentleman yield?

The CHAIRMAN. What is the request—for five minutes more?

Mr. HILL. That I may be allowed to conclude my remarks.

Mr. STAFFORD. I think we should provide some limit as to the time.

Mr. HILL. I should like about 15 minutes. It is a very important matter.

Mr. ALLEN. If the gentleman from Connecticut will yield——

The CHAIRMAN. Does the gentleman from Wisconsin [Mr. STAFFORD] object to the gentleman proceeding without limitation of the time?

Mr. STAFFORD. Yes. I make that objection.

Mr. KITCHIN. I ask unanimous consent, Mr. Chairman, that the gentleman from Connecticut [Mr. HILL], a member of the committee, be given time to conclude his remarks.

The CHAIRMAN. It is objected to by the gentleman from Wisconsin.

Mr. STAFFORD. A great number of Members want to offer amendments to this bill. There should be some limit. The gentleman says he can conclude in 15 minutes.

Mr. HILL. I can if I am not interrupted.

Mr. ALLEN. I simply want to say to the gentleman from Connecticut that——

Mr. STAFFORD. The time has not been granted yet.

Mr. KITCHIN. How much time does the gentleman desire?

Mr. HILL. If not interrupted I can easily conclude in 15 minutes, but if I am interrupted, of course I can not.

Mr. KITCHIN. I ask unanimous consent, Mr. Chairman, that the gentleman from Connecticut be permitted to proceed for 15 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The CHAIRMAN. The gentleman from Connecticut is recognized for 15 minutes more.

Mr. ALLEN. Now does the gentleman from Connecticut yield?

The CHAIRMAN. Does the gentleman yield?

Mr. HILL. Certainly.

Mr. ALLEN. I want to say in connection with what the gentleman from Connecticut has just stated that there is a concern in Cincinnati that is putting a million dollars into a plant to make dyestuffs without waiting for Congress to take any action on a dyestuff tariff.

Mr. HILL. Yes. Now the bill comes into the House with the duty lowered from 7½ to 5 cents a pound on finished products; from 3¾ to 2½ cents a pound on intermediates, and crudes go from 5 per cent to the free list. Like the gentleman from Cincinnati, other people have trusted to the protective sentiment of the United States in this matter. I do not mean as a general proposition, but in this matter they have trusted to the protective sentiment of the United States, and have been putting their money into this industry. I know nothing about the Cincinnati concern, but I have here a telegram from Mr. Dow, of the Dow Chemical Works, of Saginaw, Mich. Some of you may know him. He appeared before the Committee on Ways and Means, and stated that he had been making large experiments in the development of synthetic indigo, and he succeeded in making a satisfactory dye, and brought the samples of cloth which had been treated. I received a letter yesterday from Dr. Herty, of North Carolina, president of the American Chemical Society, transmitting to me this telegram to him, and saying I might read it. I read:

SAGINAW, MICH., *July 7, 1916.*

CHARLES H. HERTY,
Care Chemist Club, New York.

We know of no reason for excluding synthetic indigo and very much regret to learn that discrimination is contemplated. We appreciate your aid. If we are discriminated against, we will call directors meeting to consider withdrawal from indigo manufacture, although we have already spent $102,000 on plant now under construction.

H. H. DOW.

Now, what does that mean? I have tried to show by the testimony that a specific duty of 5 cents is not sufficient; that 7½ cents is the minimum. Since that statement of Dr. Hesse I called on him in New York two weeks ago, and I said, "Dr. Hesse, has anything occurred from the time your report was made until now that would justify you in lowering that duty?" He again repeated to me, "Mr. HILL, you know I am a free trader, but I say to you that if you want to establish this industry in the United States you can not do it at less than 7½ cents a pound."

I have just read to you from Mr. Dow, who says he will request his directors to cancel or withdraw the $102,000 investment from the indigo industry, which, if I am not mistaken, will leave the United States without one single, solitary manufactory of indigo if that is done.

Now, I want to call your attention to a telegram from Dr. Beckers. I understood the chairman of the committee, when he made his remarks at the opening of the discussion on the bill, to say that Dr. Beckers had agreed to the rates of duty fixed in this bill. If I am mistaken, I would like to be corrected now.

Mr. KITCHIN. I did not say he agreed to it. I said he said that under the rates of this bill in five years he could make dyestuffs more cheaply than any German manufacturer.

Mr. HILL. I think he could, if he had 7½ cents a pound duty.

Mr. KITCHIN. He said he could under this bill.

Mr. HILL. I will read now a telegram I received yesterday from Dr. Beckers. He says:

BROOKLYN, N. Y., *July 7, 1916.*

Hon. E. J. HILL,
House of Representatives, Washington, D. C.:

Exceptions made in dyestuffs tariff bill with regard to indigo, alizarin, and all their derivatives are, according to my opinion, very detrimental to the American dyestuffs industry. Foreign manufacturers can easily develop these lines of dyestuffs to such an extent that they will largely substitute the aniline colors, and the duty in general will then average about 30 per cent, same as now. As most of the intermediate products are used for the different lines we can not properly develop only one line in this country and have the others come from abroad. These exceptions, furthermore, will create a discrimination among the dyestuffs consumers and, strange to say, the alizarins and their derivatives are used for the higher class of textiles, while the anilines are used for the cheaper goods. Please use all efforts to eliminate these exceptions.

W. BECKERS.

Furthermore, the bill provides that at the end of five years, if we have not produced 60 per cent of the consumption of the United States, it is made the duty of the President to so declare, and all duties go off and go back to where they were before. Twenty-seven per cent of our entire consumption cut out by being left without the benefit of any specific duty whatever, leaves it to Germany to sell us only 13 per cent, and then the President has got to order the suspension of all the duties.

Is it fair to ask men to put their money into an industry and try to develop it here under those conditions? I do not care as to the ultimate effect of these provisions in the bill relating to restrictions five years from now, because I have great hopes that something is going to happen so that five years from now we will alter all these provisions. [Applause on the Republican side.]

But the point about it is—and I am sorry I said that, because it is the first political allusion I have made with reference to this matter from beginning to end; I am sorry, gentlemen, that these restrictions are there, because neither you nor I nor any sensible man would invest capital by the millions now, under such conditions as these, and I do not want them in the bill. I am perfectly willing to put it to any fair-minded man that the proposition shall be passed at 7½ cents a pound, and leave the future to an impartial and nonpartisan tariff commission.

Mr. BURNETT. Mr. Chairman, will the gentleman yield?

Mr. HILL. Yes.

Mr. BURNETT. Would you give that commission the power to reduce it or merely the power to recommend to Congress?

Mr. HILL. They can not have the power to reduce or raise the rates. It is a power of investigation and recommendation, and an honest recommendation from an honest commission in this country will be heeded and acted upon by an honest Congress five years from now.

Mr. BURNETT. That has not been the rule. I remember that on print paper and pulp wood they did not do that.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. HILL. Certainly.

Mr. FESS. Suppose we adopt the gentleman's substitute and increase the rate upon indigo, how much higher, in the gentleman's judgment, will indigo sell in five years from now than we pay the German monopolies?

Mr. HILL. I think it will sell at a lower price. I do not think there is any sort of question about it whatever. I think that within two years, as a result of protected domestic competition, every additional penny of these duties that are put on by this bill will be absorbed and dyestuffs will sell in the United States of America lower than anywhere else in the world. [Applause on the Republican side.]

Mr. GORDON. But that will wipe out the industry, then?

Mr. HILL. Not at all. The whole question, my good friend from Ohio, is this: This is a question affecting not only dyestuff, but it affects every ounce of cotton goods that is made in the United States. I have the petition or resolution passed unanimously by 700 southern cotton mills in Atlanta in April, asking for the passage of this bill. I have in my office the expression of the National Association of Cotton Manufacturers at their annual convention in Boston asking for it.

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. HILL. Certainly.

Mr. COOPER of Wisconsin. The gentleman said that the National Association of Cotton Manufacturers and the Southern Association of Cotton Manufacturers asked for the passage of "this bill."

Mr. HILL. I meant to say for the passage of the bill which I introduced. We had a committee, consisting of six men, representing an output of three and a half to four billions of dollars of products in this country, saying that they had become converted by the exigencies that had arisen, and where five years ago some of them came here and protested, those very men came here now and said they wanted to take it all back and ask for the passage of the bill which I introduced.

Mr. FESS. Then the gentleman's contention is simply not for the manufacturer, but for the ultimate consumer, who will get the product cheaper after the industry is established in this country?

Mr. HILL. Certainly. The question is, What shall we do? Every other nation in the world found itself in the same position that we were in on the 1st of August, 1914. We are in competition with everyone of those producing nations all over the world. Our cotton goods meet their cotton goods in China, in the Philippine Islands, all over the world. They have established their own plants.

The British Government has put $15,000,000 into theirs. Japan has guaranteed 8 per cent profit, whether they make it or not, on any Japanese capital going into this business. We have voted $20,000,000 of Government money to make fertilizers and nitrates. We have voted $11,000,000 of Government money to build an armor-plate factory. Here men stand, and I can give you the names of the men, representing private capital and agreeing to put $42,000,000 of their own good American money into this industry, from California to New York, if we will simply give to them a rate of duty and a protection against the awful struggle which is bound to come when this war closes; and if we do so, they will begin their investment and the relief of the American people right now. [Applause on the Republican side.] It is up to you gentlemen on the Democratic side. This is not a question of protection or free trade. You have agreed now to what you think is a protective duty. The policy in this case is determined by an emergency, not by past moss-grown theories, either upon your part or upon mine. It is a question of an existing emergency, and I ask you as patriotic American citizens to meet that emergency now and make the United States an independent Nation upon this matter—independent of all the world. [Applause on the Republican side.]

The CHAIRMAN. The time of the gentleman from Connecticut has again expired.

Mr. KITCHIN. Mr. Chairman, I should like to ask the gentleman from Ohio [Mr. LONGWORTH] if there will be any more speeches on that side on the substitute amendment now pending? If so, I should like to hear them now, because there will be only one on this side on the question.

Mr. LONGWORTH. I do not care to speak, and unless there is some other gentleman who does——

Mr. FORDNEY. I want to say to the gentleman from North Carolina that there are a great many amendments to be offered here. I wanted to speak on this, but there has been so much time taken that I will not do so.

Mr. KITCHIN. So there will be no other speeches in favor of this amendment?

Mr. FORDNEY. We will take the time on some other amendment.

Mr. KITCHIN. So we can take a vote on it after I finish my remarks?

Mr. FORDNEY. Yes.

Mr. KITCHIN. Mr. Chairman, my friend from Connecticut [Mr. HILL] has exhibited, as he always does in discussing any

matter, an ebullition of enthusiasm and earnestness that always has a tendency to convince one who does not know the facts that he is absolutely right about the matter under discussion. He says that under the provisions of the pending bill the dyestuff industry, according to the testimony of the dyestuff manufacturers, can not be established and can not be maintained, and he reads from telegrams and letters from the presidents of the two big dyestuff manufacturers in the United States, and from one or two other gentlemen more or less interested. There will be only two dyestuff manufacturers in the United States if the substitute of the gentleman from Connecticut [Mr. HILL] is enacted into law. I want every Democrat and every Republican in this House to know that, according to the testimony of these two dyestuff manufacturers themselves, if the Hill substitute is carried and becomes a law, there will be an absolute monopoly of the manufacture of dyestuffs, consisting of two manufacturers, in the United States.

Mr. Schoelkopf and Dr. Beckers, whom the gentleman produced as witnesses, represent the two big dyestuff manufacturing plants of the United States. Mr. Schoelkopf is president of the Schoelkopf, Hartford & Hanna Co., Buffalo, N. Y., and Dr. Beckers is president of the W. Beckers Aniline & Chemical Works, Brooklyn, N. Y.

They testified before our committee on January 14, 1915, that if the Hill substitute becomes a law each of them would make 50 per cent of the dyestuffs in the United States. Each testified that he would make 50 per cent, and they testified that both together would make all the dyestuffs in the United States. I asked them if they would not have a monopoly. Each said that his company expected to make 50 per cent of our total consumption if the Hill bill was passed. They knew that the high rates of that bill, which is the substitute before the House, would enable them to effect and maintain an absolute monopoly. So, gentlemen, I want every Member who votes for the Hill substitute to know that he is voting for a dyestuff monopoly consisting of only two manufacturers in this country, and those two manufacturers testified to that themselves, and the gentleman from Connecticut [Mr. HILL] will not and can not deny it.

Now, let us see whether the dyestuff industry can be established and maintained with this reasonable and fair provision which is contained in the pending bill. The gentleman from Connecticut has Mr. Schoelkopf declaring, as I understand, that he would not put a dollar into the industry; that he could not maintain it and could not establish it in this country unless the rates were at least as high as those in the Hill bill; that that was the least protection that would enable them to establish and maintain a dyestuff industry in this country. Why, this same Mr. Schoelkopf testified before our committee that he was then making about three times more dyestuffs than he made when the war broke out; that he enlarged his plant over three times its former capacity, and when in a few months from then his enlarged plant would be in full operation he would then be making nearly five times as much. That this enlargement of capital and plant was made without expecting or thinking of any additional tariff to that of the Underwood Act. He further testified that during the European war he was making, and would continue to make, such excessive profits from the high prices he was getting that he was justified in putting in the additional capital. He declared that when the war stopped he would have made enough profit to be able to charge up to profit and loss all the additional capital he had put into the enlarged plant, and if his plant should forever remain idle thereafter he had made enough profit to compensate him. He testified at the 1909 tariff hearings that from 1900 to 1909 he had about trebled his annual output under the Dingley Act, which was no higher on dyestuffs than the Underwood Act. And yet he wants us now to believe, according to the gentleman from Connecticut, that his industry will be destroyed unless we more than double the tariff rate of the Dingley, Payne, and Underwood Acts.

Mr. COOPER of Wisconsin. Will the gentleman permit a question?

Mr. KITCHIN. Yes.

Mr. COOPER of Wisconsin. The war, in so far as that industry is concerned, has acted as a prohibitive tariff.

Mr. KITCHIN. Yes.

Mr. COOPER of Wisconsin. The Underwood tariff has nothing to do with it.

Mr. KITCHIN. Absolutely nothing to do with it. If it enabled the American manufacturer to charge from three to ten times the normal prices for dyestuff which he is now charging, it ought to be repealed. The war had everything to do with these enormous prices and profits of our dyestuff plants and with every other dyestuff plant in the world except in Germany.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CRISP. I ask unanimous consent that the time of the gentleman from North Carolina be extended 15 minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that the time of the gentleman from North Carolina be extended 15 minutes. Is there objection?

There was no objection.

Mr. KITCHIN. Before this stir up about war and the making of dyestuffs for explosives for "preparedness," and so forth, before Congress got so excited and nervous, in 1909 this same man, Mr. Schoelkopf, testified before the Ways and Means Committee that if Congress would give him 40 per cent ad valorem tariff on dyestuffs he would make dyestuffs as cheaply as any country and would compete with Germany or any nation in the world. He said he only wanted and that the dyestuff industry only needed 40 per cent ad valorem. This same gentleman again appeared before the Ways and Means Committee at the tariff hearings in 1913. He then testified that the dyestuff industry needed only 35 per cent ad valorem, that this would be a fair and reasonable rate and would enable them to compete successfully with Germany or any other country. The bill under consideration gives for 10 years more than 40 per cent ad valorem. So, gentlemen, if you Republicans want to give a fair and reasonable tariff, and if the Democrats want to give a fair and reasonable tariff, why not support the provisions of the pending bill? Why do you want to give by this substitute a higher tariff by nearly 100 per cent than Mr. Schoelkopf, the largest dyestuff manufacturer in the United States, himself testified in 1909 and 1913 was needed? [Applause on the Democratic side.]

Mr. TOWNER. Will the gentleman yield?

Mr. KITCHIN. I will.

Mr. TOWNER. Before the commencement of the war we were producing about 3,000 tons of dyestuffs.

Mr. KITCHIN. We were producing 3,300 tons, it is estimated, about 20 per cent of the dyestuffs used in this country.

Mr. TOWNER. In the neighborhood of that. That means that we are producing one-fifth of the total consumption required in the United States.

Mr. KITCHIN. We were producing about that much prior to the war. They say that we are now producing over one-third.

Mr. TOWNER. These men that you are talking about are the men who were engaged in the business in the commencement or during the war.

Mr. KITCHIN. Two of them.

Mr. TOWNER. And it is necessary now if we want to establish the economic independence of the United States on this proposition to increase more than five times the present amount of those engaged in the business.

Mr. KITCHIN. The gentleman will pardon me. I have not the time now to go into a discussion of that.

The gentleman from Connecticut produces another witness, a Mr. Dow, president of the Dow Chemical Co., Saginaw, Mich., and says that Mr. Dow had written or wired him that he is not going to put any capital into the manufacturing of indigo if the present bill passes; that the 30 per cent ad valorem is not enough, and that unless indigo is given, in addition to this 30 per cent, 5 cents per pound his company will withdraw from making indigo. He invested that $102,000, to which he refers in that telegram, with indigo on the free list, and yet, while this bill takes indigo from the free list and puts a tariff of 30 per cent ad valorem on it, he now sends to Mr. Hill this bluffing wire that he will stop the manufacture of indigo unless we give him 5 cents per pound additional. Let him stop. We will not give it to him. He put his money into the indigo business, like all the manufacturers of dyestuffs, to get the benefit of the big profits of the high-war prices and not upon any expectation of a change or increase of the tariff. This same gentleman testified before our committee, in the hearings on the Hill bill, practically the substitute now before the House, that he was not so much interested in tariff protection—and was not asking for it—as he was in something to prevent unfair methods of competition on the part of foreign manufacturers. In this bill we give not only 30 per cent ad valorem on indigo, which is now and has been on the free list, but a full, ample, and drastic remedy against such unfair methods of competition as he mentioned. Mr. Dow's telegram to Mr. Hill, of July 7, is absolutely refuted by his testimony before the committee.

The gentleman from Connecticut said that the efficacy of the bill is destroyed because we do not give alizarin and indigo the 5 cents per pound in addition to the 30 per cent ad valorem, as we do the other dyes and colors. Indigo and alizarin have been on the free list under the Dingley Act, the Payne Act, and the Underwood Act—all the time on the free list—and, gen-

tlemen of the committee, Mr. HILL's bill, which he introduced and upon which we had hearings in January, put indigo on the free list. [Applause on the Democratic side.]

Mr. Schoelkoff, Mr. HILL's star authority and witness, in a statement filed with our committee on January 14, asked that indigo and alizarin be kept on the free list, and yet we put them in the same class as other colors, so far as the ad valorem duty goes, and give them 30 per cent each. [Applause on the Democratic side.] And now they want this House and the country to believe that this bill destroys the whole dyestuff industry because we put 30 per cent on these two articles that have always been on the free list without adding the 5 cents per pound specific duty. [Applause on the Democratic side.]

Now he brings another witness, Dr. Herty, president of the American Chemical Society, and he says that Dr. Herty knows that unless the Hill bill rates are enacter into law that this industry can not be established; that after the war it will be ruined. Dr. Herty knows no such thing. He testified before our committee in January that he knew absolutely nothing about what the rates should be—whether they are too high or too low in the Hill bill.

Mr. MOORE of Pennsylvania. Did not Dr. Herty testify that it would be absolutely essential for the continuation of the business to have these rates?

Mr. KITCHIN. No; absolutely not.

Mr. MOORE of Pennsylvania. And did he not favor the Hill bill?

Mr. KITCHIN. Yes; he favored the Hill bill because the two big manufacturers of dyestuffs had fooled him into the belief that it was necessary in order to build up the industries, but he did not know anything about the rates, whether they were reasonable or unreasonable. He showed that all he knew about the rates was what the manufacturers wanted, what the manufactures desired to satisfy their avarice for profits, and that was the rates of the Hill bill—the rates of this substitute he offers. Our bill is what the industry needs in this emergency, and that is all that any honest and patriotic man, whether a Republican or a Democrat, ought to vote for. [Applause on the Democratic side.]

This is the testimony of Dr. Herty: Mr. GARNER asked, "What do you say as to the rates of the Hill bill?" Dr. Herty said, "I have no judgment on that. I am not a dyestuff expert or manufacturer." [Applause on the Democratic side.]

Mr. HILL. Might I ask the gentleman if he would read the telegram dated day before yesterday from Dr. Herty, which I handed to him?

Mr. KITCHIN. Yes; send it to me.

Mr. HILL. I have sent for it.

Mr. KITCHIN. All right; send for it. Let me quote something else this witness testified in answer to a question of the gentleman from Missouri [DICKINSON] as to how long the industry would require protection:

> Five or six years will be enough, I think, to get the majority of our manufactures in good shape where we can not only hold our own but more than hold our own with Germany.

[Applause on the Democratic side.]

We give in our bill five years, and thereafter a reduction of the specific duty of 20 per cent a year for five years, at the end of which time all the specific duty is removed and the 15 per cent ad valorem on intermediate and the 30 per cent ad valorem on finished dyes and colors remains permanently. Bring on that telegram. [Laughter.]

Mr. HILL. I have sent for it.

Mr. KITCHIN. I know there must be something in that telegram the gentleman did not want to read, otherwise he would have read it himself. [Laughter.]

Mr. HILL. I have got a lot I did not have time to read. That is from Dr. Herty, from the State of North Carolina, the gentleman's State.

Mr. KITCHIN. I know he is from North Carolina, and he is an honest and candid witness. He is the president of the American Chemical Society. He does not make dyestuffs. He is not interested in getting profits, and, as I quoted, he declared that the industry only needed a fair and reasonable tariff for five or six years. Dr. Beckers, of the Beckers Aniline Oil & Chemical Works, is another witness called in this debate by the gentleman from Connecticut. I will tell you what Dr. Beckers thought and said about the provisions of the present bill.

A month or two ago he, Mr. Waters, of the Germantown Dye Works, and Mr. Wigglesworth came to Washington as a committee representing the dyestuff manufacturers, including the Schoellkopf Co., and also the textile and other dyestuff-using industries and had a conference with the gentleman from Maine [Mr. MCGILLICUDDY] and the gentleman from Tennessee [Mr. HULL] and myself with respect to dyestuff legislation. We discussed at length the Hill bill and its rates and the provisions and rates which we proposed, which were practically the same as are contained in the pending bill with reference to dyestuffs. After a full and free discussion Dr. Beckers said that while naturally they wanted all the tariff they could get he was satisfied that the rates and provisions which are contained in the pending bill were all that the dyestuff industry needed, and with such provisions and rates enacted into law the industry would be so well established within the five years that he would be producing dyestuffs as cheap or cheaper than the Germans or any other foreign manufacturers could, and that the industry in this country could compete successfully with the industry of Germany or any other country; that after five years, as provided in this bill, the gradual reduction for each of the succeeding five years could be made on the specific duty on the intermediates and finished dyes or colors until such specific duties were completely removed without injury to American dyestuff industries. He said further that he was so confident that this could be done that he would be perfectly satisfied to have inserted, as was suggested by us, a clause in the bill requiring the specific duty to be at once removed after the termination of five years if the home industry at that time was not producing 70 or 75 per cent of the domestic consumption. Dr. Beckers impressed me most favorably as a gentleman of marked candor, intelligence, and integrity. This position of Dr. Beckers was approved and confirmed by Mr. Wigglesworth and Mr. Waters. So Dr. Beckers, one of the gentleman's star witnesses before the Ways and Means Committee and this committee who came to Washington to see us, does not sustain the contentions and arguments of the gentleman from Connecticut.

Now I will read for the gentleman the Dr. Herty telegram just handed me:

NEW YORK, *July 7, 1916.*

Hon. E. J. HILL,
House of Representatives, Washington, D. C.:

Have consulted many chemists and manufacturers to-day, and all agree that the exclusion of alizarin and indigo and their derivatives from the 5 cents special duty would be a serious mistake in the effort to build up a complete American dyestuffs industry, and that such exclusion has no scientific or technical basis. It would seem that the framers of the bill should be willing to explain on the floor of the House the grounds on which such exceptions are made.

CHAS. H. HERTY, *President.*

Dr. Herty, no doubt in the interest of Mr. Dow, president of the Dow Chemical Co., the only indigo manufacturer, who, on the same date of the Herty telegram just read, had wired the doctor about the indigo rate, demands an explanation on the floor of the House by the framers of the bill why the specific duty of 5 cents per pound was not given indigo and alizarin. I have in part explained it and will do so further. Dow himself never contended for it in his testimony before the committee. He declared that he was more concerned about a remedy against unfair methods of competition; that in five or six years, if we could prevent unfair competition, the indigo industry could be established and maintained here without a tariff; that we could produce it here by that time more cheaply than the Germans or other foreign manufacturers could.

Mr. FORDNEY. Will the gentleman quote all of Mr. Dow's testimony in connection with that?

Mr. KITCHIN. Yes; let me read exactly what he said on that point. Mr. DICKINSON, of Missouri, asked him the following question:

> I make that inquiry because the general position of the manufacturer is that he has to have this tariff in order to manufacture his product and to stay in business in competition with foreign trade. That is not your position?

Mr. Dow replied:

> No; that is not our position. In a line where so much is consumed, as is the case with indigo, the American manufacturer can hold his own with any foreign maker, I am satisfied, provided he is not subjected to unfair competition, due to the combining against him, and also provided he has had five or six years' experience in manufacturing.

[Applause on the Democratic side.]

I want to say that when Dr. Herty sent this hurry-up telegram to the gentleman from Connecticut to help him out in this debate he did not know that the Hill bill, the very bill in the interest of which he appeared before the Ways and Means Committee last January, put indigo on the free list, as it is now under the present law and was under the Dingley Act and Payne Act; he did not know that Mr. Schoellkopf, the biggest dyestuff manufacturer in the United States, had asked at the hearings before the committee in 1909 for only 40 per cent ad valorem on dyestuffs, and in 1913 for only 35 per cent as "adequate protection," and declared that that was all the industry needed; he did not know that Mr. Schoellkopf, in his statements before the Ways and Means Committee in

1909 and in 1913, and before our committee at the hearings in January this year, asked that alizarin and indigo be kept on the free list; he did not know that Mr. Dow, of the Dow Chemical Co., the only manufacturer of indigo so far, testified before our committee in his, the doctor's, presence that he was not asking so much for a tariff as he was for some provision preventing unfair methods of competition on the part of foreign manufacturers; he did not know that we knew that he had solemnly testified before our committee at the hearings in January last, that he knew absolutely nothing about rates, what they should be, how high or how low; he did not know that when he sent that telegram for Mr. HILL to use in boosting the Hill bill, or substitute, that, owing to these facts, we would know that his opinion expressed in the telegram is as valueless as the scrap of paper on which it is written. The only other witness the gentleman summons to his aid to-day is Dr. B. C. Hesse, of the American Chemical Society, and chairman of a self-constituted chemical and dyestuff committee, who made a report recommending the provisions of the Hill bill.

The gentleman from Connecticut says that since the hearings before our committee in January, at which the doctor testified, he has seen Dr. Hesse, and he is still of the opinion that the dyestuff industry can not be established and maintained with rates lower than those in the Hill bill or substitute.

It is clearly shown in Dr. Hesse's testimony before the committee in January that he knows absolutely nothing about rates, whether the Hill bill or substitute rates are too high or too low. He candidly admitted that he had not made a comparison of cost production here and abroad. He further candidly admitted that the rates of the Hill bill recommended by his self-constituted so-called "dyestuff committee" was based on the statement of Mr. Schoellkopf filed by him, for his company, with the Ways and Means Committee at the hearings on the Payne bill of 1909. He and his committee took the statement of a manufacturer, financially interested in the highest possible rates, without question or inquiry, and upon this filed a report urging the rates of the Hill bill, and the gentleman from Connecticut invokes such evidence as a warrant for his contentions. Be it remembered, however, that Mr. Schoellkopf, author of the statement upon which Dr. Hesse and his committee based the Hill bill rates, only asked in 1909, on that statement, a tariff of 40 per cent ad valorem, declaring it "adequate protection," while this Hesse committee on the same statement now, or did at the hearings in January, recommend rates nearly 100 per cent higher.

Now, gentlemen, I submit that the facts, the condition of the dyestuff industry, the testimony of his own witnesses, refute the statements and contentions of the gentleman from Connecticut [Mr. HILL] Even if you take the testimony of these gentlemen who are interested in making a profit, in January of this year and at the tariff hearings in 1909 and in 1913, no Democrat is justified in voting for the substitute of the gentleman from Connecticut [Mr. HILL], which will make an absolute monopoly and put at its mercy all the textile and other dyestuff-using industries of this country. [Applause on the Democratic side.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina [Mr. KITCHIN].

Mr. MOORE of Pennsylvania. Mr. Chairman, is the discussion closed by arrangement?

The CHAIRMAN. The Chair understood the gentleman from North Carolina had made the statement that the time would be consumed.

Mr. KITCHIN. I made the statement that when I concluded the vote would be taken.

Mr. MOORE of Pennsylvania. Does the gentleman object to my having three minutes to answer the statement of the gentleman as to Mr. Herty's testimony?

Mr. KITCHIN. The gentleman can have it at some other time.

Mr. MOORE of Pennsylvania. It is quite appropriate now, but if you do not want it now I will make it some other time.

Mr. KITCHIN. Let me have three minutes afterwards, then, and then we will have the vote.

The CHAIRMAN. The gentleman from North Carolina [Mr. KITCHIN] asks unanimous consent that the gentleman from Pennsylvania have three minutes and that he himself shall have three minutes, and that debate shall then be closed. Is there objection? [After a pause.] The Chair hears none.

Mr. MOORE of Pennsylvania. Mr. Chairman, the gentleman from North Carolina [Mr. KITCHIN] devoted a part of his answer to Mr. HILL to a statement to Dr. Herty. The doctor is professor of chemistry at the University of North Carolina. He appeared before the Ways and Means Committee, and his statement appears in the hearings. He was wholly in favor of the so-called Hill bill. In the course of his statement he said:

Prof. HERTY. Mr. Chairman and gentlemen of the Ways and Means Committee, I am president of the American Chemical Society and professor of chemistry at the University of North Carolina.

* * * * * * *

Let me say to you gentleman on the left side of the House, as a fellow Democrat, that I wrestled with this question a long time before I could bring my mind to the point of advocating a protective tariff, as it was naturally against the convictions which I had acquired earlier in life in a Democratic atmosphere; but I was finally driven to it from whatever line I tried to solve this problem, and am convinced that if we are to have such an industry in this country we must have protection for it in the way of a tariff.

* * * * * * *

I think this tariff should pass, and I think it should be passed promptly, because the industry will then get the idea at once that this Congress is favorable to the industry, and it will work this way: The German dyestuffs coming into this country after the war will pay a higher tax, and the revenues of the country will not be changed for a while, but will gradually disappear, and then competition between men in this country will result in cheaper dyestuffs. But the idea of the dyestuff users in this country to compete in a foreign market with the men who have control of the dyestuffs business, I can not see it. I believe it is to the interest of the men who are looking forward to export trade in dyed cotton goods in this country to have an American dyestuff industry from which to get their dyes, rather than be dependent upon their chief competitors to get their dyes. I do not see how we can hope to compete with Germany in dyed articles in foreign markets unless we have a dyestuff industry of our own.

Now, then, after the gentleman from Texas [Mr. GARNER] had led the gentleman from North Carolina, Dr. Herty, along a little bit, this colloquy ensued:

Mr. GARNER. Then you do not need this tariff as long as there is a war?

Prof. HERTY. Yes. The British Navy is the best protection, only we do not know how long it will be on the job.

Mr. MOORE. Doctor, you are president of the American Chemical Society?

Prof. HERTY. Yes.

Mr. MOORE. And your home is in North Carolina?

Prof. HERTY. Yes.

Mr. MOORE. And you say this is not a political question?

Prof. HERTY. Absolutely not—to my mind.

Mr. MOORE. You advocate a tariff on chemicals in order to protect the industry in the United States?

Prof. HERTY. To protect it during the period of starting.

Mr. MOORE. And also to avoid the dumping of foreign materials upon the United States, in view of our present inability to supply the demand in the United States?

Prof. HERTY. I think the dumping would take place later, in any event, whether we had a tariff or not, because we are manufacturing 10 per cent, for instance, for our needs, to 100 per cent of Germany's manufacture. We will be on a small scale of manufacture even when we supply all our needs.

Mr. MOORE. Is it your opinion that if we should pass this bill the American producer generally would be benefited?

Prof. HERTY. Yes.

Mr. MOORE. You favor the bill, then, as it is written, providing for a protective tariff upon these chemical commodities? You favor the fixing of rates of duty to protect these chemicals in the United States?

Prof. HERTY. Yes, sir; absolutely.

Mr. MOORE. And you fear that there may be a dumping of foreign materials upon the United States market, if we do not pass this bill, after the war?

Prof. HERTY. I think, even though you pass this bill, there will be a dumping.

Mr. MOORE. You fix a limitation of five years during which you think there ought to be protection such as is suggested in this bill? What after the five years?

Prof. HERTY. I think we would be ready then for a gradual reduction of the duty.

Mr. MOORE. Do you think that by that time the American manufacturer of chemicals would be in such shape as to effectively compete with the German manufacturer?

Prof. HERTY. My statement was from six to eight years. I think there will be a great number of lines developed in six years that can stand on their own feet.

Mr. MOORE. But in order to establish the industry at this time you think there should be a raising of the duties as suggested in this bill?

Prof. HERTY. As suggested by the report of that New York committee.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE of Pennsylvania. Now, the gentleman from North Carolina [Mr. KITCHIN] has quoted a witness without fully quoting what the witness said.

Mr. KITCHIN. You read just a little too much for yourself. You began just a few lines too late. He says he does not know anything about the rates—whether it should be 1 per cent or 7 cents—but he does know that with a fair and reasonable tariff they can establish the industry in five or six years, and that thereafter it does not taper off in five or six years like this bill. So you read exactly what I did. I agree with Dr. Herty.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut [Mr. HILL] in the way of a substitute.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. MANN. Mr. Chairman, I ask for a division.

The committee divided; and there were—ayes 96, noes 122.

Mr. MANN. I ask for tellers, Mr. Chairman.

Tellers were ordered, and Mr. CRISP and Mr. HILL took their places as tellers.

The committee again divided; and the tellers reported—ayes 116, noes 143.

So the amendment in the nature of a substitute was rejected.

Mr. HAYDEN, Mr. MOORE of Pennsylvania, and Mr. MANN rose.

The CHAIRMAN. The Chair will recognize the gentleman from Arizona [Mr. HAYDEN].

Mr. HAYDEN. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Arizona [Mr. HAYDEN] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. Hayden: Amend by striking out all of lines 23, 24, and 25, on page 61, and all of lines 1 to 10, inclusive, on page 62, which read as follows:

"Every person smelting copper ore and copper concentrates, refining metallic copper, or alloying copper, shall pay for each taxable year an excise tax equivalent to the following percentages of the gross receipts during such year from the sale or disposition of refined copper or copper alloys and from the sale or disposition of crude or unrefined copper if sold or disposed of for any purpose except for refining or alloying:

"One per cent of the amount by which such receipts exceed $25,000 and do not exceed $1,000,000.

"Two per cent of the amount by which such receipts exceed $1,000,000 and do not exceed $10,000,000.

"Three per cent of the amount by which such receipts exceed $10,000,000."

Mr. HAYDEN. Mr. Chairman, I have offered this amendment because, after careful consideration, I have reached the conclusion that the proposed tax on copper is unjust in that it discriminates against the leading industry of my State.

It is true that the bulk of this tax will be collected from the refiners and alloyers of copper, but I trust that no Member present will insist that the revenue thus obtained will actually come out of the pockets of those who "manufacture" copper, as the bill describes it. The refiners and alloyers can not pass the burden on to the consumers by adding the tax to the price of their products, because refined copper and brass are sold in a world market, where the price is regulated by supply and demand. But the refiner can, and will, recoup himself by either increasing the refining charges or by reducing the price paid for unrefined copper. Therefore, this is a tax upon production that must ultimately be paid by those who mine copper ores.

This tax dates back to January 1, 1916, and the amount due for this calendar year must be paid on or before April 1, 1917. The United States Geological Survey recently estimated that at the present rate of production over 600,000,000 pounds of copper will be produced in Arizona in 1916. This is nearly twice the output of any other State, and represents over one-third of the copper produced in the United States. Six hundred million pounds of copper at an average price of 25 cents a pound equals gross receipts aggregating $150,000,000 that will be subjected to taxation. The maximum tax under this bill is 3 per cent, but presuming that advantage is taken of that other provision of the bill which allows a net profit of 10 per cent on the amount actually invested in the "manufacture" of copper, still it is safe to assume that this tax will yield a return of 2 per cent on the gross output. In that event, at least $3,000,000 will be collected from the copper produced in my State.

Now, those who mine copper in Arizona are as patriotic as any other body of Americans. They are willing to pay a fair share of the cost of preparedness, but they do object to having copper singled out for double taxation while no such discrimination is practiced against any other metallurgical industry. As a matter of fact, this bill provides for triple taxation of large quantities of copper. First, the refiner must pay a tax on the gross receipts of his business. Then the alloyer, who purchases the refined copper that has once been the basis of a tax, is taxed on his gross receipts. The alloyer sells brass to a munition maker, who must pay a tax on the gross amount he receives for the cartridges and other war material he has sold. A pound of copper that follows this course will, in all probability, be used as a basis for at least a 2 per cent tax paid by the refiner, another 2 per cent tax paid by the alloyer, and still another tax of at least 4 per cent paid by the munition manufacturer. I am sure that the Committee on Ways and Means could not have given much study to the effect of this double and triple taxation of copper or certainly they would not have included this form of raising revenue in the bill.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield there?

The CHAIRMAN. Does the gentleman from Arizona yield to the gentleman from Pennsylvania?

Mr. HAYDEN. With pleasure.

Mr. MOORE of Pennsylvania. The gentleman has just indicated that he is opposed to a provision in this bill which he says will militate against the interests of the people of his district. Did the gentleman vote for the Hill amendment, which would help some other industries in that gentleman's district?

Mr. HAYDEN. I do not offer this amendment upon the theory that it will confer a special privilege upon the copper producers of my State, but I do insist that they shall not be discriminated against. That is the difference between my amendment and the Hill amendment.

We are all agreed that the munition industry has been enjoying exceptional prosperity and the profits derived therefrom are therefore a fit object for temporary taxation. We know that this industry has reached its maximum growth and no one contends that this unusual tax is expected to remain on the statute books for more than a year. Except as to copper the tax will practically repeal itself when the shipments of munitions to Europe shall cease. I understand that the committee considers that the necessity for this tax will end whenever the inheritance tax is in full operation.

The production of copper, upon the contrary, is a permanent industry, the prosperity of which is vital to our national welfare. Without asking for or receiving any favoritism by legislation, such as a protective tariff or any other special privilege, the output of copper has steadily and legitimately increased until the United States now leads the world in the production of this red metal, without which the present electrical age would be impossible. Why, then, should this, rather than the other metallurgical industries, be especially chosen to contribute to the cause of national defense at this time?

It is true that the producers of copper are now enjoying great prosperity, but they have justly earned this reward by passing through a period of depression as the result of embargoes and unfriendly legislation like the English orders in council declaring copper to be contraband. Shortly after the beginning of the European war the production of copper almost ceased, and thousands of miners were either thrown out of work or employed on half time at reduced wages. Under the circumstances I feel that the copper industry should, in all fairness, be allowed to enjoy its present prosperity. I suspect that the real reason for this tax is that the committee has associated copper with munitions on account of the large amount of this metal that is used in making war material.

I would like to inquire why copper has been taxed in this bill and no tax has been placed upon steel? If copper is to be taxed because it enters into the manufacture of munitions, why has not steel been taxed for a similar reason?

Mr. SNYDER. Mr. Chairman, will the gentleman yield for a moment?

The CHAIRMAN. Does the gentleman from Arizona yield to the gentleman from New York?

Mr. HAYDEN. Yes; I yield.

Mr. SNYDER. Does the gentleman expect that the producers of copper in his State are going to pay this tax?

Mr. HAYDEN. I certainly do.

Mr. SNYDER. Does not the gentleman believe they will immediately pass it on to us men in the East who use copper?

Mr. HAYDEN. That might be possible if the producers could increase the price of copper, but they can not. As I have said before, the market price is fixed by supply and demand.

Mr. SNYDER. Then we will pay that, and the income tax, and the inheritance tax. We will pay this also?

Mr. HAYDEN. No; this tax, like any other element that enters into the cost of production, will have nothing to do with the price of copper.

But steel is used to make cannon and shells, small arms and machine guns, railroads and bridges, and every other war use from barbed wire to battleships. Yet there is no tax on steel ingots or billets in this bill. If there is to be double taxation of copper because it is used in making munitions, why should not steel also be twice taxed? Everyone knows that vastly more steel and iron is used in modern warfare than any other single metal.

In addition to copper and iron all of the other metals have advanced in price owing to the demand created by the European war. Lead and antimony are used to make bullets and shrapnel. Aluminum is required for aeroplanes, Zeppelins, and automobiles. The manufacture of projectiles and armor plate makes a market for nickel, and quicksilver is used to make priming explosives. A vast quantity of zinc is consumed in the form of brass and to galvanize barbed wire. If copper is to be taxed, why ignore these metals? There is no double taxation on any of these articles in this bill.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. HAYDEN. I yield to my friend from Ohio.

Mr. FESS. Is this copper only used for munitions?

Mr. HAYDEN. I am glad that the gentleman asked that question, because it seems unreasonable that copper which is not made into munitions should be taxed. As a matter of

fact, the greater part of the copper produced in this country is used in our domestic arts and industries. In 1914, when such a thing as exporting munitions of war was undreamed of, over 700,000,000 pounds of copper, or about one-half of the total production, was consumed in the United States. It is safe to say that even a larger amount of copper will be used this year in America in a manner not even remotely connected with the war. Certainly it is a misnomer to call this a munitions tax when the greater portion of the copper upon which the collections are based is used for peaceful purposes.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. HAYDEN. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. FESS. Mr. Chairman, is that the purpose under this clause, munition manufactures, and so on, to tax articles that happen to be used for munitions and also tax them when used for other purposes, too?

Mr. HAYDEN. That is the effect of the bill. It makes no difference what the use is, a tax is levied on all copper sold.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. HAYDEN. Gladly.

Mr. LONGWORTH. Is it a matter of fact that the copper is smelted at the mines?

Mr. HAYDEN. Sometimes copper is smelted at the mines, but oftentimes it is smelted at a distance. It is usually smelted at the mines if water is easily obtainable.

Mr. JAMES. Mr. Chairman, will the gentleman yield?

Mr. HAYDEN. Certainly.

Mr. JAMES. I want to say, so far as that is concerned, that every mine in Michigan, with the exception of one or two small mines, smelts and refines its own copper.

Mr. LONGWORTH. Then, this would be a tax on the copper as it comes from the earth, no matter what the purpose is?

Mr. JAMES. Yes; and the tax will continue after the war is over.

Mr. HAYDEN. It can not be possible that this tax is to be levied merely because the copper industry can afford to pay it. I hope this House will not settle upon the policy of taxing prosperity whenever it appears. The English kings practiced that kind of extortion on the Jews of York, but no political economist will recommend such a proceeding, even as an extraordinary method of raising revenue.

If Congress is to tax the copper industry because it is profitable, then consistency demands a like tax on steel. Only last Saturday Henry Clews, that great student of financial and business conditions, gave out this statement:

> The steel trade positively is suffering from overconsumption. Production is operated at the limit, yet there is no cessation in the pressure of orders, no signs of weakness in prices, and the steel mills would welcome a respite from the urgent demands of consumers.

I defy anyone to name a copper stock that has advanced from $30 to $530 a share, as did Bethlehem Steel as a result of the munitions traffic. Why should not the steel industry, that pampered pet of protection, whose demands have been insistently presented to the American people in every political campaign for the past 50 years, after having been fed with favors by law, now that it is prosperous why should not its profits be directly taxed to pay for a program of preparedness that will require more steel than any other metal? There are no two ways about it. Either steel should be taxed or copper should not.

Mr. SABATH. Mr. Chairman, will the gentleman yield?

Mr. HAYDEN. I yield to the gentleman from Illinois.

Mr. SABATH. Are we producing largely the amount of copper that we use is this country?

Mr. HAYDEN. The United States produces twice as much copper as is consumed in this country.

Mr. SABATH. Does not the gentleman think it is better to tax prosperity than poverty?

Mr. HAYDEN. Certainly; if the tax is levied equally on all prosperous industries.

There is another matter that I want to draw to the particular attention of the friends of labor in this House. I have been discussing this tax from the point of view of the owners of the producing mines in Arizona whose property is assessed this year for purposes of State and county taxation at a valuation of over $170,000,000, but I would have this House remember that Congress can not levy a copper tax which will not also be a burden upon the 30,000 men who are employed in mining and ore reduction in my State. More than $35,000,000 will be paid in wages this year to these men, but the wage varies directly with the price of copper. If you put this tax on copper, you reduce the wages of the men employed in its production. I ask you to impose these taxes in such a way that no part of the burden can be shifted onto the laboring man.

A tax of 2 per cent on copper at 25 cents a pound means only a half cent on each pound, which does not sound like a very heavy burden. But a half cent a pound on 600,000,000 pounds means $3,000,000 that must be raised from the copper industry in Arizona. Does anyone here believe that those who labor in Arizona's copper mines will not share this burden? The friends of labor in this House will therefore vote with me to prevent a reduction in the wages paid to the miners and smelter men of the greatest copper-producing State in the Union.

The gentleman from Tennessee has said that there are two supreme duties which a citizen owes to his country—to fight for it and to pay taxes. In answer to the President's call for soldiers to protect the Mexican border there are more men under arms to-day from Arizona in proportion to her population than from any other State in this Union. Not content with receiving this liberal offering of the blood of her sons to defend the Nation, this bill proposes to seize the treasure of Arizona by an unfair and discriminating tax upon her leading industry. I would be unfaithful to the trust that has been reposed in me if I did not raise my voice in protest against this injustice. [Applause.]

Mr. MOORE of Pennsylvania. Mr. Chairman, I rise to oppose the amendment offered by the gentleman from Arizona. This illustrates better than anything else the manner in which this bill was framed. If you touch an industry in certain States, you are running into danger. You are against the trusts and combines, and the great refiners, and so forth, but the moment you begin to raise a little taxation from them down in Arizona, "the friend of the people and of the downtrodden" rises in his place to protest. [Laughter and applause on the Republican side.] The theory on which this tax was laid in this bill was that copper enters into the manufacture of munitions of war.

Mr. HAYDEN. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. HAYDEN. Does not steel enter even more largely into the manufacture of munitions of war?

Mr. MOORE of Pennsylvania. Yes; and steel is heavily taxed.

Mr. HAYDEN. Not directly. There is no double tax on steel.

Mr. MOORE of Pennsylvania. You catch steel going and coming; but when it comes to "my ox," be very careful how you gore it! Why, cotton enters into the manufacture of munitions of war, and a little while ago there was a solid vote upon your side of the House against the further use of cotton in mercantile industries, when you failed to recognize the necessity of a tariff upon dyestuffs. Yet what man upon the Ways and Means Committee on that side of the House, from Tammany Hall down to Texas, ever suggested that we should put a single cent of tax on your more than 10,000,000 bales of cotton, much of which enters into the manufacture of munitions of war? When your ox is gored, oh, how you holler! Do not tax anything that God produces for you, nothing that comes from the soil, nothing that comes from the plantations, nothing that you find in the mines, though they produce the greatest fortunes of all. Do not tax these! But the minute man begins to fabricate your cotton, the minute man begins to mold your iron and copper ore into something worth while, tax him. [Laughter on the Republican side.] He is using his labor. You gentlemen over there stand united to impose further taxes on everything that the hand of man improves. You are taxing everything in my State; yet when it appears that we are paying higher prices for everything we buy from Arizona or Texas or even Iowa, you tax us, while your own profits are increasing daily; you have not got the courage to put a little bit of the burden upon yourselves.

Mr. HAYDEN. I judge from the gentleman's remarks that he also owns an ox.

Mr. MOORE of Pennsylvania. Yes; I have an ox—my State is the ox—and it is pretty well gored, and it has been gored by your side of the House, which has been attacking its very vitals. While you in Arizona are riding in automobiles to-day, we are still walking the streets of the city of Philadelphia. You come here willing to tax our labor, while you let the speculators go scot free. Talk of trusts and combines, talk of minions of wealth, talk of the men who are despoiling the poor, talk of the men who are grinding down the toilers! Yes, but do not touch your copper smelters, or your refiners, or the owners of big mines in Arizona and elsewhere. Let them go! Tax only labor the minute it begins to employ itself in improving what God has given you. [Applause on the Republican side.]

Mr. MANN. Mr. Chairman, I ask that I may proceed for 10 minutes, and I may want a little more time. [Applause.]

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for 10 minutes. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, probably the most difficult task which confronts any governing power is to raise and properly apportion the taxes necessary to be collected to carry on government. Through all time in the history of governments that has proved to be a task almost if not quite beyond satisfactory solution. The prime purpose in raising taxation should be to collect sufficient money and fairly apportion the burden on those who receive the benefits of government.

We are called upon now to raise a considerable excess of money because of the preparedness program which we have adopted. If the preparedness program and the taxation program were linked together, I am so much in favor at the present time of preparation for the existing and prospective emergency that I would not lightly vote against any bill providing proper preparation and connecting with it any means of raising the money. But we have before us a bill for the raising of money which brings to us the responsibility of determining how the money should be raised by taxation, regardless of the purpose for which the money is to be expended. It is always easy for those who do not pay taxes to favor taxes against those who do pay taxes. [Applause.] The great problem in a republican form of government in the end will be whether the burden of taxation shall be distributed among all who receive the benefits or whether the great majority shall put the burden of taxation only upon a few. I believe that all the people are willing to bear the necessary burdens when they are equitable and just, but I do not believe that the Government will be successful where those who may be in the majority will draw the line exempting themselves from the burdens of government while they enjoy the benefits of government to put upon a few all the burdens of government. [Applause on the Republican side.]

I think there are ways of raising money now without, perhaps, exacting unjust taxes. If we were at a crisis where the life of our Nation depended upon taxes, all would give freely all that they have. [Applause on the Republican side.] But we have not reached that position, and I hope that we never may.

The present bill proposes to raise the additional money asked for by putting all the burdens upon a few. It proposes that all the people shall enjoy the benefits of government and the preparation which is made, but that the few shall bear all the burdens of taxation. We raise now a considerable sum of money by income taxes and a considerable sum by other internal-revenue taxes and a considerable sum by customs duties. If the present method is at all equitable, then in your increase of taxes the burdens should be distributed among the different ways now used in collecting money, and the large proportion of the additional revenue might well be exacted at the customhouses, equally distributing the burden and at the same time guaranteeing the American industrial independence of the world. [Applause on the Republican side.]

I propose very briefly to call attention to the income-tax proposition because whether you call it in this bill income tax or inheritance tax or munitions tax, it is in fact all a tax on income.

I wish to call attention to the figures in reference to the collection of the income tax for the last fiscal year just ended a few days ago.

The corporation tax for last year paid by the first Illinois or Chicago district was $5,109,164. During the same year Alabama and Mississippi combined paid $279,665, Arkansas paid $112,074, Florida paid $108,664, Georgia paid $367,291, North Carolina paid $324,532, Oklahoma paid $404,600, South Carolina paid $173,188, Tennessee paid $329,015, Louisiana paid $406,416, and Kentucky paid $411,843.

The 11 States of Alabama, Mississippi, Arkansas, Florida, Georgia, North Carolina, Oklahoma, South Carolina, Tennessee, Louisiana, and Kentucky, with 95 Members of Congress, paid of the corporation tax last year $2,917,288 as against $5,109,164 that Chicago paid.

Iowa paid last year $517,887, Kansas paid $377,189, Nebraska paid $332,705, New Mexico and Arizona paid $321,563, North and South Dakota paid $176,141, Oregon paid $197,795, Washington and Alaska paid $398,638, and the 20 States of Alabama, Mississippi, Arkansas, Florida, Georgia, North Carolina, Oklahoma, South Carolina, Tennessee, Louisiana, Kentucky, Iowa, Kansas, New Mexico, Arizona, North and South Dakota, Oregon, Washington, and Alaska paid a total corporation tax of $5,239,206, as against $5,109,164 paid by the city of Chicago.

Now, as to the individual-income tax: The Chicago district paid last year $4,848,593, Alabama and Mississippi paid $177,440. Arkansas paid $44,278, Florida paid $133,560, Georgia paid $199,546, North Carolina paid $175,932, Oklahoma paid $489,415, South Carolina paid $76,250, Tennessee paid $207,316, Louisiana paid $296,341, Kentucky paid $165,109, Iowa paid $276,098, Kansas paid $139,303, Nebraska paid $160,206, New Mexico and Arizona paid $94,523, North and South Dakota paid $58,594, Oregon paid $118,437, Washington and Alaska paid $219,167, Texas paid $672,456, Virginia paid $289,631, Indiana paid $410,319, Montana, Idaho, and Utah paid $225,728. The 26 States which I have named paid a total income tax of $4,630,639, as against $4,848,593 paid by the city of Chicago.

Mr. GARNER. Will the gentleman yield?

Mr. MANN. Yes.

Mr. GARNER. Is the gentleman opposed to an income tax?

Mr. MANN. I am opposed to this bill.

Mr. GARNER. Is the gentleman opposed——

Mr. MANN. If the gentleman will sit down I will answer the question in the proper time. The gentleman need not worry, I am not afraid to make my position known, I am not from Texas. [Laughter and applause on the Republican side.]

Last year Illinois paid of the corporation tax $5,579,551, New York paid $14,944,077, Pennsylvania paid $6,790,230. The three States of New York, Pennsylvania, and Illinois paid $27,313,479. The 48 States and Territories of the United States, $56,000,000. Of the income tax last year Illinois paid $5,166,689, New York paid $30,286,607, Pennsylvania paid $6,312,204. These three States paid $41,765,501, as against a total individual-income tax of $67,957,488.

The three States of New York, Pennsylvania, and Illinois paid a total income and corporation tax last year of $69,078,981. And the other 45 States of the Union paid $55,788,488, or excluding Massachusetts, the other States paid $48,926,431.

The total membership of this House is 435. New York has 43, Pennsylvania, 36; Illinois, 27; a total of 106. All of the other States have 329. The 3 States I have enumerated, with 106 Members of the House and 6 Senators, paid $69,078,981.37 of the income tax, and the other 45 States, with 329 Members, paid $55,788,448.91. Including Massachusetts, the 4 States of New York, Pennsylvania, Illinois, and Massachusetts, with 122 Members of the House and 8 Senators, paid $75,940,999.27 of the corporation and income tax, and the other 44 States, with 313 Members and 88 Senators, paid $48,926,431.01. The 4 States of Pennsylvania, New York, Illinois, and Massachusetts, paid $27,014,568.26 more of the tax than the other 44 States of the Union. [Applause on the Republican side.]

Mr. Chairman, this may be an argument to some gentlemen in favor of voting for this bill because there is a desire everywhere to put the burden of taxation on the other fellow, and yet the American people, in my judgment, do not believe in trying to locate the burden of all taxes upon a few, to make thrift only the object of taxes, to give the benefit to all, but to tax only the few. I do not believe that the American people are in favor of singling out a few because they have acquired wealth, and making them bear all of the burdens. I do believe that we may properly make wealth bear a larger proportion of taxes than poverty, that those who have accumulated fortunes may pay a larger proportion of income than those who have a small income, but the effort of the Democratic side of the House to make the few pay all of the burdens in my judgment stamps the bill as improper legislation of which we should not be guilty. [Applause on the Republican side.]

I append herewith as an extension of my remarks the following tables from which I have quoted:

Corporation tax, 1916.

[Disregarding cents.]

First Illinois, or Chicago, district $5,109,164

State.	Members of Congress.	Amount collected.
Alabama and Mississippi	18	$279,665
Arkansas	7	112,074
Florida	4	108,664
Georgia	12	367,291
North Carolina	10	324,532
Oklahoma	8	404,600

WASHINGTON, D. C., *July 4, 1916.*

Secretary McAdoo to-day made public the following receipts from corporations and individuals under the income-tax law, paid into the Treasury during the fiscal year ended June 30, 1916, listed by internal-revenue districts. These figures are subject to revision upon analysis of complete returns:

Districts.	Corporation income tax.	Individual income tax.
Alabama (Alabama and Mississippi)	$279,665.43	$177,440.48
Arkansas	112,074.11	44,278.79
First California (includes Nevada)	1,477,773.84	952,576.28
Sixth California	460,992.73	540,813.24
Colorado (Colorado and Wyoming)	573,503.74	364,102.37
Connecticut (Connecticut and Rhode Island)	1,692,183.43	2,132,866.89
Florida	108,664.80	133,560.83
Georgia	367,291.95	199,546.46
Hawaii	341,938.37	112,144.95
First Illinois	5,109,164.99	4,848,593.96
Fifth Illinois	172,301.65	90,362.39
Eighth Illinois	169,753.98	178,740.36
Thirteenth Illinois	127,931.37	48,993.20
Sixth Indiana	666,812.66	347,875.55
Seventh Indiana	147,395.32	62,444.50
Third Iowa	517,887.96	277,098.45
Kansas	377,189.51	139,303.47
Second Kentucky	34,195.83	8,734.57
Fifth Kentucky	277,159.06	103,183.91
Sixth Kentucky	28,252.37	12,985.61
Seventh Kentucky	45,717.31	33,991.88
Eighth Kentucky	26,520.97	6,216.78
Louisiana	406,416.45	296,341.35
Maryland (Maryland, Delaware, District of Columbia, and Accomac and Northampton Counties of Virginia)	1,787,680.69	2,741,761.76
Third Massachusetts	2,668,144.82	4,193,873.08
First Michigan	1,680,447.64	1,730,859.95
Fourth Michigan	340,025.52	145,885.67
Minnesota	1,854,447.24	866,557.90
First Missouri	1,031,501.65	818,411.74
Sixth Missouri	551,734.96	388,316.93
Montana (Montana, Idaho, and Utah)	735,027.04	225,728.01
Nebraska	332,705.69	160,206.31
New Hampshire (New Hampshire, Maine, and Vermont)	507,536.98	556,570.31
First New Jersey	357,474.11	697,997.95
Fifth New Jersey	1,180,259.69	2,230,302.18
New Mexico (New Mexico and Arizona)	321,563.21	94,523.23
First New York	648,514.10	1,751,547.57
Second New York	9,237,778.23	14,713,305.36
Third New York	2,869,293.42	10,618,663.03
Fourteenth New York	646,389.73	1,500,339.99
Twenty-first New York	443,589.64	472,456.77
Twenty-eighth New York	1,098,512.44	1,230,294.89
Fourth North Carolina	116,802.67	52,439.44
Fifth North Carolina	207,730.69	123,483.23
North and South Dakota	176,141.82	58,594.39
First Ohio	727,979.96	515,339.32
Tenth Ohio	765,438.82	262,010.74
Eleventh Ohio	286,080.86	229,258.43
Eighteenth Ohio	1,868,139.25	1,389,672.34
Oklahoma	404,600.80	489,415.08
Oregon	197,795.61	118,437.49
First Pennsylvania	3,153,890.79	3,756,186.27
Ninth Pennsylvania	202,329.16	170,615.55
Twelfth Pennsylvania	428,480.90	461,048.11
Twenty-third Pennsylvania	3,005,529.16	1,924,354.36
South Carolina	173,188.91	76,250.01
Tennessee	329,015.11	207,316.37

Second Virginia	367,234.40	239,984.88
Sixth Virginia	279,554.76	49,647.24
Washington (Washington and Alaska)	398,638.64	219,167.13
West Virginia	331,947.96	132,064.13
First Wisconsin	597,898.64	503,143.74
Second Wisconsin	180,437.27	56,805.24
Total	56,909,941.78	67,957,488.50

Mr. HULL of Tennessee. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to proceed for 10 minutes. Is there objection?

There was no objection.

Mr. HULL of Tennessee. Mr. Chairman, the gentleman from Illinois [Mr. MANN] would leave the impression upon the House, and, if possible, upon the country, that the only matter of tax consideration in this measure is that pertaining to taxation of incomes. We should consider the entire amount of all taxes. According to the most reliable figures the masses of the people of this country alike are paying, or were in 1913, the sum of $2,130,000,0000. Over $1,000,000,000 of that sum constituted general and personal property taxes. The remainder was paid as different special taxes. That remainder included $604,000,000 paid to the Federal Government in tariff taxes and internal-revenue taxes. The question now is one of sound economic policy, whether in accordance with the rule of imposing taxes according to the ability to pay, and the further rule of determining the ability to pay by one's income, we will impose an income tax to supplement this burden of $2,130,000,000 now imposed upon the masses of the American people to pay our preparedness bill. I want to call attention to certain

facts in order to correct a popular misapprehension. When we deduct from our total national wealth the property of the Government and the States, and the property of churches and educational institutions and other exempt property, we have not over $160,000,000,000 of national wealth. The annual net income returned by the present income-tax payers of the country under the present law amounts to more than $7,000,000,000, as I am informed.

The net income of the present income-tax payers would therefore amount to 4½ per cent annual profit upon our total national wealth. If we should assume that our entire national wealth earns 9 per cent, then the present income-tax payers own or control one-half of the income-producing property in the United States.

I have one other similar suggestion in connection with the proposed estate tax. Our national wealth has been increasing at the rate of over $10,000,000,000 a year. We might levy a combined State and Federal inheritance tax of $150,000,000 a year, and that would be only 1½ per cent, not of our national wealth, but of our annual increase in wealth. The proposed estate tax would only amount to about one-half of 1 per cent on the annual increase of our wealth, and yet some gentlemen intimate that we are imposing much larger tax burdens on the American people to meet these new expenditures.

I find here a statement from the report of the Wisconsin State tax commission on the Wisconsin income-tax law, which shows more fully the distribution of income-producing property. It states that one group of 315 taxpayers having incomes of over $15,000 each constitutes less than two one-hundredths of 1 per cent of the population of the State, and yet this group, added to one other, making 667 in number, constitutes less than three one-hundredths of the population of the State, and they pay nearly one-half of the total income-tax of the State of Wisconsin. The New York State tax commission made a report a few months ago in support of an income-tax bill it had drafted, and cited the manner in which wealth is congested, and illuminated the sources from which the income of this country is largely derived. It sets out some tables. One statement is that 72,345 people having incomes of less than $3,000 would pay a total of $287,000 tax under the proposed New York income tax, while 82 people having larger incomes in the State would pay a total of $1,809,000.

Mr. Chairman, this is the (to many) surprising experience wherever this question of the size, source, and relative number of incomes is investigated. It has been the experience of the New York tax commission which investigated tax conditions and drafted a proposed income-tax law, and of most State tax commissions, and in fact all tax authorities. This showing is elaborated in the report of the Wisconsin tax commission, and I hope that gentlemen before becoming so rash in their assertions as to the incidence and burden of this proposed income tax will look and see the real facts as to the effect of them, both in their application to wealth and to the owners of wealth, and they will conclude, if they consider it in the spirit of fairness, that this small supplemental income tax does not scarcely scratch the skin of our annual increase of wealth, much less touch any of the capital of the people of this country. This statement may also include the estate tax.

As to the remarks of the gentleman from Arizona [Mr. HAYDEN] relative to the amendment he offered to the copper provision, I desire to say this:

We found that a great many countries have levied a special combination tax, called in some cases an "excess-profits" tax—Canada, Germany, France, England, Sweden, and other countries, In every case those tax laws exempted agriculture and live stock. They found it to be sound policy, notwithstanding their revenue necessities, to exempt agriculture and certain other classes of business. Now, in this case the committee undertaking to meet a temporary extraordinary expenditure, found that certain products of business in this country have derived abnormal, peculiar, and colossal profits incidental to the sale of munitions and kindred products since the outbreak of the war.

It also appeared that many of these companies had been declaring extra dividends from 5 to 10 and up to 200 per cent, and their profits, according to all available sources, have been in many cases so swollen as to be almost unbelievable. When we came to the copper situation we found that this industry was supplying Europe almost one-half of the domestic product, and that the net increase, making a most liberal allowance for normal profits according to normal rates and prices, and only computing an increase of 10 cents a pound on the total volume of copper handled in this country, showed a profit, an abnormal profit, of from $210,000,000 to $250,000,000. We would much have preferred to have imposed those taxes in only one place as it related to the copper industry, but we found that the smelter was selling an immense amount of crude copper to Europe as well as to different sections of this country. We found also it was impossible to place it on the refiner alone or on the alloyer alone, or on the consumer alone, so, in view of these enormous increases of war profits, we thought that to spread ten or twelve millions dollars over the entire industry in the most equitable manner possible would do no one an injustice. Besides, we would expect these munition prices and profits soon to cease and the law to be repealed within a few months.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HILL. Mr. Chairman, I would ask that the gentleman have five minutes additional.

The CHAIRMAN. The gentleman from Connecticut asks unanimous consent that the time of the gentleman from Tennessee be extended for five minutes. Is there objection?

Mr. HILL. I desire to ask the gentleman one question for information. The industry is a very large one in my State and I would like——

Mr. ELSTON. Mr. Chairman, reserving the right to object, I have an amendment which I desire to offer, and I inquired of the Chairman to get a little time to introduce the amendment which I have and the time is going so speedily I do not believe I will have that opportunity, especially if these extensions be given.

Mr. HULL of Tennessee. I will not insist on time. I think I have stated the situation.

Mr. HILL. The gentleman has been spending weeks and months in the consideration of the terms of this bill and he can answer any question concerning it——

Mr. ELSTON. If the gentleman will permit me to discuss my matter with him I will be glad to withdraw my objection.

Mr. MANN. Mr. Chairman, reserving the right to object, I shall not object now, the gentleman from Connecticut should remember he offered an amendment this morning and talked for half an hour on it, and other gentlemen talked nearly half an hour. There are a lot of gentlemen who desire to offer amendments and I think we will soon get to the point where there can be no extensions.

Mr. HULL of Tennessee. I do not ask for any more time.

Mr. MANN. I do not object to the gentlemen's extension.

The CHAIRMAN. The gentleman from Montana [Mr. EVANS] is recognized for five minutes.

Mr. EVANS. Mr. Chairman, the question——

Mr. HILL. I would like to ask if it is intended the refiner and alloyer of copper——

Mr. EVANS. I will yield the gentleman a minute out of my five minutes.

Mr. HILL. I would like to ask the gentleman if it is intended under the terms of this law to collect a tax from the proceeds of the refined and alloyed copper that is going into the making of products and then collect from the products into which the brass is made, outside of cartridges, for instance, bedsteads, tubing, and all that sort of thing? Under the terms of the bill it seems to me there is a double tax, provided it is done in separate departments of a factory.

Mr. HULL of Tennessee. Well, I would say to the gentleman that in a large number of cases one concern refines and alloys the copper, and they may then make it into cartridges. In that case it would only pay a tax on the gross receipts from the sale of the cartridges, because it is the only case where there are gross receipts derived. In working this out we tried to make this as equitable as possible to the entire industry; and to that end, where the smelter sells to the refiner or the alloyer, he would pay no tax. Again, any concern smelting or refining or alloying copper would pay the tax on the gross receipts of whatever form of the product he sells, whether sold in the form of alloy or refined or smelted copper.

Mr. HILL. Let me ask the gentleman further. Gross receipts—does it mean, for instance, a product that sells as tubing as it stands or does it mean simply the copper that is in it?

Mr. HULL of Tennessee. It depends upon whether the manufacturer of tubing refines his copper.

Mr. HILL. Oh, he certainly does; I am putting that case.

Mr. HULL of Tennessee. It is measured by the gross receipts of his alloyed products, because otherwise no one would pay any tax. It is impossible to separate the copper munitions from these other kinds of copper products, because some of the munition products are sold direct to Europe by the smelter, others by the refiner, and still others by the alloyer. If the tax were placed upon the cartridge manufacturer alone the larger portion of copper going into munitions would escape the tax. It was therefore considered most feasible and equitable to fix the copper rates at but little over half the other munition rates and let them spread over the industry.

Mr. HILL. I am not talking about munitions. What I want to get at is the ordinary products of peace, like tubing and bed-

steads, and all that sort of thing. Does it cover the zinc that is in it in the final——

Mr. HULL of Tennessee. It covers whatever makes up the gross receipts of any alloy product of which copper constitutes the chief value.

Mr. HILL. That is what I want to know. One-third zinc and two-thirds copper.

Mr. EVANS. Mr. Chairman, this particular item in this bill can not help but strike me as being unjust and inequitable and as being class legislation. Our people in the State of Montana who are large producers of copper do not desire to shift any of the burden. We are willing to pay our taxes—inheritance, income, and other taxes—as levied on the rest of the people of the country; but, in addition to that, you are levying upon the State of Montana, with its about 500,000 people, $3,000,000 in addition to what you are levying upon the other people of the land. This is about $5 a head. My estemed friend, the gentleman from Pennsylvania [Mr. MOORE], says the people from the copper-producing States are complaining because we are attempting in this bill to take from them a portion of the money to support the Government, and says that it makes a difference whose ox is gored and that if we, in the tariff bill, had placed a duty upon the manufactured articles of his city it would not now be necessary to levy a direct tax.

Well, of course, it makes a difference whose ox is gored. The gentleman from Pennsylvania stands for a high protective tariff. He wants all the people of the country to pay an additional price for manufactured articles of his city that a few favored ones may profit thereby. But we of the copper-producing States are not asking any such protection. We are only asking to be treated as are the other people of the country.

Suppose you should levy on the city of Philadelphia an additional tax of $5 on every man, woman, and child, they would have a right to complain as we have in this instance.

We are not asking any protection. We ask that what we produce we may spend ourselves and utilize ourselves as well as the other people of the land. Why, Mr. Chairman, if they limited this proposition to the copper that went into munitions of war, I should not complain, and I do not believe our people would complain; but we do protest against the effort to single out a special industry and tax it for the benefit of all the people.

We are now electrifying 450 miles of transcontinental railroad in Montana. It is an event in the history of the Nation; but this provision of the bill penalizes the efforts of our people to develop the natural resources of the country or to promote its transportation facilities.

Mr. MONDELL. The gentleman is making his argument to this part of the House. He knows that we are not responsible for this copper tax and are not going to vote for it.

Mr. EVANS. Maybe you will help me vote against it, then?

Mr. MONDELL. The gentleman should make his plea to that side of the House.

Mr. EVANS. I understand those gentlemen know where I stand upon the proposition.

As I suggested to you, we are willing to bear our proportion of this burden if necessary. I have not complained that you did not put any duty upon wool or upon the other products of the State of Montana. I have not complained on that score. We do not ask that, but as to our own resources we think we should be called upon to bear only an equitable distribution of taxes.

This provision of the bill discloses the astounding fact that the entire business of copper smelting and refining is classified with the manufacturers and sale of munitions of war; and, in my opinion, such a classification is wholly unjust and unwarranted, and is an indefensible discrimination against the principal industry of my State and a number of other States in the Rocky Mountain country. This tax will amount in instances at least to 10 per cent of the total net income of the copper business under normal conditions and is highly discriminatory against business in Montana because of the high wages, heavy freight rates, and other costs of production. It is class legislation and unjustified as a legislative measure, because copper mining and smelting should not be classified as munition manufacturing unless we should also so classify the production of steel, lead, zinc, antimony, and numerous metals that go into munitions of war.

As compared with the quantities of this metal used in the arts and industries, the amount used in munitions of war is quite small. And yet all the industries in which copper is used must bear an additional burden because it so happens that a small quantity of this metal is used in the manufacture of munitions of war. Our people are not asking for any exemption from taxation for the copper that is actually used for war material, but we do protest against this unfair discrimination of a tax against the peaceful industry in our State.

Mr. COX. What proportion of copper mined in Montana goes into the manufacture of munitions?

Mr. EVANS. I do not know. I know a large part of the copper goes into the industrial development of this country. I know that we are trying to do everything we can under the so-called conservation laws to develop the water power of that country. We must have the copper for that purpose.

The CHAIRMAN. The time of the gentleman has expired.

Mr. EVANS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by printing a large number of telegraphic protests against this clause in the bill.

The telegrams are as follows:

ANACONDA, MONT., *July 8, 1916.*

Hon. J. M. EVANS,
United States Representative from Montana, Washington, D. C.:

The revenue bill now under consideration in Congress imposes a 3 per cent tax on gross revenue of copper producers. Our city depends entirely on the production of copper, and the proposed tax would cripple our industry, involving our city, with population of 20,000. Please use your utmost endeavor to have copper producers omitted from the bill, as such are not manufacturers of munitions.

ANACONDA BUSINESS MEN'S ASSOCIATION,
D. R. MCRAE, *President,*
F. W. HARRISON, *Secretary.*

—

GREAT FALLS, MONT., *July 8, 1916.*

J. M. EVANS,
Washington, D. C.:

The Great Falls Commercial Club urges you to oppose that provision of proposed revenue bill which levies special tax on copper as a munition of war. Such tax is not only class legislation, but would result in casting a burden upon the State of Montana so disproportionate to its just share of the burdens of taxation as to be manifestly unjust.

GREAT FALLS COMMERCIAL CLUB.

—

BUTTE, MONT., *July 8, 1916.*

Hon. JOHN M. EVANS,
Representative of Montana, Washington, D. C.:

The attention of the Butte Rotary Club has been called through the columns of the Associated Press of the proposed general revenue measure now before Congress, which, if true, vitally affects the principal industry of this city and State, and which we consider an open and unjust discrimination against every interest in investment in this Commonwealth. We most strenuously and vigorously oppose this part of the measure and insist that every honorable means at your command be used for its elimination from the proposed act. We will use every means at our command, locally and nationally, to accomplish this purpose. This is of such vital importance that we wish to be informed of what action you may take in the premises, and you can rest assured that you will have our earnest cooperation and hearty support to the end that the interests of this State may be protected.

MALCOM GILLIS, *President.*

—

GREAT FALLS, MONT., *July 8, 1916.*

Hon. JOHN M. EVANS,
Washington, D. C.:

Personally, am sure public opinion whereby the proposed revenue bill, which levies special tax on copper as munition of war, will not be fair or equitable, as it will cause an apparent and distinct unjust burden of taxation on Montana. Trust that you will oppose that particular provision.

A. J. BREITENSTEIN.

—

MISSOULA, MONT., *July 8, 1916.*

Hon. JOHN M. EVANS,
Washington, D. C.:

Section 201, general revenue bill, reported last Saturday, is considered by us to be entirely indefensible as applied to persons smelting or refining copper ores. A tax of 3 per cent on gross sales in excess $10,000,000 places outrageous burden on principal industry this State, which we vigorously condemn. We heartily urge every effort on your part to prevent enactment clause referred to.

MISSOULA CHAMBER OF COMMERCE,
By W. G. FERGUSON, *Secretary.*

—

BUTTE, MONT., *July 8, 1916.*

Hon. J. M. EVANS,
Representative from Montana, Washington, D. C.:

The text of the proposed general revenue measure now before Congress has reached Montana, and we have just become apprised of its contents, and examination of title 3 of the act disclosed the astounding fact that the entire business of copper smelting and refining is classified with the manufacture and sale of munitions of war. This is wholly unwarranted classification, and, in our opinion, is an unjust and indefensible discrimination against the principal industry of the State. The tax proposed is as follows, based upon the gross receipts obtained from the sale of the metal: One per cent on receipts above $25,000 to a million dollars a year, 2 per cent on receipts from a million to ten million dollars a year, and 3 per cent on all gross receipts above $10,000,000. In normal times this tax would amount to more than 10 per cent of the total net income of the copper business. It is particularly discriminatory against the business in Montana, where, on account of high wages, heavy freight rates, and other costs of production, the Montana producer is seriously handicapped in competing with the production of other States and countries. It is wholly unjustified as a legislative measure, because copper mining and smelting should not in any event be classified as munition manufacturing. In normal times the amount of copper which goes into munitions of war as compared with the quantities used in the arts and industries is inconsequential, and even under the present extraordinary conditions, compared with the amount of the total production which is going into munitions of war, is relatively small. The imposition of this tax will work a hard-

ship upon the copper producer and upon the various industries in which copper is used, entirely aside from that of manufacturing munitions. It is discriminatory because copper is the only raw material that has been selected and placed in the category of manufactured munitions as compared with the other articles classified as munition manufactures; it is discriminatory because express provision is made in the measure limiting the application of the tax to the particular portion of the output of the manufactory which goes into war material and exempting such part of the output of the factory as is made for peaceful industry. But with copper, all copper produced, no matter for what purpose used, is taxed. We are not asking for any exemption from taxation of the copper industry, which under the present general income-tax law is paying its proportion, the same as other industries with which it is properly allied and classified. We feel that the entire State of Montana will be vitally and unjustly affected by the discrimination imposed upon the principal industry of this State, and respectfully urge you to protest vigorously against this provision of the proposed measure and endeavor to secure its elimination from the act.

BUTTE CHAMBER OF COMMERCE.

—

LIVINGSTON, MONT., *July 9, 1916.*

Hon. J. M. EVANS,
Member of Congress, Washington, D. C.:

Title 3 of the general revenue measure, imposing an extraordinary tax on copper, classifying its production and refining with the manufacture and sale of munitions of war, is absolutely indefensible, discriminating, unjust, and an outrage on every mountain State; promoting foreign copper development and production and retarding its production in the United States. Proposed tax is an especial outrage on Montana. Even in this unusual time of war but a small percentage of copper is going into military channels, and in times of peace this consumption is inconsiderable. Copper is asking no favors. The industry is now bearing its full share of public burdens, as compared with other metallic industrials; and we ask that you immediately and strenuously protest against the proposed outrageous discrimination. This county and this State have many copper beds to be developed, and under this law development never could be secured; but if passed, while killing the copper industry of the Rocky Mountains of the United States, will tremendously promote it throughout the copper areas of Mexico, Central and South America.

S. H. FRANK, *President,*
O. M. HOLMES, *Secretary,*
Park County Chamber of Commerce.

—

HELENA, MONT., *July 9, 1916.*

Hon. JOHN M. EVANS,
House of Representatives, Washington, D. C.:

This association, whose membership is composed of representative men and firms engaged in manufacturing, agricultural, stock-raising, banking, commercial, and mining industries, does strenuously protest against that portion of the general revenue measure now before Congress which classifies copper smelting and refining with the manufacture and sale of munitions of war. This proposed tax on the principal industry of Montana is not only discriminatory and unjust to all engaged in the production of copper but it will indirectly penalize the various other lines of human endeavor in our State, as the farmer, stockman, and manufacturer are dependent on the mining and smelting centers for a market for their products. It discriminates unjustly inasmuch as all copper would be taxed as munitions of war, whereas the portion thus used is negligible when compared to the greater amount used in industrial enterprises. We respectfully urge you to use all honorable means to have this unjust portion eliminated from the act.

STATE OF MONTANA ADVANCEMENT ASSOCIATION,
By J. E. WOODARD, *President.*

—

BUTTE, MONT., *July 8, 1916.*

Hon. JOHN M. EVANS, M. C.,
Washington, D. C.:

Section 201 et seq. of proposed revenue law, classifies copper smelting and refining under munition manufacturers tax and proposes a levy entirely disproportionate considering the character of the business taxed; the proposed schedule would impose upon the copper industry of this State a burden of approximately $3,000,000 at normal prices. The tax would amount to more than 10 per cent of the net income of the business. It does not seem possible that this provision was incorporated with a full understanding of the situation. We can not comprehend why the copper business should be singled out for such an excessive, unjust, and discriminatory tax, nor why it should bear disproportionately a burden not imposed upon other metals nor upon agricultural products and innumerable lines of manufacture, all of which are benefiting incidentally by reason of present current high prices. We urge upon your attention that the proposed measure will unjustly burden the principal industry of this State and that without logic it places upon the copper producers of the United State a burden that it will be practically impossible to bear. We respectfully urge the exercise of your utmost efforts to have this unjust provision stricken from the proposed measure.

C. F. KELLEY.

—

VIRGINIA CITY, MONT., *July 8, 1916.*

Montana Congressman EVANS,
Washington, D. C.:

The text of the proposed general revenue measure now before Congress has reached Montana and we have just become apprised of its contents, disclosing the astounding fact that the entire business of copper smelting and refining is classified with manufactures and sale of munitions of war. This is a wholly unwarranted classification and in our opinion is an unjust and indefensible discrimination against the principal industry of this State. This tax would amount to more than 10 per cent of the total net income of the copper business under normal conditions. It is particularly discriminatory against the business in Montana, where, on account of high wages, heavy freight rates, and other costs of production, the Montana producer is seriously handicapped in competing with the production of other States and countries. It is wholly unjustified as a legislative measure because copper mining and smelting should not in any event be classified as munition manufacturing. In normal times the amount of copper which goes into munitions of war as compared with the quantities used in the arts and industries, is inconsequental and then under the present extraordinary conditions compared with the amount of the total production which is going into munitions of war, is relatively small. The imposition of this tax will work a hardship upon the copper producer and upon the various industries in which copper is used. Entirely aside from that of manufacturing munitions, it is discriminatory because copper is the only raw material that has been selected and placed in the category of manufactured munitions, as compared with the other articles classified as munitions manufactures. It is discriminatory because express provision is made in the measure limiting the application of the tax to the particular portion of the output of the manufacturing which goes into war material and exempting such parts of the factory as is made for peaceful industry; but with copper, all copper produced, no matter for what purpose used, is taxed. We are not asking for any exemption from taxation of the copper industry which under the present general income tax law is paying its proportion the same as other industries with which it is properly allied and classified. We feel that the entire State of Montana will be virtually and unjustly affected by the discrimination imposed upon the principal industry of this State and respectfully urge you to protest vigorously against this provision of the proposed measure.

J. Z. CLEM,
Secretary, the Madison Club.

BUTTE, MONT., *July 8, 1916.*

Hon. JOHN M. EVANS,
Capitol, Washington, D. C.:

Organized labor in Montana emphatically protests against the increased tax upon copper production as contained in the general revenue bill now before Congress classifying this business with the manufacture of war munitions. Its passage will have the effect of seriously handicapping the mines of this State, thereby jeopardizing the employment of thousands of people.

MONTANA STATE FEDERATION OF LABOR,
By M. M. DONOGHUE, *President.*
O. M. PARTELOW, *Secretary.*

—

GREAT FALLS, MONT., *July 8, 1916.*

Hon. JOHN M. EVANS,
Washington, D. C.:

Much interest has been aroused here over the provision of the pending revenue bill which includes copper as a munition of war and levies a heavy tax upon the output. Of the same Montana uses enormous quantities in electrical and power development, which would by said tax be seriously retarded, as would development of the State.

LEADER PUBLISHING CO.

—

GREAT FALLS, MONT., *July 8, 1916.*

Hon. JOHN M. EVANS,
Washington, D. C.:

My attention is directed to provision of pending revenue bill, which includes copper as a munition of war and levies an enormous tax upon the output of same. Enactment of such law would be gross injustice to State of Montana and would retard the great electrical and power development of this State that is now going on.

PARIS GIBSON.

—

HELENA, MONT., *July 8, 1916.*

Hon. J. M. EVANS,
House of Representatives, Washington, D. C.:

We strongly protest the passage of Kitchin income-tax bill taxing smelter copper production as unjust and placing an unequal burden on both large and small mining interests of the country. We ask you to use your best efforts for its elimination. The provision as it now stands affects mining, mercantile, and labor interests.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The Chair recognizes the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. Mr. Chairman, I can not say much in five minutes. I do not wish to repeat what has often been said.

This bill is unlike anything in the heavens above or the waters beneath the earth. When you come to read it you will find that there is a spirit, I might say, of unfairness in it. It is a war measure, and yet we are not at war. There are 100,000 soldiers down on the border, part of the Regular Army, and yet we are not at war, so it is said, although there is practically war over in Mexico. We are still paying to get out indigent citizens. We will have a chance to vote for an additional appropriation for that purpose in a short time.

This is not the first revenue bill that has been introduced since I have been a Member of Congress. I recollect that in the war with Spain—and it is sometimes useful to walk in the present in the light of former experience—we authorized an issue of $500,000,000 of 3 per cent bonds. One hundred and ninety-eight million dollars' worth of them were issued. The people took them at popular subscription, and it was oversubscribed seven times. There was a stamp tax imposed at that time, internal revenue, and it was submitted to generally because war had already been declared. And yet when we came to introduce the bill and consider it in the House, there were only six Democrats for it, and under the lead of the present Speaker of the House and Senator LEWIS, who was then a Member of the House, and others, there was a solid vote against it outside of those mentioned. Now, why? Juet let me stir up your minds by way of remembrance a little bit. Amos J. Cummings, a Member of Congress from New York, voted for the bill. Mr. CLARK, now Speaker, led against it, strong then as he is strong now. I have great respect for him personally, but yet upon one matter he is radical, always has been radical, and that is upon matters from an economic standpoint. He believes there ought to be free trade with all the world. [Applause on the Democratic side.] I hear Members applaud on that side.

We Republicans believe in raising the larger share of the revenue through the customhouse. [Applause on the Republican side.] You believe in excise taxes so placed, as you say, that we will not have much need for revenues through the customhouse, and what there is levied you say should be for revenue only. We hold a different view. I will not discuss it now. It has been discussed time in and time out, but I am just a little bit desirous of calling your attention to the tenor of the discussion when the war appropriation bill was passed in 1898. By the way, it was repealed in 1902, less than five years after it was enacted. There was $198,000,000 of money borrowed; that is all. The balance was raised by taxation.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. BURNETT. Mr. Chairman, I ask unanimous consent that the gentleman may have five minutes more.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent that the gentleman from Illinois may have five minutes more. Is there objection? [After a pause.] The Chair hears none.

Mr. CANNON. Now, then, I want to just read a bit. After the bill was passed Mr. LEWIS, now Senator, but then a Member of this House, attacked Amos J. Cummings on the Democratic side and read him out of the party. The "devil was to pay, and no pitch hot," from the Lewis standpoint. [Laughter.] I have not the time to read it to you in full, but possibly I may put some of it in the RECORD.

In his own defense Mr. Cummings said that after "a Democratic administration had issued $300,000,000 of bonds to run the Government in time of peace a Republican administration might be allowed to sell bonds to run the Government in time of war." The present Speaker, then a Member of the House, proceeded to make a pretty long speech and a very bitter one. He said:

> You talk like you brought on this war. This is not a Republican war. * * * My Republican friends, we took you by the scruff of the neck and dragged you into it, and that will be the verdict of history. We started the fire among the people, and they heated you so hot that at last you had to go into it or go out of business.

Now, then, when we came to vote for the funds to carry it on he voted against it, and said, amongst other things:

> We say we are willing to vote every dollar necessary to carry the war to a speedy and successful conclusion, but that a bonded debt is not necessary, and we offer to coin the $42,000,000 silver seigniorage now in the Treasury, to vote $150,000,000 in full legal-tender greenbacks, and to levy an income on all our incomes above $2,000, which would raise $90,000,000 more annually without one dollar of interest. We offer you all the money the Government needs, but you rejected our proposition. We offer you a noninterest-bearing currency. Nothing will do you but an interest-bearing debt. There we part company. We offer you abundant money to carry on the war, but you are bent on a debt carrying $18,000,000 annually.

As to Mr. Cummings, I just want to read a little bit touching what he said on the proposition to read him out of the Democratic Party. The Speaker denounced him fiercely, saying:

> If it were not for my personal affection for the gentleman from New York, I would inaugurate a movement among the Democrats in this and the other end of the Capitol to read out of the Democratic Party by name every man on this floor who voted for the bond bill the other day. To issue bonds when there is no earthly necessity for it is an un-Democratic performance. Genuine Democrats do not propose that such action shall be charged to them.

Mr. CLARK accused Mr. Cummings of committing "the unpardonable sin" in calling the Cleveland administration a Democratic administration, and declared that there had been no Democratic administration in this country since the 4th of March, 1861. He denied that Grover Cleveland had ever been a Democrat, and said:

> There are but two men in all the hoary registers of time that Cleveland's name ought to be associated with—Judas Iscariot and Benedict Arnold. Shades of Arnold, forgive the profanation. He at least did not hire a substitute to do his fighting. The blood which he shed at the storming of Quebec and on the heights of Saratoga was American blood. The shattered leg which was buried in his grave of obloquy was an American leg, broken by British bullets in the holy cause of liberty. Arnold was at one time both a hero and a patriot. He fell headlong from his high estate to everlasting infamy. Upon reflection I think really I ought to beg the pardon of Judas Iscariot, because after his treason he did have the grace to go out and hang himself.
>
> Yes; Grover Cleveland by his unfaithfulness did the cause of free trade more harm than all the McKinleys and Dingleys could do in 100 years. He could not kill it. Nobody can do that. But he did set it back for perhaps a generation. The tariff barons ought to build a monument to his odoriferous memory.

You may ask, Why read this? I read it because he led then, and leads now, largely, in the public position and the thought of the Democratic side of the House in this legislation and similar legislation to follow. The gentleman from Indiana [Mr. Cox] declares to-day that this legislation will stand and never be repealed. You want to put the whole thing over by direct taxation and tear down the customhouses. My friends, the Speaker has not changed in that respect, although I doubt if he would make it as radical now as he made it when he uttered the remarks.

Now you say, "Oh, you Republicans, come and vote for this. We have made a tariff board and we have made an antidumping provision." If you were to live to be as old as Methuselah nobody could ever be convicted under that antidumping provision. It is a pretense, a cheat, and a fraud. [Applause on the Republican side.]

Take your Tariff Commission. You have been suddenly converted, not permanently converted, as Saul was when he was journeying from Jerusalem to Damascus.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. CANNON. May I have just one minute more?

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. CANNON. I want to turn to this side of the House, the Republican side, a minute. Who put on the stamp tax? The Democrats, against a solid Republican vote. Who continued that tax a year longer, last December? The Democrats, the Republicans voting against it. Now, they seek to repeal it, hoping to get votes to keep them in power. What do they say? "Oh," said the gentleman from North Carolina [Mr. KITCHIN], "it is unpopular." I asked him whether he proposed to refund that which had been paid. He said, "Oh, yes; we considered it, but it would take too much clerk hire to reckon and distribute the $40,000,000 which has been paid under that law." Now they propose to repeal it.

Now, I want to say to this side of the House, If they have got anything in this bill that you think ought to be in it, let them present it singly. [Applause on the Republican side.] Do you want to vote for this bill because they have put in a false prayer and made false pretenses? I am for an income tax; not this income tax, but for a sound, well-arranged income tax. [Laughter on the Democratic side.] I say a sound, well-arranged income tax, that will distribute well and equitably the burden required for the protection which the Government affords to all the people. [Applause on the Republican side.]

Mr. LONDON. Mr. Chairman, the real enemy of society is the standpatter, the man who refuses to recognize the fact that the world moves forward, the man who would not see that new forces are at work.

For once the Democrats have got the better of the Republicans. When the astute and resourceful leader of the minority, Mr. MANN, of Illinois, found himself unable to give a direct answer to a direct question, whether he was for or against the income tax, no better proof was necessary that the Democrats had succeeded in putting the Republicans in a hole. [Applause on the Democratic side.]

How can the Republicans justify their opposition to the bill? They can not oppose the antidumping provision, and they have not argued against it, for it is a protectionist measure. They can not oppose the tariff-commission provision, and they have not argued against that, because it is originally a Republican proposition. They can not oppose the dyestuffs industry protection feature. While this bill does not give them as much protection for the dyestuffs industry as they would have liked to have, it gives them a great deal. All of these three provisions of the bill are essentially Republican in character. In spite of it all, their leader advises them to vote against the bill. But what will make them vote against this bill, if they vote against

it? The income tax. And the amusing part of it is that they have not the courage to say so. [Applause on the Democratic side.] Afraid to disclose the real reason for their hostility to the measure before us, they argue in a roundabout way that because a small portion of the population located in a geographically small section of the country pays the larger share of the income tax, that the tax is unequal and unjust. They point to New York as paying one-third of the total of the entire personal tax. They point to Chicago as too large a contributor. Is there anything in that argument? They might as well complain that there is more blood in the heart than in any other portion of the human body. New York is the industrial heart of America. Both New York and Chicago are our industrial, financial, and commercial centers, and it stands to reason that the larger proportion of wealth being in those places they should pay a larger proportion of the income tax.

The last Speaker, Mr. CANNON, suggested that there should be a tax on everybody, on the bricklayer as well as on the millionaire. What should be the principle of an income tax? It should not be a burden on the worker. We should not tax the man who renders service and whose only source of income is his service. The overwhelming majority of those who earn less than $3,000 a year belong to the class who work for a living.

The Republicans should be the last in the world to complain that certain States are poor and other States are rich. It was mainly under Republican management and a Republican tariff and a Republican protective policy, and under Republican stimulation of trusts and monopolies that the wealth of this country has been concentrated in the hands of a small number. [Applause on the Democratic side.] It is interesting to see how the minds of these men work. The gentleman from Illinois [Mr. MANN] drew a parallel between the number of Representatives sent here by certain States of the Union and the amount of taxes that they are called upon to pay. He found a great disproportion between the amount of taxes some States contribute and the number of Representatives they have in Congress.

I would like him to study the franchise system of the Prussian Landtag. He will find that the Prussian statesmen have followed the reasoning of the gentleman from Illinois. Under the Prussian three-class system, representation in the Landtag is determined entirely by a tax qualification. The taxpayers are divided into three classes. The smallest class numerically, which pays one-third of the taxes, has one-third of the representatives in the Prussian Landtag; the next class is somewhat larger numerically, pays one-third of the taxes, and has one-third of the representation; and finally, they have the great majority of the people who pay the last third of the taxes and have one-third representation. Under this ideal system the great majority of the people are always sure to have a minority in the legislative body. Leave it to the Republicans and we may some day be blessed with the same system in the United States. [Applause on the Democratic side.]

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed without amendment joint resolution of the following title:

H. J. Res. 257. Joint resolution permitting the use of certain hospital facilities belonging to the United States.

REVENUE.

The committee resumed its session.

Mr. HELVERING rose, and was recognized by the Chairman.

Mr. HAYDEN. Mr. Chairman, a parliamentary inquiry. Has not debate on my amendment been exhausted?

Mr. MOORE of Pennsylvania. I demand the regular order.

The CHAIRMAN. Debate on the amendment has been exhausted. It has been proceeding by unanimous consent, and the Chair has recognized the gentleman from Kansas [Mr. HELVERING].

Mr. MOORE of Pennsylvania. Mr. Chairman, I make the point of order that debate is now out of order. We are proceeding under the five-minute rule, and I demand the regular order. There are legitimate amendments here that must be offered, and if we are to be gagged on this bill as we have been on most of the other important bills we wish to know it.

Mr. HELVERING. Will not the gentleman withhold his demand for a moment?

Mr. MOORE of Pennsylvania. I will, at the request of a member of the committee; but I will not hereafter. We want to get down to business or know the reason why.

Mr. HELVERING. Mr. Chairman, I do not intend to talk politics, but there is one question suggested by the gentleman from Connecticut [Mr. HILL] which is very pertinent to this section and affects the amendment offered by the gentleman from Arizona [Mr. HAYDEN].

Some gentlemen seem to have the impression that this tax refers to all the manufactured articles into which composition copper enters, where the capital is invested in part in the manufacture of war munitions and in part in the manufacture of articles of commerce. That is not the fact. Section 201 levies a tax, but on page 63, lines 11 to 19, inclusive, it is provided that—

> In cases where such person has undivided capital invested in the manufacture of the articles specified in section 201 and of other articles, the amount invested in the manufacture of the articles specified in section 201 shall be considered as in the same ratio to the total amount invested as the gross receipts from the sale and disposition of such articles bear to the total gross receipts from the sale and disposition of all articles manufactured.

In other words, the proportionate amount of the capital invested in manufacturing articles entering into commercial lines can be deducted from the total amount of the gross output. Therefore in the case referred to in the question of the gentleman from Connecticut [Mr. HILL], where $500,000 of the output consisted of munitions of war and $500,000 of the output consisted of commercial articles, the tax would only be levied against the one-half manufactured into munitions of war.

Mr. HULL of Tennessee. Practically one half the copper has been sold to Europe during this war at war prices, and that fixed the domestic price of the other half. The bill fixes the copper rate at about one-half the other munitions rate, so that really it bears only about one-half the average on all other munition rates.

Mr. HELVERING. Then, I wish to call attention to another phase of the bill. Unless the net profit exceeds 10 per cent the manufacturer or smelter would not be taxed.

Mr. HAYDEN. That profit is the net profit of the man from whom the tax is collected. For instance, if the refiner pays the tax he can pass it back to the producer of copper, and there is nothing in the bill which says that the producer is allowed to make a profit of 10 per cent on his investment.

Mr. HELVERING. But all the running expenses of the manufacturing concern can be deducted.

Mr. HAYDEN. That applies to the man from whom the tax is collected, but if the tax is collected from the refiner he can shift the tax to the producer, and nothing is said about allowing the producer to make a profit of 10 per cent.

Mr. JAMES. Will the gentleman yield for an interruption?

Mr. HELVERING. Yes.

Mr. JAMES. In normal times not over 2 per cent of the copper produced in this country is used for munition purposes.

Does not the gentleman think there should be a limit as to the length of time that this tax should continue to be imposed?

Mr. HELVERING. I am perfectly willing, because it was not in the anticipation of the committee that this should be a continuing tax.

Mr. JAMES. Will the gentleman consent to a limitation of two years?

Mr. BURNETT. The war may continue longer than that.

Mr. HELVERING. I do not know what effect that would have on the tax. We want the tax to continue as long as the exorbitant profits continue.

Mr. JAMES. Would the gentleman be willing to accept an amendment providing that the tax should cease after the war in Europe is over?

Mr. HELVERING. Unless we have a war here.

Mr. JAMES. I do know that in normal times not over 2 per cent of the copper produced in this country is used in the manufacture of war munitions.

Mr. HULL of Tennessee. I take it that it is the intention of everybody that this provision relating to war munitions shall be only temporary, and that it is not intended to continue during the normal conditions that the gentleman speaks about, after the conclusion of the war.

Mr. JAMES. Under present conditions there would be a tax levied on mining corporations that is not levied on other corporations. My people would be satisfied to pay the tax with the provision that everybody else pays it, on the excess over 10 per cent net profits.

Mr. HULL of Tennessee. That has been impossible in this country. We are not levying anything like the amount or kind of taxes that are being levied in other countries.

The CHAIRMAN. The question is on the amendment proposed by the gentleman from Arizona [Mr. HAYDEN].

The question being taken, on a division (demanded by Mr. HULL of Tennessee) there were—ayes 57, noes 46.

Mr. HULL of Tennessee. I ask for tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. HAYDEN and Mr. CASEY.

The committee divided; and the tellers reported—ayes 50, noes 78.

Accordingly the amendment of Mr. HAYDEN was rejected.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The Clerk read as follows:

Page 100, line 2, after the word "States," insert a semicolon and the following:

"*And provided further*, That it shall not be lawful for any person to import into the United States any foreign articles the product, in whole or in part, of any child under 16 years of age, of any convict, or of any workingman or woman employed for wages less than are paid for corresponding work in the United States."

Mr. HULL of Tennessee. Mr. Chairman, to that I reserve a point of order. I will make it if the gentleman from Pennsylvania does not desire to discuss it.

Mr. MOORE of Pennsylvania. I do desire to discuss it if the point of order is to be made. The committee has brought in a bill here in which it proposes under title 7, headed "unfair competition," to protect the United States markets against importation of articles calculated to destroy the United States markets. It is commonly known as the antidumping clause. It is a protective measure or intended so to be, though I question from the language used whether it is as protective as it would seem to be on its face.

My amendment proposes an extension of the majority committee program so as actually to protect the American people against the unfair importation of articles from any foreign country into the United States, "commonly and systematically," as herein set forth with a view to injuring the prices in the United States. This House has passed a bill which provides that convict goods shall not be passed from State to State, and another bill that goods made by child labor shall not be passed from State to State. It has passed other bills pretending to protect the labor of the United States and to limit the hours of employment.

Now, my amendment is simply an extension of the protective provision apparently set forth in the article headed "Title 7." It proposes to protect the people of the United States against the importation of articles that are made by convict labor in foreign countries, which is a part of the American law. It proposes to protect people of the United States against the importation of articles made by child labor under 16 years of age, which is in line with legislation passed by this House. It proposes to protect the people of the United States against the importation from foreign countries of articles made by men or women who are employed a greater number of hours a day in foreign countries than they are employed in the United States, and who receive less wages in foreign countries than they receive in the United States. In several instances these amendments have been offered and have been held in order.

Mr. KITCHIN. Will the gentleman yield?

Mr. MOORE of Pennsylvania. I will.

Mr. KITCHIN. Will the gentleman state whether any such provision was included in the Dingley bill or the McKinley bill or the Payne-Aldrich bill?

Mr. MOORE of Pennsylvania. I regret to say that there was not as I have offered it. There was as to convict labor.

Mr. KITCHIN. So your party never put any such provision into any tariff bill?

Mr. MOORE of Pennsylvania. This side of the House has voted unanimously that this provision in substance should be attached to several measures brought in by the gentleman from North Carolina and his colleagues, but in each case the Democratic Party has voted in opposition to it.

Mr. KITCHIN. But when the gentleman's party was in power and had the power they never put any such provision in a bill?

Mr. MOORE of Pennsylvania. The Dingley bill amply protected labor against unfair competition. Likewise under the Payne bill we protected it under our system.

Mr. KITCHIN. I will tell the gentleman why his party never did it. Because $190,000,000 of silk was imported into this country, made by children 8 or 9 or 10 years old.

Mr. MOORE of Pennsylvania. If the gentleman's statement is true, the practice should be discontinued.

Mr. KITCHIN. And then there is tea, which is made by children in China and Japan 9 to 16 years old. Of course the Republican Party would not put any such provision in the tariff bill, and these things were imported from China and Japan.

Mr. MOORE of Pennsylvania. If that is true, will the gentleman tell me why his party has recently voted down the protective amendments we tried to put into other bills?

Mr. KITCHIN. Just like the Republican Party did, when they were in power 16 years and never put any such provision in the bill.

Mr. MOORE of Pennsylvania. The answer is that we protect the people in this country by putting sufficient tariff rates on competitive imports. Tea and coffee are not produced in the United States.

Mr. KITCHIN. How could you protect silk and tea when they were on the free list? [Laughter and applause on the Democratic side.]

Mr. MOORE of Pennsylvania. The gentleman will find, if he examines the bills carefully, that the Republican Party has generally taken care of American labor where there was unfair foreign competition.

Mr. BURNETT. How about 1907?

Mr. MOORE of Pennsylvania. Oh, that is a nightmare of the Democrats. That was a financial panic which was not due to the tariff at all. That began with the failure of a bank in New York.

Mr. GOODWIN of Arkansas. How about 1873?

Mr. STAFFORD. What does the gentleman mean—the crime of '73?

Mr. MOORE of Pennsylvania. Mr. Chairman, has the Chair ruled on this point of order?

The CHAIRMAN. No; the gentleman has not discussed the point of order.

Mr. HULL of Tennessee. Mr. Chairman, I make the point of order.

Mr. MOORE of Pennsylvania. This matter was held in order, I think, on the convict-labor bill. I do not happen to have it before me now, but we have had a vote on this question on two or three bills that have been before the House. We had a vote upon it when the Underwood tariff bill was up.

Mr. STAFFORD. Mr. Chairman——

The CHAIRMAN. The Chair is ready to rule.

Mr. STAFFORD. Very well, if the Chairman's mind is made up.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. STAFFORD. I believe the present occupant of the chair was in the chair when a similar amendment was offered on another bill, and he held that the amendment was in order. When the bill was brought back to the House the Speaker ruled that it was not in order. But this amendment differs from the situation in the bill then under consideration, because the bill now before us applies not only to one subject but to many subjects relating to the tariff. There is the provision for the tariff commission. There is this provision to which this amendment is submitted, pertaining to unfair competition. Unfair competition may be of several kinds. It may be as suggested and as covered by the amendment in the bill or it may be by the amendment proposed and submitted by the gentleman from Pennsylvania [Mr. MOORE]. This bill contains numerous subjects of legislation. I do not think that there is any precedent that would rule it out of order. I assume the only ground that can be raised against it is that it is not germane, and yet we have here in the precedents many instances where if there are more than two provisions relating to different subjects a third provision is in order. I respectfully submit that the amendment is in order.

The CHAIRMAN. The Chair wishes to state that at one time while presiding in the Committee of the Whole he was called upon to make a ruling on the convict-labor bill, which admitted an amendment similar to this, but that in the House it was overruled. The Chair has great respect for the wisdom and fairness of the Speaker of the House, a higher authority than the Chairman of the Committee of the Whole. In this case the Chair takes it that we are operating under Rule XXI, paragraph 3, which has reference to amendments offered to revenue bills. The paragraph in question, section 601, provides for preventing unfair competition, which contains the following, "Such market value and wholesale price, freight, duty, and other charges," and refers solely, as the Chair understands it, to the question of price of imported goods.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the Chair permit an interruption?

The CHAIRMAN. Certainly.

Mr. MOORE of Pennsylvania. Mr. Chairman, I desire to call the Chair's attention to the fact that this amendment is suggested to a revenue bill, which takes it somewhat out of the category referred to by the chairman, I think. There is existing law which justifies at least a portion of this amendment—that pertaining to convict-made goods. This perhaps would answer the gentleman from North Carolina [Mr. KITCHIN]. The existing tariff law provides that "no goods, wares, merchandise, manufactured in whole or in part in any foreign country by convict labor, shall be entitled to entry into any of the ports" of the United States, and that importation thereof is prohibited.

The amendment now before the Chair carries a prohibition as to goods made by child labor. We already have legislation in a revenue bill, the so-called Underwood Act of October 3, 1913, justifying the prohibition of the importation of goods made by convict labor. Why would it not be germane to extend that prohibition to goods made by child labor?

The CHAIRMAN. Let the Chair ask the gentleman this question. Does this section of this paragraph refer at all to any part of the amendment that the gentleman has offered, or does not this section refer entirely to a different subject, that of price, and so on?

Mr. MOORE of Pennsylvania. Mr. Chairman, I looked over this antidumping provision very carefully, and it appeared to me that this was the only place in which I could insert an amendment of this kind. You were going to admit certain kinds of goods, but we have a prohibition upon them to a certain extent if they were made by convicts in foreign countries. Therefore the only thing that could be done in order to prohibit the importation of child-labor products of foreign countries would be to tack this amendment on at this place.

The CHAIRMAN. The Chair is not called upon to rule upon the question of whether there is another paragraph to which this might be offered, but the Chair submits, and I think the gentleman from Pennsylvania understands, that this section does not refer to any unfair competition in reference to the kind of labor that might be employed here or in Europe, but refers only to the price, and so forth. Under the circumstances the Chair can not see, and feels sure that the gentleman from Pennsylvania on reflection would decide the same way, that it is not in order.

Mr. MOORE of Pennsylvania. I do not wish to argue with the Chair, but I ask the Chair's indulgence——

The CHAIRMAN. This amendment, in the judgment of the Chair, is not germane. It does not refer to the special item in the section contained in the bill, and the Chair sustains the point of order.

Mr. MOORE of Pennsylvania. Mr. Chairman, then I offer the amendment as a separate paragraph.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment as a separate paragraph, which the Clerk will report.

The Clerk read as follows:

Page 101, to follow line 3, insert as a new paragraph the following:
"*And provided further*, That it shall not be lawful for any person to import into the United States any foreign articles the product in whole or in part of any child under 16 years, of any convict, or of any working man or woman employed for wages less than are paid for corresponding work in the United States."

Mr. MOORE of Pennsylvania. Mr. Chairman, I ask to modify that amendment by striking out the words preceding the word "person" after the word "that," so that it will read "No person shall import," and so forth.

The CHAIRMAN. Without objection, the Clerk will note the modification.

Mr. KITCHIN. Mr. Chairman, I make the point of order on that.

Mr. MOORE of Pennsylvania. Mr. Chairman, I would like to be heard for a moment on the point of order.

The CHAIRMAN. The Chair is ready to rule, but will be glad to hear the gentleman.

Mr. MOORE of Pennsylvania. I wish the Chair to be informed that in the world of labor what is known as "unfair labor" includes convict-made goods, and in this same world of labor what is known as "unfair labor" or "unfair goods" includes goods made by children below the lawful age.

Unfair goods or unfair labor would include such foreign goods as are made by labor which is paid less than is paid in the United States. Therefore it seems to me that under the Chair's ruling the proposition now is germane and can be considered in this bill.

The CHAIRMAN. The Chair begs to state that the gentleman from Pennsylvania is now offering his amendment as a separate paragraph to section 603——

Mr. MOORE of Pennsylvania. I offer it as a new section, Mr. Chairman.

The CHAIRMAN. The gentleman from Pennsylvania, as the Chair understood, stated it as a new paragraph.

Mr. KITCHIN. Mr. Chairman, of course it makes no difference whether it is offered as a new paragraph or not; it is plainly subject to the point of order.

The CHAIRMAN. Rule XXI—the gentleman from Pennsylvania is no doubt as familiar with the rules as the Chair is, or probably more so—paragraph 3 of Rule XXI is as follows:

No amendment shall be in order to any bill affecting revenue which is not germane to the subject matter in the bill; nor shall any amendment to any item of such bill be in order which does not directly relate to the item to which the amendment is proposed.

The Chair clearly thinks, whatever his private views may be as to the exclusion of convict-labor-made goods, he must follow the rules of the House, and having that in mind, without relation to the merits of the amendment at all, but under the rules of the House, which must be followed, the Chair feels constrained to sustain the point of order and does sustain the point of order.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 99, line 14, after the word "than," strike out all down to and including the word "States," in line 21, and insert the following:
"The actual market value or wholesale price of such articles in the United States at the time of the export of any such articles to the United States, the American price of such articles, and not the foreign price, to be the determining factor."

Mr. MOORE of Pennsylvania. Mr. Chairman, I regret sincerely we could not obtain a vote on a question of such great importance to the labor of the country as the admission into the country free, in competition with American labor, of goods made by child labor in Europe, goods made by convict labor in Europe, and goods made by labor in Europe at a less wage than is paid for corresponding work in the United States, which labor in foreign countries works more hours than does labor doing corresponding work in the United States. I regret that the Democratic Party, the champions of "the downtrodden of this land," who have inveighed against convict labor, who have shed bitter tears over the child labor of the country which they presume to protect, are not now willing to protect that child labor, or the honest and fair adult labor of this country against the child labor of Europe, against the convict labor of Europe, against the poorly paid labor of Europe, but are willing to sidestep on a point of order under a rule by which there can be no fair, square vote upon the question.

I have offered this amendment to show the weakness of the antidumping clause, a sop to the Republican Party, with a view of catching votes for this extraordinary deficiency bill. Here is an antidumping clause supposed to contain Republican doctrine, which enables the foreigner to fix the price of the goods he is to send to the United States.

Under this splendid scheme of yours all the foreigner has to do is to manufacture for export only, looking, of course, to our rich market, the best market in the world, for his customers. He can send his goods in here at the convict-wage price, at the child-labor price, at the low-wage price, and thus clean up the American wage earner who normally, under Republican rule, and now due to the war in Europe, has been making a pretty fair wage. My amendment proposes that when these foreign goods, including convict-labor-made goods, these child-labor-made goods, these low-wage-made goods come into the United States they shall be appraised upon this side of the water at the American price, and that they shall not be accepted on this side of the water under this Democratic spider-web bill at the price fixed by the foreign competitor. [Applause on the Republican side.] Oh, you have a smart scheme here; but if you want to play fair with the American workman, let the appraisers at the ports of the United States say what the price of those convict-labor-made goods is, these child-labor-made goods, these low-wage-made goods that you propose shall enter into competition with goods made in the United States. Adopt this Democratic antidumping clause as it has been written, and the foreigner will manufacture for export only, so that his foreign price can not be ascertained, and he will make us swallow the price he fixes upon his goods before they leave the other side. I hope Republicans will stand by the amendment I have offered. [Applause on the Republican side.]

Mr. BURNETT. Mr. Chairman, I ask to be recognized for five minutes.

The CHAIRMAN. The gentleman from Alabama.

Mr. BURNETT. Mr. Chairman, it ill becomes the gentleman from Pennsylvania [Mr. MOORE] to stand here as the pretended friend of American labor. [Applause on the Democratic side.] I have been for years pleading in this House for an antidumping law against the dumping of European pauper labor, and unless that bill is passed it will be because the Senate will not pass it, and that body will be responsible for its defeat if it is defeated. But the gentleman has been standing for 12 years pleading for the admission of more of that class of laborers to this country.

He stands now and draws his sanctimonious garments about him and sheds crocodile tears as the self-constituted friend of labor. And I saw gentlemen over there applauding those tears who were given an opportunity just a few weeks ago to stop the dumping of the laborers themselves that will come over here after the war and beat down the wages of American wage earners and take the bread from the mouths of their children.

Yet the gentleman always raises his voice and casts his vote in favor of more dumping. And therefore I say that he is the last man on this floor, after speaking so loudly, and so often, and so vociferously, and so volubly against the laboring man in this country, that wants to be protected against the foreign laborer himself, to talk about protecting labor against bringing in the goods made by the foreign laborer, when he wants the man himself to come here and beat down the price of the toil of the man that works. [Applause on the Democratic side.]

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. BURNETT. Yes.

Mr. MOORE of Pennsylvania. Does not the gentleman understand the position of the gentleman from Pennsylvania in that there is a difference between when flesh and blood are concerned and the goods that are made by flesh and blood?

Mr. BURNETT. Yes. I have always understood that the gentleman stood for the goods and not for the flesh and blood. Away back yonder, 2,000 years ago, the question was asked, "How much better is a man than a sheep?" The gentleman has always stood for the sheep and against the man whenever he had an opportunity to stand for the man as against the sheep.

Labor is not deceived by his cries, Mr. Chairman; they have taken an appraisement of the gentleman's words and of his attitude to them, and no man that toils in this wide land is deceived by the wails of the jeremiads of the gentleman in the interest of labor. [Applause on the Democratic side.]

Mr. MOORE of Pennsylvania. Will the gentleman from Alabama yield for one question further? I merely want to ask the gentleman whether he favors taxing the human being or whether he favors taxing the goods made by the human being?

Mr. BURNETT. On that question the gentleman can not shake his gory locks at me. He knows where I stand. I stand and have always stood for the protection of the human being as against the protection of the goods from foreign lands.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Pennsylvania [Mr. MOORE].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. MOORE of Pennsylvania. Division, Mr. Chairman.

The committee divided; and there were—ayes 81, noes 76.

Mr. KITCHIN. Tellers, Mr. Chairman.

Tellers were ordered, and Mr. MOORE of Pennsylvania and Mr. COLLIER took their places as tellers.

The committee again divided; and the tellers reported—yeas 99, noes 113.

So the amendment was rejected.

Mr. GREEN of Iowa. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 99, line 21, after the words "United States," strike out, beginning with the word "*Provided*," all the remainder of the paragraph.

Mr. GREEN of Iowa. Mr. Chairman, this is an amendment to the antidumping clause. I do not propose to discuss this matter in any political way, although, as the gentleman from Pennsylvania [Mr. MOORE] has stated, the purpose and the object of an antidumping clause embodies good Republican doctrine; but if it is intended to make this provision anything more than a scarecrow, the proviso which my amendment seeks to strike out will have to go.

The antidumping clause reads as follows, in section 601:

SEC. 601. That it shall be unlawful for any person importing or assisting in importing any articles from any foreign country into the United States, to commonly and systematically sell or cause to be sold such articles within the United States at a price substantially less than the actual market value or wholesale price of such articles, at the time of exportation to the United States, in the principal markets of the country of their production, or of other foreign countries to which they are commonly exported, after adding to such market value or wholesale price, freight, duty, and other charges and expenses necessarily incident to the importation and sale thereof in the United States.

Now, this clause has enough in it right there, and if it puts any more in it by way of proviso or exceptions it takes the teeth entirely out of the whole provision. I am opposed, and I believe every gentleman on this side is opposed, to articles being commonly or systematically sold upon this side of the water in competition with American products for less than they are sold for in the country of their production. If gentlemen upon the other side are also opposed to that condition of affairs, that dumping upon our side of articles made upon the other side of the water for less than they are sold in the country where they are produced, they will take out the proviso, which reads as follows:

Provided, That such act or acts be done with the intent of destroying or injuring an industry in the United States, or of preventing the establishment of an industry in the United States, or of restraining or monopolizing any part of trade and commerce in such articles in the United States.

Now, anyone who has ever acted as prosecuting attorney, or ever sat in the capacity of a judge trying criminal cases, knows how extremely difficult and often impossible it is to prove the intent with which a certain act is done. In fact it is easy to see that the effect of the importation of articles in this manner and selling them commonly or systematically on this side might be in the long run, or even at the time, to destroy the industries on this side, and yet such might not, in fact, have been the intent. Intent is a purpose of the mind. It is absolutely impossible to show except from inference and deduction. It has been claimed that the intent would follow from the mere proof of the sale for less here than it was sold for abroad. But that is not the principle that prevails in any court. The intent would have to be shown by the results that were accomplished, and the results might not always be sufficient.

So, Mr. Chairman, I maintain that if this antidumping clause is to be real and effective, and if it is meant actually and intended to protect the manufacturers of this country, this proviso must be taken out.

The CHAIRMAN (Mr. FERRIS). The time of the gentleman from Iowa has expired.

Mr. HELVERING. Mr. Chairman, by the amendment offered by the gentleman from Iowa it is clear that he intends to invoke a criminal statute by one sale, whether dumping goods into this country or not is intended. It is very evident, I think, to every Member of this House that intent must be shown in all criminal prosecutions.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. HELVERING. I will.

Mr. GREEN of Iowa. This is not a criminal matter at all.

Mr. HELVERING. I do not know what it would be considered when we impose a penitentiary sentence and a fine of $5,000.

Mr. GREEN of Iowa. And I will further say that the gentleman is not correct as to his general principle. There are many crimes where there is not any intent; for instance, for violation of the revenue laws.

Mr. HELVERING. Mr. Chairman, in carrying out the provisions of this law, we can not say, because a man has sold an article once in this country, that such transaction is dumping. We must show that from the continued selling there is an attempt to dump goods into this country to the detriment of our industries. A man may buy in the old country one consignment of goods and bring it in here and sell it out, and we could not prosecute him under this law. As I understand, the gentleman would desire if one sale were made—that is to say, if a consignment of goods were made to a merchant on this side of the water at a low price—that he be prevented from entering into such a contract without ascertaining the price in this country.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield? I do not want the gentleman to misrepresent me. I did not move to strike out the words "to commonly and systematically sell or cause to be sold such articles within the United States at a price substantially less than the actual market value or wholesale price of such articles, at the time of exportation to the United States, in the principal markets of the country of their production, or of other foreign countries to which they are commonly exported," and so forth. I simply proposed to strike out the proviso, "That such act or acts be done with the intent of destroying or injuring an industry in the United States, or of preventing the establishment of an industry in the United States, or of restraining or monopolizing any part of trade and commerce in such articles in the United States."

Mr. HELVERING. That is what I was trying to show. It is desired to show that the person importing or assisting in importing any articles from any foreign country into the United States intends to injure an industry in the United States by dumping goods into this country and continuing that practice, and making it a business, to the detriment of the industries of this country.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Iowa [Mr. GREEN].

The question was taken, and the amendment was rejected.

Mr. JOHNSON of Kentucky and Mr. SLOAN rose.

Mr. JOHNSON of Kentucky. Mr. Chairman, I yield to the gentleman from Nebraska [Mr. SLOAN].

Mr. SLOAN. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Nebraska offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SLOAN to section 102: Amend by striking out the period in line 5, page 54, and adding thereto the following:

"*Provided*, That in States which at this time or which may hereafter become subject to a State inheritance tax similar to or greater than the tax herein provided, the same shall be exempt from the imposition of the tax provided by this act."

Mr. SLOAN. Mr. Chairman, I think that an estate tax or an inheritance tax should be left to the States as one of their means of meeting their own expenditures.

When the Constitution of the United States gave to the General Government the sole right to collect duties at our ports and prohibited the States from raising any revenue upon goods coming across their borders, it was an invitation to the States of the Union to use the field furnished by the inheritance or the estate tax.

It was well said by Speaker CLARK the other day, in discussing the inheritance or estate tax, that a strong reason given against the imposition of the estate tax at a former Congress was that at that time 36 States had an inheritance tax. At this time there are 42 States which have either inheritance taxes or estate taxes. The rate or amount of exemption and surtax varies in different States. It seems to me that in levying this tax where the States have preempted this tax field as their own the United States should not come in and make a double taxation upon property that passes by reason of the death of an individual.

This amendment will not destroy or prevent the collection of a considerable number of taxes on estates, because a large number of the States have not preempted the field in the nature of estate taxes, but only in the matter of legacies, devises, and bequests. So it seems to me that the amendment I present is eminently fair to the Government and fair to the States. Automatically the Government estate tax would attach when the State has not imposed an equal or greater tax, and to the extent which a tax at this time or hereafter may be imposed is or shall be less than that by this bill imposed, the Government tax would be retained, giving way only to the imposition of the State taxing power.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Nebraska [Mr. SLOAN].

The question was taken, and the amendment was rejected.

Mr. JOHNSON of Kentucky. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Kentucky offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Kentucky: Page 69, line 24, after the word "Revenue," insert a comma and the words "with the approval of the Secretary of the Treasury" and a comma.

Mr. KITCHIN. Mr. Chairman, we accept that amendment. It should have been in several places there.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Kentucky.

The amendment was agreed to.

Mr. JOHNSON of Kentucky. Mr. Chairman, I offer another amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Kentucky.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Kentucky: Page 74, line 23, after the word "Revenue," insert a comma and the words "with the approval of the Secretary of the Treasury" and a comma.

Mr. KITCHIN. We accept that amendment also.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Kentucky.

The amendment was agreed to.

Mr. JOHNSON of Kentucky. Mr. Chairman, I offer another amendment.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Kentucky: Page 77, line 3, after the word "Revenue," insert a comma and the words "with the approval of the Secretary of the Treasury" and a comma.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. JOHNSON of Kentucky. I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Kentucky.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Kentucky: Page 78, line 23, after the word "Revenue," insert a comma and the words "with the approval of the Secretary of the Treasury" and a comma.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. JOHNSON of Kentucky. Mr. Chairman, I offer another amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Kentucky: On pages 77 and 78, strike out lines 22, 23, and 24 on page 77, and lines 1, 2, 3, 4, 5, and 6 on page 78.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. JOHNSON of Kentucky. The reasons I see for striking out these lines are as follows: That part of the bill which I wish to strike out proposes to relieve wine, and wine alone, from the operation of section 3244 of the Revised Statutes, which relates to rectifiers or adulterators of alcoholic beverages. If these lines should not be stricken out, then a man can adulterate wine without paying the license heretofore required of every adulterator of all other alcoholic beverages.

In addition to that, if these lines should not be stricken out, section 3244 of the Revised Statutes would be repealed, in so far as it relates to wine, by permitting a rectifying establishment to be nearer than 600 feet to a distillery. It has been the policy of the law for many years that no rectifying establishment should be closer than 600 feet to a distillery, for the reason that frauds may result by spirits being transferred from one to the other.

Mr. WM. ELZA WILLIAMS. Spirited from one to the other?

Mr. JOHNSON of Kentucky. These are the principal reasons, and they have been agreed to as being sufficient by the Internal Revenue Department and by the committee having the bill in charge.

Unless this amendment should be adopted it is also possible, as all law as to adulterating wine is repealed by the proposed item in the bill, that imitations of wine would not have to be so branded under the pure food and drugs act.

The part of section 3244 of the Revised Statutes referred to is as follows:

Third. Rectifiers of distilled spirits shall pay $200. Every person who rectifies, purifies, or refines distilled spirits or wines by any process other than by original and continuous distillation from mash, wort, or wash, through continuous closed vessels and pipes, until the manufacture thereof is complete, and every wholesale or retail liquor dealer who has in his possession any still or leach tub, or who keeps any other apparatus for the purpose of refining in any manner distilled spirits, and every person who, without rectifying, purifying, or refining distilled spirits, shall, by mixing such spirits, wine, or other liquor with any materials, manufacture any spurious, imitation, or compound liquors for sale, under the name of whisky, brandy, gin, rum, wine, spirits, cordials, or wine bitters, or any other name, shall be regarded as a rectifier and as being engaged in the business of rectifying: *Provided*, That nothing in this section shall be held to prohibit the purifying or refining of spirits in the course of original and continuous distillation through any material which will not remain incorporated with such spirits when the manufacture thereof is complete: *And provided further*, That no officer shall collect any special tax for rectifying distilled spirits on any premises distant less than 600 feet in a direct line from any distillery. And every officer who collects any special tax in violation of this (section) (proviso) shall be liable to a penalty of $5,000 for each offense.

Fourth. Retail dealers in liquors shall pay $25. Every person who sells, or offers for sale, foreign or domestic distilled spirits or wines in less quantities than 5 wine gallons at the same time shall be regarded as a retail dealer in liquors.

Wholesale liquor dealers shall pay $100. Every person who sells, or offers for sale, foreign or domestic distilled spirits or wines in quantities of not less than 5 wine gallons at the same time shall be regarded as a wholesale liquor dealer. But no distiller who has given the required bond and who sells distilled spirits of his own production at the place of manufacture, in the original packages to which the tax stamps are affixed, shall be required to pay the special tax of a wholesale liquor dealer on account of such sales.

Mr. KITCHIN. We accept that amendment.

Mr. MEEKER. In this connection I ask unanimous consent to extend my remarks in the RECORD by printing a number of amendments which I will endeavor to offer, but which possibly for lack of time can not be offered, and also a statement of the brief of the case of the Missouri, Michigan, Illinois, Ohio, and New York vineyard and wine men as against the California organization. If time permits, I will offer certain amendments to this bill.

Mr. JOHNSON of Kentucky. Reserving the right to object, I think we ought to dispose of the amendments before the House before going into other matters.

Mr. MEEKER. I simply ask permission to extend my remarks.

Mr. JOHNSON of Kentucky. I do not object to that.

The CHAIRMAN. The gentleman from Missouri [Mr. MEEKER] asks unanimous consent to extend his remarks in the RECORD. Is there objection.

There was no objection.

The CHAIRMAN. The question now recurs on the amendment of the gentleman from Kentucky [Mr. JOHNSON].

The amendment was agreed to.

Mr. LONGWORTH. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Ohio, a member of the Committee on Ways and Means, offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. LONGWORTH: Page 91, line 10, after the word "Senate," strike out the words "not more than three of whom shall be members of the same political party" and insert in lieu thereof the following: "Three members shall be named from each of the two greater political parties as represented in Congress, and in making the first appointment the membership of each party shall be assigned to equal length of service."

Mr. LONGWORTH. Mr. Chairman, I would like to have the attention of the gentleman from North Carolina [Mr. KITCHIN] and the gentleman from Illinois [Mr. MANN]. The amendments that I am now offering are those agreed upon by the minority of the commitee, and are suggested for the improvement of the bill, and I am now going to ask unanimous consent to offer another amendment on this same subject, to be considered as pending with this amendment that I have just offered.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent to offer an additional amendment, to be considered as pending during the consideration of the others. Is there objection?

Mr. FITZGERALD. Let the amendment be reported.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Amendment by Mr. LONGWORTH: Page 91, line 14, after the word "four," insert the word "and." In line 15 strike out the words "eight, ten, and twelve." In line 19 strike out the word "twelve" and insert in lieu thereof the word "six."

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LONGWORTH. Mr. Chairman, as this bill stands at present the preliminary terms of the members of this board are, respectively, 2, 4, 6, 8, 10, and 12 years, and then the term is 12 years thereafter. There is no provision whatever as to the way the membership of the different parties shall be selected—as to the length of the terms. For instance, the three members of one party could be assigned to the three long terms and the three members of another party to the three short terms. The object of my amendment is to cut down the term to six years, which, under the circumstances, seems to me to be a sufficient period.

It further provides that in making the appointment the President shall designate the members of opposite parties to the same length of term. In other words, under my amendment the President would first appoint a Democrat and a Republican to the two-year term, a Democrat and a Republican to the four-year term, and a Democrat and a Republican to the six-year term, insuring absolute fairness. I have no question but that the gentleman from Illinois and the gentleman from North Carolina want to see a fair, nonpartisan commission established.

Mr. FITZGERALD. Will the gentleman yield for a question?

Mr. LONGWORTH. Yes.

Mr. FITZGERALD. The first amendment the gentleman offers provides for the selection of the members of this commission from the two political parties as represented in the House of Representatives.

Mr. LONGWORTH. Yes.

Mr. FITZGERALD. Would it not be fairer to base the representation upon the popular electoral vote of the last presidential election?

Mr. LONGWORTH. In view of the fact that this House is the authority responsible for the creation of this board, we thought better to let the House be the basis of representation.

Mr. FITZGERALD. Would it not be better to have the real sentiments of the people of the country as expressed in the presidential campaign represented on this board, rather than to have the accidental occupancy of seats in this House determine a question of that magnitude?

Mr. LONGWORTH. May I ask the gentleman from New York if he would prefer that on this board there should be three Democrats and three Progressives, and if he thinks they would make a better board, and if that is the reason of his question?

Mr. FITZGERALD. Did the gentleman say three Democrats and three Progressives?

Mr. LONGWORTH. That seems to be what the gentleman is driving at.

Mr. FITZGERALD. There is no real difference between a real Democrat and a real Progressive. [Applause on the Democratic side.]

Mr. LONGWORTH. There is no difference to-day between a real Progressive and a real Republican. [Applause on the Republican side.] The gentleman will find that out to his cost.

Mr. FITZGERALD. The gentleman is mistaken; he means the counterfeit Progressives are real Republicans. The real Progressives are coming into the Democratic Party [Laughter on the Democratic side.]

Mr. LONGWORTH. I would like to ask the gentleman from Illinois whether he does not think that this is a fair amendment?

Mr. RAINEY. I do not think so.

Mr. LONGWORTH. In what respect does not the gentleman think it is a fair proposition?

Mr. RAINEY. We provide in this bill that no more than three members of any one party shall serve upon this board. That is as fair as we can make it. Now, the effect of the gentleman's amendment is to shorten up the length of service from 12 years to 6 years. By this amendment you seek to appoint as many members on the commission as the bill now provides for, and as soon as they become efficient by having served a few years under this amendment, if it prevails, they would be retired. The gentleman has overlooked a clause in this bill.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. RAINEY. Mr. Chairman, I ask that the time of the gentleman from Ohio be extended five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RAINEY. One effect of this amendment is to prevent the grouping of three Democrats together, giving three Democrats a long term. The gentleman from Ohio has overlooked the clause in the bill just ahead of his proposed amendment, which reads:

In making said appointments members of the different political parties shall alternate as nearly as may be practicable.

In other words, the bill provides that members of the different parties shall alternate. So it is impossible to give three Democrats or three Republicans the long terms. If there is any change in the political complexion of the country, provision is here made so that it is possible to select another chairman and another vice chairman, giving the President that right. It also gives, in the event of inefficiency, the right of removal.

Mr. LONGWORTH. The gentleman's real objection is that the 12-year term is none too long?

Mr. RAINEY. Yes; the 12-year term is none too long.

Mr. LONGWORTH. The gentleman can not, I think, quote any law passed before this which provides for a term of 12 years.

Mr. RAINEY. This is a commission which will require technical knowledge in order to carry out the duties of the commission. The longer a member serves on a commission of this kind, provided he is efficient and does not neglect his duties, the better qualified he is. His duties are judicial.

Mr. LONGWORTH. I think not.

Mr. RAINEY. To a considerable degree, and it requires that kind of talent.

Mr. LONGWORTH. I do not desire to waste any time, Mr. Chairman. I regret that the gentleman can not consent to accept the amendment, which, I think, is in the interest of fairness and efficiency of the board. I will ask for a vote on the amendment.

Mr. HILL. Mr. Chairman, I move to strike out the last word. For many years I have been in favor of an impartial tariff commission, and I am in favor of such commission now, and if this was an independent question I should vote for an independent tariff commission. But you put me in a position where I can not do it. I want to say to the gentleman from Illinois [Mr. RAINEY] that I hold in my hand the pronunciamento that he sent to the country when he introduced his tariff commission bill. It reads as follows, referring to his position on the character of the commission:

This would mean three Democrats and three Republicans, and from a political standpoint the membership of the committee would be equally balanced between the parties which favor different methods of imposing the tariff.

That is certainly what this amendment does, but he said he was in favor of it when this bill was introduced in the House, and this is the original document which I hold in my hand which was sent out with the bill. We who favor a tariff commission on this side want a fair one, and if this is a fair one we are in favor of it. I want to say now that I want to see a tariff commission so arranged that it shall not be as the Federal Reserve Board is—all Democrats—that it shall not be as the Federal Trade Commission is—three Democrats and two original Progressives, and now both of them Democrats. [Laughter on the Republican side.] We want to see a fair tariff commission, and if you will give us such a fair tariff commission, if we can get a chance for some of us on this side to vote for it independently and separately, we will gladly do

so. Why does the gentleman from Illinois repudiate his own statement sent out to the country at the time his bill was introduced in Congress?

Mr. RAINEY. Mr. Chairman, we stand for the very fairest kind of a tariff commission, and in response to the suggestion of the gentleman from Connecticut [Mr. HILL] himself, we put here in this bill a provision requiring that members of this commission of different political parties shall alternate in their appointments. In response to the suggestion of the gentleman from Connecticut [Mr. HILL] himself, we provided for a biennial selection of chairman and vice chairman. In response to the suggestions of the gentleman from Connecticut [Mr. HILL], we provided in this connection that vacancies should not be carried over one session of Congress in order that at no time over half of this commission should belong to any one political party.

I undertake to say that this commission will be selected from the majority parties always, provided one party is perhaps not nearly equally divided. If the commission had been selected three years ago when the party which is now the minority party in this House, carried only two small States of this Union, if at that time we were selecting members of this commission upon the basis of the popular vote instead of by presidential candidates, then I think even the gentleman from Connecticut will agree with me that under those circumstances the party to which he belongs would not have been entitled, under the position he now takes, to three members on the commission. It is the boast of that side of the House that Progressive Republicans and regular Republicans upon the tariff question in their theories and in their ideals are absolutely united.

It is their boast that at the last national election, adding together the Progressive vote and the straight Republican vote, the tariff theories for which they both say they stand won in this country. This is a tariff commission to investigate tariff questions, so what difference does it make to them whether its members are selected from the Progressives or from the Republicans? But, as I have stated, in my judgment—and I speak for no one except myself—this commission ought to be selected and will always be selected from those two major parties which are divided in their positions upon tariff theories, and I do not think the suggestions made by the gentleman from Ohio [Mr. LONGWORTH] makes this a fairer bill. The provision in this bill that we alternate between members of political parties is as much as he expects to accomplish by his amendment, and he certainly does not provide for a more effective tariff commission by doubling it up and by only permitting members to serve six years.

Mr. WHEELER. Mr. Chairman, I move to strike out the last two words. I want to state most emphatically that I am in favor of a tariff commission, but I object to the way this bill is framed up. There are such objectionable features in the bill that I do not see how I can vote for it as a whole. What we want is a nonpartisan tariff commission made up of men with free, open minds, and if there is a tariff commission created by the passage of this bill I hope the Democrats will not repudiate it as they did the last tariff board created some years ago.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. WHEELER. Yes.

Mr. MOORE of Pennsylvania. The gentleman knows that the other side of the House unanimously rejected the Taft Tariff Board?

Mr. WHEELER. Absolutely.

Mr. MOORE of Pennsylvania. They did not want information of that kind?

Mr. WHEELER. They did not.

Mr. MOORE of Pennsylvania. They were entirely satisfied with the information they got from the departments?

Mr. WHEELER. That is true.

Mr. MOORE of Pennsylvania. And they thought that this would be an extravagance?

Mr. WHEELER. Yes.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Ohio [Mr. LONGWORTH].

The question was taken; and on a division (demanded by Mr. LONGWORTH) there were—ayes 95, noes 109.

So the amendment was rejected.

Mr. RAKER rose.

Mr. LONGWORTH. Mr. Chairman, a parliamentary inquiry. Are not members of the committee entitled to recognition first before gentlemen who are not members of the committee?

The CHAIRMAN. That is correct.

Mr. LONGWORTH. Mr. Chairman, I desire to offer a few amendments, which will not be debated to any length, and I think we ought to dispose of those before we have amendments from gentlemen who are not members of the committee. All of these amendments to which I refer relate to the tariff commission section. I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment by Mr. LONGWORTH: Page 91, line 22, after the word "succeed," strike out the words "no person shall be eligible for appointment as a member of the commission who has been elected to or served in the Senate or House of Representatives of the United States."

Mr. LONGWORTH. Mr. Chairman, under the bill as presented to the committee, no man who has ever served in the Senate of the United States or in the House of Representatives is eligible to appointment upon this commission. The gentleman from Illinois [Mr. RAINEY] undertook to explain the other day that this provision was asked by somebody, some gentlemen in New York, I believe, who gave as a reason for this provision that Members of the House and the Senate had become too firmly wedded to the opinions they held either for or against the system of protection, and hence could not be trusted to render a strictly unbiased opinion as to facts. I can not support any such contention, even if they should be avowed believers in a principle. I think it unjustifiable to assume that they will not give their honest and fair opinions when the time comes.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. LONGWORTH. Yes.

Mr. TOWNER. Is not that abundantly disproved by the change of sentiment over on the other side of the House upon these tariff questions? [Applause and laughter on the Republican side.]

Mr. LONGWORTH. The gentleman is entirely correct. Mr. Chairman, I do not care to say anything more about this. If this House wants to vote that no Member heretofore or hereafter shall be eligible to serve on the tariff commission, so far as I am concerned, it may do so.

Mr. RAINEY. Mr. Chairman, the gentleman misunderstood my remarks on this subject the other day. I did not attempt to quote any gentleman in New York or anywhere else. I stated the reasons, as they seemed to me appeals to this country in the matter of appointing former Members of Congress and Members of Congress elect upon this commission. The object is to make this commission as fair and as nonpartisan as possible, not to put upon it Members of Congress who are elected always on account of their positions taken either for or against certain tariff policies. They frequently become the most active kind of partisans on tariff matters. This bill in its present form, containing this particular clause, has been approved by the Tariff Commission League of the United States. It has been approved by the United States Chamber of Commerce. It has been approved by commercial organizations throughout the country, and it meets with the approval of the country.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. RAINEY. Yes.

Mr. LONGWORTH. Does not the gentleman think that possibly in the distant future he and I would be pretty fair members of that commission, and that we could, regardless of our opinions and differences on matters of principle, give an honest judgment?

Mr. RAINEY. The gentleman may be right about that. [Laughter.] I am very sure that he would make a very excellent and a very fair member of the commission.

Mr. LONGWORTH. And I am sure that the gentleman would, and I do not want to penalize him.

Mr. RAINEY. Unfortunately for me and for the gentleman, the Constitution of the United States would prevent our being members of that committee.

Mr. LONGWORTH. Oh, no.

Mr. RAINEY. At any rate, during our term of office.

I want to show what the sentiment of the country is, and I want to read from the Philadelphia Public Ledger of this morning.

To-day's Philadelphia Public Ledger states the argument as it has been made by editorial writers and published throughout the country. It is as follows:

WHAT SORT OF TARIFF COMMISSION?

We are going to have a tariff commission. With both parties committed to the resumption of the experiment, there is nothing that can stop it. The pending revenue bill makes provision for a commission which, if it shall be permitted, may perform a useful service for the Nation. But the big "if" in the proposition is what makes the business men of the country more or less doubtful as to the real utility of the provision. Unless there can be some guarantee in the law creating the commission that its membership shall be closed to politicians of the "lame duck" variety, it will be viewed with doubt for some time to come.

If the commission is to be composed of ex-Members of Congress for whom the political powers that be feel under obligations to provide, then it may be taken for granted that the tariff is not going to be "taken out of politics" to any great extent. On the other hand, if the commission is properly constituted it will gain the confidence of the coun-

try, and, possessing that confidence, it should exercise an important influence in the shaping of future tariff legislation. Nobody imagines, of course, that any commission, however carefully constituted, is going to be allowed to usurp the functions of the elected representatives of the people. But then, too, no one of intelligence imagines that a commission made up of cast-off political hacks, or even of "deserving Democrats" and "deserving Republicans," selected as such, is going to be able to investigate industrial conditions here and abroad with an unbiased mind or to formulate conclusions that will command confidence and respect. The House and Senate ought to understand that the country will not be satisfied with a tariff commission that is no more than a name; it wants the substance.

And in this morning's Washington Post, commenting upon this very question editorially I read from one of the editorials——

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAINEY. Just one minute more.

The CHAIRMAN. The gentleman desires one minute more. Is there objection? [After a pause.] The Chair hears none.

Mr. RAINEY (reading)—

No place on the tariff commission should be given for political favor or advantage No applicants for a place should even be considered. Lame ducks should be barred out. The President should go into the open market and find the best business men available. It is a business problem that must be handled.

Now, I have read those two most recent expressions of editorial opinion from to-day's issues of two great newspapers, and those arguments have been running for weeks in the great metropolitan papers of this country. No matter how good a member of the commission the gentleman from Ohio [Mr. LONGWORTH] may make at some time hereafter, no matter how good a member I would make, or any other Member of this House, at the present time the country and the business interests of the country demand that this commission shall be as fair and as nonpartisan as it is possible to make it, and they do not think it can be so made by appointing men who during many of the active years of their lives have been partisan upon tariff questions.

Mr. MANN. Mr. Chairman, I am in favor of a tariff commission, but even the birds with their small brains have sense enough not to foul their own nests. [Applause on the Republican side.] I am not willing to say when a man is elected to Congress that is proof that he has neither the brains nor the honesty to serve as a member of a tariff commission. [Applause on the Republican side.]

Mr. CANNON. Will the gentleman from Ohio yield me the balance of his time?

Mr. LONGWORTH. I do not think there is any time remaining.

The CHAIRMAN. There is no time remaining.

Mr. CANNON. Mr. Chairman, then I rise to oppose the amendment, to strike out the last word, or to make any motion necessary in order to say a word.

The CHAIRMAN. The Chair understands the amendment offered by the gentleman from Ohio is to strike out a certain portion of the bill. Without objection, the gentleman from Illinois will be recognized for five minutes.

Mr. CANNON. Mr. Chairman, I indorse what my colleague has just said. After making ineligible anybody if they serve in Congress, the bill proceeds:

No member shall engage actively in any other business, function, or employment—

And so forth.

I recollect a commission you gentlemen did not appropriate for which had on it ex-Representative Howard, a distinguished man, who commanded the respect of this side of the House, a man who believed in Democratic policies, an honest, able man. I would rather have him on a commission than some man who had no color, some man who is an intellectual eunuch. I do not object to red blood. Oh, we quarrel on the different sides of the House here; we do not agree with each other about this bill. You are determined that this bill shall pass without amendment. We are determined to vote against the bill and try to furnish sufficient reasons therefor. In this we are honest, and I think that you are honest; but I can pick out gentlemen, looking in your faces, who, if you were upon a tariff board, from your experience in Congress, from your knowledge of public affairs, I would infinitely sooner trust to make an honest investigation touching questions of fact—and if a tariff board is worth three whoops in that place that burns with fire and brimstone it will assuredly report facts; they have no power beyond that—I would sooner trust that man than some man who never saw anything of public life. I agree with what has been said by the gentleman from Illinois, and I hope that this amendment will prevail. [Applause.]

Mr. DECKER. Mr. Chairman, I move to strike out another word——

The CHAIRMAN. There is not——

Mr. DECKER. I would like to talk.

The CHAIRMAN. Debate has been exhausted on the amendment. Does the gentleman ask unanimous consent to proceed?

Mr. DECKER. I ask unanimous consent that I may proceed for five minutes.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. DECKER. Mr. Chairman and members of the committee, I would like to indorse what has been said by the distinguished gentleman from Illinois [Mr. CANNON]. If being a Member of this body disqualifies any honest man from any honorable avocation, I want to get out of it. [Applause.] Of course I may get out of it anyway, but I want to get out if service here disqualifies a man to serve in any high honorable position. I would like to see a tariff commission here that would, as far as possible, take the tariff out of politics, and I would like to have the business men of this country satisfied, but I am tired of this kind of sentiment that is going around the country, that in order for a man to have any business sense he has to be a retired millionaire. [Applause.]

I think there ought to be somebody on this tariff commission that would take into consideration the poor people who are affected by the tariff as well as the rich people. And, as the gentleman from Illinois says, you can have some man on this tariff commission who is nonpartisan, but you can not have a man on a tariff commission or on anything else that is nonpartisan on an important subject provided he has any sense. [Applause.] All you can expect on this commission, all the country can expect, and all the business people can expect, is to have honest men on it who will not be working for the interests of the Democratic Party or for the interests of the Republican Party but working for the interests of all the people of this country. [Applause.] Because a man is a Democrat it does not mean that he is a partisan; because a man is a Republican it does not mean he is a partisan. He either believes one way or believes another on this subject if he has given it any study.

And I am in favor of striking out this provision, just as the distinguished gentleman from Ohio [Mr. LONGWORTH] has moved to do, and let us show a little nonpartisanship here now by using our own judgment in striking it out. [Applause.] How would OSCAR UNDERWOOD do on a commission like this? If there is any man here that thinks OSCAR UNDERWOOD would not make a good man on a tariff commission, provided you could get him to serve, let him vote against this amendment of the gentleman from Ohio. If there is any man here that does not believe that Mr. FORDNEY, from a Republican standpoint, would make an honest and fair member from that standpoint, let him vote against this commission. I know he is partisan in the sense that he believes in protection, but he is an honest man, and that is all you are going to get on the commission. [Applause.] I would rather have some man like that than one of these milk-and-water fellows, well defined by the gentleman from Illinois [Mr. CANNON] as intellectual and political eunuchs. We have too many of them in the country now. [Applause.] And Speaker CLARK would serve in that capacity, or as President of the United States, or anywhere else. [Loud applause.]

There is a man running against me in my district now and all he has in the newspapers is, "Put a business man in Congress." That is, you have to be rich, you have to make $1,000 a week in some occupation, before you have the ability to perform a public duty and serve your country, and I am against that kind of a doctrine. [Applause and laughter.] These so-called business men who spend their time after the almighty dollar, accumulating money and amassing fortunes are not always the best men to put on any kind of commission that will look after the interests of all the people. The man who runs the bank is a business man. The man who owns an oil well or a mine is a business man. The man who works in the ditch for $1.50 a day is also a business man from my standpoint. The man that sits with his hand on the throttle and his eye on the rail while some of us are asleep on the cushions is also a business man from my standpoint. There are 100,000,000 people in this country interested in business, and I say it is an insinuation against the integrity, against the intelligence, against the patriotism of the people themselves to say that their Representatives in this great legislative body shall never, regardless of their qualifications, become members of this great tariff commission. [Applause.]

Mr. RAINEY. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. SLOAN. Mr. Chairman, I desire to ask whether or not the majority has made any arrangement for the extension of

time for the presentation of amendments and their consideration, and especially those amendments by the members of the Committee on Ways and Means who have not had opportunity to present them?

Mr. RAINEY. I will say to the gentleman from Nebraska that the members of the Committee on Ways and Means will be given preference in recognition by the Chairman. There has been no change in the rule, of course, to vote on this bill at 5 o'clock.

Now, I contend, as I have always contended, that this commission ought to be absolutely impartial; and in order to make it effective, in order that it may command the respect of the country, we have to listen to the opinions expressed in the country upon this question. The gentleman from Missouri and other gentlemen appeal to the patriotism of this body. They call attention to the fact that Members elected here have enough education, enough ability, to serve on commissions of this kind. Why, of course they have enough education and ability; but we know on both sides of this aisle how these commissions are frequently filled up, how selections are made, from Members of Congress who have been defeated. At the present time four or five ex-Members of Congress, I am advised, are opposing this provision in this bill. One or two of them have been frank enough to say they are candidates for positions on this commission. I think they are splendidly qualified for positions on this commission. This is a proposition presented here in this clause which appeals to the unselfishness and to the patriotism of this body. It closes the doors to positions upon this commission to ex-Members of Congress, and I am afraid most of them have been partisan upon this question.

Now, take the gentleman from Missouri [Mr. DECKER], who has just addressed this House. He probably never made a political speech in his life upon the tariff that was not partisan. Like all the rest of us, he is partisan upon tariff questions, and he makes most forceful and effective speeches at all times. He acts with his party in party matters, and during the period of his service here the tariff has been the subject of bitter partisan controversy. Every Member of this body, when he retires from it, goes out with his convictions upon the tariff, and the impression in the country is that he would not become an unprejudiced member of this great tariff jury. This is a jury, and he who goes upon it with prejudices one way or another, which must be overcome, is not in a position to render the fairest service. Whether this is true or not, the country has got that sort of an impression. If this body wants to make a good impression on the country in this particular, the very best way to do it is to close the doors of this commission to lame ducks, whoever they may be. [Applause on the Democratic side.]

Mr. HARDY. Mr. Chairman, will the gentleman yield for a question before he takes his seat?

Mr. RAINEY. If I have any more time, I will.

Mr. MANN. Mr. Chairman, I ask for the regular order.

Mr. CLARK of Florida rose.

The CHAIRMAN. For what purpose does the gentleman from Florida rise?

Mr. CLARK of Florida. I wish the gentleman from Illinois would indulge me for a minute.

Mr. MANN. The gentleman can ask for unanimous consent to speak on the amendment.

Mr. CLARK of Florida. I want to ask unanimous consent for three minutes, Mr. Chairman.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the debate on the amendment close in three minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the debate on the amendment close in three minutes. Is there objection?

There was no objection.

Mr. CLARK of Florida. Mr. Chairman, I simply wanted to say that I am absolutely in favor of this amendment. [Applause on the Republican side.]

Ever since I have been in this House Congress has been legislating to the discredit of Members of Congress. [Applause.] We have pandered to the public sentiment that Members of Congress can not be trusted.

A good deal has been said about the business man. Now, I have no possible objection to the business man, but the business of the business man is to trade and traffic. That is his chief business. Some business men have been known to carry their chief business into official positions. The old habit of trading and trafficking stuck to them still. It is an outrage, it seems to me, for this Congress to solemnly write into an enactment that a Member of Congress is not fit to fill a position created by Congress itself. [Applause.] I do not know that any Member of Congress or any man who has ever been a Member would be an applicant for appointment upon this commission, but if he should be, the fact that he had served here and had acquired by experience the peculiar knowledge to fit him for service on it ought not to discredit him and weigh in the balance against him. We only pander to the general sentiment that a Member of Congress is not what he ought to be when we put legislation of this kind upon the statute books, and I am sick and tired of it. If Congress has not any respect for itself, it can not ask the public to treat it with any respect. [Applause.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Ohio [Mr. LONGWORTH].

The question was taken, and the amendment was agreed to.

Mr. LONGWORTH. Mr. Chairman, I offer another amendment.

The CHAIRMAN. The gentleman from Ohio [Mr. LONGWORTH] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. LONGWORTH: On page 94, line 17, after the word "production," strike out the period and insert a comma and the words "and the nature and causes of the advantages and disadvantages of American as compared with foreign producers, and the possibility of establishing new industries or of expanding industries already in existence through scientific and practical processes in such a manner as substantially to promote the prosperity of the United States."

Mr. LONGWORTH. Mr. Chairman, on the 24th of last January the President of the United States addressed a letter to the gentleman from North Carolina [Mr. KITCHIN], urging the need of a tariff commission. This letter you will find published on page 10529 of the RECORD. In this letter the President made a series of statements as to what he thought ought to be done by the kind of tariff commission he advocated. The President did not do things by halves in this case. When he was converted he was converted all the way. When he changed his mind he changed it completely, and he favored granting powers and prescribing duties for the commission, to make it just the same kind of a powerful, useful commission that the Republican Party has always demanded.

In this case, however, while nine-tenths of his recommendations were adopted by the majority of the Committee on Ways and Means, one very important recommendation was left out. That was the recommendation you have just heard read by the Clerk of the House of Representatives. The President asked, and asked properly, that we should have, as the result of the investigations of this tariff commission, this kind of information: "The nature and causes of the advantages and disadvantages of American as compared with foreign producers, and the possibility of establishing new industries or of expanding industries already in existence through scientific and practical processes in such a manner as substantially to promote the prosperity of the United States."

The amendment I have offered is the precise language written by the President in his letter to the gentleman from North Carolina [Mr. KITCHIN].

Why is it, gentlemen on the other side, while you have adopted every other recommendation in the precise language that the President used in his letter, you refuse to give him here what he asks for? Are you not in favor of investigating the question of the advantages and disadvantages of American as compared with foreign producers? Are you opposed to the development of American industries? Do you think that it should ignore the investigation of practical processes, as the President suggests, to substantially promote the prosperity of the United States? Are you against the United States being prosperous? If so, you will vote against your President.

Now, I challenge the other side of this House to vote down the recommendation of their acknowledged leader, the President of the United States. [Applause on the Republican side.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Ohio [Mr. LONGWORTH].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. LONGWORTH. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 95, noes 118.

So the amendment was rejected.

Mr. FITZGERALD. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. FITZGERALD: Page 98, line 24, after the word "hereby," strike out the word "permanently," and on page 99, in line 5, before the word "each," insert "for," and in line 6 strike out the period and insert "a like sum is authorized to be appropriated."

Mr. FITZGERALD. Mr. Chairman, the section in the bill to which this amendment is offered provides a permanent annual appropriation of $300,000 for the expenses of the tariff commis-

sion. The amendment which I have offered provides $300,000 for the fiscal year ending June 30, 1917, and authorizes a similar appropriation to be made annually each year thereafter for the purposes of the commission.

During my entire service in the House, one of the vicious evils of legislation which has come under my observation has been the practice indulged in at odd times of making permanent annual appropriations for the maintenance of some particular service of the Government. To make this permanent annual appropriation removes this commission entirely from Congress. No one will scrutinize its work. No one will keep track of its administration. It eventually will result in such a condition as to make strong opposition to its existence. The bill provides for six commissioners, at $10,000 a year, and a secretary at $6,000—$66,000 annually. In addition it transfers from the Bureau of Commerce and Labor, in the Department of Commerce, the Division of Cost of Production. The appropriation for the field service of that bureau is $50,000 annually. The bill provides that with the exception of the commissioners, the secretary, a clerk to each commissioner, and such technical experts as may be required, all of the employees shall be in the classified service, and it authorizes the commission to fix the compensation of all of its employees excepting the secretary of the commission. In every department of the Government clerks are appointed and paid under the provisions of the Revised Statutes. Four classes of clerks are recognized, and clerks can not be given any compensation additional to that provided for those four classes, except under specific authority of Congress. Under this bill the clerks in the tariff commission can be paid any compensation the commission determines. In other services chief clerks and chiefs of division are all paid definite, designated compensations that run uniformly through the departments. Whenever any service has been created and authorized to appoint employees and to fix their compensation, the inevitable and invariable rule has been for such service to fix the compensation in excess of that uniformly paid in all the departments of the Government.

I know it is the belief that by fixing the appropriation permanent this commission is taken so far away from Congress that it can never be abolished. It is feared that perhaps a statutory commission like the one provided in this bill may share the fate of the old Taft Tariff Board by practically being legislated out of office by refusal of appropriations for its support. But, Mr. Chairman, the mere fact that the service has a permanent annual appropriation will not protect it if a majority of Congress want to abolish it. To-day we are in a peculiar situation. Every one is for a tariff commission, some from conviction, some from expediency, some because they are practical men, some, like myself, because of their helplessness. [Laughter.] I know I am in a very small minority. Whenever a majority of Congress determines to abolish the tariff commission, if it ever does, the mere fact that it has a permanent annual appropriation will not preserve it; and in the interest of good, orderly legislation and correct administration of the Government no service should be given a permanent appropriation.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FITZGERALD. I ask for one minute more.

The CHAIRMAN. The gentleman asks unanimous consent that his time be extended one minute. Is there objection?

There was no objection.

Mr. FITZGERALD. While I have been chairman of the Committee on Appropriations a great deal of the time of my committee has been spent in endeavoring to have repealed permanent appropriations, and the movement to repeal the permanent appropriations has been persistent, because wherever permanent appropriations exist abuses are found, bad administration exists, and the sentiment is so persistent and so prevalent that those services have been put on the annual basis and compelled to submit annual estimates to Congress, compelled to run the gauntlet of the House and the Senate, and to demonstrate the necessity for the employment of those upon their pay rolls. There is no more reason why the tariff commission should have its employees carried on the pay rolls at a time when there may be no need for them, simply because they have the appropriation, than that any other service of the Government should have a definite sum, regardless of its needs. I hope the amendment will be adopted.

Mr. RAINEY. Mr. Chairman, I desire to be recognized in opposition to the amendment. The object of this clause in the bill is to make this tariff commission as permanent as this body can make it. We do not take it away from Congress. It is required to report once every year to this body, and it is required also to report whenever——

Mr. HAMILTON of Michigan. May I ask the gentleman a question?

Mr. RAINEY. Yes.

Mr. HAMILTON of Michigan. The gentleman states that this commission is required to report to this body. He means that it is required to report to the Ways and Means Committee, does he not?

Mr. RAINEY. No; to report to Congress.

Mr. HAMILTON of Michigan. Has the bill been amended to that effect?

Mr. RAINEY. No; that is in the bill.

Mr. HAMILTON of Michigan. On what page?

Mr. RAINEY. And it also reports to the Ways and Means Committee of the House whenever they want a report; to the Finance Committee of the Senate whenever they want it; and it makes any special reports that Congress may require at any time. Now, as I remember, the platforms of this year and the platform expressions of former years, so far as they have gone, whether they have been State platforms or national platforms, they have declared always in reference to this commission that it shall be permanent and nonpartisan. I think that proposition is in every platform that has been adopted this year by any political party. The charge has been made that the method of dropping such commissions heretofore was by discontinuing appropriations. I contend that there never has been a tariff board appointed under any law since the law of 1882. We are making this as permanent as we can, in response to the demand of the country.

Mr. HAMILTON of Michigan. Will the gentleman yield?

Mr. RAINEY. Yes.

Mr. HAMILTON of Michigan. The gentleman says the bill provides that this commission shall report to Congress?

Mr. RAINEY. Yes.

Mr. HAMILTON of Michigan. On what page?

Mr. RAINEY. Section 503, on page 94.

Mr. HAMILTON of Michigan. Will the gentleman read the precise language which he says makes such requirement?

Mr. RAINEY. Page 94, lines 5 and 6—

And shall report to Congress on the first Monday of December of each year hereafter.

Mr. HAMILTON of Michigan. What shall they report?

Mr. RAINEY—

A statement of the methods adopted and all expenses incurred, and a summary of all reports made during the year.

Mr. HAMILTON of Michigan. Yes; and that is all.

Mr. RAINEY. Is not that enough?

Mr. HAMILTON of Michigan. That does not include the findings of the commission.

Mr. RAINEY. The investigations of the commission can be reported whenever this body wants them reported, and whenever one of these great committees wants a report. I am now answering the gentleman from New York [Mr. FITZGERALD], when he says that a permanent appropriation takes this commission entirely away from this body. This annual report is intended to show how much money they have expended during the year, and how they expended it, in connection with other matters.

Mr. STAFFORD. Will the gentleman yield?

Mr. RAINEY. Yes.

Mr. STAFFORD. Suppose the commission, in view of the Committee on Appropriations expend money in an extravagant way for salaries of clerks or chief clerks beyond what they do in any other service, what opportunity has the House to check this extravagance under this permanent appropriation?

Mr. RAINEY. The House ascertains how the money has been expended every year when the commission makes its report, and if they have abused the privileges conferred upon them and extravagantly expended money, the House can and will take proper action.

Mr. STAFFORD. The gentleman knows that the House would be powerless to change it.

Mr. MANN. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, I think the amendment offered by the gentleman from New York [Mr. FITZGERALD] ought to prevail. There is an erroneous opinion on the part of many people outside of Congress in reference to the so-called Taft Tariff Board. That board was not created by a legislative provision of law. It was created by an appropriation, and when further appropriation was refused it fell to the ground. But here is a proposition to create by legislative enactment a tariff commission. I can recall no case where Congress provided by law for the creation of an office and then refused to make the appropriation necessary for that office.

Talk about the tariff commission being permanent! The office of the President of the United States is permanent, but we do not

make a permanent appropriation for the payment of his salary. We make appropriation annually, and the purpose of having Congress make the appropriation annually for a tariff commission is not for the purpose of refusing to make an appropriation, but to compel reasonable economy in the expenditure of the money. There is no case where officials having the general authority to expend money without making a report and submitting to determination by the Committee on Appropriations that they do not become grossly extravagant. It would be so in this case. We ought to hold the purse strings of the Government in our hands. [Applause.] I am not in favor of assuming that Congress in the future will not have sense enough or patriotism enough to make the necessary appropriations for the commission which it has created and which it maintains. [Applause.]

Mr. HUMPHREY of Washington. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. HUMPHREY of Washington. Mr. Chairman, I have listened to the discussion of this bill, and I can not understand any reason why a Republican should give it support. I was especially struck by the two speeches made by the veterans of this House, the former Speaker of the House, Mr. CANNON, and the present Speaker of the House, Mr. CLARK. Mr. CANNON, the gentleman from Illinois, called attention to the fact that if Republicans were expected to vote for the bill they ought to have an opportunity to express themselves on its different provisions.

For the first time in our history in time of peace, during this administration, a direct tax is placed upon the people to raise money to meet the expenses of government. I can not understand why any Republican should vote for the pending bill. It is opposed to the very foundation principles of the Republican Party. It is the British system of taxation transferred to this country.

I know it is argued that the Republicans have voted for preparedness, and that a large part of the money to be raised is to be used for expenditures made necessary for this reason, and therefore that the Republicans are bound to support the method of getting the revenue because they supported the preparedness legislation. I submit that this is a strange and unusual argument that does not greatly appeal to me. Had the question been first submitted to us, and we had given our consent that the money for preparedness might be raised in this way, there would be some foundation for such argument. But the true Democratic policy has been followed of increasing expenses first and providing some way of securing the money afterwards.

Suppose you were in partnership with 435 other men and it was agreed that for the good of the partnership certain expenditures must be made and these were decided upon and the improvements contracted for and that you favored these improvements, but when the final decision came as to how the money should be raised the majority decided that the best and most expeditious way to get the cash would be by robbery. Would you feel under such circumstances that you must therefore turn highwaymen, whatever nice conscientious scruples you might have about the method, and help secure the money by such methods simply because you had said that the money was needed for a legitimate expenditure?

When there is a perfectly plain and sure remedy at the customhouse are we called upon as Republicans to violate all political integrity, to disregard the very foundation principles of our party, and help the majority to place a burden upon the people, and leave our industries open to foreign invasion simply because the majority insist that it shall be done their way and no other?

The Good Book says, "In vain the net is spread in the sight of any bird." The Republicans who vote for this bill will show more confidence and less wisdom than the birds of the air, for the net has not only been spread by the distinguished Speaker of the House in your full view but your attention has been specifically called to it. He asked the Republicans a very pertinent question when he said, "If this bill is not a good one why are you going to vote for it?" This will be the chief Democratic argument in the coming campaign, that Republicans have supported a great many of their measures. How are you going to meet it? The party that has to stop to explain in a campaign is lost. [Applause on the Republican side.]

It will avail you little to say that it was a Republican bill. If the Democrats are enacting Republican measures, helped by Republican votes, what more could the Republican Party do if placed in power? Do you believe the people will listen with any patience while you argue that the Democrats should be defeated to give the Republicans an opportunity to do exactly what they have already done? The most powerful weapon that the Democrats will have in the coming campaign will be that the Republicans helped to pass this bill.

Those who vote for this bill will be pursuing the same policy that the Democratic administration has been pursuing toward Mexico. We will furnish the Democrats the guns and ammunition to destroy us. [Applause on the Republican side.] This fall when you go out upon the stump the Republicans who vote for this bill will find that they will be done to death by the very weapons that they have given to their enemy. I have never yet been able to defeat an enemy by praising him. I have never yet been able to lick a man by being too proud to fight him. I have never yet known a political party to win victory by working with its opponents. [Applause on the Republican side.]

But they tell us that this bill has some protective features in it. That is true. As the distinguished gentleman from North Carolina [Mr. KITCHIN] has said, "it is a sugar-coated pill." It has been fixed especially to tickle the palates of frightened Republicans. It is a thin coating of protection sugar that covers a deadly dose of Democratic free trade, and the Republican who takes it will cry out in his agony as the prophet of old when he said, "It was in my mouth sweet as honey, and as soon as I had eaten it my belly was bitter." [Laughter and applause on the Republican side.] Those who swallow this Democratic concoction, if this law remains upon the statute books when peace comes in Europe, will experience inward nausea that will make seasickness a genuine delight by comparison. [Laughter.]

But they tell us that this bill has good things in it. It may be so. An enthusiastic optimist in a moment of delirium once exclaimed that there were good things in hell and Texas. I am not prepared to dispute that statement in its entirety—I have only been in Texas. [Laughter.] But suppose the statement is true, is that any reason why Republicans without further ceremony should move bodily into the enemy's favorite country?

If the unexpected should happen and we should fail to capture either House or Senate and this law should remain upon the statute books until the end of the bloody struggle in Europe, then 60 days from that time we will seee 2,000,000 idle men in this country; cheap foreign goods will be invading this country as never before; our mills and factories will be closing and millions of the unemployed, the ragged and hungry, will again fill the highways and byways of this Nation as they did in the days under the Underwood tariff law before the war in Europe began. [Applause on the Republican side.] If that time comes, the people will demand what excuse a Republican had for voting for a law directly taxing the people while leaving our country defenseless against this destructive invasion by the products of foreign cheap pauper labor. They will demand to know why we gave support to a free-trade measure when it was perfectly apparent that this deluge of industrial ruin was certain to come. [Applause on the Republican side.] On that day the people are going to look at things as they are, and he will stand defenseless who must explain why he joined hands with the Democrats in placing this law upon the statute books.

This expenditure for preparedness is made to protect us from the foreigner. The foreigner, and not the American, should be compelled to pay this expense. All money for preparedness made necessary by the foreigner should be raised by making the foreigner pay for the privilege of competing in our markets with the product of American labor, with the product of the American farmer, with the product of the American manufacturer. In other words, make the foreigner pay for "preparedness" by making him pay for the privilege of selling in American markets. Let the Republicans take that position and all the powers of darkness and Democracy can not prevail against it. [Applause on the Republican side.]

Mr. EMERSON. Mr. Chairman, I rise in opposition to the pro forma amendment.

Mr. GOOD. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. That is not in order.

Mr. MOORE of Pennsylvania. I call for the regular order.

Mr. GOOD. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

Mr. MOORE of Pennsylvania. I demand the regular order.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to proceed for five minutes.

Mr. MOORE of Pennsylvania. For the present I object.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. FITZGERALD].

The question was taken; and on a division (demanded by Mr. RAINEY) there were—ayes 144, noes 55.

So the amendment was agreed to.

Mr. FORDNEY. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

After the word "alloying," on page 62, line 4, add the following:
"*Provided, however*, That copper used for any purpose other than the making of munitions shall not be subject to said tax."

Mr. FORDNEY. Mr. Chairman, all I wish to say respecting the amendment is that the committee fears they might not cover copper that is used for ammunition if they offer an amendment similar to this. I offer this amendment in the hope that it might be accepted by the majority members of the committee as covering that point. It was prepared by my colleague, Mr. JAMES, of Michigan.

Mr. KITCHIN. Mr. Chairman, I hope that amendment will not prevail. It will be impossible to ever separate the uses of this copper after it passes out of the hands of the refiner and smelter.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. MOORE of Pennsylvania. Mr. Chairman——

The CHAIRMAN. Debate is closed.

Mr. KELLEY. But five minutes have not been used, Mr. Chairman.

Mr. HAMILTON of Michigan. I ask unanimous consent that the gentleman from Michigan [Mr. JAMES] may proceed for five minutes.

The CHAIRMAN. The rule provides that one Member shall be permitted to speak for an amendment and one against.

Mr. STAFFORD. But the rule says five minutes.

Mr. KELLEY. And there has not been a five-minute speech made upon it.

The CHAIRMAN. The Chair so rules. The Chair will submit the request for unanimous consent. The gentleman from Michigan [Mr. HAMILTON] asks unanimous consent that the gentleman from Michigan [Mr. JAMES] may proceed for five minutes. Is there objection?

Mr. KITCHIN. Mr. Chairman, I hope that there will be no objection to that.

There was no objection.

Mr. JAMES. Mr. Chairman, on page 60 of this bill, on line 4, we find these words, "Title III, Munition Manufacturers' Tax."

One would naturally suppose from the title that this bill proposed to lay a tax on all munitions of war, and personally I would have no objection to a bill that did propose to tax all munitions of war.

What does the word "munitions" mean? The dictionary states that the word "munitions" means "military stores or material."

The word "munitions," according to the resolution introduced by the Senator from Nebraska [Mr. HITCHCOCK] apparently means "arms, ammunition, artillery, and explosives of any kind."

The word "munitions," according to the resolution introduced by the gentleman from Missouri [Mr. SHACKLEFORD], seems to be as follows, according to his bill introduced on December 6, 1915:

That upon the following munitions of war, to wit, all guns, shells, and cartridges, except such as are ordinarily used for hunting or sport; ordnance, pistols, cannon, mortars, machine guns, grenades, bombs, torpedoes, mines, battleships, battle cruisers, gunboats, torpedo boats, torpedo-boat destroyers, submarines, monitors, armor plate, bayonets, and swords manufactured in the United States there shall be levied a tax of 20 per cent of their value.

According to the gentleman from Wisconsin [Mr. CARY] munitions includes all of the above and mules, horses, automobiles, and even chewing gum in addition.

But according to this bill called "munition manufacturers' tax," we find no mules, automobiles, zinc, cotton, and so forth, taxed.

We find ammunition and firearms of all kinds taxed; and one metal, and one metal alone—copper—taxed.

Zinc, copper, lead, steel, and cotton are all used in the manufacture of munitions; but none but copper are included in this bill.

There can be no objection to an income tax if it picks no favorites. An income tax would not be fair that proposed to only tax incomes received from the sale of some metal; it would not be fair if it proposed to tax only incomes received from the sale of automobiles alone, or of horses and mules alone, or of zinc alone.

It would be even more unfair if it proposed to tax only those who received their income from copper alone, or steel alone, or any other kind of metal alone; it would be absolutely unfair if it only taxed those who received an income from a certain make of automobile and exempted those who received incomes from all other makes of automobiles.

It would be more unfair still if it proposed that in case an income was 10 per cent from the sale of a certain kind of metal and 90 per cent from other sources, or 10 per cent from the sale of a certain make of auto and 90 per cent from other sources, the tax should apply on the entire income because part of the income was received from the sale of a certain make of auto or a certain kind of metal.

An inheritance tax would be unfair if it stated that the only inheritances that should be taxed was those that consisted of interests in automobiles alone or inheritances received from interests in mining properties alone.

The bill would be more unfair still if it stated that the only inheritances that should be taxed was inheritances where the estate consisted of stocks in a particular kind of automobile stock, or only to be taxed when the estate consisted of copper mining stocks.

It would be more unfair still if it stated that in cases where the estate consisted of 20 per cent of stock in a particular automobile stock or a particular kind of mining stock, and the other 80 per cent consisted of some other kind of stock, the inheritance tax was to apply on the entire 100 per cent.

A corporation tax would not be fair if it only applied to corporations engaged in mining or in the automobile industry or the cotton trade and let every other corporation go "scot free." It would be still more unfair if it provided that those who engaged in copper mining should pay a tax and all other mining companies went free. It would be unfair if the bill provided that a certain make of automobile should pay a corporation tax but that all other automobile manufacturers needed to pay no taxes.

It would be more unfair still if it stated that in case a corporation had part of its capital invested in a certain kind of automobile stock and the most of its capital in real estate it should pay a tax on the 100 per cent simply because a small part of its capital was invested in automobiles.

This bill does these very things. It states that owners of cotton pay no tax and owners of zinc-mining properties pay no tax, although both cotton and zinc are used in the making of munitions. This bill, as I have stated, only levies a tax on one metal—copper—and levies it on all copper, regardless of the fact that at least 50 per cent of our copper is not used in the making of munitions of war.

As I have stated, I would vote for a tax on munitions of war if it covered all munitions of war. I would not want to see a tax levied on zinc alone, on mules and horses alone, on cotton alone, and neither do I want to see a tax levied on copper alone. I would not believe it fair to put a tax on all Missouri mules because part of them are being shipped to Europe for war purposes.

It may be that the makers of this bill believed that the smelting of copper was handled by middlemen alone, and that they thought that these men were making enormous profits out of this kind of business. I do not know the situation in other parts of the country, but in Michigan nearly all our companies own their own smelters, and therefore the mining company is the smelter and refiner as well.

In normal times not over 2 per cent of the copper produced goes into cartridge metal or metal for munitions, but under the proposed bill the copper producer has to pay a tax on all of its output, regardless of the fact of how much or how little may be used for the making of munitions.

The unfair part of it is that unless the bill is amended those in the copper business will be paying an excise tax after the war is over, even if only 2 per cent is used for munitions of war. The result will be that in the long run a large part of this tax will be shifted onto the miner of the copper.

If the committee believes that all corporations engaged in any business shall pay an excess-profits tax on all profit over 10 per cent, and will amend this bill so that everybody will be placed on the same basis, then I have no objection to it, but we do not want to be singled out as the one industry to be hurt.

Page 25, entitled part 2, provides for a corporation tax. You will note by the wording of the bill that all corporations pay a tax of 2 per cent on their annual net income. This applies to those engaged in the copper business as well as those engaged in other business. In addition, they will pay the tax I am now trying to amend.

If the proposed law goes through, it will mean a tax of about $1,300,000 to one county in my district alone. The State of Montana will pay more than $3,000,000; it will mean more than $3,000,000 a year to the State of Arizona, and about $1,500,000 to the State of Utah.

The following article from the Mining Gazette, of Houghton, Mich., of July 6, 1916, will give you some idea of what it will cost some of the States:

[From the Mining Gazette, Thursday, July 6, 1916.]

THAT TAX ON COPPER.

If the general revenue bill just introduced into Congress is enacted into law in its present form, the copper producers of the country will be called upon to pay a heavy toll.

The section aimed at the copper industry provides for a graduated tax on the gross receipts from the sale of refined copper or copper alloys, as follows: One per cent in excess of $25,000 and not exceeding $1,000,000; 2 per cent exceeding $1,000,000 and not exceeding $10,000,000; and 3 per cent in excess of $10,000,000.

Copper can hardly be expected to sell so low that such companies as Anaconda, Calumet & Hecla, Inspiration, Kennecott, Nevada Consolidated, Ray Consolidated, and Utah Copper would ever pay less than 3 per cent of their gross receipts, while with copper at 25 cents per pound the list would be considerably expanded.

In a rough way the proposed tax would fall upon various producers as follows, with copper at 25 and 15 cents per pound, respectively:

	Copper at 25 cents.	Per share.	Copper at 15 cents.	Per share.
Ahmeek	$125,000	$0.60	$75,000	$0.37
Allouez	50,000	.50	30,000	.30
Anaconda	2,250,000	1.00	1,350,000	.60
Calumet & Arizona	600,000	1.00	360,000	.60
Calumet & Hecla	562,500	5.50	337,500	3.37
Copper Range	300,000	.75	120,000	.30
Inspiration	900,000	.80	540,000	.50
Kennecott	1,275,000	.40	765,000	.25
Miami	375,000	.50	150,000	.20
Mohawk	60,000	.60	36,000	.36
Nevada Consolidated	600,000	.30	360,000	.18
North Butte	125,000	.25	25,000	.18
Old Dominion	175,000	.60	100,500	.33
Osceola	100,000	1.00	60,000	.60
Quincy	100,000	1.00	60,000	.60
Ray Consolidated	515,000	.30	350,000	.20
Utah Copper	1,425,000	.90	855,000	.45

It will be noted that with the exception of Calumet & Hecla the tax with copper at 15 cents per pound would make little impression on earnings per share, but with copper at 25 cents several companies would have to pay the Government close to $1 per share earned, Calumet & Hecla topping the list with a tax which would be the equivalent of $5.50 per share on its 100,000 shares outstanding.

The following editorials, from the Washington Times of July 8 and the Washington Herald of July 7, show that the profits of the munitions business is rapidly coming to an end. From these editorials I believe the Members of this House will be shown that in a short time the only ones that will be paying this tax will be the copper producers. I know that this is not what the committee intends. I trust, therefore, before this bill is completed it will be so amended that it will not be levied after 1917, or after the war in Europe is over.

If I have an opportunity, I expect to offer an amendment limiting this tax to December 31, 1917. If this is defeated, and I have an opportunity, I shall offer the following amendment: "After the word 'alloying,' on page 62, line 4, add the following: 'Upon the signing of treaty of peace at the conclusion of the so-called "great war" said tax shall cease.'"

[From the Washington Times, Friday, July 7, 1916.]

TIDE OF WAR TRADE TURNS.

A Pittsburgh dispatch says that the Westinghouse Air Brake Co., having completed a contract for 1,250,000 18-pound shrapnel shells, is preparing to dismantle the plant in which they were made. There is no more business of the kind in prospect, and the plant is useless in its present form.

So far as observed, this is the first case of the kind; but there will be more in plenty. At the outset of munition making the hard-headed supply companies in this country insisted on prices high enough to insure them from loss if they built plants especially for the business. The du Pont company demanded, and got, $1 per pound for smokeless power that had previously been made profitably for half that sum. This was not extortion; it was safe business; for it was necessary, in turning out the immense quantities the allies wanted, to construct new plants which must be paid for from contracts actually in hand. One-half the price was stipulated to be paid when the order was given, in order that it might be used in building emergency plants.

[From the Washington Herald, July 8, 1916.]

UNITED STATES WAR BOOM ON ITS LAST LEGS—EUROPE NOW ABLE TO SUPPLY ITS OWN ARMS AND AMMUNITION.

NEW YORK, *July 7.*

The manufacturing boom that has been sweeping the United States as the result of the allies' war orders is about to wane.

A big slump is looked for in the business of making munitions for the entente powers, and, in fact, has already set in.

Thousands of workmen have been dismissed by various firms who have closed the doors of plants created or enlarged for the purpose of putting out arms, ammunition, and war material for England, France, and Russia.

Most of the contracts let early in the war have been filled. In many cases there were no renewals. One reason for this is the fact that some of the American output has proved inferior in quality. The main cause for the let-up in the "war business," however, is the fact that the allied countries have now sufficiently mobilized their industries to turn out their own arms, ammunition, and material.

If I get an opportunity, in order to see how many Members from the States of Arkansas and Missouri believe in a tax on horses and mules, I shall offer an amendment to have this tax also apply on mules and horses. The dealers in horses and mules have also made a nice profit in the last two years. The following article from the New York World of July 9 shows the horse-and-mule situation to-day:

[From the World, July 9, 1916.]

DEARTH OF MULES AND HORSES FOR AMERICAN ARMY—RANCHES WITHIN 100 MILES OF THE BORDER HAVE BEEN STRIPPED BY AGENTS FROM ABROAD—PLENTY IN THE REMOTE INTERIOR OF MEXICO—UNITED STATES IS BUYING AT PRICES 25 PER CENT HIGHER THAN A YEAR AGO.

FORT SAM HOUSTON, TEX., *July 8.*

Notwithstanding the fact that there are now more than 600 Army trucks in service within the jurisdiction of the southern military department, which has its headquarters here, the demand for horses and mules for the additional military units that will soon be in the field is larger than can be promptly supplied. It is stated by Army commissary officers that besides the 26,550 Cavalry horses, 15,900 Artillery horses, 8,100 wheel mules, 8,100 lead mules, 8,000 pack mules, and 192 light draft horses, which have already been authorized to be purchased, probably double this number will be required a little later on.

Much difficulty is being met in finding the right kind of animals in Texas. This State has been scoured for good horses and mules during the last three years by French and English Army buyers. The farms and ranches have been depleted of most of the animals that come up to Army specifications.

PRICES HAVE GONE UP.

The scarcity of first-class horses and mules is causing a big rise in prices of these animals, and those that are now being bought by the Government cost fully 25 per cent more than they would have sold for a year ago.

As my colleague, Mr. FORDNEY, stated the other day, the shipments to Europe on horses and mules for the 10 months prior to the war amounted to only $3,533,000 and for the 10 months of the fiscal year just closed amounted to $84,293,000—why not put a tax on the lowly Missouri mule?

For the 10 months prior to the war we exported $6,000,000 worth of brass—the 10 months of the present fiscal year just closed the exports amount to $103,000,000; why not place brass on the same basis as copper?

Automobiles and parts thereof have increased from $29,000,000 to $116,000,000—and a great profit on every automobile; why not place automobiles on the same basis as copper?

If I have an opportunity I shall introduce an amendment to have this tax also apply on producers and dealers in cotton, as cotton is also used in the making of munitions of war. Not that I expect to see the amendment pass, but because I would like to see how many Congressmen from the Southern States will vote to place a tax on cotton.

If it is reasonable to place a tax on all copper, because part of the copper production is used in the production of munitions, it is also fair and reasonable to place a tax on all cotton because part of the cotton crop is used in the making of munitions of war.

It is true, as my colleague, Mr. FORDNEY, stated a day or so ago, that one firm in this country alone has used since August, 1914, 611,000 bales of cotton in the manufacture of explosives. In a letter to Mr. FORDNEY they state that they know of over 300,000 bales used by other manufacturers for the same purpose.

At least $70,000,000 worth of cotton has gone into the manufacture of explosives. Why not put a tax on cotton?

Shipments of zinc abroad have increased from 328,000 to 36,800,000 pounds during the 10 months of the last fiscal year. Why not a tax on zinc?

Mr. BARKLEY. Mr. Chairman, will the gentleman yield now?

Mr. JAMES. Yes.

Mr. BARKLEY. Mr. Chairman, I am in sympathy with the purposes of the gentleman's amendment, but I am bothered by the question of how it can be separated at the refinery or the mine or anywhere else before it gets into the manufactured product so as to determine how much is used for the purpose of manufacturing munitions of war.

Mr. JAMES. I do not know exactly how it can be done, but if the Committee on Ways and Means can levy this tax, it certainly would have the authority and would know exactly how to arrange it. I might say that so far as my district is concerned, we mine, smelt, and refine all of the copper that we produce.

Mr. BARKLEY. How does the gentleman arrive at the statement of 40 per cent at this time as being used in the manufacture of munitions of war?

Mr. JAMES. That is what I am informed, with only 2 per cent in normal times.

As I have stated, if we believe that every corporation or every person receiving an excess of 10 per cent net profit from the manufacture of munitions of war ought to pay a tax, let us amend this bill so that every person and every corporation getting over 10 per cent will pay a tax on that income, and personally would vote for such an amendment, but I do object to having one industry singled out and paying this tax, and I hope that my amendment will prevail.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Michigan.

The question was taken; and on a division (demanded by Mr. JAMES) there were—ayes 101, noes 116.

So the amendment was rejected.

Mr. FORDNEY. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Page 51, line 10, strike out "Title II.—Estate tax," and after line 10 strike out all the provisions included under said title, the same being sections 100 to 112, inclusive, of the bill.

Mr. FORDNEY. Mr. Chairman, I am ready to submit the questions.

[Mr. GOOD addressed the committee. See Appendix.]

Mr. MOORE of Pennsylvania. Mr. Chairman, I demand the regular order.

Mr. GOOD. I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman has that privilege.

Mr. MANN. Mr. Chairman, I ask for the regular order.

The CHAIRMAN. The question is upon the amendment offered by the gentleman from Indiana.

Mr. DILLON. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. MANN. Mr. Chairman, I ask for the regular order.

Mr. DILLON. Mr. Chairman, I wish to speak to the amendment. Nobody has spoken on the amendment.

Mr. MANN. Regular order.

Mr. CULLOP. Mr. Chairman, there are five minutes remaining.

Mr. DILLON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MANN. We are simply wasting time. Why does not the Chair put the question?

The CHAIRMAN. The Chair understands that the gentleman from Michigan did not occupy five minutes. If so, there is five minutes debate.

Mr. MANN. There is no time left. There has been time consumed on both sides.

Mr. DILLON. Mr. Chairman, a parliamentary inquiry.

Mr. CULLOP. Mr. Chairman, I ask to be recognized.

Mr. FORDNEY. I yielded the balance of the five minutes to my colleague from Michigan [Mr. JAMES].

Mr. CULLOP. Mr. Chairman, I ask to be recognized.

The CHAIRMAN. The Chair does not recognize the gentleman.

Mr. MANN. Mr. Chairman, regular order.

The CHAIRMAN. The question is upon the amendment offered by the gentleman from Michigan.

The question was taken and the amendment was rejected.

Mr. MOORE of Pennsylvania, Mr. CROSSER, and Mr. CULLOP rose.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. MOORE], a member of the committee, is recognized to offer an amendment, which the Clerk will report.

The Clerk read as follows:

Page 18, line 14, after the word "within," strike out the word "three" and insert the word "two."

Mr. MOORE of Pennsylvania. Mr. Chairman, I hope the chairman of the committee will accept this amendment. Section 9, page 17, gives the Commissioner of Internal Revenue the right to overhaul all income-tax accounts for three years after settlement has been made. I am suggesting that the time be reduced from three years to two years, so that a man who has paid his taxes may not have to wait three years before he knows whether he can dispose of his books and papers.

Mr. HULL of Tennessee. Will the gentleman yield.

Mr. MOORE of Pennsylvania. I yield.

Mr. HULL of Tennessee. I call the gentleman's attention to the fact that there is a limitation really on the department which is in the interest of the proposition the gentleman favors.

Mr. MOORE of Pennsylvania. I have no interest in "fraudulent" returns; I am thinking of errors discovered by the department after a term of years.

Mr. HULL of Tennessee. The Government would simply take the taxpayer into court instead of making an assessment, and have the entire transaction overhauled. And I think you would find this much better for him.

Mr. MOORE of Pennsylvania. My thought is that three years is too long a period now to hold a taxpayer in suspense, after he has his receipt in hand.

Mr. HULL of Tennessee. I think the gentleman will find it is to the benefit of the taxpayers to deal with the commissioner in that way rather than to turn them over to the courts in connection with any return they fail to make.

Mr. MOORE of Pennsylvania. I submit it to the committee as a matter of convenience to the taxpayers.

Mr. HULL of Tennessee. The gentleman is aware that the statute of limitations does not run on the Government with respect to these tax matters. They would simply take the taxpayer into the court instead of making his assessment, if you strike out that three years and make it two years.

Mr. MOORE of Pennsylvania. I do not wish to argue it further. Let the committee act.

Mr. FESS. Mr. Chairman, I rise in opposition to the gentleman's amendment.

Mr. Chairman and members of the committee, last Saturday the Speaker of this House made a very earnest plea, not on behalf of the bill, but for votes; not for votes on that side of the House, because he has them, but for votes on this side of the House; not because he needs them, since this bill will pass, if necessary, without a single Republican vote cast for it.

You have already enough Democratic votes, and it is a pertinent question to be asked now, Why the concern of the leader of the majority and the distinguished Speaker of this House to get Republican votes on this measure? [Applause on the Republican side.] It is not to pass the bill, but it is to estop argument against the direct-tax system to which the Democratic Party is committed, and to foreclose argument in the days preceding November. [Applause on the Republican side.] And in order to win the votes on this side they have thrown out many specific sops. The first is the tariff commission, that they opposed, and are now willing to swallow in the hope that we will vote for it. Our support of the tariff commission does not depend upon the action to-day. We will write it after March 4. We will not attempt to deceive the people. The commission will not be created to avoid the repeal of the Underwood bill, as now designed by the Democrats, but to do that specific thing, in order to place a protective law on the statute books. The second sop is an antidumping clause, that they ridiculed in the discussion of the Underwood tariff bill, when we Republicans urged it upon them, and now they swallow it in the hope that they will get votes from this side of the House, not to carry it; they have the votes to do that, but they want this side to surrender to their scheme. We will write an antidumping clause that will be a revision of the Underwood tariff bill, and write it in a protective measure. [Applause on the Republican side.] The dyestuff proposition is another effort of estoppel. They say it is protective, and my distinguished friend from North Carolina [Mr. KITCHIN] literally holds his nose, because it is hard to swallow. Why do you swallow it? To get Republican votes. Why? To use as arguments against us when the discussion is on in the days between now and next November against your method of raising the tax totally by the direct method in opposition to and supersession of the protective tariff system. Another sop is the repeal of the Democratic deficiency tax, deceptively called war tax. It never should have been passed; it was enacted over the protest of a solid Republican vote. Our position on this tax is too well known to require an affirmative vote on your abandonment of the indirect method of taxation.

Our position on the income tax is an equitable taxation; not a class discrimination.

Our position on an inheritance tax does not require a support of this bill, which threatens the necessity of State revision of their system for State support.

The real purpose of these pleas is not to secure the money, but to find an excuse for not rewriting the Underwood bill and to estop the Republicans from a demand for the restoration of the protective system. [Applause on the Republican side.]

Mr. BORLAND. Will the gentleman yield?

Mr. FESS. No. Do not take my time.

I will not vote for this measure, because I will not allow the Democrats under a claim of an emergency to manufacture arguments against the protective system. [Applause on the Republican side; laughter on the Democratic side.] It is not an emergency, for that is covered by your proposed bond issue.

You voted $50,000,000 on a ship-purchase bill that I opposed.

Mr. SABATH. The bill must be a good bill, then.

You voted $45,000,000 to be dumped into the mouth of the Mississippi for flood control, that I opposed; $43,000,000 for rivers and harbors, that I opposed; $20,000,000 for a nitrate plant—a vicious proposition—that I opposed; $11,000,000 for a munition plant, at the very moment when you were offered its manufacture at the Government's own price, a measure that I opposed; $36,000,000 of an increased pay roll, that all Republicans opposed. You voted, with your eyes wide open to what you called emergency situations $205,000,000 of extravagant

expenditures, not a dollar of which should have been authorized at this time, if at all, and you only ask to raise $197,000,000 here, eight millions less than you wasted. [Applause on the Republican side.] If you would save on your wasteful expenditure you would not need to saddle upon the country this sort of a bill; and even if you did need it, there is a better way to do it. Rewrite your broken-down, concededly mistaken, dismally disappointing revenue-producing tariff; rewrite it by the protective system, that always raises enough revenue and starts the business of the country in the employment of labor. [Applause on the Republican side.] This proposed scheme expresses not alone your desire to meet a condition of deficient revenue, but it is to fix a system of taxation that prompts this moving appeal of Democratic leaders to silence our opposition. It is the same old Democratic wail against an American system of protection on behalf of an English free-trade scheme. I will not vote for your measure. But after March 4 we will restore the protective system, and these other Republican measures you offer as a sop will be cared for. [Loud applause on the Republican side.]

Mr. MANN. Mr. Chairman, I ask for the regular order.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The amendment was rejected.

Mr. SLOAN, Mr. CULLOP, Mr. CROSSER, Mr. KENT, and Mr. WOOD of Indiana rose.

The CHAIRMAN. The gentleman from Nebraska [Mr. SLOAN] is recognized.

Mr. SLOAN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Nebraska offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend section 305 by striking out the period after the word "taxes," page 86, and inserting as follows: "*Provided*, That the United States shall reimburse from any moneys in the United States Treasury not otherwise appropriated all persons to the extent they have heretofore purchased from the Government or its agents stamps, as provided in the act which is repealed by this section: *And be it further provided*, That all persons who have purchased such stamps from the original purchasers shall have a legal demand against such original purchasers to the amount of their respective purchases, enforceable in any court having jurisdiction thereof."

Mr. SLOAN. Mr. Chairman, the purpose of this amendment is to reimburse those who have purchased stamps under the law that we on this side have denounced as an outrage. It was agreed by the chairman of the Committee on Ways and Means, in his speech the other day, to have been an outrage. If the American Congress has perpetrated an outrage, it ought to be manly enough to correct it. Therefore it ought to reimburse purchasers of these stamps.

Mr. DAVIS of Texas. Mr. Chairman, will the gentleman yield there?

Mr. SLOAN. I have not the time. I desire to ask unanimous consent, Mr. Chairman, to present two or three more amendments, so that they may be voted upon without debate. I understand that a great many gentlemen here desire to present amendments, but are waiting for the members of the Ways and Means Committee to exhaust their right of precedence. If the amendments presented by the members of the committee are fully debated, these Members may not have time to offer their amendments. I ask therefore that certain of my amendments may be offered and voted upon without further debate.

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent to offer amendments to be voted upon without debate. Is there objection?

Mr. KITCHIN. Reserving the right to object, Mr. Chairman——

Mr. DAVIS of Texas. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DAVIS of Texas. Does this amendment include the return of the Republican Spanish war taxes that they collected?

Mr. SLOAN. Certainly not.

A MEMBER. That was for war purposes.

Mr. SLOAN. Everybody knows that; and they, being war taxes, are not in the same class with stamp taxes levied after the first recent Mexican War, and are now being repealed as the second Mexican War seems to begin.

Mr. KITCHIN. Mr. Chairman, I call for a vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Nebraska [Mr. SLOAN].

The question was taken, and the amendment was rejected.

Mr. SLOAN. Mr. Chairman, I offer another amendment.

The CHAIRMAN. The gentleman from Nebraska offers a further amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SLOAN: Amend section 200 by striking out the word "sixteen" on line 14 of page 60 and inserting "fifteen" in lieu thereof.

Mr. SLOAN. Mr. Chairman, I am ready to have that voted upon without debate.

Mr. EMERSON. Mr. Chairman, I rise in opposition to that.

Mr. KITCHIN. Mr. Chairman, I thought it was understood that we would vote without debate on that proposition.

Mr. EMERSON. I did not so understand it. No unanimous consent was granted.

The CHAIRMAN. The gentleman from Ohio [Mr. EMERSON] is recognized.

Mr. EMERSON. Mr. Chairman and gentlemen of the House, I have read this bill with much interest, and especially the income-tax exemption part of the bill. I was very much surprised to find on page 7, among the exemptions, one that interested me very much, and that was the exemption of the present President of the United States from the operation of this income-tax law and for the term for which he has been elected.

Mr. HULL. Mr. Chairman, will the gentleman yield?

Mr. EMERSON. No; I can not yield.

Mr. KITCHIN. Of course, it is unconstitutional.

Mr. EMERSON. Why, then, did the Ways and Means Committee have to write it into this bill? If it is unconstitutional, it is unnecessary to write it into the law. This Congress can not make a law that is unconstitutional, and if it is unconstitutional for the President of the United States to pay an income tax out of his compensation, under paragraph 6 of section 1 of Article II of the Constitution, why did you write it into the law? Tell me that.

Mr. GORDON. It is excepted.

Mr. EMERSON. If you do not write it into the law, then the President would have to come in and claim his exemption under the Constitution. This exception saves him that trouble.

Mr. CROSSER. Let the gentleman offer his amendment.

Mr. EMERSON. Give me a chance and I will offer it. What an injustice to our present President, and how inconsiderate of all future Presidents. Note the wording: The compensation of the present President," and not in the compensation of succeeding Presidents. But the compensation of the present President is to be exempted for the term for which he has been elected. No assumption that he will be reelected, but his compensation for the last year of his term, and the only year he will ever serve, is exempted from the operation of this law.

Now, who asked the members of the Ways and Means Committee to exempt the compensation of the present President of the United States? Why did they exempt the present President from the operation of this law, and why did they deny him the privilege of paying this tax, which no doubt he would be glad to pay? No doubt he would be just as glad to pay this tax as he is to ask others to pay the tax.

Did the present President ask that this exemption be made? Was it placed there by some friend of the present President? Is it possible his friend the gentleman from North Carolina [Mr. KITCHIN] asked that this exemption be made?

I wish some one would tell this Congress and the people of this country why the present President is denied this privilege of helping bear the burden of national taxation.

What a rank injustice to our present President, what an insult to his patriotism. It can not be that he, the present President, who has asked patriotic men to enlist to fight for their country, and, if necessary, die for their country, would himself ask to be relieved of this patriotic duty. But how about future Presidents? Poor souls, they are not exempted. When Charles E. Hughes becomes President of the United States on the 4th day of next March the first person who will confront him is the income-tax collector. No exemption for poor Hughes; he will have to pay. But the Ways and Means Committee were so thoughtful that they looked out for our present President and neglected all future Presidents. How did these distinguished members of the Ways and Means Committee come to this wonderful conclusion? By what process of reasoning did they arrive at this conclusion? God only knows.

But patriotic Democrats will say that paragraph 6 of section 1 of Article II of the Constitution of the United States protects the present President. Well, if it does, which I doubt, let him claim his protection under the Constitution itself. Do not presuppose that he wants the exemption. Wait until he asks for it. If the present President is protected by the Constitution in his compensation, the only one who has the right to claim the protection of the Constitution is the one affected. Well, if the Constitution protects the compensation of the present President,

why write it into this law? It is unnecessary, as the Constitution of the United States is greater than any law which Congress can make. The facts are that if this exemption is not written into the law, the present President, in order to get his exemption, would either have to go into court and claim it, or would have to specifically ask for it, which would be very embarrassing to the present President, especially at this particular time. Is that the reason this exemption was written into the law? I stand for an opportunity for the present President to pay the income tax. This will be the last opportunity the present President will have. Perhaps he would cheerfully pay it; perhaps the Ways and Means Committee have gone altogether too far; perhaps the exemption is uncalled for.

I am for giving the present President a chance to at least pay the income tax during the last year he is in office. If he does not wish to pay, let him claim his exemption under the Constitution. The Democrats have talked a good deal about the Constitution, now let them use it.

Let no Ways and Means Committee dictate to the present President. [Applause on the Republican side.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Nebraska [Mr. SLOAN].

The question was taken, and the amendment was rejected.

Mr. GREEN of Iowa. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GREEN of Iowa: Page 92, line 8, after the word "of," strike out the figures "$10,000" and insert in lieu thereof "$7,500"; and in line 10 strike out "$6,000" and insert in lieu thereof "$5,000."

Mr. GREEN of Iowa. Mr. Chairman, I shall not discuss this but very briefly. It reduces the salary of the tariff commissioners from $10,000 to $7,500 and the salary of the secretary from $6,000 to $5,000.

I know of no reason why the salaries should have been fixed at this exorbitant amount in the first place. The House has just recently adopted an amendment making Members of Congress eligible on the commission, and I know no reason why they should get a higher salary, if appointed on this commission, than they receive now. The salaries provided by this amendment would be as large as any ever received by any similar commission. They are as large as ought to be received. The salary of the secretary is large and quite sufficient to get an able and competent man to fill this position. [Applause on the Republican side and cries of "Vote!" "Vote!"] Mr. Chairman, I ask for a vote.

Mr. RAINEY. Mr. Chairman, the salary is placed at $10,000 in the bill in order that we can secure the services of the most competent men—of the best men—as members of this commission. The salary is in harmony with other salaries. We fixed the salaries of the members of the Federal Trade Commission at $10,000 and the members of the Federal Reserve Board receive $12,000 and the members of the Board of Tariff Appraisers receive $9,000. This is a board superior, of course, to the Board of Tariff Appraisers. The gentleman from Iowa [Mr. GREEN] by his amendment would make it inferior in rank by reducing the salary to $7,500. These salaries are $1,000 more than those received by the members of the Board of Tariff Appraisers.

Mr. CULLOP rose.

The CHAIRMAN. For what purpose does the gentleman from Indiana rise?

Mr. CULLOP. I want to speak in behalf of the amendment offered by the gentleman from Iowa [Mr. GREEN].

The CHAIRMAN. Without objection, the gentleman from Indiana will be recognized. Is there objection? [After a pause.] The Chair hears none.

Mr. CULLOP. Mr. Chairman, I hope the amendment offered by the gentleman from Iowa [Mr. GREEN] will be adopted.

Ten thousand dollars seems to have been a stereotyped salary that has been fixed here for almost every office which has been created. When the rural-credit bill was up I offered an amendment, and it was adopted in the committee and by the House, fixing the salary of the members of the board at $7,500, and I believe that is an adequate compensation for the members of this board and that as good men can be obtained to act in this capacity for $7,500 a year as could be secured for $10,000 a year. It was my purpose to offer the same amendment here, but the gentleman from Iowa [Mr. GREEN] has beat me to it, and hence I join in requesting the adoption of his. While we are raising the salaries of the higher-up men, the men who do the real work are the low-paid men in the Government service, and this distinction that has been made all along ought to be obviated and the salaries put in proper proportion to the labor that is rendered. Therefore I hope the amendment offered by the gentleman from Iowa will be adopted. It will secure men abundantly qualified to perform the function and the labors of this commission and men who will perform them in a satisfactory manner, perform duties that will be of great credit to the service of the country.

Mr. Chairman, we are about to spread upon the statute books one of the most splendid measures that has ever been adopted by Congress in the history of this Government. [Applause on the Democratic side.] I am glad to see the gentleman from Iowa [Mr. GOOD] come out and indorse the measure. He already understands the public mind and the public sentiment bearing on this question, and gentlemen on that side must admit that their opposition to this measure is not because it is a bad measure, but because it emanates from the Democratic Party, and they do not want the Democratic Party to have the proper credit. [Applause on the Democratic side.]

Let me remind them of the fact that while they were in power the people of this country were demanding an income tax as one of the methods of raising the revenue of this great Government; they also demanded an inheritance tax, but they refused their demand, and now we propose to put both measures on the statute books. [Applause on the Democratic side.] We propose to respond to the wishes of the people and give them revenue legislation which will properly adjust the burdens of taxation in keeping with the governmental protection afforded; and in thus distributing the burdens, we will do justice to all the people.

Gentlemen on that side ask us to return to the tariff taxation. Aye, gentlemen, if we return to a Republican tariff, we will get no revenue, for the reason goods are not being imported from which duties could be collected. The gentleman from Iowa clearly showed that if their party when in power had adopted the preparedness program which the Democratic Party has put through they would have had to resort to some other method of taxation; they would have been driven to the method we are now adopting. If we were to return to the customhouse methods and adopt tariff duties, high protection, the customhouses of this country would not collect adequate revenues. The theory of the gentlemen on that side, who have advanced that plan of raising revenue, know it would be a failure because foreign goods are not coming into this country, and having no products admitted into the country, there would be no tariff collected. [Applause on the Democratic side.] This being true, some other method must be resorted to, and we are in this measure adopting the one most universally used. It is the popular one, the one the people demanded when the Republicans were in power, but they refused to adopt it, and the people commissioned the Democratic Party with power and instructed it to place the method into law, whereby it could be enforced, and we are obeying instructions. [Applause on the Democratic side.]

Gentlemen well know if their theory of protection was carried into practice it would not raise a single dollar of revenue. The theory carried to its ultimate analysis is that we should produce all of everything we consume. Buy nothing abroad. If we did that then a protective tariff would not raise a single dollar of revenue at any customhouse in this Union. No goods under such circumstances would be imported, and if no goods were imported then no tariff taxes could be collected, and in such event some other method of taxation for the purpose of supporting the Government would have to be adopted. If the Republican Party was in power and would attempt to enforce its theory of taxation it would prove futile. But that is out of the question. It is out of power, and by its course in this matter, it earned the opposition of the people, and they do not propose that it shall soon again get control of this Government. [Applause on the Democratic side.] It has been repudiated by the people, its policies condemned, and by its course on this measure it is demonstrating its incapacity, its want of accord with the thought, sentiment, and best interest of the people.

By its course in this matter it clearly demonstrates that it is still reactionary, hostile to progressive legislation, and unwilling to employ constructive legislation to promote the welfare of the people. Men on that side of the Chamber who shape and direct the policies of the Republican Party, so blinded with partisan zeal and actuated by partisan prejudice, have declared in this debate they would not vote for this measure because it was a Democratic measure, and have advised their colleagues to vote against it for the same reason. Such a thing in this enlightened age is almost inconceivable.

But it has so happened. Is it possible that men intrusted with high position are so blinded by party zeal and party prejudice that they would vote to defeat a concededly meritorious measure and punish the people because such measure was pro-

posed by the Democratic Party, the party in power? Men think of it and consider the degeneracy of those who would resort to such indefensible methods of party bigotry and party subserviency. Such a thing is almost incomprehensible. Such speeches have been made here to-day, such advice has been given. What will their constituents think when they learn of their course, and how will the country look upon them? When apprised of their attitude will not the verdict of all enlightened men be they are unworthy of the trust confided, unsuited for the positions they hold, and should be retired to private life, where they properly belong and should forever remain? [Applause on the Democratic side.]

Oh, banish such a thought, lay aside prejudice, cast out the bigotry, and come join us in the great work we are about to perform and show the country that you are too big to resort to such unpardonable things, and that above all you are patriots, serving your country and promoting its best interest, to advance the welfare of all its people. Remember that "he who serves his country best serves his party best." [Applause on the Democratic side.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. GREEN].

The question was taken; and on a division (demanded by Mr. GREEN of Iowa) there were 125 ayes and 86 noes.

Mr. RAINEY. Mr. Chairman, I ask for tellers.

Tellers were ordered, and the Chairman appointed Mr. RAINEY and Mr. GREEN of Iowa.

The committee again divided; and the tellers reported that there were 143 ayes and 96 noes.

So the amendment was agreed to.

Mr. KITCHIN. Mr. Chairman, since we have had so many political speeches, it has deprived many Members who have important amendments, or amendments which they consider important, and perhaps they are kept from offering them. It will be impossible for us to debate all these amendments, and I believe that they should be placed before the House and be voted upon. I do not know as we can ask unanimous consent in the Committee of the Whole, but I will make this suggestion, and I hope it will be agreed to, that from now on until the committee has to rise, under the rule, all gentlemen who have amendments may send them up to the desk, have them read, and voted on, as soon as possible.

Mr. FORDNEY. Without debate.

Mr. KITCHIN. Without debate, because one amendment and debate would take up all the time.

Mr. HAMILTON of Michigan. When do we vote?

Mr. KITCHIN. The committee will rise at 5 o'clock.

Mr. HAMILTON of Michigan. That will give us 12 minutes to offer amendments.

The CHAIRMAN. The gentleman from North Carolina requests that those having amendments may offer them at this time and have them voted upon without debate.

Mr. BENNET. Reserving the right to object, this will be a useless mechanical performance. If we can not have time to consider an important bill like this, this automatic device for considering amendments is a waste of time, and I object.

Mr. KENT. Mr. Chairman, I wish to offer three amendments, as follows:

Page 67, line 14, strike out the words "including vermouth."
Page 67, line 22, strike out "4" and insert in lieu thereof "3."
Page 68, line 2, strike out "10" and insert in lieu thereof "7."

The first amendment is intended to provide more revenue for the Government. Vermouth is not a wine in a strict sense, but a wine compound, which is provided for in section 301 (e), page 76, line 11, at the rate of 24 cents a gallon. Taking vermouth out of its class and putting it in the wine column will result in a loss of revenue of something like $70,000, without any excuse at all. The use of vermouth is practically confined to the making of mixed drinks, and it could stand as high a tax as distilled liquor without appreciable effect on the price to the consumer.

The next two amendments are the result of more than five months of careful work with the best expert service that I could obtain. California produces about 90 per cent of the wine of the United States. The emergency-revenue tax of 8 cents a gallon almost resulted in the destruction of the dry-wine business, while the tax on brandy used for fortifying sweet wine has not been collected because the manufacture of sweet wine has been largely abandoned, owing to the impossibility of financing the fortifying tax. It has been my task to endeavor to remedy this condition and, at the same time, to provide a maximum possibility of revenue for the Government.

A bill was drafted with the aid of the Treasury Department, which provided a sliding scale of taxes based on alcohol content. As a compromise measure and for the sake of simplification in the schedule we concluded that the industry could stand a tax of 3 cents a gallon on dry wine up to 14 per cent alcohol content, and I had supposed that this was satisfactory to the committee, and this is the rate which I wish to replace the 4-cent rate reported in the bill. Dry wines are made from grapes that grow best on rocky hillsides, which are oftentimes unfit for any other crop. It is land of this sort that produces the best wine, and the discouragement of the industry by overtaxation works harm and hardship that are lasting.

On page 68, line 2, we find a rate of tax levied by the bill on sweet wines which run above 14 per cent in alcohol. These wines are largely grown on rich bottom land, and the tonnage product is much higher than of grapes grown on the hills for dry-wine purposes. In the manufacture of sweet wine grape brandy is used to add to the alcohol strength, with the intent of stopping fermentation and saving unfermented a portion of the natural sugar of the grape, which is nearly all fermented out in the process of making dry wine. The bill provides for a tax on the brandy used for fortification of 10 cents a gallon, and inasmuch as it takes about three-elevenths of a gallon of brandy to fortify a gallon of wine the added tax from the use of the brandy amounts to about 3 cents. In other words, sweet wines under the terms of this bill are taxed 10 cents on alcohol content plus 3 cents on the brandy used for fortification, making a total tax on the sweet wines of 13 cents a gallon. These wines are sold at so low a price as to make this tax almost prohibitive, and the result will be that those who have heretofore made sweet wine will avoid the tax of fortification and make an enormous quantity of dry wine, which will not be as good as the dry wine produced in the proper dry-wine districts. This, in my opinion, will at the present time cause a dislocation of the industry and will add to the burden of the dry-wine manufacturers, who are already suffering severely as a result of the previous tax measure.

I sincerely hope that these amendments may be adopted. I am certain that from the mere standpoint of revenue better results will obtain with the more moderate tax that I have suggested, the industry will be saved, and this is the opinion of the Treasury Department.

The CHAIRMAN. The question is on the amendment of the gentleman from California.

The question being taken, the amendment was rejected.

Mr. CROSSER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Ohio offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. CROSSER: In paragraph (b) of section 1, Title I, beginning with the words "exceeds $20,000," in line 12, page 2, strike out everything through the words "exceeds $500,000," in lines 6 and 7, page 3, and substitute the following: "and does not exceed $50,000, 2 per cent per annum upon the amount by which such total net income exceeds $50,000 and does not exceed $75,000, 3 per cent per annum upon the amount by which such total net income exceeds $75,000 and does not exceed $100,000, 4 per cent per annum upon the amount by which such total net income exceeds $100,000 and does not exceed $125,000, 5 per cent per annum upon the amount by which such total net income exceeds $125,000 and does not exceed $150,000, 6 per cent per annum upon the amount by which such total net income exceeds $150,000 and does not exceed $175,000, 7 per cent per annum upon the amount by which such total net income exceeds $175,000 and does not exceed $200,000, 8 per cent per annum upon the amount by which such total net income exceeds $200,000 and does not exceed $250,000, 9 per cent per annum upon the amount by which such total net income exceeds $250,000 and does not exceed $300,000, 10 per cent per annum upon the amount by which such total net income exceeds $300,000 and does not exceed $400,000, 11 per cent upon the amount by which such total net income exceeds $400,000 and does not exceed $500,000, 12 per cent per annum upon the amount by which such total net income exceeds $500,000."

Mr. CROSSER. Mr. Chairman, because of the rule giving preference to the members of the committee in charge of a bill, I have not been allowed time enough to discuss fully the amendment which I have offered for the purpose of increasing the supertax on annual incomes of $60,000 and over. I am therefore submitting a statement explaining the amendment.

The rates proposed in the bill submitted by Representative KITCHIN require amendment for the following reasons:

1. They discriminate unjustly against the taxpayer of modest income and in favor of the multimillionaire class. Under the proposed law the tax upon persons with incomes of from $3,000 to $20,000 is increased 100 per cent, while the supertax rate upon persons with incomes over $500,000 is increased only 66⅔ per cent. In no case is the supertax upon persons with incomes over $100,000 increased more than 80 per cent, and in the class with incomes of from $100,000 to $150,000 the increase is only 25 per cent.

This is shown in the following table, which compares the rates under the old and new laws. As several changes in classi-

fication have been made in the new bill there are several overlapping rates:

Supertax rates.

Class.	Old rate.	Rate proposed by pending bill.	Increase.
Normal tax upon incomes of unmarried men from $3,000 to $20,000 and upon incomes of married men from $4,000 to $20,000	Per cent. 1	Per cent. 2	Per cent. 100
$20,000 to $40,000	1	1	
$40,000 to $50,000	1	2	100
$50,000 to $60,000	2	2	
$60,000 to $75,000	2	3	50
$75,000 to $80,000	3	3	
$80,000 to $100,000	3	4	33⅓
$100,000 to $150,000	4	5	25
$150,000 to $200,000	4	6	50
$200,000 to $250,000	4	7	75
$250,000 to $300,000	5	8	60
$300,000 to $500,000	5	9	80
$500,000 and over	6	10	66⅔

2. The rate increases are extremely irregular, varying from no increase whatever in certain cases to 100 per cent in others, without regard to the question of discrimination.

3. The rate increases rise too sharply in the lower classes. It will be noted that the supertax rate increases 4 per cent in the first $100,000 and then increases to 8 per cent only after the $300,000 mark is passed, and for the next $200,000 increases only 1 per cent.

4. The corporation tax, which is increased from 1 per cent to 2 per cent, only serves to increase the discriminatory features of these rates. This arises from the fact that the corporation tax is not a tax upon corporations or upon the stockholders of corporations, but almost entirely a tax upon the consuming public. The tax is paid by the corporations, but is shifted directly to the consumers by addition to the price. This is most clearly seen in the case of railroads and other public utilities, who are permitted by courts and commissions to add such taxes to their costs in ascertaining what their rates should be.

5. The discrimination is particularly unjustified and subject to criticism in the case of the multimillionaire class, whose incomes are derived principally from dividends and interest on tax-free bonds. These wealthy individuals pay practically no normal tax, since under the law all income upon which the tax is paid at the source is exempt from further normal tax.

The extent to which such wealthy persons are exempt from the normal tax is shown by official figures compiled by the Bureau of Internal Revenue for the 173 individuals reporting incomes over $500,000 in 1914. These figures show that while the total gross incomes of these multimillionaires were $246,327,000, the following amounts were exempt from the normal tax—dividends, $153,699,000; salaries, $2,674,000, and at least 50 per cent of $29,986,000 interest on bonds, of which it is safe to assume that at least half are tax-free. In addition, reductions for expenses, and so forth, to the amount of $42,662,000 were allowed. Thus the normal tax was paid on not more than $30,000,000 out of the entire $246,000,000 gross income, or a little more than 12 per cent.

Such men as John D. Rockefeller, whose incomes are derived from securities, pay practically no normal tax. The greater part of the normal tax is paid by men with incomes derived from salaries, professions, and businesses, which they themselves own and operate. To tax this class in favor of the idle rich is the rankest kind of discrimination, and no individual or party can defend it before the country.

PROPOSED RATES.

The rates proposed in the amendment have been arranged to make the increases as nearly equitable as possible. This is done by leaving the classifications under $100,000 as they were in the Underwood Act, and subdividing into $25,000 increases the classifications from $100,000 to $200,000. This makes the increases much more gradual and uniform. The supertax rate increases 3 per cent in the first $100,000, 4 per cent in the second $100,000, and 5 per cent thereafter.

A complete comparison of the proposed rates with those submitted by Representative KITCHIN is made in the table on the attached sheet.

The proposed rates are not only more equitable, but will yield about $10,000,000 more revenue. The burden is placed where it can most easily be borne—upon the multimillionaire class with incomes over $250,000.

Comparison of rates—Kitchin bill and proposed rates.

NORMAL AND SUPER TAX RATES COMBINED.

Class.	Kitchin bill. Rate.	Kitchin bill. Increase over Underwood Act.	Class.	Proposed rates. Rate.	Proposed rates. Increase over Underwood Act.
	Per cent.	Per cent.		Per cent.	Per cent.
Normal tax	2	100	Normal tax	2	100
$20,000 to $40,000	2–1	50	$20,000 to $50,000	2–1	50
$40,000 to $50,000	2–2	100	$50,000 to $75,000	2–2	33⅓
$50,000 to $60,000	2–2	33⅓	$75,000 to $100,000	2–3	25
$60,000 to $75,000	2–3	66⅔	$100,000 to $125,000	2–4	20
$75,000 to $80,000	2–3	20	$125,000 to $150,000	2–5	40
$80,000 to $100,000	2–4	30	$150,000 to $175,000	2–6	60
$100,000 to $150,000	2–5	40	$175,000 to $200,000	2–7	80
$150,000 to $200,000	2–6	60	$200,000 to $250,000	2–8	100
$200,000 to $250,000	2–7	80	$250,000 to $300,000	2–9	83⅓
$250,000 to $300,000	2–8	66⅔	$300,000 to $400,000	2–10	100
$300,000 to $500,000	2–9	83⅓	$400,000 to $500,000	2–11	116⅔
$500,000 and over	2–10	71⅔	$500,000 and over	2–12	100

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio [Mr. CROSSER].

The amendment was rejected.

Mr. WOOD of Indiana. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. WOOD of Indiana: Pages 79 and 80, strike out all of section 302 after the word "say," in line 11, on page 79, down to and including the word "tax," in line 6, on page 80.

SEVERAL MEMBERS. Vote! Vote!

Mr. WOOD of Indiana. Just a word, gentlemen. This is worth your while. This limits the tax on banks. Every bank in the United States has some interest in this amendment. The section I seek to amend clearly presents a case of double taxation. You say you are trying to do the best for the greatest number of people. There are a very great many people in very moderate circumstances who have some concern in this amendment, who have some little holdings in little banks in villages and towns throughout the United States. You are subjecting every bank, by reason of the bill as it is now presented, to double taxation. You are putting upon them a tax that you are not putting upon any other character of corporation, and I dare say that if you will stop and consider for a few minutes you will conclude that there is absolutely no necessity for singling out the banking institutions of this country and subjecting them to this extraordinary amount of tax. [Cries of "Vote!"] Every institution, every bank in this country, is now paying its full share of income tax as a corporation. If this extra tax goes upon the banks of the country, the interest rate will have to be made higher or the interest on deposits made lower. I wish to say to you, gentlemen, that if the banks of this country are to be subjected to this extraordinary tax there is but one of two ways whereby the banks can meet it.

One is that they will have to raise the interest charged upon the loans that they are making, or else reduce the rate of interest they are paying on deposits. There are many of the banks of this country that are not now paying dividends to their stockholders. It may be that in the large commercial centers they do, but what I say applies to many of the banks and many of the trust companies in the smaller towns and cities of this country, and there is no reason why this amendment should not be adopted in the interest of fair play and common justice.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana.

The question was taken; and on a division (demanded by Mr. WOOD of Indiana) there were—ayes 136, noes 104.

Mr. KITCHIN. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed Mr. RAINEY and Mr. WOOD of Indiana to act as tellers.

The Committee again divided; and the tellers reported—ayes 169, noes 114.

So the amendment was agreed to.

The CHAIRMAN. The hour of 5 o'clock having arrived, and all pending amendments having been voted on, under the rule the committee will rise and report the bill to the House with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. FOSTER, Chairman of the Committee of the Whole House on the state of the Union, reported that that com-

mittee had had under consideration the bill (H. R. 16763) to increase the revenue, and for other purposes, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. KITCHIN. Mr. Speaker, I demand a separate vote on the amendment just adopted, offered by the gentleman from Indiana [Mr. WOOD].

Mr. RAINEY. Mr. Speaker, I demand a separate vote on the Fitzgerald amendment affecting the permanency of the commission.

Mr. RAGSDALE. Mr. Speaker, I demand a separate vote upon the salary amendment of the gentleman from Iowa [Mr. GREEN].

Mr. RAINEY. I also demand a separate vote on the Longworth amendment respecting ex-Members of Congress.

The SPEAKER. Is a separate vote demanded on any other amendment? [After a pause.] If not, the Chair will put them in gross. The question is on agreeing to the amendments.

The question was taken; and on a division (demanded by Mr. KITCHIN) there were—ayes 221, noes 5.

So the amendments were agreed to.

The SPEAKER. The Clerk will report the first of these amendments, upon which a separate vote is demanded.

Mr. KITCHIN. Mr. Speaker, I understand that the gentleman from South Carolina [Mr. RAGSDALE] withdraws his demand for a vote on the salary amendment.

Mr. MANN. We have to vote upon it, anyway.

The SPEAKER. The Clerk will report the first amendment to be voted upon.

The Clerk read as follows:

Amendment by Mr. LONGWORTH: Page 91, line 22, after the word "succeed," strike out the words "no person shall be eligible for appointment as a member of the commission who has been elected to or served in the Senate or House of Representatives of the United States."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. LONGWORTH) there were—ayes 239, noes 76.

So the amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment by Mr. FITZGERALD: Page 98, line 24, after the word "hereby," strike out the word "permanently," and on page 99, in line 5, before the word "each" insert the word "for," and in line 6, strike out the period and insert "a like sum is authorized to be appropriated."

Mr. FITZGERALD. Mr. Speaker, I ask that the paragraph may be reported as it would read if amended.

The SPEAKER. Without objection the paragraph will be reported as it will read should it be amended.

There was no objection.

The Clerk read as follows:

That there is hereby appropriated for the purpose of defraying the expense of the establishment and maintenance of the commission, including the payment of salaries herein authorized, out of any money in the Treasury of the United States not otherwise appropriated, the sum of $300,000 for the fiscal year ending June 30, 1917, and for each fiscal year thereafter a like sum is authorized to be appropriated.

The SPEAKER. The question is on the amendment.

The question was taken and the Speaker announced the ayes seemed to have it.

Mr. RAINEY. Mr. Speaker, I demand the yeas and nays on the amendment.

The SPEAKER. The gentleman from Illinois demands the yeas and nays on this amendment. [After counting.[Twenty-two gentlemen have arisen, not a sufficient number, and the yeas and nays are refused. [Applause.] The Clerk will report the next amendment.

The Clerk read as follows:

Amendment by Mr. GREEN of Iowa: Page 92, line 8, after the word "of" strike out the figures "$10,000" and insert in lieu thereof "$7,500; in line 10, strike out "$6,000" and insert "$5,000."

The SPEAKER. The question is on the amendment.

The question was taken and the amendment was agreed to. [Applause.]

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment by Mr. WOOD of Indiana: Pages 79 and 80, strike out all of section 302 after the word "say," in line 11, on page 79, down to and including the word "tax," in line 6, on page 80.

The SPEAKER. The question is on the Wood amendment.

The question was taken, and the Speaker announced the ayes seemed to have it.

Mr. KITCHIN. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. DILLON. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. DILLON. I would like to have the amendment again reported.

The SPEAKER. Without objection, the Clerk will again report the amendment.

There was no objection.

The amendment was again reported.

The question was taken; and there were—yeas 202, nays 167, answered "present" 10, not voting 55, as follows:

So the amendment was agreed to.

The Clerk announced the following pairs.

For the session:

Mr. CANTRILL with Mr. LANGLEY.

On this vote:

Mr. SHACKLEFORD (against amendment) with Mr. DYER (for).

Mr. HEFLIN (against amendment) with Mr. GRAHAM (for).

Mr. STEELE of Iowa (against amendment) with Mr. MEEKER (for).

Mr. BLACK (against amendment) with Mr. CAPSTICK (for).

Mr. SLAYDEN (against amendment) with Mr. FAIRCHILD (for).

Mr. FIELDS (against amendment) with Mr. GRAY of New Jersey (for).

Mr. BURGESS (against amendment) with Mr. Moss of West Virginia (for).

Mr. NICHOLLS of South Carolina (against amendment) with Mr. HUTCHINSON (for).

Mr. WILSON of Florida (against amendment) with Mr. PORTER (for).

Until further notice:

Mr. DOREMUS with Mr. HOWELL.

Mr. GREGG with Mr. STEENERSON.

Mr. CALLAWAY with Mr. PETERS.

Mr. SHERWOOD with Mr. WOODS of Iowa.

Mr. WEBB with Mr. MILLER of Pennsylvania.

Mr. DRISCOLL with Mr. TILSON.

Mr. HOUSTON with Mr. GUERNSEY.

Mr. RAUCH with Mr. HUSTED.

Mr. RAYBURN with Mr. KAHN.

Mr. KEY of Ohio with Mr. POWERS.

Mr. MOON with Mr. NORTH.

Mr. POU with Mr. MCFADDEN.

Mr. LANGLEY. Mr. Speaker, did my colleague, Mr. CANTRILL vote?

The SPEAKER. He did not.

Mr. LANGLEY. I have a general pair with him, Mr. Speaker. I voted "yea," and wish to change that and answer "present."

The name of Mr. LANGLEY was called, and he answered "Present."

Mr. GALLAGHER. Mr. Speaker, I wish to change my vote from "yea" to "present."

The name of Mr. GALLAGHER was called, and he answered "Present."

Mr. SABATH. Mr. Speaker, I voted "yea." I desire to withdraw that vote and answer "present."

The name of Mr. SABATH was called, and he answered "Present."

Mr. MEEKER. Mr. Speaker, I am paired with the gentleman from Iowa [Mr. STEELE] on the bill and all amendments, and I wish to change my vote from "yea" to "present."

The name of Mr. MEEKER was called, and he answered "Present."

Mr. FOSTER. Mr. Speaker, I was called out of the Hall, and when I returned my name had been called.

The SPEAKER. The gentleman does not come within the rule.

Mr. FOSTER. I desired to vote.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

Mr. FORDNEY. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. The gentleman from Michigan offers a motion to recommit, which the Clerk will report.

The Clerk read as follows:

Mr. FORDNEY moves to recommit H. R. 16763 to the Committee on Ways and Means with instructions to amend the bill so as to raise an equitable portion of the required revenue from a protective tariff, "Sufficient to protect adequately American industry and American labor, and to be so adjusted as to prevent undue exactions by monopolies or trusts," paying particular attention to the conditions inevitable at the close of the present European war, with a view to insuring the industrial independence of the United States.

[Applause on the Republican side.]

Mr. KITCHIN. Mr. Speaker, I make a point of order against that.

The SPEAKER. What is the point of order?

Mr. KITCHIN. That it is contrary to Rule XXI, section 3, and it is not germane to the subject matter or to any item in it.

The SPEAKER. The point of order is sustained.

Mr. MANN. Mr. Speaker, I respectfully appeal from the decision of the Chair.

The SPEAKER. The gentleman from Illinois [Mr. MANN] appeals from the decision of the Chair.

Mr. MANN. And on that I ask for the yeas and nays.

Mr. FITZGERALD. Mr. Speaker, I move to lay the appeal on the table.

Mr. GARDNER. Mr. Speaker, a parliamentary inquiry. May the gentleman from New York move to lay the appeal on the table after the yeas and nays are ordered?

Mr. FITZGERALD. They are not ordered yet.

The SPEAKER. Does the gentleman from Illinois renew the demand for the yeas and nays?

Mr. MANN. I ask for the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. The question is on the motion of the gentleman from New York [Mr. FITZGERALD] to lay on the table the appeal of the gentleman from Illinois [Mr. MANN] from the decision of the Chair. Those in favor of the motion will, when their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 199, nays 181, answered "present" 5, not voting 49, as follows:

YEAS—199.

Fairchild	Kahn	Porter	
Fields	Key, Ohio	Pou	
Graham	Lenroot	Powers	

So the motion to table the appeal was agreed to.

The Clerk announced the following additional pairs:

On the vote:

Mr. BLACK (for) with Mr. CAPSTICK (against).

Mr. SLAYDEN (for) with Mr. FAIRCHILD (against).

Mr. FIELDS (for) with Mr. GRAY of New Jersey (against).

Mr. BURGESS (for) with Mr. Moss of West Virginia (against).

Mr. NICHOLLS of South Carolina (for) with Mr. HUTCHINSON (against).

Mr. WILSON of Florida (for) with Mr. PORTER (against).

Mr. STEELE of Iowa (for) with Mr. MEEKER (against).

Mr. DOREMUS (for) with Mr. HOWELL (against).

Mr. GREGG (for) with Mr. STEENERSON (against).

Mr. HEFLIN (for) with Mr. GRAHAM (against).

Mr. SHACKLEFORD (for) with Mr. DYER (against).

Until further notice:

Mr. MURRAY with Mr. NORTH.

Mr. BARNHART with Mr. HUSTED.

Mr. LANGLEY. Mr. Speaker, I voted "no," but I am paired with my colleague Mr. CANTRILL. I desire to withdraw my vote and answer "present."

The SPEAKER pro tempore (Mr. CRISP). The Clerk will call the gentleman's name.

The Clerk called the name of Mr. LANGLEY, and he answered "Present."

The result of the vote was announced as above recorded.

The announcement of the result was greeted with applause on the Democratic side.

The SPEAKER. The question is on the passage of the bill.

Mr. MANN. Mr. Speaker, I demand the yeas and nays.

Mr. KITCHIN. Yeas and nays, Mr. Speaker.

Mr. CULLOP. I demand the yeas and nays.

The SPEAKER. The gentleman from North Carolina [Mr. KITCHIN] and the gentleman from Illinois [Mr. MANN] and the gentleman from Indiana [Mr. CULLOP] demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and there were—yeas 238, nays 142, answering "present" 4, not voting 50, as follows:

YEAS—238.

Abercrombie	Aswell	Browne	Caldwell
Adair	Ayres	Bruckner	Candler, Miss.

Driscoll	Howell	Nicholls, S. C.	Steele, Iowa
Eagle	Husted	North	Tilson
Edwards	Hutchinson	Oglesby	Wilson, Fla.
Fairchild	Kahn	Peters	Woods, Iowa
Fields	Key, Ohio	Porter	
Graham	Lenroot	Pou	

So the bill was passed.

During the roll call,

Mr. MOORES of Indiana (when his name was called). Mr. Speaker, I ask to be excused from voting, and I have a right after the roll call to state my reasons.

A MEMBER. I object.

The SPEAKER pro tempore (Mr. FITZGERALD). The gentleman can not interrupt the roll call. He will either answer to his name or keep silent.

The Clerk completed the first calling of the roll.

The SPEAKER pro tempore. The Clerk will call the names of Members failing to respond on the first roll call.

Mr. MOORES of Indiana (when his name was called on the second roll call). Mr. Speaker, if there is objection to my request to be excused, I will vote "nay."

The Clerk resumed and completed the calling of the roll.

The Clerk announced the following additional pairs:

For the session:

Mr. DEWALT with Mr. MCFADDEN.

Until further notice:

Mr. MURRAY with Mr. PORTER.

Mr. POU with Mr. DALE of Vermont.

Mr. FIELDS with Mr. MILLER of Pennsylvania.

On this vote:

Mr. WILSON of Florida (for bill) with Mr. HUSTED (against).

Mr. SHACKLEFORD (for bill) with Mr. DYER (against).

Mr. HEFLIN (for bill) with Mr. GRAHAM (against).

Mr. DOREMUS (for bill) with Mr. HOWELL (against).

Mr. STEELE of Iowa (for bill) with Mr. MEEKER (against).

Mr. NICHOLLS of South Carolina (for bill) with Mr. HUTCHINSON (against).

Mr. BURGESS (for bill) with Mr. Moss of West Virginia (against).

Mr. HART (for bill) with Mr. GRAY of New Jersey (against).

Mr. SLAYDEN (for bill) with Mr. FAIRCHILD (against).

Mr. BLACK (for bill) with Mr. CAPSTICK (against).

Mr. DEWALT. Mr. Speaker, I voted "aye." I am paired with the gentleman from Pennsylvania, Mr. MCFADDEN, and I wish to withdraw my vote and answer "present."

Mr. LANGLEY. Mr. Speaker, I voted against the bill; but I am paired with my colleague Mr. CANTRILL. I wish to withdraw that vote and answer "present."

Mr. MOORES of Indiana. Mr. Speaker, I ask to be excused from voting on this proposition for the reason that I own five or six thousand dollars' interest in dyestuffs. I have voted "no," but I would like to be excused.

The SPEAKER. If that rule should prevail, there would be no vote in the House, for every Member is more or less interested in the result of the bill. The gentleman from Indiana asks to be excused. Is there objection?

Mr. RAINEY. Reserving the right to object, what was the ground of the request?

The SPEAKER. The request of the gentleman from Indiana is to be excused from voting because he owns an interest in dyestuffs to the amount of five or six thousand dollars.

Mr. MANN. Every honest man in this House pays an income tax under the law.

The SPEAKER. He pays it not because he is honest, but because the Sergeant at Arms takes it out of his salary. [Laughter.] The gentleman from Indiana asks to be excused from voting. Is there objection?

Mr. RAINEY. I have no objection to the gentleman withdrawing his vote and answering "present." I do not think a man ought to be excused from voting for the reason stated. Every Member in this body has exactly the same reason.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none; the gentleman's vote is withdrawn and he is excused. The Chair does not want this off-hand decision taken as a precedent. The Chair investigated the matter once, but he has forgotten what the conclusion was.

Mr. GARRETT. Mr. Speaker, the gentleman from Indiana is exercising a constitutional right.

Mr. MANN. I ask for the regular order; that matter has been disposed of.

The SPEAKER. The Chair recalls this although he does not know where to put his hand on it. One time the House undertook to make John Quincy Adams vote. He wrangled with them for two or three weeks, introduced resolutions, but they never did make him vote. That is the reverse side of this question.

The result of the vote was then announced as above recorded.

On motion of Mr. KITCHIN, a motion to reconsider the vote whereby the bill was passed was laid on the table.

LEAVE OF ABSENCE.

Mr. CAPSTICK, by unanimous consent, was given leave of absence for 10 days, on account of illness.

LEAVE TO ADDRESS THE HOUSE.

Mr. BYRNS of Tennessee. Mr. Speaker, I ask unanimous consent that I may be permitted to address the House for 30 minutes to-morrow morning immediately after the reading of the Journal.

Mr. MANN. I understand the gentleman has a matter of personal privilege, but he makes this request for unanimous consent.

Mr. BYRNS of Tennessee. Not a matter of personal privilege, but more in the nature of a House privilege.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that to-morrow, immediately after the reading of the Journal and the clearing up of business on the Speaker's table, he may address the House for 30 minutes. Is there objection?

There was no objection.

VOTING DEVICE.

Mr. LLOYD. Mr. Speaker, I wish to present a report (No. 940) on House resolution 223, known as the voting device, and I ask unanimous consent that the minority may have leave to file minority views at once.

Mr. FITZGERALD. Mr. Speaker, I reserve all points of order.

The SPEAKER. Who is the minority?

Mr. LLOYD. Mr. MILLER of Delaware represents the minority.

Mr. MANN. Give him until to-morrow.

Mr. LLOYD. Mr. Speaker, I also ask in that connection, at the instance of the minority, that the views be printed separately.

The SPEAKER. The gentleman from Missouri asks unanimous consent, at the instance of the minority, that the views be printed separately. Is there objection? [After a pause.] The Chair hears none. When will the gentleman from Delaware file them?

Mr. MILLER of Delaware. I am going to file them to-night, Mr. Speaker.

The SPEAKER. Well, it will go on the House Calendar.

ENROLLED BILLS SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolution of the following titles, when the Speaker signed the same:

H. R. 16287. An act granting the consent of Congress to the county of Sumter, or to the county of Dooly, both of the State of Georgia, acting jointly or separately, and their successors and assigns to construct a bridge across the Flint River;

H. R. 16641. An act granting the consent of Congress to Julian B. McCurry, A. G. McCurry, P. W. Walton, and J. J. Fretwell to construct a bridge across the Savannah River; and

H. J. Res. 257. Joint resolution permitting the use of certain hospital facilities belonging to the United States.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 3673. An act to establish a term of the United States circuit court of appeals at Asheville, N. C.;

H. R. 8351. An act to accept a deed of gift or conveyance from the Lincoln Farm Association, a corporation, to the United States of America of land near the town of Hodgenville, county of Larue, State of Kentucky, embracing the homestead of Abraham Lincoln and the log cabin in which he was born, together with the memorial hall inclosing the same; and further, to accept an assignment or transfer of an endowment fund of $50,000 in relation thereto; and

H. R. 11878. An act to amend section 99 of the act to codify, revise, and amend the laws relating to the judiciary.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

Mr. CONRY. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. MANN. Mr. Speaker, I ask for the regular order.

The SPEAKER. The regular order is the motion to adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 3 minutes p. m.) the House adjourned to meet to-morrow, Tuesday, July 11, 1916, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of South Bristol Harbor, Me. (H. Doc. No. 1278), was taken from the Speaker's table, referred to the Committee on Rivers and Harbors, and ordered to be printed with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and a joint resolution were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. CURRY, from the Committee on the Merchant Marine and Fisheries, to which was referred the bill (H. R. 8816) authorizing the Commissioner of Navigation to cause the sailing vessel *Golden Gate* to be registered as a vessel of the United States, reported the same with amendment, accompanied by a report (No. 936), which said bill and report were referred to the House Calendar.

Mr. LENROOT, from the Committee on the Public Lands, to which was referred the bill (H. R. 8844) for the relief of H. B. Rogers, reported the same with amendment, accompanied by a report (No. 937), which said bill and report were referred to the Private Calendar.

Mr. COLEMAN, from the Committee on Mines and Mining, to which was referred the joint resolution (H. J. Res. 256) to authorize the Secretary of the Treasury to accept from the city of Pittsburgh certain lands in exchange for other lands of equal area, reported the same without amendment, accompanied by a report (No. 939), which said joint resolution and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII.

Mr. MAYS, from the Committee on the Public Lands, to which was referred the bill (H. R. 11860) for the relief of Halvor Nilsen, reported the same without amendment, accompanied by a report (No. 938), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. HULL of Iowa: A bill (H. R. 16889) authorizing the Secretary of War to donate condemned cannon and balls; to the Committee on Military Affairs.

By Mr. STEENERSON: A bill (H. R. 16890) granting the consent of Congress to the village of Climax and Vineland Township, Polk County, Minn., and Traill County, N. Dak., to construct a bridge across the Red River of the North on the boundary line between said States; to the Committee on Interstate and Foreign Commerce.

By Mr. HELGESEN: A bill (H. R. 16891) granting the consent of Congress to Traill County, N. Dak., and to Polk County, Minn., to construct a bridge across the Red River of the North; to the Committee on Interstate and Foreign Commerce.

By Mr. LIEBEL: A bill (H. R. 16892) to appropriate funds for the erection of an addition to the present post-office building in the city of Erie, Pa.; to the Committee on Appropriations.

By Mr. RIORDAN: A bill (H. R. 16893) to prohibit the use of harbors, rivers, canals, etc., owned, operated, or maintained by the United States, to vessels for the transportation of waste material collected from cities contiguous thereto; to the Committee on Rivers and Harbors.

By Mr. MOORE of Pennsylvania: Resolution (H. Res. 298) directing the Secretary of the Treasury to inform the House of Representatives as to the relations of the Director of the Mint to the Democratic national campaign committee and as to the compensation paid to said director; to the Committee on Expenditures in the Treasury Department.

By Mr. ROGERS: Resolution (H. Res. 299) calling upon the Secretary of the Treasury for information concerning exportations to Mexico; to the Committee on Interstate and Foreign Commerce.

By Mr. CALDWELL: Joint resolution (H. J. Res. 258) authorizing the President to appoint a commission to conduct negotiations concerning the purchase of certain portions of northern Mexico; to the Committee on Foreign Affairs.

By Mr. KETTNER: Joint resolution (H. J. Res. 259) authorizing and directing the Interstate Commerce Commission to ascertain the cost to the Southern Pacific Co., and the amounts expended by it, at the request of President Roosevelt, and under stress of great emergency, in closing and controlling the break in the Colorado River and preventing the overflow and destruction of the Imperial Valley, in southern California, as well as saving to the Government the Laguna Dam and the irrigation project connected therewith in Arizona; to the Committee on Claims.

By Mr. COX: Joint resolution (H. J. Res. 260) appropriating $500,000 for the purpose of combating infantile paralysis; to the Committee on Appropriations.

By Mr. GRIFFIN: Joint resolution (H. J. Res. 261) directing that the sum of $100,000 be appropriated to the United States Public Health Service for the investigation, treatment, and eradication of infantile paralysis; to the Committee on Appropriations.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BOWERS: A bill (H. R. 16894) granting a pension to M. M. Sayers; to the Committee on Invalid Pensions.

By Mr. CRISP: A bill (H. R. 16895) for the relief of Mrs. Gertrude Harper; to the Committee on Claims.

By Mr. DOOLITTLE: A bill (H. R. 16896) for the relief of James R. Gristy; to the Committee on Military Affairs.

By Mr. EMERSON: A bill (H. R. 16897) granting an increase of pension to Robert W. Irvine; to the Committee on Pensions.

By Mr. FOSTER: A bill (H. R. 16898) granting an increase of pension to Pitzer Ingram; to the Committee on Invalid Pensions.

By Mr. HOLLINGSWORTH: A bill (H. R. 16899) granting an increase of pension to Storer Packer; to the Committee on Invalid Pensions.

By Mr. KEARNS: A bill (H. R. 16900) granting a pension to Robert E. Boggs; to the Committee on Invalid Pensions.

By Mr. LIEBEL: A bill (H. R. 16901) granting a pension to Mary J. Ensign; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16902) granting an increase of pension to Gertrude W. Brown; to the Committee on Invalid Pensions.

By Mr. MOON: A bill (H. R. 16903) to remove the charge of desertion from the name of William H. Travis; to the Committee on Military Affairs.

By Mr. OVERMYER: A bill (H. R. 16904) granting an increase of pension to Vinel E. McCreary; to the Committee on Invalid Pensions.

By Mr. SANFORD: A bill (H. R. 16905) granting an increase of pension to Henry Garvey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16906) granting an increase of pension to Lawrence O'Toole; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16907) granting an increase of pension to Martin Lockwood; to the Committee on Invalid Pensions.

By Mr. TAGGART: A bill (H. R. 16908) granting an increase of pension to John S. Albright; to the Committee on Invalid Pensions.

By Mr. WATSON of Pennsylvania: A bill (H. R. 16909) granting an increase of pension to George W. Pierson; to the Committee on Invalid Pensions.

By Mr. WINSLOW: A bill (H. R. 16910) to correct the military record of Edward Maher; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of Illinois Branch, Congressional Union for Woman Suffrage, in re Susan B. Anthony amendment; to the Committee on the Judiciary.

By Mr. DALE of New York: Memorial of 11,000 members of the Department of New York, Woman's Relief Corps, Grand Army of the Republic of the United States, relative to increase in widows' pensions; to the Committee on Invalid Pensions.

Also, petition of Mrs. Mary C. Walker, of Denver, Colo., favoring woman-suffrage amendment; to the Committee on the Judiciary.

Also, petition of A. M. Hayes, Long Island City, N. Y., against passage of the Borland resolution; to the Committee on Labor.

By Mr. DAVIS of Texas: Petition of J. W. Young, Galveston, Tex., against passage of Senate bill 6239; to the Committee on the Merchant Marine and Fisheries.

By Mr. FLYNN: Petition of 11,000 members of the Department of New York, Woman's Relief Corps, relative to increase in widows' pensions; to the Committee on Invalid Pensions.

By Mr. GRAHAM: Petition of citizens of Philadelphia, Pa., favoring a Christian amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. HAMILTON of Michigan: Petition of citizens of Bangor, Mich., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. IGOE: Petition of E. F. Caldwell, Burlington Junction, Mo., against passage of House bill 16307, relative to register for pure-bred stock; to the Committee on Agriculture.

Also, petitions of Merchants' Exchange of St. Louis and Third National Bank of St. Louis, Mo., relative to amendments to bill-of-lading bill; to the Committee on Interstate and Foreign Commerce.

By Mr. KENNEDY of Rhode Island: Petitions of Ava C. Mishner, Emily B. Ellis, Annie O. Heath, of Providence, and Mrs. James H. Rickard, of Woonsocket, R. I., favoring woman-suffrage amendment; to the Committee on the Judiciary.

Also, petition of Providence (R. I.) Chamber of Commerce, favoring aero coast patrol system in connection with Naval Militia; to the Committee on Naval Affairs.

By Mr. LIEBEL: Papers to accompany House bill for relief of Gertrude W. Brown; to the Committee on Invalid Pensions.

Also, papers to accompany House bill for relief of Mary J. Ensign; to the Committee on Invalid Pensions.

By Mr. MILLER of Minnesota: Petition and protest against proposed change in banking law, permitting national banks to establish branches; to the Committee on Banking and Currency.

By Mr. SCULLY: Petition of National Association of Woolen and Worsted Overseers, Clinton, Mass., favoring a protective tariff; to the Committee on Ways and Means.

Also, petition of Business Men's Association, Plainfield, N. J., favoring bill relative to leave for aged employees of the Postal Service;; to the Committee on the Post Office and Post Roads.

Also, petition of Society of the Chagres, relative to compensation for employees of Panama Canal; to the Committee on Appropriations.

By Mr. SMITH of Michigan; Papers to accompany House bill 15798, in pension case of Sidney W. Davy; to the Committee on Invalid Pensions.

By Mr. VAN DYKE: Memorial of Minnesota Bankers' Association by H. Von Der Veyer, president, in re House bill 16763; to the Committee on Banking and Currency.

Also, memorial of Minnesota Bankers' Association, opposing continuation bankers special tax and increase in corporation income tax in revenue bill; to the Committee on Ways and Means.

SENATE.

TUESDAY, *July 11, 1916.*

(Legislative day of Friday July 7, 1916.)

The Senate reassembled at 11 o'clock and 30 minutes a. m., on the expiration of the recess.

Mr. LEWIS. Mr. President, will the Senator in charge of the Agricultural appropriation bill yield to me for a couple of minutes out of order?

Mr. SMITH of South Carolina. When we recessed yesterday afternoon the Senator from Iowa [Mr. CUMMINS] had the floor. I see that he is present, and he has the floor.

RAILROAD LANDS IN OREGON.

The VICE PRESIDENT. Out of order the Chair lays before the Senate a communication signed by sundry citizens of the United States, notifying the Senate that an act approved June 9, 1916, is unconstitutional. It will be printed in the RECORD.

The communication was referred to the Committee on Public Lands and ordered to be printed in the RECORD, as follows:

To the UNITED STATES OF AMERICA;
To the CONGRESS OF THE UNITED STATES;
To the Hon. WOODROW WILSON, *President of the United States;*
To the Hon. FRANKLIN K. LANE, *Secretary of the Interior of the United States;*
To the Hon. DAVID F. HOUSTON, *Secretary of Agriculture of the United States;*
To the Hon. JOHN BURKE, *Treasurer of the United States;* and
To the honorable the ATTORNEY GENERAL OF THE UNITED STATES:

You are hereby respectfully notified that each of the undersigned claims and asserts that that certain act of Congress, approved June 9, 1916, and entitled "An act to alter and amend an act entitled 'An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon,' approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled 'An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon,' approved May 4, 1870, and for other purposes," is a violation of the property rights of the Oregon & California Railroad Co. and of the rights of each of the undersigned; that the Congress of the United States had no power or authority to pass said act or any part thereof, or any act which assumes to have the effect of revesting or vesting in the United States without the consent of said Oregon & California Railroad Co. the title to the lands or property of said company, or any part thereof, or to any money arising out of its grant lands, and that said act as a whole is, and that all its provisions are, unconstitutional, null, and void.

You are further notified that the undersigned do not and that any of them does not in anywise assent to or acquiesce in the provisions of said act of June 9, 1916, or any provision thereof.

The undersigned protest and each of them protests against the United States making or asserting any claim of title or ownership in or to any of the lands, the title to which is, by section 1 of said act, declared to be revested in the United States or in or to any of the money arising out of said grant lands, the title to which is declared by section 8 of said act to be vested in the United States, or against its interfering with the possession of said lands by the Oregon & California Railroad Co., and against any step, action, or proceeding of any kind being taken by any officers or officer or agent of the Government in furtherance or pursuance of said act or for the purpose of carrying out its provisions.

The undersigned are not, and any of them is not, willing that the Government should pay, on behalf of the Oregon & California Railroad Co., any taxes on the lands which are declared by section 1 of said act to be revested in the United States; and they protest, and each of them protests, against the Treasurer of the United States making any payment of the taxes on said lands as prescribed in said act, or any part of said taxes, and against the Secretary of the Interior ordering the payment of said taxes or any part thereof.

And you are further notified that any payment of such taxes or ordering of the payment of the same by the respective officers mentioned will be made upon their own responsibility and at their peril and that of the United States.

Dated June 30, 1916.

[SEAL.] OREGON & CALIFORNIA RAILROAD CO.,
By W. SPROULE, *President*
G. S. KING, *Assistant Secretary.*

[SEAL.] SOUTHERN PACIFIC CO.,
By W. SPROULE, *President.*
G. S. KING, *Assistant Secretary.*
STEPHEN T. GAGE,
Individually and as Trustee.

[SEAL.] UNION TRUST CO. OF NEW YORK,
Individually and as Trustee.
By CARROLL C. RAWLINGS, *Vice President.*

Attest:
O. W. HARTSHORNE,
Assistant Secretary.

CALLING OF THE ROLL.

Mr. CUMMINS rose.

Mr. KENYON. Mr. President——

The VICE PRESIDENT. Does the Senator from Illinois yield to the Senator from Iowa?

Mr. KENYON. I wanted to suggest the absence of a quorum; that is all.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gallinger	Norris	Smoot
Beckham	Gronna	Overman	Sterling
Brady	Hitchcock	Owen	Swanson
Brandegee	Hughes	Pittman	Thomas
Bryan	James	Poindexter	Tillman
Catron	Johnson, S. Dak.	Pomerene	Townsend
Chamberlain	Kenyon	Ransdell	Underwood
Clapp	Kern	Saulsbury	Vardaman
Clark, Wyo.	La Follette	Shafroth	Wadsworth
Colt	Lane	Sheppard	Walsh
Culberson	Lee, Md.	Sherman	Warren
Cummins	Lewis	Simmons	Works
Curtis	McCumber	Smith, Ariz.	
du Pont	Martine, N. J.	Smith, Ga.	
Fletcher	Nelson	Smith, S. C.	

Mr. KERN. I wish to announce the unavoidable absence of my colleague [Mr. TAGGART]. He is paired with the Senator from Vermont [Mr. PAGE].

The VICE PRESIDENT. Fifty-seven Senators have answered the roll call. There is a quorum present. The Senator from Illinois.

RUSSIA-JAPAN TREATY.

Mr. LEWIS. Mr. President, by the courtesy of the Senator from Iowa [Mr. CUMMINS], I interrupt the proceedings on the Agricultural appropriation bill to tender a resolution, and I ask to have it read. I also desire to be heard for a moment, and then I wish to submit a motion to the Senate which may call for unanimous consent.

The VICE PRESIDENT. The resolution submitted by the Senator from Illinois will be read.

The Secretary read the resolution, as follows:

Resolved, That the Secretary of State of the United States of America be requested to obtain information and report the same to the United States Senate as to what will be the effect of the new contract between Japan and Russia known as the Russia-Japan treaty, executed in the first week of July, upon the trade arrangements, trade contracts, trade treaties now existing or under consideration, or commercial opportunities of the United States in Japan, China, and Russia.

Mr. LEWIS. Mr. President, this matter, as suggested in this resolution, has been in my mind for some time, but, understanding that the Committee on Foreign Relations had a cognate subject under consideration, I preferred, out of deference to that committee, to wait for such disposition as the committee should make of the subject. Yesterday morning, however, an incidental matter relating to the subject was referred to by the chairman of the Committee on Foreign Relations [Mr. STONE] and the Senator from Massachusetts [Mr. LODGE], the ranking member of the minority of that same committee. I was attracted by the fact that the observations of those eminent Senators were

confined wholly to the effect of tariff arrangements between France and England and the United States; that is, as to the effect that those relations would have upon the United States. There was a complete omission as to anything touching the effect upon the people and interests of the United States of the compact which we now know has been entered into between Japan and Russia.

Mr. President, twice in this body I have had the boldness to prophesy this event. In my speech upon the Panama tolls bill I took the liberty to state to the Senate that I thought I saw a coming disposition on the part of these nations by arrangement to eliminate the United States from the oriental sphere.

Later, in discussing the Philippine bill and the amendment of the Senator from Arkansas [Mr. CLARKE], I then alluded again to what I saw would ultimately transpire; and stated that, among the reasons to be given, would be that we were excluding these people from our sphere, and that they therefore had the right to exclude both ourselves and our goods from theirs; that Japan and her allies would assume to establish an Asiatic Monroe doctrine, excluding the Western Hemisphere from the affairs of Asia.

Now, Mr. President, my attention is particularly directed to the words of that compact if correctly reported. When in London, having the honor to represent this body at the Safety at Sea Conference, I was attracted by the first publication of the then tentative agreement between England and Japan. That tentative treaty contained a provision of offensive and defensive against the United States, as well as against other nations of the world. That threatening provision was subsequently eliminated. I observe, however, that the very provisions which were eliminated in the Japanese and English treaty, as it was at first proposed, are now in effect comprehended in the proposed compact between Russia and Japan as against the United States.

Mr. President, I am not, of course, complaining that these countries have not a right to make any contract they please; but I take the liberty of inviting the attention of this honorable body to this thought which is in my mind: I think I clearly see the purpose on the part of these nations to duplicate Cæsar's observation as to Gaul—dividing the world into three parts. First, it is comprehended that France and England shall control all Europe. Second, that Russia and Japan shall control all Asia, bringing in China as an incident, something akin to the relation that South America occupies to the Western Hemisphere, and to leave to the United States the control of the Western Hemisphere—North America and South America—if it can, for business uses and governmental purposes, and here limit, restrict, and confine us.

Mr. President, it seems to me that if the United States sits silently and allows these contracts to be entered into without any assertion on our part of what we believe to be our rights of trade and the rights of our people in the territory of Asia, Asia will have a right in equity to say that, as we sat silent and made no protest, it was equivalent to a tacit consent; and that after these contracts have been consummated it does not lie well in our mouth then to raise objection and to produce confusion, calling for the undoing of that which has been consummated. Japan and Russia will invoke their new European allies as their aid against us.

Mr. President, we may go out of the Philippines; we may not. We may go out within 10 years; we may not go out within this generation. What I wish to accent to the distinguished Senators sitting around me is this: That as long as we are in the Orient we are a part of that oriental civilization to some extent, and any arrangement that looks to the exclusion of the United States in the enjoyment of full and complete trade relations in Asia, or of citizenship in common with Europeans, should attract our attention, and before they are finally consummated the United States of America should make its interests known and assert the needs of its welfare. Upon this our country could make its demands.

That these provisions of these Asiatic compacts are clearly addressed in retaliation for our excluding the Asiatics from our sphere, I have not a doubt; and that they have an equity in their behalf on this point from the standpoint of the Asiatic I do not dispute; but I respectfully urge at this time that it is well for the Senate to be informed as to how far these new arrangements will go in effect and purpose to repeal and abrogate any arrangements which have been made heretofore under previous administrations, and the present one which authorize the United States to enjoy certain trade privileges in the Orient and certain reciprocal privileges respecting our citizens, our finance, and our Government. For that reason I have tendered the resolution asking that the Secretary of State inform this body, after investigation, what effect this new arrangement will have upon the present existing contracts or arrangements touching the United States and its commercial welfare and the status our people will have as a result.

Mr. President, I would therefore ask to have the resolution passed and ask unanimous consent of the body that it be passed this morning.

Mr. SMITH of Arizona. I move, Mr. President, that the resolution be referred to the Committee on Foreign Relations.

Mr. SMITH of Georgia. Mr. President, I do not understand that unanimous consent has been given to present the resolution. I ask for the regular order. I do not understand that the unfinished business has been laid aside.

Mr. LEWIS. Mr. President, permit me to say that I would not ask that the resolution be passed instanter—if, as I was about to continue when interrupted—Senators representing the Foreign Relations Committee feel that it contains matters which they consider should more appropriately be sent to that committee for consideration. To their view I would yield, of course. I had asked permission—the Senator from Georgia probably did not hear me—to tender the resolution out of order, and asked the Senator from Iowa [Mr. CUMMINS] if he would yield, as I did not wish to interfere with the discussion of the Agricultural appropriation bill. The Senator from Iowa yielded. I did not understand there was any objection or I would not have proceeded at this moment.

The VICE PRESIDENT. The Chair understood the Senator from Illinois to state that he tendered the resolution out of order and would subsequently ask unanimous consent for its consideration. That was the understanding of the Chair.

Mr. LEWIS. The Chair is correct; and I asked for that unless the members of the Foreign Relations Committee felt that in propriety, or for reasons satisfactory to them, it should be sent to the Foreign Relations Committee.

Mr. SMITH of Arizona. If unanimous consent for the introduction of the resolution is granted out of order——

Mr. SMITH of Georgia. It has not been.

Mr. SMITH of Arizona. Then, as I am a member of that committee, I ask its reference to the committee.

Mr. SMITH of Georgia. I object to the unanimous consent, and I object to laying aside the regular business, Mr. President; and I do not understand that that subject has been submitted to the Senate at all. The Senator from Illinois stated what he intended to do. He had a right to speak even though the Agricultural appropriation bill was before the Senate. We could not prevent any Senator from indulging in any line of discussion that he desired. I object to any suspension of the consideration of the unfinished business, and I ask for the regular order.

The VICE PRESIDENT. The Senator from Georgia objects to the resolution going to the Committee on Foreign Relations?

Mr. SMITH of Georgia. I object to its being introduced. It has not been introduced, Mr. President.

The VICE PRESIDENT. Very well; then the regular order is before the Senate.

Mr. LEWIS. Mr. President, a parliamentary inquiry. Do I understand that the call for the regular order while the Agricultural bill is pending prevents the introduction of the resolution?

The VICE PRESIDENT. We are now on the unfinished business. There is no morning hour. No Senator has a right to introduce anything except by unanimous consent, and the Senator from Georgia objects to granting unanimous consent.

Mr. LEWIS. Of course, with that understanding, I am powerless against the objection. I shall revive the question at an early day.

The VICE PRESIDENT. The Chair is likewise powerless to grant the request. The Senator from Iowa is entitled to the floor.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED.

The VICE PRESIDENT announced his signature to the following enrolled bills and joint resolution, which had previously been signed by the Speaker of the House of Representatives:

H. H. 16287. An act granting the consent of Congress to the county of Sumter, or to the county of Dooly, both of the State of Georgia, acting jointly or separately, and their successors and assigns, to construct a bridge across the Flint River;

H. R. 16641. An act granting the consent of Congress to Julian B. McCurry, A. G. McCurry, P. W. Walton, and J. J. Fretwell to construct a bridge across the Savannah River; and

H. J. Res. 257. Joint resolution permitting the use of certain hospital facilities belonging to the United States.

AGRICULTURAL DEPARTMENT APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12717) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes.

Mr. CUMMINS. Mr. President, I repeat and emphasize what I said yesterday in this respect. I am not discussing this bill from a hostile point of view—that is, I am not opposed to the principle of the bill, the object sought to be accomplished. I am, however, insisting that the measure now before us will not accomplish the desired purpose, and that it will do vastly more harm than good. Especially will it injure that very large class of our citizens, the farmers, who are the objects of special solicitude in the bill.

I had pointed out before I yielded the floor yesterday the course of business in my own State, and I am taking that as a fair example of the grain States. I had suggested that a very large proportion of the grain, especially corn, sold by our farmers, was sold to middlemen at varying times during the growth of the crop and after it had matured. It was stated by the Senator from Colorado that the sale by the farmer to the middleman under the circumstances I have suggested would not be embraced within the terms of this bill. I concur with his opinion in that respect, and that without regard to whether there is or is not an inspector appointed at the place of delivery—that is, at the place at which the farmer delivers the grain to the elevator man or the grain buyer.

I repeat my conclusion, therefore, that this bill does not safeguard at all the farmer's interests. He sells his grain upon grade, but it is a grade fixed by the buyer in the local market or agreed upon, if you please, between the buyer and the farmer, and it matters not what may happen to that grain thereafter; the contract between the farmer and the grain buyer is not affected or disturbed. Whether the grade of the grain in the terminal market to which it may eventually be shipped is raised or lowered the farmer in the one case does not receive the advantage nor, in the other case, must he bear the disadvantage of a reduction in the grade of his grain.

I am thoroughly in favor of a system of inspection, and inasmuch as there are so many States without an adequate law in this respect I have inclined toward a Federal system of inspection; but this system is without beginning or end. It is crude. It is imperfect. It will be unsatisfactory in its operation, and the Senate has no right to impose upon the people of this country, in order to attain a desired object, a bill which is so full of imperfections as this one. I am not impeaching, of course, the care of the Senate committee, because the committee, as I understand, had very little to do with the preparation of this particular part of the bill.

Mr. SMITH of Georgia. Mr. President, I want to say to the Senator, if he will permit me, as one member of the committee, that I did not think myself that we would be capable of preparing a bill along that line. Our earnest desire was that the Senators from the grain States, who were considered masters on the subject, should work it out, and those of us who were not familiar with the grain trade wanted to cooperate with them to help them get what they thought would really serve their people. I do not pretend to be master of it.

Mr. CUMMINS. I am sure that is the desire and has been the purpose of the Senator from Georgia.

Mr. SMITH of Georgia. The Senator's colleague [Mr. KENYON] is on the Agricultural Committee, and the Senator from North Dakota [Mr. GRONNA] is on it, and the Senator from Colorado [Mr. SHAFROTH], and the Senator from Nebraska [Mr. NORRIS].

Mr. CUMMINS. Mr. President, I think the difficulty has arisen because the committee surrendered the idea of presenting a system of Federal inspection, thinking that it would not be accepted by Congress, and in order to take some step in the direction it adopted this particular bill, the defects of which and the shortcomings of which I am attempting to point out.

I now ask Senators to take with me the next step in the progress of the corn that I have used as an illustration. I will ask you to imagine that you are with the grain buyer when he purchases the grain from the farmer. You will remember we have already agreed, many of us at least, that the transaction between the grain buyer and the farmer is not affected by this law, and that neither of the parties can derive any advantage whatsoever from the terms of the law.

What does the buyer then do? If he is not a speculator, he does this: If he has bought a thousand bushels of grain from the farmer to be delivered at a certain time at his warehouse or elevator in the small town, which I have imagined, he immediately sells upon the Chicago Board of Trade a thousand bushels of corn of the same grade—that is, the grade the farmer has agreed to deliver to him. That is the way in which he protects himself against fluctuations of the market.

Now, the transaction between the grain buyer and the Chicago Board of Trade, or some member of the Chicago Board of Trade, which consists in a sale of a thousand bushels, we will assume, of No. 2 corn for a certain delivery, involves the shipment of no grain at that time, and certainly involves the shipment of no grain from one State to another. His contract is made in Chicago.

Mr. CLARKE of Arkansas. Mr. President——

Mr. CUMMINS. In just a moment. His contract of sale in Chicago involves the delivery of a thousand bushels of corn—not the corn he bought from the farmer, but any corn which will answer the grade which he has agreed that it shall answer. I yield to the Senator.

Mr. CLARKE of Arkansas. If the Iowa farmer can sell on the Chicago Grain Exchange a thousand bushels of No. 2 corn, the person from whom he bought it could not deliver to him oats or potatoes or anything of that kind.

Mr. CUMMINS. He could not.

Mr. CLARKE of Arkansas. Then, it is not exactly like the cotton business.

Mr. CUMMINS. No; it is very different from the cotton business. We are not met with the difficulties which the cotton planter and the cotton dealer must meet. When our grain buyer sells upon the Chicago Board of Trade a thousand bushels of No. 2 corn he must deliver that quantity of corn which sustains that grade.

Now, how does he do it ordinarily? In three cases out of four when the contract matures he buys in upon the Chicago Board of Trade and in that way fulfills his contract of delivery. Now, I ask the Senator from Colorado or any other Senator who may be interested in this subject whether, in his opinion, that transaction is affected in any way by this bill?

Mr. SMITH of South Carolina. Mr. President, the contemplation of this bill, I think, meets the point the Senator has raised. It is the contemplation of the bill that certain uniform standards of grain shall be established by the Agricultural Department and promulgated. That is my idea; so that the transaction is covered which the Senator referred to as between the buyer and the farmer. When he buys from that farmer after you have promulgated your standard he buys No. 2 corn. It is so stated in his purchase from the farmer. The farmer requires it. The corn is delivered to him. Now, if the farmer for any reason believes that his corn is above or below that or if the buyer believes that it is above or below it, you have a court of appeals to which a sample of this corn may be taken.

Mr. CUMMINS. There is nothing of that sort in this bill.

Mr. SMITH of South Carolina. I was just reading an amendment here, and it was my idea that that would answer the objection of the Senator from Iowa if the bill could be so amended as to make that provision.

Mr. CUMMINS. I reserve my judgment with reference to that when the bill is so amended. I only say at this time, even with the amendment offered by the Senator from North Dakota, there is no appeal, there is no inspection, there is no inspector authorized to do the work in the grading of grains in the transaction between the farmer and a grain buyer, and consequently it depends entirely upon the agreement between the two.

Mr. McCUMBER. Mr. President——

Mr. CUMMINS. I yield to the Senator from North Dakota.

Mr. McCUMBER. As I understand the Senator, the proposition which he makes is not a sale in interstate trade at all; it is purchasing upon the board of trade in Chicago. It does not imply the shipment of any grain except as he may ship it himself afterwards, and therefore it would not be a case of interstate grain trade.

Mr. CUMMINS. That depends, of course, upon whether the Senator from North Dakota is referring to the suggestion of the Senator from South Carolina or to my inquiry put to the Senator from Colorado in regard to the Chicago Board of Trade.

Mr. McCUMBER. I was referring to the inquiry made by the Senator from Iowa, and I say that in that case it involves no shipment at all.

Mr. CUMMINS. The Senator from North Dakota is quite right about that. The transaction I have mentioned does not fall within the terms of the bill. While it is an interstate transaction that, in my opinion, could be regulated by law under our power to regulate commerce among the States, yet it is not affected by this bill, because, as the Senator from North Dakota has just stated, the bill involves the shipment or the offer for shipment of grain to be transported from one State to another.

I therefore answer the Senator's question in the way he has already suggested. So far I assume I am right, because my position is not challenged.

Then we have another transaction in the course of the sale of grain that is not regulated by this bill, and neither party to

the transaction is protected by the bill against any infirmities that may be in the transaction.

Now, I come to the next transaction. Some time, possibly at the date of the contract or the date upon which he has agreed to deliver the grain in Chicago, the grain buyer does ship the thousand bushels of corn which he has bought from the farmer. He either ships it in fulfillment of the contract of sale or he ships it upon consignment for sale.

That transaction is covered by the bill, and the thousand of bushels of corn which he ships must be inspected under the terms of the bill.

Mr. McCUMBER. Mr. President, may I call the Senator's attention right there to the amendment on page 5 of the reprint, which, I think, avoids the necessity for inspection. It reads as follows:

And provided further, That in any State where there has not been established, either by the laws of the State or by the rules and regulations of any commercial exchange, a system of grain inspection—

Like there is not, I presume, in Iowa or North Dakota—

this act shall not apply so far as it relates to the shipment or delivery of grain entering into interstate or foreign commerce, but such grain shall be inspected at the terminal point if shipped to a State having a system of inspection, and if shipped to a foreign country through a State having a system of inspection it shall be inspected at the most convenient point within such State.

Does not that cover that proposition?

Mr. CUMMINS. No; it does not, Mr. President, I think.

Mr. McCUMBER. It simply means that the shipper from Iowa or North Dakota can ship grain without its being inspected at the place of shipment.

Mr. CUMMINS. I have no doubt of that. That could have been done under the bill before the amendment was offered by the Senator from North Dakota. The bill very clearly provided for that contingency originally.

I come back to my proposition. When the grain buyer comes to ship the thousand bushels of grain to Chicago, we will assume the grain must be inspected. I am not now concerning myself with the point of inspection. It must be inspected, and in that respect the bill is good, for the grain ought to be inspected. But there is no improvement over the present method of inspection; that is to say, if there be no inspector at the point of origin—and I am discussing the bill now upon that hypothesis—the grain buyer must send his thousand bushels of corn to Chicago, and it is inspected there under the terms of this bill precisely as it is inspected now under the general system which prevails.

Mr. SHAFROTH. Mr. President——

Mr. CUMMINS. In just a moment. Now, the only benefit which the grain buyer can possibly derive in the inspection service that is here provided for is in the standardization of grain. I am thoroughly in favor of that, and in favor of the bill which provides for uniform grades of grain throughout the United States; but tell me what real practical advantage is conferred upon the grain buyer by the license which is issued by the Government to some one in Chicago authorizing him to inspect grain?

Mr. SHAFROTH. Mr. President, it seems to me the very fact that the inspector, although he may be a State inspector, has a license from the United States Government, evidently places him in closer touch with the United States Government and with the standards which the United States Government has established, and that together with the right of appeal which exists is a perfect protection it seems to me to the man who sends wheat to the Chicago market.

Mr. CUMMINS. I do not consider the right of appeal as of any value at all. The right of reinspection is of some value, and if the inspector into whose hands this grain finally falls were a United States official, not only clothed with the power of an officer of the law but burdened with a responsibility that follows an appointment by the Government, there would be very much in the argument of the Senator from Colorado. But I do not believe in power without responsibility; it is always abused, and the confused proposal contained in the bill can be described better than in any other way by declaring that it is giving power without attaching responsibility. What responsibility has the inspector in Chicago? He is selected, we will say, by the Chicago Board of Trade. I do not know what the law of Illinois is with respect to that subject, but they have some system there for the appointment of inspectors. We will assume that he is appointed by the Chicago Board of Trade. He is paid by the Chicago Board of Trade. He recognizes the Chicago Board of Trade as his superior. He is paid by salary or paid by fees, which are collected ultimately from the farmer who is actually excluded from all the benefits of the law.

Mr. NELSON. Will the Senator allow me?

Mr. CUMMINS. I yield.

Mr. NELSON. I am quite confident that Illinois has a system of State inspection under State law.

Mr. CUMMINS. I think that is quite probable, but this bill covers not only State authorities such as we have in Minnesota and possibly in Illinois, although I am not familiar with the law of Illinois, but it covers the fugitive authority of commercial associations and boards of trade and all other sources of employment.

I am opposed to this part of the bill simply because of what may be done under it. I can imagine that it could be administered so that no harm would flow from it; but, on the other hand, it can be administered so as to introduce into the present disordered system a great many faults that are not there now.

Now, so much for that particular transaction. I do not see any good which can be conferred upon the people engaged in this traffic that is the equivalent for the chaos that will ensue in trying to mingle State agents with Federal agents with a divided authority. I can not see the equivalent of $250,000 which you propose to pay out in order to introduce the system. Why not come fairly and squarely to the issue itself and provide a system that will protect every man who must depend upon the grade of his grain for the price at which he sells it? I think the Senator from Nebraska was about rising.

Mr. HITCHCOCK. I was unable to understand the nature of the Senator's objection. Does he fear that the State inspectors or the local inspectors will fail to conform with the United States standard?

Mr. CUMMINS. I do not.

Mr. HITCHCOCK. They will accept the United States standard.

Mr. CUMMINS. Just as thoroughly as if they were licensed by the Government.

Mr. HITCHCOCK. And will make their inspection in accordance with that standard?

Mr. CUMMINS. Certainly.

Mr. HITCHCOCK. And report in accordance with it. Then how can confusion arise under it?

Mr. CUMMINS. The confusion arises because the officer is a quasi Federal officer and also a State officer or a board of trade officer. He gets his compensation from one source and his authority from another, and there will not be the same inducement to be faithful and independent as between those who are interested as though the inspecting officer had one authority from a government, if you please, from the United States Government, from a State government, or from a private institution.

Mr. HITCHCOCK. I had some doubt, such as I thought possibly the Senator harbored, but I reached the conclusion that any local inspector or State inspector would be compelled practically to accept the United States standard and to carry it out faithfully because if there came a doubt as to whether a certain market accepted the United States standard and enforced it shippers would be very apt to discriminate against the market, and in self-defense the authority in the market would be compelled to put into effect the United States standards.

Mr. CUMMINS. It is only very rarely that a shipper can discriminate against a market.

Mr. HITCHCOCK. Certainly.

Mr. CUMMINS. In my part of the country his market is determined by more potential factors than the inspection of his grain.

All lines of commerce are perfectly well established, and it is very difficult for any individual farmer or grain buyer to depart from them; but the effect of my remarks is this: The only person who can possibly be benefited by the license system that is hereby proposed is the grain buyer, and he is no more likely to receive an advantage under this proposed law than under the present system. I am thinking all the time of a plan that will protect the isolated farmer who has no association, no connection, but who must deal with one who is in the business and deal with him always under disadvantageous conditions.

I take up now another phase of the matter, and I want the attention of the Senator from Colorado [Mr. SHAFROTH] to that.

Mr. JOHNSON of South Dakota. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from South Dakota?

Mr. CUMMINS. I yield to the Senator from South Dakota.

Mr. JOHNSON of South Dakota. Mr. President, it seems to me that the vital part of this whole bill is the question of whether this body is favorable to permitting, under the provisions of the bill, the grain grower or the farmer to have a grain grader at his home place. The question of selling——

Mr. CUMMINS. Mr. President, I yielded for a question only, for I very much desire to conclude.

Mr. JOHNSON of South Dakota. Then, Mr. President, I may say that it seems to me the most important matter to be con-

sidered is the complete elimination of any connection between grading and the business of buying and selling and shipping.

Mr. CUMMINS. Mr. President, I think the Senator from South Dakota has reached the very heart of the whole matter. I do not believe that the grain buyers now need the further protection of double inspection. I do not know of any instances in which he is particularly oppressed. I think he would be greatly benefited by the establishment of uniform grades throughout the United States, so that every grain buyer and farmer could understand precisely the standard by which all grains were to be measured or tested; but, so far as discrimination is concerned, so far as disadvantage is concerned, I have not heard that the grain buyer has suffered any great disadvantage.

Mr. McCUMBER. Mr. President, let me suggest to the Senator from Iowa that, if he means the buyer at the terminal, that is certainly true; he is taking care of himself; but the final purchaser for milling purposes has been without an adequate remedy to secure the proper grade of grain even under the rules by which it has been graded. The grain has been invariably certified to him as being of a higher grade than it really was.

Mr. CUMMINS. Mr. President, so far as the field with which I am familiar is concerned, I very much doubt that. The grain buyer, if he be a large one, has many elevators and covers a wide territory. He has a very close association with the commission merchant at the terminal point, and the combination of the grain buyers and their commission merchants usually, I think, exercises quite as much control and influence as does any other interest about the terminal.

Mr. McCUMBER. Mr. President, the Senator from Iowa must have misunderstood me. I have stated that that class of buyers were well protected, that they were able to take care of themselves; but that the final purchaser for milling purposes, the man who is compelled, as the owner of the mill, to buy at these great terminals a certain grade of grain, has not been protected in buying that grade for milling purposes.

Mr. CUMMINS. That may be and probably is true, but I am as zealously and as earnestly for a system of inspection that will apply honestly and intelligently the standards that are established as can be the Senator from North Dakota.

However, I come back now to another phase of this bill. I have been discussing it so far upon the assumption that there were no local inspectors; that there was no local inspector at the point from which I have originated the shipment. This bill gives the Secretary of Agriculture the authority to license just as many inspectors as he desires and to license them wherever he desires.

I assume that he will look upon it as an authority that ought to be exercised. Why else is it given to him? Inasmuch as it costs the Government of the United States nothing and does not add to the expenditure, I predict that the Secretary of Agriculture will appoint an inspector at every place for which an application for such appointment is made. Why should he not do so? If anyone can suggest any reason why the Secretary of Agriculture should not appoint an inspector who is not to be compensated by the Government, and for whom the Government undertakes no responsibility whatever, I should like to hear it.

The Senator from Colorado says that that is not in his contemplation, and I believe that; but if it is not in his contemplation, why are we proposing to authorize the Secretary of Agriculture to do it? I intend to consider the bill, and I shall vote, upon the hypothesis that the Secretary of Agriculture will do what he is authorized to do, and that when responsible persons ask for a license in a town of 2,000 people in my State and sufficient proof is given that the person sought to be appointed is competent to discharge the duties of the place he will be appointed.

Mr. McCUMBER. Mr. President——

Mr. CUMMINS. I yield to the Senator from North Dakota.

Mr. McCUMBER. I merely wish to ask the Senator from Iowa right here if he can not go further and say that if the elevator man who is competent as an inspector says that he desires to inspect his grain and to ship it out at a certain grade, how can the Secretary of Agriculture refuse to grant him the right to make that inspection?

Mr. CUMMINS. I do not well see how the Secretary can do so. It would be a plain abdication of his duty if he were to refuse.

I now desire to bring you back to the case of a town of 2,000 people in Iowa, with three elevators, we will assume, and an inspector is appointed to grade grain at that point. Who will probably secure the appointment of the inspector? The bill has provided that he must not be an employee of either of the elevator companies and that he must not be directly interested in the business; but I assert that it is utterly impossible to select a man in a community of that sort and of that extent who will not be in sympathy with one of these elevator companies. Somebody will surround him with the influence necessary to secure the license, or the appointment, as I prefer to call it, because nobody else can inspect grain but the one licensed by the Federal Government. He is, however, in effect appointed by the Federal Government, without compensation and without responsibility.

Now, let us assume that two of these elevators are owned by capitalists or by independent men, who are buying, legitimately, of course, for their own profit. The other is owned by a farmers' organization—and we have a great many instances of that kind in Iowa, as I suppose they have elsewhere—where a body of farmers associate themselves together, and when their grain is ready to be put in the elevator they haul it to town and put it in the elevator until ready for shipment, and then it is shipped to some terminal point. I am not imagining a situation. You will find that in 40 places in my State, and probably more, perhaps in a hundred places. I assert now—and the Senator from Colorado will not dispute me—that every bushel of grain shipped from that point must be inspected by the local inspector.

Mr. SHAFROTH. If it is shipped by grade; yes.

Mr. CUMMINS. We ship all grain by grade, practically; there are some exceptions, but I do not know of any grain in a substantial way that is dealt in without being dealt in by grade. Mr. President, that will be an intolerable condition in my State, and I believe it will be intolerable in every State. If the Secretary of Agriculture were appointing an inspector for a given district or a given locality, if you please, and were to select him for the place he is to fill and were to pay him his compensation and exact from him the responsibilities which follow an appointment, I would be willing to trust an inspector of that kind, no matter how small the community; but that is not this bill. The inspector is simply licensed; he must be paid by somebody. Who pays him? He will be paid by those whose grain he inspects. He can not receive compensation in any other way.

Now, let us assume that he has been appointed under certain influences which incline him to one or other of the corporations or associations doing business at that point, and yet every pound of grain that is shipped from that point, no matter how sharp the competition, is to be graded by an inspector who is practically an ally of one or other of the persons who may be carrying on the grain business. I tell you, Mr. President, that if you impose an inspector of that kind upon the people of Iowa the farmers who are carrying on the cooperative grain business will repudiate the law. It will be intolerable to them to have an inspector grading their grain, licensed under the influence of their rivals, who, no matter how honest he may try to be, will be subject to all the prejudices which arise out of conditions of that kind.

Mr. SHAFROTH. Mr. President, the illustration the Senator from Iowa gives as to his State is one to which the rule which he invokes would not be applied. There was an amendment offered to this bill and adopted, which I will read. It is found on page 5 and reads:

And provided further, That in any State where there has not been established, either by the laws of the State or by the rules and regulations of any commercial exchange, a system of grain inspection, this act shall not apply so far as it relates to the shipment or delivery of grain entering into interstate or foreign commerce, but such grain shall be inspected at the terminal point if shipped to a State having a system of inspection, and if shipped to a foreign country through a State having a system of inspection it shall be inspected at the most convenient point within such State.

It seems to me that as Iowa has no State inspection system, the condition to which the Senator calls attention could not arise, and the farmer in Iowa would not be affected by reason of provisions calling for inspection. That amendment, it seems to me, obviates the very difficulty which the Senator has suggested. In the case of a State inspection such as Minnesota has, of course, the inspectors are absolutely disinterested.

I want to call attention to this fact: I take it that the inspectors, whether or not they operate under a license, as the Senator said in response to a question propounded to him by the Senator from Nebraska [Mr. HITCHCOCK], would gladly adopt the United States standard. Furthermore, when a license is given by the Federal Government that license can be revoked by the Federal Government, and if it is revoked the inspector will have no right to issue any certificate of inspection because of the fact that he no longer is licensed by the United States Government. That, I think, is going to tie him to the United States Government more than it will tie him to any interest that may have had an influence in his appointment.

Mr. CUMMINS. Mr. President, I want no misunderstanding upon one point. I am in favor of the establishment of uniform grades and in favor of this measure so far as it provides for them, and I am assuming that thereafter every inspector, no matter who may appoint him and what his authority may be,

will be compelled to adopt and apply the uniform grades; but the Senator from Colorado is either very much mistaken about the meaning of the amendment which he had just read, or I am mistaken. I think that that applies wholly to a case where there is no inspector. If there be no inspector appointed in Iowa, then the amendment gives us the right to ship freely and without any obstruction or regulation to a terminal point at which the grain is to be inspected, but the amendment does not modify that part of the law which gives the Secretary of Agriculture the authority to appoint inspectors wherever he may desire to appoint them.

It does not modify that part of the law which says that, if there be an inspector at the point of origin, the grain shall be inspected by him at that point and before it is delivered for shipment. There is no modification of the statute in that respect.

Mr. HITCHCOCK. Mr. President, I confess there might be some danger of discrimination against the farmer and in favor of the grain buyer in the case stated by the Senator, but does not the Senator think that that in a measure has been met by the amendment inserted, beginning at the bottom of page 5, which provides:

That any corn or grains of any kind that is sold and graded at the home market under this act for interstate shipment may be regraded at any intermediate or terminal point, and if the grade there given shall be higher than the grade given at the local home market the seller shall have the benefit of the higher grade given and shall receive the amount of additional price he should have received had his grain been given the correct grade at his home market?

Mr. CUMMINS. Mr. President, that does not apply to the farmer at all. I have already shown that, whether there is an inspector at the point or not, the transaction between the farmer and the grain buyer is not covered by the provisions of this measure.

Mr. HITCHCOCK. The amendment uses the word "seller," and if the seller be the farmer, would it not apply to him?

Mr. CUMMINS. No; it only applies to grain that is shipped or offered for shipment in interstate commerce. When the farmer sells his grain to a grain buyer in his own State and delivers it to him in his wagon, he is not delivering the grain in interstate commerce or for shipment from one State to another, and therefore the act does not apply to him at all.

Mr. HITCHCOCK. I should imagine that the word "seller" must indicate the man who sold the grain at the time it was inspected.

Mr. CUMMINS. The Senator from Colorado will not so affirm.

Mr. SHAFROTH. Not as to the farmer. I think the Senator is right as to the farmer; but as between the person who sells the grain, whether it is a person who purchased it from the farmer or not, and the inspection at the terminal point, that rule would also apply.

Mr. CUMMINS. I think that is true so far as the person who ships the grain is concerned, and the person to whom it is shipped.

Mr. HITCHCOCK. Mr. President, will the Senator answer another question? Suppose, in the case that the Senator speaks of, an inspection at a local market were found to be persistently below grade by these reinspections, how long does the Senator from Iowa think that would be tolerated? How long would the Government continue to license an inspector who so habitually made an inspection that defrauded the farmers or the shippers?

Mr. CUMMINS. I do not know, Mr. President. It depends entirely on the character of the administration. I have seen things done and tolerated in this administration which rob me of a great deal of the confidence I otherwise would have. I have seen things done under former administrations that lead me to be skeptical about such things. I simply do not want to put this power in the hands of any administration unless it will do some good. Why should we give the Secretary of Agriculture this power unless it will really do some good? Why should we spend $250,000 unless it will really benefit the people of the country? I am pointing out why I think that instead of bettering our condition it will make it a great deal worse.

Mr. President, I call attention to one other thing before I close. There are two or three exceptions made to section 4. The first I will not read, because it is not an exception at all. I do not know why the committee put it in, although it is a very common thing in legislation, but it ought not to be encouraged. The first proviso of section 4, purporting to be an exception, does not operate in that way, because the thing that is supposed to be released is not included in the original prohibition at all. But there is an exception of this kind:

And provided further, That any such grain sold or offered for sale by any of the grades fixed therefor in the official grain standards may, upon compliance with the rules and regulations prescribed by the Secretary of Agriculture, be shipped without inspection from a place at which there is no inspector licensed under this act to a place at which there is no such inspector, subject to the right of either party to refer any dispute as to the grade of the grain to the Secretary of Agriculture, who may determine and certify the true grade thereof.

That means that if any shipper in my State desires to ship grain to another State and there is no inspector either at the point of origin or at the point of destination, the grain may be shipped by grade wihout inspection. But mark the effect of that: We give the Secretary of Agriculture the power to put this law into effect wherever he desires and to except all the localities which he may desire. If he wants to appoint an inspector in Iowa at a particular point no grain can be shipped out of that point without the examination of the inspector. Now, all that he has to do in order to take Iowa out of the law is to remove the inspector. If he wants to bring us again within the operation of the law all that he has to do is to appoint an inspector at the place to which the grain is to be shipped.

Does the Senator from Colorado think that it is either constitutional or wise to confer upon the Secretary of Agriculture the power to discriminate between the States of the Union as he deems best—to have this law in operation in one part of the country and suspend it in another part of the country? I agree that Congress has the power to pass a law that is not uniform. There is no such constitutional restriction with regard to Congress; but I deny that you can give the Secretary of Agriculture the power to apply a law in one place and relieve another community from its operation.

In the hands of a wise Secretary it might work well, but in the hands of a Secretary who would be inclined to abuse his power it might be used to the very great disadvantage of the people, and I always measure the desirability of a law upon the assumption that the power which we grant may be abused. Therefore it is my view of the law always to limit the discretion of an administrative officer within the narrowest practicable bounds.

Mr. President, I have reviewed——

Mr. SHAFROTH. Mr. President, before the Senator proceeds to another point, my attention was distracted from the first part of this point which he makes. Does the Senator refer to the fact that the Secretary has the power to license or not license, by which he can discriminate against one State in favor of another State?

Mr. CUMMINS. Not entirely. I referred to the third proviso of section 4.

Mr. SHAFROTH. On what page?

Mr. CUMMINS. Of the reprint?

Mr. SHAFROTH. Yes.

Mr. CUMMINS. It is on page 4 of the first reprint. It is the amendment which the Senator read a few moments ago. However, it is simply a slight revision of the proviso as it was in the bill.

Mr. SHAFROTH. Does the Senator mean beginning with "*And provided further*, That in any State where there has not been"——

Mr. CUMMINS. No——

Provided further, That any such grain sold, offered for sale, or consigned for sale by grade may be shipped or delivered for shipment in interstate or foreign commerce without inspection at point of shipment by an inspector licensed under this act when shipped from a place at which no such licensed inspector is located, to or through any place at which an inspector licensed under this act is located, subject to be inspected by a licensed inspector—

And so forth.

What I mean, my application of it, is this: Suppose we were shipping grain from Des Moines to St. Joseph, Mo., with no inspector at either place. We would not be governed by the provisions of the bill. We could ship grain freely by grade without any limitation. Suppose, however, the Secretary of Agriculture should appoint an inspector at Des Moines. That privilege would instantly cease, and the grain that was shipped from Des Moines to St. Joseph must be inspected by the inspector licensed at Des Moines. Upon these facts I was suggesting that you were giving the Secretary of Agriculture the right to make this law applicable to one community and not to another. He could, if he wanted to, relieve the entire country of all the effect of the law. I do not even suggest that he would, but you are giving him the lawful power to do it, because if he appointed no inspectors the law would not be operative at all; or, if he appointed an inspector in Iowa, and therefore brought it in that way under the law, by simply removing the inspector we would be free to ship grain to any point at which there was no inspector.

Mr. SHAFROTH. Would not that condition exist if this were a regular United States grain-inspection bill? Would he not have the right to appoint inspectors at one place or to remove them, in his discretion?

Mr. CUMMINS. That is not the question. It would be his duty, if he removed one, to appoint another.

Mr. SHAFROTH. Yes; but, as to the discrimination against a State, it seems to me it would be the same under this measure as if there were a general inspection bill and he were authorized or empowered to appoint inspectors at every place where he deemed it necessary that an inspector should exist.

Mr. CUMMINS. Of course, the bill might be framed in that way, but it is not necessary that it shall be framed in that way.

Mr. McCUMBER. Mr. President, allow me to suggest that the only bill that has been framed along that line has provided for inspection only at the important terminals in interstate grain trade.

Mr. CUMMINS. That probably is the first step that should be taken. That is the natural, reasonable way in which to regulate this subject. But when I think of the confusion and chaos that will be brought about if the Secretary of Agriculture does as he is authorized to do under this act, and appoints inspectors throughout the country, I confess to a good deal of apprehension and alarm; and I do not think the committee having in charge the agricultural interests of the country ought to permit a bill to be passed which can be used in that way. If the Federal Government undertakes the inspection of grain at the great terminal points, no one can complain, and it is bound to be of great benefit to the country. But the very moment that you put restrictions upon the shipment of property, the sale of property from one State to another, the very moment you interpose an inspection under some circumstances and remove the necessity under other circumstances, you are doing something the effect of which you can not possibly predict at this time. That is my only objection to the bill. You are interrupting the course of commerce without any advantage to the people.

If it were perfectly clear that we could reach back to the farmer and protect him, and insure that he always received the proper grade for the grain sold, that would be a compensation for some of these difficulties that you are interposing in the way of commerce. But I have stood here for an hour or two just to show that you are not doing the farmer any good whatsoever. You are conferring no right upon him, and you are placing obstacles in the channels of commerce that will simply be vexatious, and render all such business transactions uncertain, without accomplishing anything for the benefit either of grain dealers or of grain buyers.

Mr. President, I conclude my remarks upon this question by offering the following amendment: I move to strike out sections 4, 5, 6, 7, 8, 9, and 10 of that part of the bill which is known as Part B and to insert as section 4 the matter which I send to the desk, the other sections to be renumbered accordingly.

The PRESIDING OFFICER (Mr. POINDEXTER in the chair). The amendment offered by the Senator from Iowa will be stated.

The SECRETARY. On page 102, beginning with section 4, it is proposed to strike out sections 4 to 10, both inclusive, of that part of the bill known as part B and to insert the following:

SEC. 4. No person shall in any certificate or in any contract or agreement of sale or agreement to sell by grade, either oral or written, involving, or in any invoice or bill of lading, or other shipping document relating to, the shipment or delivery for shipment, in interstate or foreign commerce, of any grain for which standards shall have been fixed and established under this act, describe, or in any way refer to, any of such grain as being of any grade other than a grade fixed therefor in the official grain standards of the United States.

That any person who shall violate any of the provisions of this section shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not more than $500.

Mr. CUMMINS. Mr. President, this amendment, if adopted, would limit part B of the bill to the establishment of standard grades. It contains a provision which prohibits any contract for sale or shipment being made upon any other basis than the standard grades so established by the Secretary of Agriculture. It attaches a penalty for the disobedience of the law, and makes an appropriation for the use of the Secretary of Agriculture in ascertaining and establishing the grades. I do not think it ought to be $250,000, for I think a very much less sum is adequate for that purpose; but it removes every element of inspection so far as Federal authority is concerned. It leaves traffic just as it is. It does not disturb the business of the country, but it does require every inspector, no matter where or how he may be appointed, it requires every person who deals in grain, in entering into contracts of sale or shipment, to observe the Government standards as thus fixed. It seems to me that it is much wiser than to attempt to go forward in this somewhat chaotic way by the licensing of inspectors everywhere, and especially the licensing by the Federal Government of State officials, appointees of boards of trade, chambers of commerce, and the like.

Mr. SHAFROTH. Mr. President, I am glad that the Senator from Iowa has offered the amendment which he has presented, because until that was presented I had no idea what his position was. He criticized particular parts of the bill, but not until the last few minutes has he suggested a remedy which he believes is sufficient to cover some of the evils which exist.

During a part of his argument I imagined that he was in favor of United States inspection, because he criticized the idea of the United States Government issuing a license to somebody who was appointed by a board of trade or some one by a State official, which indicated, to my mind, that he was in favor of the appointment of inspectors by the United States Government. Yet I remembered that on yesterday he said that inspection on the part of the United States Government would take thousands and thousands of men, and that it would create a bureau here in Washington which would of necessity be a great cost, which he thought would be improper and would involve the Government in an enormous expenditure of money. It seems now that he has come to the proposition that there should be an adoption of grades, and that is all.

I concede that there are three lines of thought in the consideration of the grain-grading business. The first is, as the Senator has suggested, the grading proposition. It is true that the position of the farmer and the position of all people dealing in grain would be better than it is now if we had simply the grain-grading proposition.

Then there comes another element which has a great many followers, and with whom, I must say, I have great sympathy, and that is that the United States Government should not only establish grades, but it should also have inspectors to enforce those grades. As a matter of fact, a great many people differ from that, and they say no, that will not do. The position which the Senator from Iowa took on yesterday is a very strong argument to me against the bureau, which would have such a powerful influence with relation to the great agricultural interests of our Nation.

Mr. CUMMINS. I am sure the Senator from Colarado wants to be absolutely accurate in describing my position.

Mr. SHAFROTH. Certainly.

Mr. CUMMINS. I am in regard to Federal inspection much as I am in regard to the Government regulation of common carriers of interstate commerce; I want to try it out; I want to try the system we have now and see if it will afford a reasonable protection to the people. It is just so with regard to grain inspection. I want to establish Government grades and see if the adoption of those grades or the enforcement of those grades by the inspectors who are provided for in other ways will not fairly accomplish the purpose. If not, then I am for Federal inspection.

Mr. SHAFROTH. Mr. President, the position which the Senator has taken, it seems to me, accords exactly with our view, except that he does not adopt the part of what we think is necessary to make that transformation. The argument of the Senator from Iowa on yesterday with relation to the number of employees and the great bureau that will be established is somewhat of an obstacle in the passage at one time of inspection by the Federal Government, and on that account I hesitated and the committee hesitated. But the committee felt that there ought to be a limited amount of authority exercised by the Federal Government with relation to this matter in order to see that the standards are enforced, so far as the provision is concerned.

I can not conceive of a man who believes in Federal inspection who would say, "No; I will not take Federal supervision; I will take the standardization, but not the supervision," because supervision is a step in that direction unquestionably, and supervision will, in my judgment, if it operates well, produce inspection upon the part of the Federal Government. That being the case, I can not understand why these objections that are made should be made as to supervision when its tendency is toward making a compliance with the standards that may be adopted.

Every bill is imperfect to some extent. No person can conceive of all the points but that some further objections may be made. The Senator from Iowa has very ably pointed out some of those objections, some of which are true, others of which I do not think are of the importance which is attached to them by the Senator from Iowa.

But I must say that the objection that a license given by the Federal Government would not have any control or influence over the person appointed, it seems to me, is contrary to human nature. Inspectors, according to the bill, are not to be the employees of or directly interested in the business. Even if they did not have the supervision it would be a step in the right direction—in giving to the farmers and shippers from a State an advantage over what they have now. For

that reason it seems to me it ought to stand even if there is no supervision.

But when you take into consideration that the Federal Government also grants the license to that man and provides that he can not grade unless he has that license the whip handle is in the Federal Government, and for that reason there is a supervision which will be effective. No inspector of grain is going to run the hazard of losing his right to inspect grain by a violation of the standard or a failure to enforce the standards of the United States. For that reason it may not be quite as perfect as if the United States Government appointed and paid the inspector. Perhaps there is not quite as complete control over it, yet there is a control that is far better than that which exists now, when there is no restraining influence upon the part of the Government that establishes these standards.

For that reason it seems to me that supervision is a great step in the way of enforcing these standards which all of us seem to be quite willing may be established on the part of the Federal Government.

Now, the object and purpose of the bill is to prevent the buying of grain from the farmer at a low grade and selling it at a high grade. That is one of the most important points in the entire bill. When we do that we have accomplished for the farmer, we have accomplished for the seller in those States, something that is of substantial benefit to him. By reason of that, while the supervision and control may not be as perfect, it does not also run the hazards and the risks which were pointed out yesterday by the Senator from Iowa.

So, Mr. President, it seems to me that when we take into consideration that there are three thoughts upon this proposition, one in favor of the grades alone, another in favor of total Federal inspection and the wiping out of all State inspection, and another that gets into the operation and influence of the United States Government the very men who are doing the inspecting now—and the Senator from Iowa says they would readily adopt the Federal standards—it seems to me that we are accomplishing a great deal in the interest of grain grading and a great deal in the interest of the farmer.

Consequently any supervision, even if it were not as great as that which is provided in this bill, is a step in the right direction. I believe in testing it, just as the Senator from Iowa has said, to see whether this supervision is going to aid and assist in the proper grading of grain. If it is deemed wise to experiment for a while, to adopt the standard of inspection by the Federal Government under persons who are not even suggested by the interests of elevators or boards of trade or State laws, it seems to me that we will have made a step in that direction, and we can very readily then determine whether we will adopt the whole system by which the Federal Government would have the entire control of it. But as to that the Senate has passed upon it, the Senate has said "No" as to total Federal inspection, and for that reason it seems to me we ought to get as near to it as possible.

Mr. President, I called attention the other day to a number of resolutions that had been passed by various farmers' organizations, elevator organizations, and millers' organizations, showing that those men have examined into the provisions of the Rubey bill or the Moss bill and that they have approved of the same. There is a difference between them as to whether there should be Federal inspection or Federal supervision. All seem to agree that there should be grain grading.

Now, when we take into consideration that these various organizations have agreed almost unanimously in favor of adopting the provision as to the supervision of the Federal Government, when probably they are influenced to some extent by the fact that this body refused to adopt the grain-inspection business by the Federal Government, it seems to me we ought to give caution to what they say.

I want to call attention to one which has just been held, which was handed to me a few moments ago. I will read it. It will not take long:

The second annual convention of the Northwestern Grain Dealers' Association was held at Hunters Hot Springs, Mont., on June 22, 23, and 24, and was a splendid success, both in point of attendance and in the interest shown in the meetings.

Though the new association is but two years old, it already boasts of a membership of 300, composed of line houses, small country dealers, and farmers' elevators.

The association embraces the States of Montana, Wyoming, Utah, and Washington at present, but it is expected that eventually some of this immense territory will be surrendered to other State associations which will in time be formed as the great northwestern country develops its grain resources.

At the present rate of development in Montana the "Stubtoe State" will alone contain enough grain dealers before long to form one of the biggest State grain associations in the country.

It would have been a source of surprise and pleasure to some of the members of the national association and the older State associations to see the enthusiasm displayed by the northwestern dealers in the work of their organization. In the round-table talks the grain men showed that they had an intimate knowledge of the problems of the trade, both State and national.

While most of the problems discussed related to conditions in Montana and adjoining States, subjects of a national character were not overlooked. Among the resolutions passed was one favoring the early passage of the Rubey bill, or grain-grading amendment to the Agricultural appropriation bill, as it is now known. This resolution was wired to Senator GORE, chairman of the Senate Committee on Agriculture and Forestry. Senator GORE has charge of the measure in the Senate. The resolution is as follows:

"Whereas there is pending in the United States Senate the Agricultural appropriation bill, H. R. 12717—

Which is the Rubey bill—

"And whereas this bill, which has passed the House, carries an amendment known as the grain-grading amendment, which is designed to place under Federal supervision the grading of all grain entering into interstate commerce;

"*Resolved by the Northwestern Grain Dealers' Association in convention assembled at Hunters Hot Springs, Mont., on June 24, 1916*, That we heartily favor the speedy passage by Congress of this amendment, which amendment would, we believe, if enacted into law, bring relief to the grain trade from the present unsatisfactory system of grading.

"*Resolved*, That a copy of this resolution be wired at once to Hon. THOMAS P. GORE, chairman of the Senate Committee on Agriculture and Forestry."

Mr. President, these farmers and these grain men have looked into the question with a great deal of care. I have not any doubt that they have looked into it more than nine-tenths of the Members of this body. They have come to the conclusion that the establishing of standards is one thing that they believe ought to be adopted. They believe, further, that supervision on the part of the Federal Government is something that should be enacted into law. They are silent as to the question of Federal inspection. That being the case, they ought to know what is for their interest. Unquestionably this supervision is in the interest of honesty and fair dealing, and for that reason it seems to me we ought to adopt it.

If the position which is taken by the Senator from Iowa prevails, it will destroy the bill. It will leave nothing whatever except grading. It will wipe out of existence the admirable amendment which was offered by the Senator from North Dakota to the effect that inspectors or supervisors shall be appointed by the Federal Government at the leading markets of the United States. That is in the interest of Federal inspection, it is true, but it is also Federal supervision, and that Federal supervision coupled with the direct touch which it will have upon each inspector in the United States under State laws or under boards of trade, it seems to me, will give a command, desires, and wishes of the Federal Government that will not be ignored by them.

Inasmuch as Federal inspection seems to be out of the question, the supervision which is provided in this bill ought to make a very satisfactory arrangement, and it has made a very satisfactory arrangement to most of the farmers' organizations in the entire United States. For that reason I hope the amendment offered by the Senator from Iowa will be voted down.

Mr. McCUMBER. Mr. President, I think the bill in its present shape is far preferable to what it would be if the amendment offered by the Senator from Iowa should prevail, and I hope therefore that it will not prevail. The Senator will find in the bill as it now stands everything that he contends for, and in addition he will find some other things that are quite essential to the proper operation of the other provisions.

The bill as it now stands does provide for the fixing of Government standards. The bill as it now stands does provide that these standards when fixed shall be the standards at which all grains sold by grade shall measure up to at the terminal. The bill as it now stands goes a step further and provides for proper supervision of the grading at the terminals.

There are things in the bill which I do not entirely agree with, and which I believe can be easily met either by amendment in the Senate or agreement by the committee of conference.

One of the principal objections made by the Senator from Iowa was as to the appointment of inspectors at the place of origin. I agree with the Senator from Iowa that there should be no inspectors at such place. The Senator in charge of the bill declares that it is not contemplated that there will be any inspectors at the place of origin, because if you provide for inspectors at these places you will have as many inspectors as there are little villages and stations all over the United States at which grain is sold.

I know the bill does not contemplate that, and yet it does not prohibit the Secretary of Agriculture from making an appointment at such a place if some person asks to be appointed.

It may be possible that the Secretary of Agriculture can, by rule, under this bill provide that the department shall exercise

the right to say that an inspector should not be appointed at such place unless there was a real demand for an inspector, and undoubtedly the Secretary would have the right to refuse to make such appointment; but we could make that simple and clear by a slight amendment either in the Senate or by the committee of conference. They could accept one of these provisions with a further amendment providing that inspectors shall be appointed only at the important terminals in the interstate grain trade. That would cure that difficulty, and would be in accordance with what is contemplated.

I see no objection to an amendment of that kind. That would, therefore, meet the objections of the Senator from Iowa [Mr. CUMMINS] directed to the possibility of inspectors being appointed at these country places. There is no need of inspectors at such places, and I agree that if one were appointed and farmers were compelled to submit to his inspection it would be a great detriment to the trade in grain.

The next proposition—and I must admit that there is something in that, although I do not know whether the Senator from Iowa discussed it, though I think he did to some extent—is the appointment of the inspectors at the great terminals. As a matter of fact, in my candid judgment you would be compelled to appoint the men who have been appointed and given places by the exchanges and the boards of trade. If you do not appoint them you would have no one to do the inspecting. Of course, you might in time develop a class of men who could do the inspecting, but at the present time you must draw your army of inspectors from those who have had some experience, and the people who have had experience are those who have been employed at the great terminals by boards of trade, by chambers of commerce, and so forth. That, however, could be easily provided for, as I have said, either by amendment in the Senate or in the committee of conference, to make the bill harmonious and workable, and I trust that that will be done.

When we have covered that point we have met the principal objection against the measure as it now stands. It will then provide, first, for the standardization of grain; second, that when the grades have been established all grain sold in interstate commerce by grades must conform to the standard fixed by the Secretary of Agriculture; and third, a prohibition against the use of any other grades.

In addition to that, by the amendment which was adopted yesterday, we shall secure real supervision. Supervision by appeal only amounts to very little indeed, but if we have one or more experts at each of the great terminals who have the right to inspect, to supervise the inspecting department, and to report to the Secretary of Agriculture whether or not the grades which are being promulgated and which are being applied conform to the standards, we will secure a great advantage by such supervision. I would not lose that provision, if possible, from this bill. I think it is the most important provision in the bill. Therefore, by striking out all of section 4, which the amendment of the Senator from Iowa contemplates, you would strike out the most important provision in the bill. So I hope, Mr. President, that the amendment will not prevail, for I am certain that the objection made by the Senator from Iowa can be remedied either by further amendment in the Senate or, as the bill now stands, such remedy can be afforded by proper amendment which may be made by the committee of conference.

Mr. NELSON. Mr. President, I am unwilling to detain the Senate for any length of time in this discussion, and I have heretofore avoided as much as possible taking part in the debate with a view to expediting the passage of the bill.

I must say, however, that I entirely concur in the views of the Senator from Iowa [Mr. CUMMINS]. I think that if the Federal Government establishes standards for all kinds of grain entering into interstate commerce, it has gone far enough; that there is no need of its going any further, because those standards can always be referred to and used in all interstate transactions. Whatever impediments or restrictions are placed upon the grain trade react on the farmer.

It has always seemed to me, and I think it will be found in practice to be, a most difficult problem for the Federal Government to establish what I may term interstate grades. People who are not familiar with the subject imagine that is it an easy thing to grade wheat, for instance, imagining that you can fix a set of grades—No. 1, No. 2, and No. 3—that will apply equally well to the whole country. Those, however, who are conversant with the subject, know that you can not establish a grade that is applicable to the whole country, but that you must establish grades in the different localities which may be properly applied to the kind and quality of wheat raised in those localities.

There is an immense difference between spring wheat raised in Minnesota and Manitoba and the spring wheat raised in Montana and in the States on the Pacific coast. The Minnesota and Canadian wheat is what we call glutinous wheat; it contains a very large proportion of gluten and is very much desired by the millers for the manufacture of flour. They like glutinous wheat because they can take an inferior grade of wheat, a starchy grade, and mix with the glutinous wheat, and still get a good, fair quality of baker's flour.

As you go west into Montana, and as you go south into the southern edge of the spring wheat belt into northern Iowa, Nebraska, and northern Wisconsin, you will find spring wheat of a different variety from that grown in Manitoba or in Minnesota. It is a softer and a more starchy wheat, and it is used by the millers to mix with the hard wheat of Minnesota.

To fix a proper grade in these different cases you would be obliged to establish one series of grades for what I term hard varieties of spring wheat, and then you would have to establish another series of grades for what I call the soft varieties of spring wheat.

What I have stated in reference to spring wheat applies equally and to the same extent to winter wheat. There are very many varieties of winter wheat. There is what is called in the trade red winter wheat and white winter wheat. There is also a soft winter wheat and a hard winter wheat.

Some years ago there was imported from abroad—I think from Russia—into Kansas and Nebraska a variety of hard winter wheat which was called Turkey red. That variety of wheat resembled more than does any other of the winter wheats the hard wheat which is raised in Minnesota. That is true to such an extent that the millers in Minnesota import some of that Turkey red hard winter wheat and mix a little of it with the hard spring wheat in the manufacture of flour.

Therefore, in the fixing of grades by the Government there will be many obstacles encountered. For instance, if you make a moisture test for wheat, somewhat akin to that which has been established by the Department of Agriculture in respect to corn, those who have been complaining a great deal in the past will find themselves considerably embarrassed. In large portions of North Dakota, in portions of South Dakota, and in portions of Minnesota, in what is called the Red River Valley, where there are many large farms and where help is scarce, the farmers are in the habit of not stacking their grain. They simply reap it, shock it, and let it stand in the field until they are ready to thrash, and then they thrash it from the shock. When there is a dry fall, with little or no rain, that is not a very dangerous method to pursue. To be sure, if the grain stays a long while in the shock it is apt to become somewhat bleached, but it is otherwise all right. However, it oftentimes happens that in the course of the fall there is considerable rain, and when that is the case the wheat not only becomes bleached, but becomes damp and moist. The farmers thrash that wheat from the shock as soon as it will bear thrashing; and, what is more, the big farmers are accustomed to haul the wheat right from the thrashing machine to the railway station and there they usually load it into cars or else place it in elevators. The result is that wheat in that condition, when it reaches the terminals, is likely to heat and to spoil; and the farmer shipping the grain will fail to get the grade which he expected to receive. If there is a moisture test, that character of grain will be graded as of an inferior quality.

In all the grain States there are two systems of grain inspection. There is what is called the State system, the most perfect example of which, as I have heretofore explained to the Senate, is the Minnesota system. I think next to that system comes the system in vogue in Missouri. State-inspection systems also exist in Illinois and in a number of other States, but where there is not a State system of inspection there is what is known as the board-of-trade inspection system or the chamber-of-commerce system. All along the eastern seaboard, where grain is shipped to Europe, the last-named system of inspection prevails. Most of the grain is shipped originally according to the local system of inspection, and some of the grain that goes to the seaboard for export, if it is shipped from Duluth, Minn., or from Manitoba is bought and sold upon the Duluth or the Winnipeg inspection, which is considered superior to the board-of-trade inspection.

If you establish a Government standard for grain shipped in interstate commerce and leave the application of the law to the different States, either under the State system of inspection or under the board-of-trade inspection, the law will be as effective as it possibly can be under the system proposed in the pending bill, and you will avoid endless and needless expense.

Many men who talk about Federal inspection and about having Federal inspectors appointed to do the work scarcely comprehend the volume of the business and the vast number of

employees that would be necessary. During the grain season, when the farmers are busy thrashing their grain and shipping it to market, there are very many days in the course of the fall when as great a number as four or five thousand cars arrive at the terminal at Minneapolis or Duluth to be inspected. The most that one inspector can do—and then he will be obliged to work from daylight until dark—will be to inspect from 75 to 80 cars a day, perhaps 90 as an extreme. Just imagine the enormous number of inspectors who would be required to inspect the cars if prompt inspection were desired; and it is important that grain should be inspected as soon as it arrives at the terminal, otherwise the shipper must pay demurrage on the car.

All that is needed in the matter of grain inspection is—and I take it that that is really what the exporters of grain want—to have grain when it is shipped abroad so labeled as to indicate that it conforms to the United States standard; in other words, so labeled as to indicate that it is graded according to the standard provided; and if we adopt the plan suggested by the Senator from Iowa we should be taking as long a step as we ought at this time to take.

Mr. President, the historian Macaulay well said that all legislation is of an experimental nature. In adopting Federal grades we are entering upon an entirely new field of legislation; and it seems to me that the safest and most prudent way to proceed would be to provide for Federal standards. After we have tried that experiment under the existing systems of inspection which prevail throughout the country, we shall then know whether any further remedial legislation is needed.

It is not difficult, if grain is bought and sold under a Federal standard, to enforce conformity to that standard. There are inspectors in every State, either under the State system of inspection or under the board-of-trade system of inspection, who will continue to inspect the grain; and if it is bought according to Federal standards, the inspectors will of necessity have to be guided by those standards, and in case of complaint being made, the action of the inspectors can be checked and restrained.

To go into the field of licensing a lot of inspectors is something that should give us pause. It would not be so bad if it were merely proposed to license inspectors in States where there is an organized force of inspectors; but in States where there is no such force, where the inspection is merely a private matter, it would be rather a dangerous and risky thing to appoint an unlimited number of inspectors, and leave the inspection to a multitude of such inspectors who, in many cases, would be subject to be swayed by private interests.

The complaint against the present system is not that it has not worked well locally, but that it has not resulted in uniformity. This Federal inspection can be of no benefit or advantage to the farmers of the country. They sell their grain to the local buyer; and this Federal inspection that is talked about is simply an inspection that governs the trade of the middlemen, the men why buy from the farmers and ship to the millers, or who ship their grain abroad. The whole system of inspection, in whatever form you put it, does not operate directly for the benefit of the farmer. It is a system that operates simply for the benefit of those who deal in wheat, the middlemen, the men who buy from the farmers, and the men who, having bought from the farmers, sell the grain to the millers, or sell it for shipment abroad. The whole inspection system reaches them; and the idea that is being spread abroad that a Federal system of inspection can be of any benefit or advantage to the farmers is, in my opinion, far-fetched in the extreme.

The Minnesota farmer, for instance, comes with his load of grain to the country elevator, and we perhaps have between one and two thousand such elevators or grain houses in our State. Many of them are owned by big companies called line companies. Others, again, are known as farmers' elevators. When the farmer comes to town with his load of grain and sells it to the elevator man, the elevator man takes that wheat and says: "I grade this wheat so much, and I will pay you so much a bushel for it." If the farmer sells his grain at that time—if he sells it on the spot to the elevator man—that is the end of the transaction. If he sees fit not to sell it, he gets what is termed a storage ticket, stating that he has stored so many bushels of No. 1 or No. 2 or No. 3 wheat, as the case may be; that it is subject to certain dockage; and that he must pay certain elevator charges in proportion to the length of time the grain remains in the elevator.

So it is a difficult problem. I have never been able to see how any system of inspection, either State or Federal, would be of any benefit directly to the farmer. It is the middlemen who are benefited. The men who within the last year have become clamorous for this legislation are not the farmers, they are not the ordinary elevator men, but the millers. They claim that they will be able to get better and more satisfactory grades under a Federal system.

Assuming that to be so, Mr. President, I think that if we establish a Federal standard of quality we have gone far enough. While this bill as reported from the committee, with the amendments that have been ingrafted upon it, is not so bad as it might be; while the amendments that have been injected into it, partly on the motion of the members of the committee and partly on the motion of the junior Senator from North Dakota [Mr. GRONNA], have greatly improved the bill; yet, after all, I am thoroughly convinced that it will be for the best interests of the business of the country to so limit this bill as to make it simply a Federal standardization bill. That is practically, as I understand, what you have done in the matter of cotton, is it not? I will ask the Senator from Georgia in regard to that.

Mr. SMITH of Georgia. It does not go far beyond simply the work of standardization.

Mr. NELSON. That is it exactly; and I appeal to you men of the South to extend to us the same beneficial system as to our great product that we have extended to yours. We have not interfered with your cotton legislation. We have told you to name the system you desired, and we have accorded it to you; and you have adopted the same plan as to cotton that the Senator from Iowa and I are now advocating as to grain. You have simply adopted a Federal standard, and beyond that you have not provided for any Federal inspection. Am I not correct?

Mr. SMITH of Georgia. That is practically the effect of it.

Mr. NELSON. Yes. You have not, either directly or indirectly, provided for any Federal inspection?

Mr. SMITH of Georgia. I do not think so; and, as the Senator appeals to us, I will say that we wish to give the grain-producing States what their representatives deem best. We wish, as far as possible, to refrain from deciding their question. We have sought to induce the Senators upon the committee from the grain States to prepare the legislation for themselves. I wish to assure the Senator from Minnesota that we are not trying to put anything on them. We are trying to let them have what they wish. The difficulty has been that there has not been a harmonious view. We worked out practically without any dissent from the cotton States the cotton problem.

In one breath we are told by certain Senators that they are entitled to certain protection; that they are entitled to certain legislation; that it is wrong not to give it to them. In the next breath Senators in whom we have equal confidence object to our giving what some of the Senators from the grain States say is essential. I wish we could have left it to the grain-State Senators to fix it for themselves, and that is practically what we are seeking to do. So far as I am concerned, and so far as those of us who are from the Southern States on the committee are concerned, we are following the majority on the committee of the grain-State Senators.

Mr. NELSON. I realize fully the force of what the Senator from Georgia has said, and I want to congratulate him and his associates from the South on the fact that they have been able to unite upon a program. You have adopted a very sensible idea in reference to cotton. You have simply established a Federal standard, and you have stopped at that. You have not provided either for a Federal or a State inspection. I think if we did in respect to wheat what you have done in respect to cotton we would be going far enough. I submit, Mr. President, that we ought at all events to stop and try that experiment, and see whether or not it will work satisfactorily.

It is curious to observe what a reaching out there has been in recent years to absorb the activities of the States. Yesterday I received a letter, which I am sorry I have not here, from a prominent constituent of mine in Minnesota. He said, "I understand there is legislation contemplated to put the creameries and the cheese factories of the country under a system of Federal inspection. I understand that the oleomargarine people are pressing for such legislation. It will be a most dangerous thing," he said, "to put our creameries and our cheese factories under Federal inspection. We would not know how to get along."

If you keep on extending this system, if you adopt, first, Federal grain inspection, the next step will be that inspection of our creameries will be demanded, and they will want to inspect the milk and cream entering into interstate commerce. You are getting milk and cream here in Washington from across the river in Virginia. It comes into the District of Columbia, and it is a part of interstate commerce. The butter and the cheese we use in the country enter into interstate commerce. There is no limit to how far you may go if you adopt this principle of Federal regulation in respect to all these things.

There will be as much clamor by and by—and as plausible an argument will be made in its favor—for a Federal inspection of the creameries throughout the country of the butter and cheese that are sold in interstate trade, and of the milk and cream that are sold in interstate trade. If you follow up this program, no limit can be fixed to the absorption by the Federal Government of the activities of the States and of their people.

I sincerely trust that the amendment of the Senator from Iowa [Mr. CUMMINS] may be adopted. I have taken more time than I intended to take. I have endeavored to avoid, as I said at the outset, delaying action on this bill. I think Senators on the other side of the Chamber must admit that in one way or another, although not directly upon this provision of the bill, they have consumed more time than have we on this side.

Mr. McCUMBER. Mr. President, most of these remarks have been directed more or less to the Senator from Georgia [Mr. SMITH], who seems to be the only one on that side who is giving close attention, at least, to the bill. As he has indicated a desire on the part of those on that side, and especially those from the cotton-growing States, to give us what we want and what we ought to have, let me present this question to him from the standpoint of a North Dakota farmer—not from the standpoint of a Minneapolis buyer—and possibly he will see some distinction between the viewpoint of the two.

Let us remember that when our fathers adopted the Constitution of the United States and provided in that Constitution that Congress should have control over interstate and foreign commerce, there was some reason for it. There was some reason for taking it away from the States, and vesting that power in a Congress of all the States of the Union. Now, what was it? It was well known at that time that the people of some States must market their produce in another State, in a State whose rules and regulations and laws were beyond their control, and which rules, regulations, and laws might be used for the benefit of the purchasers of their products, and against the interests of the producers of the same products.

Every bushel of grain that is raised in the State of North Dakota, outside of a small percentage which is manufactured into flour there and the other percentage which must be used for seed, must be sold at our great terminals. The great terminals can pass laws and rules over which we have no control. You can be absolutely certain that the regulations for the handling of that grain will not be made for the benefit of the North Dakota farmer. They will be made for the benefit of the parties that are dealing in that grain.

That power has been used in the past to the great detriment of our people. We have been struggling for years to get rid of that condition, so much so that our legislature passed a law to purchase a terminal elevator which would be under the control of our own State; and that being found to be unconstitutional the people of my State voted an amendment to the constitution so that they would have the power to purchase or build an elevator at one of these great terminals and thereby escape the injustices that have been heaped upon them at these great terminals under the rules and regulations adopted by them. Our last legislature failed to make the appropriation, and so to-day we have in our State a nonpartisan league, and that nonpartisan league nominated every man for the State legislature on both the Republican and the Democratic tickets. The men that they put up were nominated, and the men that they put up will be elected this fall.

All this grew out of the abuses that the people of that State have had to submit to because they have no voice in the rules or regulations governing the final sale of their product.

Now, they are coming to the only authority in the United States that can deal with interstate commerce and can give them a moiety of protection—the Congress of the United States. They ask of you, and have asked for years, not only for Federal standardization but for Federal inspection.

So far you have failed to give them either. You now have a promise, at least, of giving us the Federal standardization, and as soon as we are about to get that and get it in a law that can be made effective, we find the same forces that say they are in favor of Federal standardization wishing to cripple the law so that you can not make your Federal standardization effective. How can you make it effective? You can only make it effective when you have at these great terminals some Federal officer that can examine into the grading and inspection of the grain, and if it does not measure up to the standard that is fixed by the department then the department can take some action. These great terminals do not want a Federal officer "spooking" around their work. The farmer does want him there, and that is the best part of your bill—a provision, not by mere expectation in your bill that the Secretary of Agriculture will do so but that he absolutely must appoint those supervisors.

The Senator from Minnesota [Mr. NELSON] has at some length expressed his opposition to Federal inspection. This is not Federal inspection. We are not asking, so far at least, in this discussion, for Federal inspection. We are asking that you make your Federal standardization what it ought to be—real Federal standardization—by giving a proper supervision. The amendment of the Senator from Iowa cuts out that supervision. If all the rest of section 4 was eliminated and this one provision kept in, I would have no serious objection to the amendment of the Senator from Iowa.

The Senator from Minnesota says Federal inspection can not in any way benefit the farmer and even that Federal standardization can not benefit the farmer. I am going to tell you right where it does benefit the farmer. I am going to tell you right where it does benefit him. The Senator is laboring under the idea that there is some lack of understanding between the elevator owner or purchaser at the point of shipment and the farmer. As a matter of fact, in nine hundred and ninety-nine cases out of a thousand they are in exact sympathy.

The elevator man does want to give the farmer the grades that his grain is entitled to receive. His business with that farmer depends upon securing for him the very best grades that he can at the terminal. But he must make the grade according to the grade he receives at the terminal. If he knows that the farmer has brought him a grade which, under the standard, would grade as good No. 1 northern and wishes to give it to him and after he has sent out a carload or two of that and has received only No. 2 northern at the terminal, then he can only give the farmer No. 2 northern for his No. 1 northern. The whole conflict is between the elevator in the State and the inspection department at the great terminal. The farmer will get whatever that elevator man will get at the terminal, and if he gets a fair and just inspection the farmer in the country who is his customer is going to get the benefit of it.

That is not all. There is another benefit, and that benefit comes from the other end of the transaction. Suppose there is a miller. He knows what is good No. 1 grain. He wants to buy that grain and he contracts for 100,000 bushels at the great terminals, say, for No. 1 northern wheat raised in the Northwest, where the gluten property is very excellent. He gets a grade that is certified to him as No. 1, which is in fact little better than No. 3. For the second hundred thousand bushels that he buys of No. 1 grade, which is in reality No. 3, he will pay only a No. 3 price. That fixes, then, the price of No. 1 at a No. 3 basis, and the farmer suffers for every bushel that he has in his granary, because his No. 1 grade does not receive its fair and honest standard at the great terminal.

There can be no possibility of any injury or injustice being done by reason of having supervisors at these terminals whose duty it will be to see that the inspection which is made measures up to the national standard. We have a right to expect that if we are going to put this bill into operation. We want to make it effective. We not only want to make it effective, Mr. President, but we want confidence in our grades.

If you will read the testimony of the foreign buyer of the American miller you will find that at the bottom of everything there is lack of confidence in the grades. The testimony given here but a year or two ago stated that no miller will ever buy grain upon the Chicago grades; that he will send his own man to inspect the grain and then will buy it according to the quality that he observes in the grain rather than by the certificate which is attached to it.

That lack of confidence in grades as between Canada and the United States has given the Canadian wheat, which is no better than ours, a character in the markets of the world that realizes for it from 5 to 8 cents a bushel more than is given for the same grade of American grain, because the foreign buyer, under our rules, must buy according to the certificate that is issued in this country, and he lacks confidence in our certificate. He has confidence in the certificate that is given under the inspection in Canada.

The very fact that we have Federal supervisors that will insist that the inspectors, whether they are State inspectors or board of trade inspectors, shall inspect and certify according to the real intent of the standards fixed by the Secretary of Agriculture, will insure a confidence that will tend to press upward the prices of all grain sold by standard. That is all that we are asking in this case. For that reason I sincerely hope that you will give us that which the Senator in charge of the bill has consented to, the services of the supervisors at the great terminals.

Mr. CUMMINS. Mr. President, it is easy to understand why the Senator from North Dakota is satisfied with the bill. He has put into the bill all that he has ever claimed before this body. He has induced those who are in charge of the bill to accept

his view of the matter. He is willing to accept the bill because it is Federal inspection. I do not oppose Federal inspection, but the Senator from North Dakota is willing to have Federal inspection all over the State of Iowa, all over the State of North Dakota, all over every other State in the Union, in order to get Federal inspection in Minneapolis. I am not. That is the whole difference between us.

I have no objection to Federal supervision in Minneapolis or in Chicago or in any other of these terminal points. I would not oppose the bill a single moment if that were the effect of it. But when the effect is to give the Secretary of Agriculture power to appoint local inspectors without pay, without responsibility, and, having appointed them, to permit that system to interrupt the business of my State and the shipment of grain from my State to some other, I protest. I would not object to any system of inspection in Chicago, Minneapolis, or St. Louis; but why does the Senate committee insist that we shall have local inspectors appointed, as I have heretofore suggested, whose very presence will oftentimes paralyze the very industry which this system is intended to stimulate and encourage?

That is the whole question here. I would rather have no Federal inspection, no Federal supervision, than the Federal inspection and the Federal supervision provided for in this bill.

Mr. McCUMBER. Mr. President, the Senator from Iowa must recognize the injustice of his statement of my position in this matter. He must recognize that I do not believe in having inspectors all over the State of North Dakota. On the contrary——

Mr. CUMMINS. I did not say that.

Mr. McCUMBER. The Senator says I am willing to have them all over the State of North Dakota and Iowa. I do not want an inspector at any place except at the great terminals in interstate grain traffic.

Mr. CUMMINS. What I said was that the Senator from North Dakota is willing to accept these inspectors in order to secure Federal supervision in Minneapolis.

Mr. McCUMBER. No, Mr. President, I do not think there will be any inspectors appointed in Iowa or in North Dakota. While it is not absolutely prohibited by the bill, I conceive that it would be within the power of the Secretary of Agriculture to refuse to appoint inspectors where they were not needed, and they are not needed under the provisions of the bill in North Dakota or in Iowa.

Not only that, but I stated at least twice, and I will repeat it, that I am in favor of a further amendment which shall provide that inspectors shall be appointed only at the important terminals in interstate grain trade. I think that that should either be made on the Senate floor or by the committee of conference. In other words, if it is contemplated that none shall be appointed there, I should like to make it clear that they should not be appointed at those places.

I have not introduced all the amendments that I wanted in this bill. The Senator intimates that it is a Federal grain inspection bill. It is not. There is no provision for the appointment of a single Federal inspector. All there is in the bill is that the Federal inspector shall grant the license the same as the Government grants a license to run a boat on the Missouri. But the owner of the boat line does the employing. It is not a Government-run boat because the captain or the pilot must have a Government certificate of navigation. He is governed by no law relative to interstate traffic simply because he receives that certificate; he is under the control entirely of his employer.

So there is no use of our saying that this is Government inspection. Possibly before we get through with this measure there will be an opportunity for all of us without taking any time for argument to vote directly on the question as to whether or not we want both Federal standardization and Federal inspection. If I can not get that much I am willing to take what I can get.

The PRESIDING OFFICER (Mr. NORRIS in the chair). The question is on the amendment of the Senator from Iowa [Mr. CUMMINS].

Mr. McCUMBER. There being very few Senators in the Senate Chamber I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll and the following Senators answered to their names:

Bankhead	Chamberlain	du Pont	Hughes
Borah	Chilton	Fletcher	James
Brady	Clapp	Gallinger	Johnson, S. Dak.
Brandegee	Clarke, Ark.	Gronna	Jones
Broussard	Culberson	Harding	Kenyon
Bryan	Cummins	Hardwick	Kern
Catron	Curtis	Hitchcock	La Follette
Lane	Overman	Simmons	Tillman
Lee, Md.	Owen	Smith, Ariz.	Underwood
Lewis	Pittman	Smith, Ga.	Vardaman
Lippitt	Poindexter	Smith, S. C.	Wadsworth
McCumber	Pomerene	Smoot	Walsh
Martine, N. J.	Ransdell	Sterling	Weeks
Nelson	Saulsbury	Swanson	
Norris	Shafroth	Thomas	
Oliver	Sheppard	Thompson	

Mr. MARTINE of New Jersey. I desire to announce that the Senator from Montana [Mr. MYERS] is detained at home through illness.

The PRESIDING OFFICER. Sixty-one Senators have answered to their names. There is a quorum present.

Mr. SHAFROTH. I should like to have the amendment read before the vote is taken.

The PRESIDING OFFICER. The amendment will be read.

The SECRETARY. In part B of the bill, the portion relating to grain in interstate commerce, the Senator from Iowa [Mr. CUMMINS] moves to strike out all of sections 4 to 10, both inclusive, and to insert in lieu the following:

SEC. 4. No person shall in any certificate or in any contract or agreement of sale or agreement to sell by grade, either oral or written, involving, or in any invoice or bill of lading or other shipping document relating to, the shipment or delivery for shipment in interstate or foreign commerce, of any grain for which standards shall have been fixed and established under this act describe, or in any way refer to, any of such grain as being of any grade other than a grade fixed therefor in the official grain standards of the United States.

That any person who shall violate any of the provisions of this section shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not more than $500.

Mr. GRONNA. Mr. President, I shall detain the Senate but a moment.

I said when this measure was first presented to the Senate that I should prefer to have all the provisions following section 3 stricken out unless the measure should be amended. I am glad to say that those who are in charge of the bill have been generous enough to accept amendments which I believe are very beneficial.

As I said when I tried to analyze this bill the first day it was being discussed, it would have been impossible for the people of my State to have shipped grain unless it had been shipped by sample or by type. Every bushel of grain sold by the farmers of my State, unless they ship it themselves, is bought and sold by grade. It is brought to the local elevator and there sold by grade.

But, Mr. President, the chairman of the committee has been generous enough to accept an amendment, which I believe takes care of that.

Another amendment has been accepted which prohibits the issuance of a license to those who are directly and financially interested in the grain trade. I believe that is one of the most important amendments accepted by the committee, and it is now incorporated in the bill.

Another amendment has been accepted which provides for a board of grain appeals. I may say, Mr. President, that I have discussed this matter with those who are supposed to administer this law if it becomes a law and I am told that there will be ample authority for the Secretary of Agriculture to appoint men at the terminals who would supervise the inspection of grain, and if it does not, my colleague has offered an amendment which has also been accepted by the committee which provides for at least one supervisor at every one of the terminals.

I said on yesterday that I believe that would hamper the Secretary of Agriculture. If this appointment is only in addition to the appointments which may be made by the Secretary then I believe it is right and proper. If it is not, I still believe that it is a limitation upon the power of the Secretary of Agriculture.

Mr. President, there is another amendment that has been adopted since the bill came to the Senate which allows the buyer or the seller to buy or sell grain and ship it regardless of grades, to ship it by type or to sell it by sample or by type. That is a copy of the Canadian law. I think it is important not only for the grain trade in the United States but it is important affecting the foreign trade. But I do not care to go into that because I do not wish to delay the proceedings of the Senate any longer.

If the bill had not been amended I should have voted to strike out everything after section 3 and amend section 3 in some respects, providing that these grades shall be the official grades of every contract both in interstate commerce and in foreign trade.

I believe, Mr. President, with the amendments which have been accepted and which are now incorporated in the bill it is a better bill than it would be to strike out everything after section 3 and make it only a standardization act.

I am simply making this explanation because I shall vote for the bill as it has been amended; and while I am on my feet I want to express my appreciation to the Senators from the South, and especially to the Senator from Georgia]Mr. SMITH[and the Senator from South Carolina [Mr. SMITH], who are my associates upon the Committee on Agriculture and Forestry. I know how anxious those Senators are to do something for the benefit and for the best interests of those who are engaged in agriculture. I also appreciate what the Senator from Georgia said yesterday, that he is willing to leave it to the Senators from the grain States to agree upon a bill that would be satisfactory to their part of the country.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Iowa [Mr. CUMMINS].

The amendment was rejected.

Mr. BRYAN. Mr. President, I offer the amendment, which I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Florida will be stated.

The SECRETARY. On page 19, after line 23, it is proposed to insert:

Provided further, That the unexpended balance of the appropriation of $300,000 for the emergency caused by the infectious nature and continued spread of the destructive disease of citrus trees, known as citrus canker, made in the further urgent-deficiency act approved February 28, 1916, is hereby reappropriated and made available for the fiscal year 1917.

Mr. SMITH of Georgia. Mr. President, in the consideration of this question, both in the subcommittee and in the general committee, we were under the impression that the bill as framed carried exactly the provision which the Senator from Florida [Mr. BRYAN] has just introduced. I do not understand why the Senator proposes the amendment. I know we had a consultation with the Secretary of Agriculture as to what the department would need, and he estimated that they would use the unexpended balance. We also gave him an additional sum which he desired outside of the unexpended balance. If there is any doubt about it, this amendment should be added, because that is what the committee propose to do; that was our intention; and that was in accordance with the calculation of the Secretary of Agriculture.

Mr. BRYAN. Mr. President, it is for the very reason that the appropriation lapses that I have offered the amendment.

Mr. SMOOT. I will ask the Senator from Florida how much of an unexpended balance is there?

Mr. BRYAN. About $75,000.

Mr. SMOOT. Does the Senator from Florida know why that sum was not expended?

Mr. SMITH of Georgia. The department merely did not finish the work.

Mr. BRYAN. I only know what was the report of the Secretary of Agriculture, and I know there is unexpended about $75,000.

Mr. SMITH of Georgia. I think we on the committee know more about it than does the Senator from Florida who was not present. We had an expert before our committee——

Mr. BRYAN. I have, however, read the hearings, Mr. President, and the title of the bill is not sufficient to carry that sum on into this fiscal year, as I understand.

Mr. SMOOT. That is true; I have not any doubt about that.

Mr. BRYAN. And it was the intention of the committee and of the Secretary of Agriculture to use that amount and to supplement it by the second amount here appropriated. I am trying to carry out that purpose.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from North Dakota?

Mr. BRYAN. I yield to the Senator.

Mr. GRONNA. I will say that, as stated by the Senator from Georgia [Mr. SMITH], it was the understanding of the committee—at least it was the understanding on my part—that the unexpended balance should be reappropriated for this particular purpose. Indeed, we had under consideration the question of doubling the appropriation, but that was not done. The committee, however, did agree that whatever balance there was unexpended should be used for the eradication of this disease of citrus canker.

Mr. SMITH of South Carolina. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from South Carolina?

Mr. BRYAN. I do.

Mr. SMITH of South Carolina. I think the proposition of the Senator from Florida is correct.

Mr. BRYAN. I do not think there is any doubt about it.

Mr. SMITH of South Carolina. We sent a communication to the Secretary of Agriculture, my recollection now is, making inquiry in regard to the matter, and I think he stated that this appropriation plus the unexpended balance was all he thought would be necessary. Does not the Senator from Georgia recall that?

Mr. SMITH of Georgia. There is no question about that. We simply made a mistake in not providing for it.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Utah?

Mr. BRYAN. I yield.

Mr. SMOOT. The first appropriation that was made for the eradication of the disease of citrus trees was in an urgent deficiency appropriation bill. That appropriation, I think, was $75,000 to carry on the work up to the end of that fiscal year. Last year there was an appropriation of $300,000 for this same purpose. What I am now trying to get at is, What is the use of appropriating $250,000, as this bill does, and appropriating $75,000 of an unexpended balance, making $325,000, if during the last year the department has only expended $225,000, and that, too, at a time when the disease was prevailing in its most virulent form?

Mr. SMITH of Georgia. Mr. President, any of us who were present at the hearing could answer that question, but as the Senator from Florida [Mr. BRYAN] is present, he also can answer it, of course.

Mr. BRYAN. The reason for this appropriation is very simple. In the winter, when there were not many rains, the disease seemed to be under control, and there was not as much money spent as it was thought it would be necessary to spend.

Mr. SMOOT. And that will happen again, will it not?

Mr. BRYAN. That will happen again, but now, since rains have come on, and the disease is beginning to again spread, they find the necessity for an additional expenditure. In the hearings which were held in May the condition was brought before the committee, and a representative of the Agricultural Department stated that they expected to have on hand at the end of the fiscal year something like $100,000, and that they felt sure an appropriation of $250,000, with the estimated amount, would be sufficient, although he expressed some doubt as to that, and stated that if it were not sufficient it would certainly carry the work through until Congress met at its next regular session.

Mr. GALLINGER. Mr. President, if the Senator from Utah will yield to me a moment, I desire to ask the Senator from Florida if his proposed amendment is not on all fours with one which was adopted the other day, which was submitted by the Senator from Massachusetts for the Senator from New Hampshire, reappropriating a sum for the suppression of the white pine blister rust, which appeared in the same bill as did the Senator's item?

Mr. BRYAN. That is true, Mr. President, and the Senator from New Hampshire and I investigated the question together as to whether or not the amount would lapse, and we came to the conclusion, after consulting with the Clerk of the Committee on Appropriations, that there was no question but that it would lapse. It is for that reason that I have offered the amendment.

I will say to the Senator from Utah that $325,000, in my judgment, is inadequate for the stamping out of this disease. I am disappointed that the Secretary of Agriculture did not ask for a greater amount. I offered an amendment to double the amount. Since February the Department have spent over $200,000 in four months, and yet they are expecting to go ahead through a whole year with $250,000. I do not believe it can be done; I have no idea it can be done, in view of the fact that the disease, while it has been controlled somewhat, has broken out in a great many places in several other States. When this appropriation was made, the disease had not been discovered in the State of Georgia; but it is there now, and it is also in all of the Gulf States.

Mr. SMITH of Georgia. It is now in Alabama, Louisiana, and Mississippi, as well as in Florida.

Mr. BRYAN. Yes; it has progressed as far west in Texas as San Antonio, and almost up to California. If it shall reach there, of course there will be a great deal more trouble.

Mr. SMOOT. Mr. President, I am quite sure the amendment ought to be adopted to the bill if the unexpended balance is to be used for this fiscal year. There is no doubt about that. The only question in my mind was whether it was absolutely necessary to reappropriate it. Last year $300,000 was appropriated. This bill appropriates $250,000, and there is an unexpended balance of $75,000.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Mississippi?

Mr. SMOOT. I shall do so in a moment, as soon as I get through with the sentence. Adding the unexpended balance of

$75,000 would make the appropriation amount to $325,000 for this year. Last year there was an appropriation of $300,000, only $225,000 of which was used. If it is now absolutely necessary that the amount of $325,000 shall be appropriated, I have not any objection at all, because I know that the disease is playing havoc with the citrus trees in the South, and far be it from me to make an objection to such an appropriation as would be sufficient to eradicate that dread disease. But I wanted some explanation as to why an appropriation of $325,000 was desired for this year when only $225,000 was expended last year.

Mr. VARDAMAN. Mr. President——

Mr. BRYAN. Mr. President, if the Senator from Mississippi will permit me, I wish to state here that $200,000 have been spent since February or March. In addition, the State of Florida alone expended $125,000 in six months, so that there has been spent $325,000 within the last fiscal year.

Mr. SMOOT. But that does not change the condition of affairs at all. No matter where the money was spent, it was only $225,000 which was expended.

Mr. BRYAN. Here is what Dr. Kellerman said in reply to a question propounded to him by my colleague [Mr. FLETCHER]:

Senator FLETCHER. I have only a few question in this direction. I would like to ask whether or not the doctor—

Who was Dr. Kellerman—

would agree with Mr. Newell—

Who was plant commissioner of Florida—

that some additional inspectors could be used.

Dr. KELLERMAN. Under the present situation there is no doubt that additional men are needed. I have just received a telegram this morning from Commissioner Newell giving details of the recent infections. Four new areas are found infected—

And so forth. Dr. Kellerman continues:

It will be immediately necessary to increase our force in the Elfers region by from 25 to 50 men, depending on how bad these infections turn out to be.

The CHAIRMAN. You say that ought to be increased how much?

Dr. KELLERMAN. From 25 to 50 additional men will have to be put in the field.

So the conditions are really as bad as they were when the work started. They are controlled in the places where it was discovered, the places of infection, but the disease has broken out in new places. There have been some 800 or a thousand places of infection. There have been a half million nursery trees destroyed and a half million row trees destroyed in Florida alone. In Texas they have a force of 86 men, in Mississippi 14, in Louisiana 19, in Alabama 59, in Georgia 3, and in Florida 294.

Mr. VARDAMAN. Mr. President, if the Senator from Utah will pardon me for a moment, I will say that the record shows that the manner of using this appropriation convinces me that it is being used with prudence. That the amount asked for by the department is needed, and needed badly, I think there is no question whatever. It seems to me if the department has made a mistake at all it was in not asking for more, because the sooner this disease is eradicated the better; and the only way to eradicate it is to take hold of it and extirpate and destroy it. You can not temporize with it; and the more money you have got to spend, the more people you have at work, the sooner you will exterminate the germ and the greater will the economy be to the people of the United States and the Government, because it is manifestly the purpose, as it is the duty of the Government, to eliminate this evil which is destroying millions and millions of dollars worth of property. I hope there will be no objection to making this money available. Now, only a small portion of my State along the Gulf coast is affected by it; but it means, unless the disease shall be exterminated, the destruction of the citrus fruit industry of the United States is inevitable. In the face of such a disaster the Senate, I am sure, will act with great circumspection. There is too much at stake for the Senate to do anything hastily or without due consideration. The appropriation carried in the bill is needed, and I hope it will be agreed to.

Mr. SMOOT. Mr. President, I agree with everything the Senator from Mississippi [Mr. VARDAMAN] has said. I agree that the disease ought to be taken in hand with vigor and all the energy possible should be expended to eradicate it, because the sooner it is eradicated the better it will be for the entire country. I agree with the Senator that if it will take more than $325,000 to bring about that result the department ought to have it. The only question that brought me to my feet was——

Mr. FLETCHER. Mr. President, will the Senator allow me?

Mr. SMOOT. In just a moment I will yield to the Senator. The only question in my mind was that while we appropriated $325,000 for this purpose last year——

Mr. BRYAN. This year.

Mr. SMOOT. Last year; that is, for the fiscal year ending June 30, 1916.

Mr. BRYAN. The appropriation was made in February.

Mr. SMOOT. The appropriation of $300,000 expired on June 30 of this year.

Mr. BRYAN. But it was made in February of this year.

Mr. SMOOT. That may be true, but of the $300,000 only $225,000 was expended, leaving an unexpended balance of $75,000. I thought if they did not use $300,000 there was no necessity whatever of appropriating $325,000. However, there is no need of discussing the subject further. If Senators say that the department claims that $325,000 is necessary, and that is the sum they want, I have not another word to say.

Mr. SMITH of Georgia. Mr. President, not only is that true, but in one word I can tell the Senator why it is true. They have to train their force, and a large force is required. At first, as stated by the representatives of the department, they did not have a force that understood how to do the work. It is also true that the disease has spread into other States, and the department needs more men to do the work now. For the committee we accept the amendment, as far as we can.

Mr. FLETCHER. Mr. President, I was just going to say that in considering the amount of the appropriation for this purpose to go into this bill it was kept in mind by the committee that the former appropriation had been made, and it was estimated that that appropriation would be entirely exhausted. So the amendment now offered is simply to exhaust the appropriation which the committee assumed would be exhausted in addition to the appropriation carried by this bill. The amendment does not carry any new appropriation.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Florida [Mr. BRYAN].

Mr. STERLING. I ask that the amendment be stated.

The PRESIDING OFFICER. The Secretary will again state the amendment.

The SECRETARY. On page 19, line 23, after the word "destroyed," it is proposed to insert:

Provided further, That the unexpended balance of the appropriation of $300,000 for the emergency caused by the infectious nature and continued spread of the destructive disease of citrus trees known as citrus canker, made in the further urgent deficiency act, approved February 28, 1916, is hereby reappropriated and made available for the fiscal year 1917.

Mr. STERLING. Mr. President, I offer the amendment, which I send to the desk, as a substitute.

Mr. FLETCHER. Mr. President, as I understand, the amendment offered by my colleague has been adopted.

The PRESIDING OFFICER. No; it has not yet been adopted. The Senator from South Dakota has offered a substitute for it, which the Secretary will state.

The SECRETARY. On page 19, after the word "and," in line 13, it is proposed to strike out the remainder of line 13 and all of lines 14, 15, 16, 17, 18, and 19, down to and including the word "purposes," and to insert:

for communicating and distributing to citrus-fruit growers in the United States the results of such investigations, together with such recommendations as to the eradication or control of such disease as in the judgment of the Secretary of Agriculture may be necessary, $150,000; and the Secretary of Agriculture is authorized to pay such expense and employ such persons and means in the city of Washington and elsewhere, and to cooperate with such authorities of the States concerned, organizations of growers, or individuals as he may deem necessary in the conduct of such investigations and the distribution of information relative thereto"; so that the paragraph, beginning with line 11, shall read:

"For conducting such investigations of the nature and means of communication of the disease of citrus trees known as citrus canker and for communicating and distributing to citrus-fruit growers in the United States the results of such investigations, together with such recommendations as to the eradication or control of such disease as in the judgment of the Secretary of Agriculture may be necessary, 150,000; and the Secretary of Agriculture is authorized to pay such expense and employ such persons and means in the city of Washington and elsewhere and to cooperate with such authorities of the States concerned, organizations of growers, or individuals as he may deem necessary in the conduct of such investigations and the distribution of information relative thereto."

Mr. BRYAN. Mr. President——

Mr. STERLING. I yield to the Senator from Florida.

Mr. BRYAN. Does the Senator offer that as a substitute for the amendment which I have offered?

Mr. STERLING. Yes.

Mr. BRYAN. The Senator's amendment, as I understand, is to the text of the bill. My amendment comes after line 23. I suggest to the Senator that he allow the amendment to be acted upon, and then his amendment will apply.

Mr. STERLING. Very well; I think that is the proper order.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Florida [Mr. BRYAN].

The amendment was agreed to.

The VICE PRESIDENT. The question now is on the amendment offered by the Senator from South Dakota [Mr. STERLING].

Mr. STERLING. Mr. President, I desire to offer a few observations——

Mr. VARDAMAN. Will the Senator permit the amendment to be stated?

Mr. STERLING. The amendment has been stated, but I have no objection to the Secretary again stating it.

Mr. VARDAMAN. I withdraw the request.

Mr. STERLING. Mr. President, I am quite aware that in an appropriation bill carrying $23,000,000, as does this bill, the saving of a few hundred thousand dollars, or even of a million, is a matter of apparently little consequence. As we approach the consideration of items in the bill which run into the hundreds of thousands we are apt to think that an addition of $10,000, more or less, to any such item is not very material, and that he who is inclined to protest is parsimonious and lacking in that liberal spirit which should characterize gentlemen who deal in millions.

But, Mr. President, it is the items that go to make up the grand aggregate. Economy must begin, if at all, in some scrutiny of these individual items. And there will be no scrutiny unless we have some patience with details and a mind to study the item in connection with the circumstances and the supposed public need which alone can justify the item.

So we can not quite escape our responsibility by denouncing the bill in general terms or the appropriations as a whole or the unsatisfactory system under which all general appropriation bills are formulated and presented to us here for our consideration. The system is yet with us, and this bill is one of its products. It is impossible to change the system now and adopt a more scientific one. Some future Congress may ignore the activities of departments and their readiness to encourage anything that promises departmental expansion and declare for a budget, but certainly not the Sixty-fourth Congress.

So the practical question is, How shall we deal with the problems actually before us and in the form in which they come? The estimates of the departments should, as long as we are under this system, furnish some guide, but they should not be our only guide. As already intimated, the departments are always ambitious to extend their activities, not that the heads of departments or the heads of bureaus in departments willfully and knowingly enter upon projects involving waste and not demanded by the public welfare, but they are ever ready to listen to suggestions coming from particular sections or special interests and to in turn give assurance that a given enterprise is within the scope of the department's activities, and if Congress but opens the purse they will do the rest.

No department compares with the Department of Agriculture in this respect. What with its Weather Bureau, its Bureau of Animal Industry, of Plant Industry, of Soils, of Chemistry, of Entomology, of Biological Survey, of Crop Estimates, its Office of Public Roads and Rural Engineering, of Markets and Rural Organization, it takes cognizance of everything cast upon the earth or that grows out of the earth, or that walks upon the earth, "of every living thing, of all flesh, * * * of fowls after their kind, and of cattle after their kind, of every creeping thing after his kind"—both male and female—it studies them all and instructs us which to conserve and which to destroy; it looks after the corn—first the seed, then the blade, then the ear; after that the full corn in the ear; after that the road to the corn market, and then the market itself. Time forbids more than this slight mention of the activities of this great and, I will say, too, beneficent department, and of the interests it serves.

As I look through this bill, however, in many respects a duplicate of previous appropriation bills, the term "special interests" becomes somewhat vague and shadowy or else has lost its once familiar meaning. Manufacturing, commercial, and transportation interests or corporate business interests generally have been all along regarded as special interests. They were the interests against which the shibboleth of the farmer was directed. Equal rights to all; special privileges to none. As against such special interests, especially as their business is interstate, we have enough restrictive and regulatory Federal legislation to fill a volume. Of this I am not complaining; but glancing over the bulky Agricultural appropriation acts of recent years, together with this bill of 127 pages, I find enough for two volumes of congressional legislation enacted and proposed for the benefit of other interests, such as those of the cattleman, the sheepman, and the raiser of swine, for the grower of corn, of cotton, who is a favored beneficiary, or wheat or fruit, and even for the man who keeps a hen house. It compasses the whole range of the agricultural industry even to minutest details. As though there was some fear that the husbandman's contest with nature might prove to him an unequal contest if left to his own devices, with no other help than his own hands and brain, a great and beneficent Government donates its many millions and summons the highest expert knowledge and all the resources of science and invention to aid him in combating every natural foe of every plant or animal product in which he is interested.

Those who hear will bear witness with me that every succeeding Agricultural appropriation bill enlarges and extends the sphere of Government activities for the benefit of the farmer, the stockman, and the horticulturist. Nor are the benefits confined to Agricultural appropriation bills proper. We remember something about the most liberal and generous appropriations in the agricultural college extension act.

I remember that as an argument in favor of free trade or the greatly reduced tariff provided for by the act of 1913 it was urged that competition with foreign-made goods would so sharpen the wits of our own producers that they could devise the means or methods to meet it, and in the end would suffer no loss. But with the producer it was too much a question of cold figures, the effect of which, the lesson of which, no wisdom of his could withstand or deny. Having exhausted his ingenuity in seeking to reduce the cost of production and in finding a fair or living market for his product, he was obliged to submit to the inevitable and close down or run on half time to the great detriment, of course, of both himself and his men.

But, Mr. President, while "necessity is the mother of invention," and difficulties but stir men of energy and determination to greater effort, there is another field than that of manufacturing in which the principle laid down in the argument for free trade is more applicable—a more elemental field—the farmer's field. There experiments are not at an end. Breeds in stock, varieties in grains and fruits may be further improved. Scientific farming will bring a better yield in quality and quantity.

While not disparaging the help the Department of Agriculture has been, it is well to remember that agriculture itself had reached a high state of development before there was such a department; that the needs and exigencies of the industry had found new machinery, new methods, new ways of conserving the soil; it knew something about how to cope with both animal and plant diseases, and unmistakably had learned something about the eradication of weeds—either with the hoe, the scythe, the cultivator, or, when too "close to the hill," with the hand. And so, unaided by Government appropriation, there had developed in the United States a strong, hardy, self-reliant, and most reliable class—the agricultural class. I venture to say that the most important and effective work done by the Agricultural Department is the collection and dissemination of knowledge gained from a study of the methods of the more advanced and progressive farmers.

But the department does not consider its functions as so limited. Already a colossus, it grows by what it feeds upon. These successive appropriation bills show the growing paternalism. The Department of Agriculture undertakes the solution of every problem, the relief from every untoward condition, and would leave nothing which the farmer may think out for himself or on which to "whet his wits." It would deprive him of the strength and the pride which comes from independent individual achievement. I am reminded of some things said some years ago by Mr. Whitelaw Reid, our former distinguished ambassador to Great Britain and editor for some time of the New York Tribune, in an address delivered by him on The Strength of the Republic. Respect for authority and individual initiative were the two cardinal principles, according to Mr. Reid, on which depends the strength of the Republic.

Mr. VARDAMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from Mississippi?

Mr. STERLING. I do.

Mr. VARDAMAN. Will the Senator, just at this point in his very interesting discourse, point out one single instance where the Agricultural Department has done anything that has taken the initiative from the farmer? Everything it has done, so far as I have been able to observe—and I have paid some attention to it—has been cooperative. It has been rather to assist the farmer, to suggest to the farmer, to encourage the farmer in the evolution of plants and the development of systems of cultivation, all of which tends to the betterment of the farmer's condition and adds to the total wealth of the American people.

Mr. STERLING. Mr. President, the amendment I have offered, I think, is suggestive of the thing I am contending for here, and a couple of other amendments that I hope to be able to offer represent the same principle. I think these amendments themselves will indicate, and what I may have to say

very briefly in regard to them, that the farmer is not left enough to his own initiative. The Government, in addition to disseminating the knowledge and giving him the instruction—all of which is proper and most commendable—does in some cases the work which the farmer or fruit grower himself ought to do.

Mr. VARDAMAN. How does it do the work? In what way?

Mr. STERLING. It does the work in exterminating the citrus-fruit canker, for one thing—the subject to which my present amendment is directed.

Mr. VARDAMAN. The Government only renders assistance, you know. It does not do the work itself or have the work done. The agent of the Agricultural Department goes among the farmers and instructs them how to plant and how to cultivate and how to select their seed, and all that. The Government does not do the work. It only assists by directing the farmer in doing the work himself. There is no question about the beneficence of the policy, for by its fruits you must judge it.

Mr. STERLING. Here is the quotation from the address of Mr. Reid. He says:

> We found the individual initiative in the necessities of an untamed continent; were driven to it, shut up to it at every turn in the imperative beginning of orderly self-government at a thousand isolated spots; in the long, protracted struggle with wild lands, wild beasts, and wild men—till it became the inheritance of the race, till under its stimulus men found their solitary way through trackless woods to make lonely clearings or start frontier settlements across the Alleghenies, through trackless prairies to possess the Mississippi Valley, through alkali deserts to wrest their gold from the mountains, and at last through the Sierras to scatter up and down the enchanted shore of the Pacific. To such a continental conquest of nature and of men have those two traits of the fathers brought us—their respect for authority and their widest freedom of individual initiative.

Mr. President, I think it is this freedom of individual initiative that these prodigal and multitudinous appropriatons tend to destroy. Let us keep on at this pace, and all the pride we have taken in the achievements flowing from individual initiative and the strong, vigorous, self-reliant spirit of the farming classes will be but a memory, and instead there will grow up a habit of dependence on government for aid in overcoming every difficulty, and there will be a resulting loss of that healthy mental and moral fiber which is the best guaranty of our stability and of our true progress.

I do not want to be understood as speaking in disparagement of much of the work—I will say the greater part of the work—of the Agricultural Department. It has accomplished great things. But the tendency, and especially in these latter years, is to overdo, and to enter upon those things for which there is no need and for which there is no general demand.

Mr. President, we do not own the millions which we appropriate. We are rather, in a very large sense, the trustees of the millions, not for special interests, but for the whole people, on whom we in turn call to provide the means out of their property, their income, and their toil.

It seems to me almost farcical to talk about economy, however, in the face of some of the items in this appropriation bill. At a time when we are talking economy, at a time when there is great need for economy, at a time when necessary increases in appropriations will amount to several hundred millions, at a time when we will soon, in a few days, be confronted with a revenue bill which will propose new methods of taxation, and give us some new subjects of taxation, probably—at such a time we find these greatly increased appropriations in the Agricultural bill. One question now is, where we have in certain items appropriated outright without asking for any cooperation on the part of the community or the State which is primarily benefited, whether we shall not ask that State or that community to cooperate with the General Government and spend something itself toward the particular interest for which the appropriation is made. Another proposition is, just as in this citrous-canker appropriation, to which my amendment is directed, whether the citrus-fruit grower should not be satisfied under these conditions, when, as I say, there is such need for economy, to let the Government appropriate the money for investigation and instruction through agents or otherwise, leaving the citrus-fruit growers themselves to do the work.

There is one industry here, Mr. President, in which I am interested, perhaps, or the people of the West and the Northwest are interested, and that is the dairy industry.

You provide $277,000 for that industry, for investigations in it, and for work done by the department in it. Mr. President, I would not favor striking out the appropriation, but would provide that the State or county or other agencies in the State should contribute as much as the General Government to investigations for the benefit of that industry, which is primarily for the benefit of the people of the State. I would provide, as I have provided in the amendment which I propose to offer, that no part of the appropriation here shall be available until the Secretary of Agriculture is satisfied that the local authorities will contribute as much as the General Government contributes.

Mr. GALLINGER. Mr. President, will the Senator permit me?

Mr. STERLING. Yes; I yield to the Senator from New Hampshire.

Mr. GALLINGER. It seems to me that in these appropriations we are getting in the habit of practically duplicating many of them. For instance, I turn to page 70. I find four items there regarding road building. For inquiries in regard to systems of road management throughout the United States and for giving expert advice on this subject there is an appropriation of $39,540. For investigations of the best methods of road making, especially ordinary sand-clay, and dirt roads, and the best kinds of road-making materials, and for furnishing expert advice on road building and maintenance there is an appropriation of $142,780. For investigations of the chemical and physical character of road materials there is an appropriation of $42,780.

Mr. STERLING. From what page is the Senator reading?

Mr. GALLINGER. Page 70. "For conducting field experiments in various methods of road construction and maintenance, and investigations concerning various road materials and preparations," and so forth, there is an appropriation of $60,000. There is $280,000, or thereabouts, for this purpose, and if anyone is wise enough to differentiate as to the work that is to be done under those different items it is more than I can do. It seems to me that it is a practical duplication of work.

Mr. STERLING. And especially, Mr. President, would that seem true in regard to the second and third items which the Senator from New Hampshire read.

Mr. GALLINGER. Yes.

Mr. STERLING. Where they are to investigate, in the first of the two I mention the best kinds of road-making materials, and in the next they are to make investigations of the chemical and physical character of road materials.

Mr. GALLINGER. It looks to me like a duplication of the work.

Mr. STERLING. Now, Mr. President, calling attention to the particular amendment which I have introduced, I wish to state to the Senate just what it proposes to do. The paragraph beginning with line 11 on page 19 provides:

> For conducting such investigations of the nature and means of communication of the disease of citrous trees, known as citrous canker, and by applying such methods of eradication or control of the disease as in the judgment of the Secretary of Agriculture may be necessary, $250,000.

The amendment I propose strikes out the word "applying," so that the application of the remedies proposed by the Secretary of Agriculture shall be left to the citizens, the owners of citrous trees, those who grow the fruit. It seems to me that in these times the Government ought not to be called upon to do the work of actually going out and cutting down the citrous-growing trees and burning them, but that that much, with the advice and with the help of the Department of Agriculture, ought to be contributed by the people who are to be affected by this appropriation.

Mr. BRYAN. Mr. President, much of the Senator's carefully prepared and written-out extemporaneous speech refers to the bill as a whole. Only in the last sentence or two did he refer to the particular item in the bill covered by his amendment; and in his reference to that, Mr. President, the Senator displays the fact that he is ignorant of the nature of this disease.

It is not much trouble to cut down an orange tree, or to set it afire. Any farmer could do that; but if he undertook to do that, he would spread the disease. The Department of Agriculture has discovered that the only way to destroy the tree so as not to spread the disease is to leave it standing, to take experts to spray it and to burn it as it stands there, without its being touched by anybody. That is a class of work that the ordinary farmer can not perform. It is a class of work that nobody can perform unless he is taken in hand and given about three weeks instruction, according to the statements made before the committee.

I shall not refer to the matter any further. I think the basis upon which this appropriation is asked is very well understood by the Senate.

The VICE PRESIDENT. The question is on the amendment of the Senator from South Dakota.

The amendment was rejected.

Mr. STERLING. I now offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 13, at the end of line 24, after the numerals "$277,470," it is proposed to add the following proviso:

Provided, That no part of this appropriation shall be available for investigations and experiments in the dairy industry in any State until assurances satisfactory to the Secretary of Agriculture shall be given that such State or the proper county authorities or other agencies within the State will provide and contribute a sum equal to 50 per cent of the amount required for such work, and that of the above appropriation no greater part shall be expended than a sum which, together with the amount so provided and contributed by or under the authority of the State, county, or other agencies within the State, may be necessary for such work of investigation and experiment.

Mr. STERLING. Mr. President, just a word with reference to this amendment. I do not think this amendment particularly affects Senators from Southern States. More particularly it will affect the Senators from Northern, Western, and perhaps some of the Eastern States.

While the term "cooperative" is used in the paragraph sought to be amended, my amendment provides for real cooperation. It provides for an expenditure on the part of the State, on the part of the community, the county or the dairy interests themselves within the State, of an amount equal to that expended by the Government.

Mr. President, primarily the investigation and all work done by the department is in the interest of the people there, and they ought to be willing to make a contribution on their part to the experiments conducted by the Government. So I have provided in the amendment that no part of this sum of $277,470 shall be available until the Secretary of Agriculture is satisfied that the State or the community within which the investigation is to be carried on will itself provide and contribute as much as the Government does.

It seems to me that is eminently fair and just. It lightens the burden to be borne by the Government, and it simply calls upon the State to contribute what it justly should contribute.

Mr. CLAPP. Mr. President, will the Senator pardon me?

Mr. STERLING. I yield to the Senator from Minnesota.

Mr. CLAPP. I did not notice, in the reading of the amendment, whether the amendment is limited to contributions for the inspection of renovated-butter factories and markets, or whether it applies to the investigations and experiments in the dairy industry.

Mr. STERLING. I will say to the Senator that the amendment applies to the investigations and experiments in the dairy industry. It does so in terms and does not relate to the latter part of the paragraph, the inspection of the renovated-butter factories and markets.

Mr. CLAPP. Does it relate to the first item, "for all necessary expenses for investigations and experiments in dairy industry"?

Mr. STERLING. I think it does.

Mr. CLAPP. Then I think it very unfortunate. Unfortunately, whoever wrote this bill added some language here in order to make it cover everything, and that same objection is often seen in the bill.

Primarily, there was an appropriation for the department to make investigations and experiments in dairy industry, which is a very proper thing for the department to do, entirely disassociated with any State activity or any State contribution. Unfortunately, then, somebody desiring to make it as elastic as possible added "cooperative investigations of the dairy industry in the various States, inspection of renovated-butter factories and markets."

If the Senator's amendment applies to the entire section it would simply paralyze the Department of Agriculture in its efforts to make investigations and experiments in the dairying industry—something it ought to make without any reference to any State cooperation, and something that it can not very well make in conjunction with State cooperation.

Mr. STERLING. Mr. President, I appreciate the force of the remarks of the Senator from Minnesota, and yet I am not so sure but that the amendment should apply to all investigations and experiments in dairy industry. However, I think the terms of the amendment show that it is to be applied only to those States in which cooperative investigations are carried on. The amendment surely relates to States and communities within the States.

Mr. CLAPP (reading)—

Provided, That no part of this appropriation shall be available for investigations and experiments in the dairy industry in any State until assurances satisfactory to the Secretary of Agriculture shall be given that such State or the proper county authorities—

The Senator, I think, is correct. It would only apply to investigations in the industry in the various States.

Mr. STERLING. I think so.

Mr. CLAPP. And that ought to be stricken out of the bill anyway, probably.

Mr. STERLING. I think that is all I have to say in regard to the amendment, Mr. President.

The VICE PRESIDENT. The question is on the amendment of the Senator from South Dakota. [Putting the question.] By the sound the noes seem to have it.

Mr. STERLING. I call for a division on that proposition, Mr. President.

The VICE PRESIDENT. All in favor of the amendment will rise. [A pause.] Those opposed will rise. [A pause.] The amendment is agreed to.

Mr. STERLING. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 13, beginning after the words "dipping vats," in line 11, it is proposed to strike out all down to and including the word "Industry," in line 18, on said page, and to insert the following words:

or for the purchase of materials or mixtures for use in dipping vats, but that the expense of such construction and of the purchase of all such materials shall be borne by the State, county, municipality, or other agency within the State in which such experimental or demonstration work in the eradication of southern cattle ticks is carried on by the officials or agents of the Bureau of Animal Industry.

Mr. VARDAMAN. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Gronna	Norris	Smith, S. C.
Borah	Harding	O'Gorman	Smoot
Brady	Hardwick	Oliver	Sterling
Broussard	Hitchcock	Overman	Swanson
Catron	James	Owen	Thomas
Chamberlain	Johnson, S. Dak.	Pittman	Thompson
Chilton	Jones	Poindexter	Tillman
Clapp	Kenyon	Ransdell	Underwood
Clarke, Ark.	Kern	Shafroth	Vardaman
Culberson	La Follette	Sheppard	Wadsworth
Cummins	Lane	Sherman	Walsh
Curtis	McCumber	Simmons	Williams
Fletcher	Martine, N. J.	Smith, Ariz.	Works
Gallinger	Nelson	Smith, Ga.	

Mr. KERN. I desire to announce the unavoidable absence of my colleague [Mr. TAGGART]. This announcement will stand for the day.

Mr. WALSH. My colleague [Mr. MYERS] is absent, his absence being due to continued illness.

The VICE PRESIDENT. Fifty-five Senators have answered to the roll call. There is a quorum present. The pending question is on the amendment offered by the Senator from South Dakota [Mr. STERLING].

Mr. STERLING. Mr. President, in the event of the adoption of the amendment I have offered the entire first proviso in the second paragraph on page 13 would read as follows:

Provided, however, That no part of this appropriation shall be used in the purchase of materials for or in the construction of dipping vats upon land not owned solely by the United States, except at fairs or expositions where the Department of Agriculture makes exhibits or demonstrations; nor shall any part of this appropriation be used in the purchase of materials or mixtures for use in dipping vats except in experimental or demonstration work carried on by the officials or agents of the Bureau of Animal Industry.

It will be seen that the entire appropriation, Mr. President, provided for in the bill, as presented by the committee, is $782,400. I was interested in seeing what the estimate had been in regard to this work of eradicating the southern cattle tick and I find that the estimate is $582,400. The amendment of the committee, therefore, increases the estimate just $200,000. The estimate made by the department is for the most part for salaries. As I remember that estimate, $431,000 is for salaries to be paid agents and inspectors engaged in the work of eradicating the cattle tick.

Mr. SMITH of South Carolina. The Senator said a moment ago that the estimate is $582,400.

Mr. STERLING. $582,400.

Mr. SMITH of South Carolina. According to the figures furnished by the clerk of the committee and also to the committee when we were investigating it, the amount estimated for by the department was $657,400, and by the House $632,400. The amount last year was $438,800. The amount for live-stock demonstration work provided by the House was $50,000, and the estimate was $75,000, which we did not change.

If the Senator will allow me right in this connection, I want to say that in the State of South Carolina I have had some personal experience with this matter. My county was within the tick zone. I had some doubt as to the practicability of this work and what they claimed. My own herd of cattle now are absolutely clean of the ticks. They have not appeared within

nearly two years, and in that county alone I believe enough value in live stock has been preserved and saved by this process to go largely to pay for the amount here appropriated. You must remember that we have a vast zone where cattle are liable to be infected where this tick is indigenous, and I think this is a very modest sum.

Mr. WADSWORTH. With the consent of the Senator from South Dakota, may I ask the Senator from South Carolina a question?

Mr. STERLING. I yield.

Mr. SMITH of South Carolina. With pleasure.

Mr. WADSWORTH. I am very much interested in the personal experience the Senator has had with respect to the matter. Will he tell the Senate whether the Federal Government is building dipping vats in which the cattle are to be dipped?

Mr. SMITH of South Carolina. They did not; they depended almost entirely on spraying them. They found that that was available and was adequate. I furnished the hands and they furnished the man.

Mr. WADSWORTH. Will the Senator yield for another question? Does he know whether the Federal Government in his community in the zone with which he is familiar built any dipping vats?

Mr. SMITH of South Carolina. I do not think they did. If they did, I am not aware of it; but I do not think they did.

Mr. WADSWORTH. I asked the question because, as I understand it, the amendment provides, in effect, that the Government shall not build dipping vats or supply the material therefor.

Mr. SMITH of South Carolina. The bill provides that they shall be built only upon Government land.

Mr. WADSWORTH. Except at fairs and expositions.

Mr. SMITH of South Carolina. That would not cost very much. It would be only for a temporary use and would be an effective way of demonstrating it, because people are there gathered together, and one vat would demonstrate to the vast crowds who come the practicability of putting them on their own private property.

Mr. WADSWORTH. If I may be permitted to interpolate a remark, it seems to me almost inconceivable that the officials of any of our State fairs would allow a dipping vat to be placed on their grounds and having cattle driven there to be disinfected. Furthermore, it is impossible to build a temporary dipping vat of any different material from a permanent one. It takes quite a vat to hold a steer.

Mr. SMITH of South Carolina. That may be true; I am not familiar with that part of it; but, if the Senator will allow me, I think an ocular demonstration of the feasibility of it would be worth a great deal. I do not know about the cost of putting in a vat, but I think a sample vat—one that perhaps would not be required for a great herd—would be quite an educative process. At any rate I do not know of anything in all that southern zone, where cattle are liable to this infection, where there has been such a practical result as in tick eradication.

Mr. STERLING. Mr. President, I do not doubt but that the work of the Government in the eradication of the southern cattle tick has been of the greatest benefit, nor would I deprive the people interested in the raising of cattle of the benefit of Government work, Government demonstration, Government investigation; but I would have the people of the community in the States interested contribute something to this work and not leave it all to be done at Government expense.

Mr. President, reference was made a moment ago by the Senator from South Carolina to the estimates. I take my figures from the Book of Estimates for the year 1917, and the estimates by the department there are $582,400. As I said, $431,000 of this amount is paid out in salaries to 416 Government inspectors, agents, and veterinarians. An army of 416 men is employed in that work now, and they estimate for that number of men for the fiscal year 1917. For what is the extra $200,000 added by the committee? It must be for the building of vats and for the purchase of material for use in the vats.

Mr. SMITH of South Carolina. If the Senator will allow me, as he is making these objections I know his object is to get the greatest good out of this appropriation and to justify this appropriation or to prove that it is not justifiable. The process is to divide a county up into certain districts and to send an agent with the proper ingredients, because they have found that where these chemicals are not properly mixed it may destroy the cattle, for if they make it too strong it burns them. I think some claims have been made against the Government and that they have been paid on that very account.

These men have a territory over which they have to go. Almost every one has three or four or five, and some have greater herds. In order to eradicate the tick from a certain area every single animal in that zone or in that area has to be visited, as the ticks have to be taken from it. As soon as they are all destroyed during the breeding period, in the course of three years they declare that herd immune, and in my experience they do not come back. Therefore, it takes a vast number of men who understand it. I do not believe there is an appropriation in this bill that is any more justified by results than this one.

Mr. STERLING. Mr. President, I only proposed to cut down the appropriation $200,000. I will say to the Senator I propose to leave as much appropriated as the department has estimated for, $582,000. I have before me the Book of Estimates, and the entire appropriation for the year 1916 was $388,800. The total estimate for 1917 is $582,400, according to the Book of Estimates.

Mr. SMITH of South Carolina. The Senator is talking about a particular paragraph. Here is the Book of Estimates sent out for all necessary expenses, and I read from page 41:

> General expenses, Bureau of Animal Industry—continued.
> For all necessary expenses for the eradication of southern cattle ticks, $438,800—

That was last year, now "$657,400."

Then it goes on and specifies how that should be divided, and the estimate from the department is $657,400.

Mr. STERLING. Mr. President, it may be that that is the estimate of the department, but I have the figures in detail here, showing the number of veterinary surgeons, the number of inspectors, the number of agents employed in this service, making a total of 416. Here are 27 veterinary inspectors, at $1,800 each; 26 veterinary inspectors, at $1,620 each; 8 agents in tick eradication, at $1,380 each; and down further I find 83 agents in tick eradication, $1,200 each; 65 agents in tick eradication, at $1,000 each; 47 agents in tick eradication, $900 each, and so on, numerous others given at stated salaries for each, according, I suppose, to their class or grade.

There is the force employed by the Government in this service. There is force enough, I will say to the Senator from South Carolina, it seems to me, in these 416 men to cover the entire field, and there is no need of an appropriation for any more men. The Government has furnished what the department estimated, the number of men, with the stated salaries to be paid each man here. Then, in addition to the $431,000 for salaries, there is $139,000 for traveling expenses; for supplies and equipment, $5,000; for miscellaneous expenses, $7,400, making a total of $582,400, as against $388,800 for the last year.

The only way in which I could figure it out that $200,000 more was needed than this $582,000 was for the purpose of buildings and for buying materials for use in the dipping vats. The bill provides that—

> *Provided, however,* That no part of this appropriation shall be used in the purchase of materials for or in the construction of dipping vats upon land not owned solely by the United States, except at fairs or expositions where the Department of Agriculture makes exhibits or demonstrations; nor shall any part of this appropriation be used in the purchase of materials or mixtures for use in dipping vats except in experimental or demonstration work carried on by the officials or agents of the Bureau of Animal Industry.

I had not thought of the objection interposed by the Senator from New York [Mr. WADSWORTH] to the building of vats at State fairs and expositions and the danger there was in it so far as that is concerned, but evidently the $200,000 is meant to be used in the construction of vats or in buying materials for use in the vats at such places as the Government intends to construct the vat under this appropriation bill.

Mr. President, my sole contention is simply this, that if the Government contributes $582,400 in paying salaries and in furnishing equipment for building vats, and so forth, the people themselves who are interested ought to furnish the $200,000, if that is necessary, to construct the vats. They ought to make that much of a contribution. Otherwise it is paternalism pure and simple, and the Government with its mighty arm is going down there into the South and doing everything, paying all the salaries and constructing the vats and paying every cent of the expense for eradicating the southern cattle tick. It is one of the faults I find running through this bill; it is a fault in regard to the citrus-fruit appropriation. It seems to me that people ought to be energetic enough, and I will put it stronger than that, they ought to be patriotic enough in this time of need for great economy to do that much to assist the Government in bearing this burden.

Mr. SMITH of South Carolina. Mr. President, I am very sorry that the question of section has been injected into this argument, because I am persuaded that the Senator in his eloquence against my section has forgotten——

Mr. STERLING. If the Senator will pardon me, I do not intend to refer particularly to a section. The dairy industry in regard to which my amendment was adopted a while ago is not an industry peculiar to one section, and I said, with reference to

that, that the people ought to cooperate with the Government and contribute as much as the Government does toward investigations for the dairy industry.

Mr. SMITH of South Carolina. I should not have said what I did had not the Senator specifically referred to the South in the eradication of the cattle tick and in the protection of the citrus industry. I wondered if the Senator had forgotten that within the last year, I believe, the foot-and-mouth disease broke out in a section other than the South, and not $672,000 but something like $3,000,000 was appropriated to stamp it out. There was an estimate made of over $4,000,000 to reimburse those whose herds were destroyed.

Mr. STERLING. That was a disease peculiar to no section, but was universal over the whole United States, so there could not be the same concentrated effort in coping with that disease as there can be with this.

Mr. SMITH of South Carolina. It may have become universal in time, but at the time it happened not to be, and there was no sectional line drawn. It is also true of the cattle tick from the South that when the cattle are shipped from the South to the North with ticks on them they convey what is called the Texas fever.

I want to call the Senator's attention also to the hog cholera. It is notorious that the corn belt is the great meat belt, and when the hog cholera appeared there there was a plea made here for a million dollars to stamp it out. I heard no man then raise the cry that we were appropriating a million dollars for the purpose of conferring a benefit upon one section as against another.

Mr. WORKS. Mr. President, I wish to remind the Senator that I very earnestly opposed that appropriation. I do not want the Senator to say that nobody was opposed to it.

Mr. SMITH of South Carolina. I said that when it was asked for this section nobody opposed it as being sectional.

Mr. SMITH of Georgia. On sectional grounds.

Mr. SMITH of South Carolina. Mr. President, I deplore the fact that sectionalism has entered into this debate at all. We are not any more responsible for the presence of that insect than you were for the presence of the foot-and-mouth disease, and I was just as loyal in helping you to stamp that out as I am in asking you to help us to stamp this out. Both are a menace to the meat supply of our common country.

Mr. STERLING. Mr President, the only difference between the Senator from South Carolina and myself is simply this: I want to give all that I think should be reasonably given for the purpose; but the $200,000 extra for the building of vats, and so forth, I think should be paid by the people who are most directly interested in it.

Mr. SMITH of South Carolina. Mr. President, we have a department whose business it is to study conditions and make estimates and our very rules provide that no amendments to a bill carrying appropriations shall be in order unless it is estimated for. We have turned this matter over to them. This department has estimated that this amount is necessary. It seems to me that they are better qualified than the Senator to say just how much is needed for the prosecution of this very necessary work.

I think some Senator has proposed an amendment looking to the auditing of the accounts of the different departments. Until that is done this is the best source of advice for the Senate. With my knowledge of the necessity for this work, covering as it does now 50,000 square miles where they have eradicated this tick and put our cattle where they could be made available for beef and for other uses in different parts of the country by shipment, I think the wonderful practicability of the expenditure of this money has been demonstrated.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Nebraska?

Mr. SMITH of South Carolina. I do.

Mr. NORRIS. It is quite important to a great many of us in voting on the amendment to know just what the estimate of the department is. There seems to be a dispute between the Senator from South Carolina and the Senator from South Dakota as to what the estimate is.

Mr. SMITH of South Carolina. If the Senator will allow me, all I can go by is the estimate furnished the Agricultural Committee by this department and from the House. I have in my hand the volume, Estimates of Appropriations for the Department of Agriculture Required for the Service of the Fiscal Year Ending June 30, 1917, prepared for the use of the Committee on Agriculture, House of Representatives. Here they have a detailed statement following that estimate of $657,400. I do not know from what the Senator from South Dakota was reading. I know what came before the committee. I know what the Secretary of Agriculture himself said about the matter, and here it is printed. That is all I can tell the Senate about it.

Mr. FLETCHER. Mr. President, I do not want to delay a vote by any observations on the provision of the bill that is under consideration, but I do feel that I ought not to let pass the remark which has been repeated over and over again in connection with the item for making an appropriation for the eradication of citrus canker. The Senator from South Dakota says that people ought to be patriotic enough and public spirited enough to cooperate with the Government in the communities where the infection exists. He instanced the citrus-canker item as one where apparently that is not to be done. I want to remind the Senator that the Legislature of Florida appropriated $195,000 and the people themselves raised $200,000, and that that State alone has cooperated to the extent of over $400,000 in the eradication of this disease, and that there are six infected States, so that Florida is only one of the six. I wanted this statement to appear so that no improper inference could be drawn from the Senator's remark.

Mr. UNDERWOOD. Mr. President, I am not a member of the Committee on Agriculture and Forestry, and I am not as well informed on these questions as the gentlemen who are members of the committee, but I have some personal knowledge of the conditions and the facts that relate to the amendment now pending before the Senate. I am satisfied that the Senator who has offered the amendment has offered it under an entire misapprehension of the facts.

As I understand the increased appropriation asked for by the Agricultural Department, it does not ask for this money to build vats with. If the Senator has any information coming from the Agricultural Department which would lead him to believe that they proposed to use this $200,000 for the building of vats, I would be glad if he would inform me from what source he got the information.

Mr. STERLING. Mr. President, I will say to the Senator from Alabama that I have no direct information upon the subject at all other than——

Mr. UNDERWOOD. Well, then——

Mr. STERLING. If the Senator will excuse me—none other than that furnished by the bill itself; but, since the bill shows the committee increase to $782,400, since the bill itself permits the building of vats by the Government and the purchase of material for certain vats, and since the Book of Estimates gives $582,000 as the amount required for this service, I supposed that the $200,000—and I think it is a reasonable inference—was to be used in the building of vats which the bill permits to be built by the Government.

Mr. UNDERWOOD. If the Senator will allow me, I think I can clear up his misapprehension on that question. I do not speak by the card from the Agricultural Department, for I am not a member of the Agricultural Committee, and I do not know. I can only tell the Senator what I know to be the fact where this work is being carried on.

I know that for many years the people of my State contributed their share to Federal taxes, to appropriations, starting away up on the northern line, for eradicating cattle tick. It moved south, county by county, until it came down through Kentucky and Tennessee, until it reached north Alabama. In the meantime we had cattle tick, but we could not eradicate it until it was eradicated in the territory of our neighbors. The Agricultural Department very properly started up north and moved south, county by county. There was no complaint at that time. It is now approaching the Gulf coast. I am satisfied the Senator from South Dakota has offered this amendment under an entire misapprehension of the conditions. I do not say that the Agricultural Department does not use some small portion of this money with which to build vats to eliminate the cattle tick; but I do say that, if so, it is a very small portion of it. I will tell the Senator why.

I do not presume the department would make any difference in the treatment of the cattle-tick problem in Alabama from what they are making in other States; and I know that within the last 18 months in one of the counties in the district which I formerly represented in the other House, in north Alabama, when the Government experts had reached there to do this work they called on the farmers to organize clubs to build vats in each precinct. What you call a township in the North, we call a precinct in the South. I am entirely familiar with this matter, because I myself contributed money to build one of these vats.

I know those vats were not built by the Government, but that they were built by the local people, who took great pride in building them at their own expense. I know that to be the condition throughout Alabama.

I do not say that there have not been possibly some places in Alabama and some places in other portions of the United States where they have used a portion of this money with which to build experimental vats, so as to demonstrate to the

farmers how to build and how to use such vats; but when the Senator from South Dakota attempts to change this appropriation and to have this amendment adopted on the basis that the people of the Southern States in fighting the cattle tick are not themselves building these vats, he is acting under an absolute misapprehension of the facts.

Mr. STERLING. Mr. President, will the Senator from Alabama give me his idea as to what this increase is meant for, if it is not for the purpose of building vats?

Mr. UNDERWOOD. I will. The question of eradicating cattle ticks is largely an educational question. In a large portion of the South, if not in the North, there is a great deal of fallow land; we in the South have a great deal of land that is not under fence. The people who have not large plantations, but the moderately well-to-do farmers have fenced in the lands which they cultivate and they allow their cattle to roam at large on what they call the public land, but, in fact, probably very little of it belongs to the United States Government, though some of it does belong to the State of Alabama. Much of the land in private ownership is not fenced, and the people have allowed their cattle to range at large.

When you come to the question of eradicating cattle tick you have to pen up your cattle; you have to feed your cattle, at least for a certain time, and take them off this common pasture, where otherwise they would come in contact with the tick as soon as they were dipped. To get a whole community of not rich farmers, but of poor farmers, farmers who have small farms, to realize that it was for their benefit to pen up their cattle, to keep them under control for several years, to put them through these dipping vats so that the cattle tick would die in the common pasture and might be eradicated from the community requires education. The farmers had to be convinced of the necessity of that to begin with. I understand the agents employed by the Government have been doing that work.

It is not a work of dipping the cattle or building dipping vats, but it is the question of education, of creating a public sentiment to get the people to agree to it. Although I am glad to say to-day there is a very strong sentiment in Alabama for the eradication of the tick, a few years ago there was a strong public sentiment against it. That is the work that the Agricultural Department is doing.

I know the department is not using this money to build vats indiscriminately, but that those vats are being built by the people themselves. I think, probably—although I do not know that to be a fact—that here and there the Department of Agriculture has used some of this money to build a demonstration vat so that they could bring it to the attention of the people and could demonstrate to them the way to build the vat, the way to put the cattle into the vat, and then let the people go out through other parts of the county or a section of the State and build their own vats.

I do not state this on the authority of the Agricultural Department, I do not state it from information which I have gotten out of some document, but I state it because of the fact that I live in a community where these vats are being built, and I know that they are being built by the people.

Why should the Senator's amendment be adopted under the idea and apprehension that the people of these States are doing nothing for themselves, when the fact is that they are building these vats for themselves right along, and he would take away from the Agricultural Department the power to occasionally build an experimental vat to demonstrate how such vats should be built and how the work should be done?

Mr. STERLING. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from South Dakota?

Mr. UNDERWOOD. I do.

Mr. STERLING. The Senator from Alabama has not yet answered my question as to what is to be done with the proposed increase?

Mr. UNDERWOOD. I will answer it.

Mr. STERLING. If the Senator will permit me, I wish to know what is to be done with the proposed increase over the estimate and the proposed increase of $149,600 over the House bill, if the money is not to be used for the building of vats?

Mr. UNDERWOOD. I have no doubt as to what will be done with it. I am not a member of the Agricultural Committee; I was not before the committee when the Agricultural Department made their report; so I can not speak by the card; but I have no doubt in the world that what will be done with the proposed increase is exactly what is being done and has for many years been done with what has been appropriated in the bill; that is, that the agents of the Agricultural Department will go out into this country and educate the people as to the necessity of eradicating the cattle tick; will show them how to build the vats and how to dip the cattle. There is a vast territory there. If you will give enough money, we can carry on this educational work and get rid of these cattle ticks in a couple of years; but the Government has not pursued the matter along that line; it has made small appropriations, and has gradually drifted down from the Northern States to the States of the South.

We have waited for many years for this work to reach us. If you would appropriate millions for this purpose, as you did for the eradication of the foot-and-mouth disease, the cattle tick would have been out of our country before now.

Mr. SMITH of Georgia. It would have been wiped out in a year.

Mr. UNDERWOOD. We would have wiped it out in a year, or in three years, anyway. You have not, however, pursued the work in that way. The proposed increase is simply to advance the work along the old lines, in the same way that you have advanced the work for a decade or more in the past. The only purpose that could be accomplished by the amendment proposed by the Senator from South Dakota is that you would say to the agricultural experiment people when they went into communities to advance the work that they could not build a demonstration vat and show the people how it ought to be built. That is all the Senator will accomplish by the amendment.

Mr. STERLING. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from South Dakota?

Mr. UNDERWOOD. I do.

Mr. STERLING. The Senator from Alabama referred to appropriations made for the eradication of the foot-and-mouth disease.

Mr. UNDERWOOD. I did not hear the Senator.

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from South Dakota? The Senator from South Dakota is taking the floor by the courtesy of the Senator from Alabama.

Mr. STERLING. I beg pardon for infringing any of the rules. I wish to say, however, Mr. President, that the Senator from Alabama refers to the appropriation made for the eradication of the foot-and-mouth disease. As I recall, that was made only two years ago, and the appropriation for cattle-tick eradication was also made two years ago.

Mr. UNDERWOOD. Oh, no.

Mr. STERLING. The Government was just as early in making appropriations for that purpose as it was for the purpose of eradicating the foot-and-mouth disease.

Mr. UNDERWOOD. Oh, no; Mr. President, the Senator from South Dakota is speaking under an entire misapprehension of the facts. The Government has been making appropriations for the eradication of the cattle tick for now more than 10 years. Indeed, the appropriation may date back far beyond that, but to my personal knowledge the appropriation has been made for more than 10 years.

Mr. STERLING. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama again yield to the Senator from South Dakota?

Mr. UNDERWOOD. I do.

Mr. STERLING. I am not laboring under any misapprehension. My point is simply that the Government aid in eradicating the cattle tick has been as early, at least, as has been Government aid in the eradication of the foot-and-mouth disease; and, according to the Senator's statement, it has been very much earlier.

Mr. UNDERWOOD. Undoubtedly it had been very much earlier; but the Senator from South Dakota has attempted to reflect on the constituency that I in part represent by saying that our people are unwilling to carry their share of the burden of the eradication of that disease when they are carrying practically all of the burden, except the educational influences of the department itself. The statement which the Senator made is a reflection on those people, and I stand here simply to repudiate a statement that is not justified by the facts. I know the Senator made the statement without knowledge of the facts, and he has so stated; but I know the facts, and I am not willing to let a statement go by which does reflect upon the constituency which I represent and which is not jusified by the facts.

Now, as to the foot-and-mouth disease, I voted for the appropriation to eradicate it, and I am willing to do so again; but I want to say to the Senator that there is not one case of the foot-and-mouth disease in the Southern States. That is no reason, however, why we should not make an appropriation for that purpose. It is a serious menace not only to the cattle interests of this country, but it is a serious menace to a food

product upon which the people are dependent; and so I very cheerfully voted for millions to eradicate that disease in the Northern States. Now, when we have in the South a condition that is a menace to the cattle interests of the South and a menace to the food supply, after we have voted millions of dollars for the eradication of the foot-and-mouth disease, to say that you are not willing to increase this appropriation $200,000 is a position that is not defensible.

Mr. GALLINGER. Mr. President, will the Senator from Alabama permit a question?

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from New Hampshire?

Mr. UNDERWOOD. I do.

Mr. GALLINGER. I am ready to vote any reasonable amount for this or any other purpose that relates to the food supply of the country; but, upon referring to the Book of Estimates—and the only official estimates are those coming through the Secretary of the Treasury; the Secretary of Agriculture submits his estimates to the Secretary of the Treasury, and the Secretary of the Treasury sends them to Congress—I find that that book shows that the estimate made does not include this $200,000. Does the Senator really feel that the exigency is such that that amount is necessary?

Mr. UNDERWOOD. I will state to the Senator from New Hampshire that, as I said in the beginning, I am not a member of the Committee on Agriculture and Forestry, and I have not informed myself as to the estimates. I understand that there has been a supplemental estimate of some kind, but I am not advised particularly as to that. I have been perfectly willing, and am willing now, to stand on what the department states is necessary to do this work. If they say they need $200,000 additional, I think it should be provided. The thing I stand here to combat is a misapprehension as to the condition of our own people. It has been charged here that we are not willing to do our share of the work, when we are doing all of the work, so far as the actual work of building vats and dipping cattle is concerned.

Mr. GALLINGER. The Senator will understand that I have taken no part in that controversy. The Senator has had large experience as a member of the Committee on Appropriations in the other House——

Mr. UNDERWOOD. I served on that committee.

Mr. GALLINGER. The Senator served on that committee, and he is serving on the similar committee in the Senate, and we were all glad to welcome him on it. The Senator knows that the simple fact that the Agricultural Department has written a letter saying they need more money does not meet the requirements of the law that the estimate shall come through the Secretary of the Treasury; but if there is an emergency, and Senators from the States where this wretched condition exists feel that more money is needed than has been estimated for in the regular form and found in the Book of Estimates, I am not going to haggle about it for a moment.

Mr. UNDERWOOD. I will say to the Senator from New Hampshire that I do not know whether this estimate is in the regular form, because, as I have said, I am not a member of the committee and have not investigated it; but I call the Senator's attention to the fact that, if I recollect aright, in the Committee on Appropriations, of which we jointly are members, last fall there was a request for an additional sum for the eradication of the foot-and-mouth disease, and we passed that without any regular estimate because of the urgency of the case. We did not wait, there being an emergency, for the estimate to come through the regular channels, but we accepted it because we recognized the condition that existed.

I am not prepared to say as to the emergency of this question, because I do not know. I am content to leave that to members of the committee. I merely wanted to repudiate a statement which I felt—and I am not reflecting on the Senator who has offered the amendment, because he said that he did not know the facts—reflected on my people, and I do not want this case to be decided on that question.

Mr. GALLINGER. I will say to my friend the Senator from Alabama that my recollection is that the supplemental estimates concerning the foot-and-mouth disease came through the Secretary of the Treasury in the regular form; but it is possible that we may have added something that did not come in that way.

Mr. UNDERWOOD. I think we did; that is my recollection.

Mr. SMITH of Georgia obtained the floor.

Mr. STERLING. Mr. President, will the Senator from Georgia yield to me for just a moment?

Mr. SMITH of Georgia. Yes.

Mr. STERLING. The Senator from Alabama has stated two or three times in the course of his remarks that I reflected upon his people or the people of the South. I want, Mr. President, to disclaim any intention of reflecting upon the people of the South. On the contrary, instead of reflecting upon them, I would rather express my high admiration for the people of the South generally.

I merely looked at this item in the bill. I saw the estimate of $582,400 for this entire service, which I supposed included the educational agents to which the Senator from Alabama has referred. I saw the House item of $632,000, an increase over the $582,000. I at once supposed, since the bill permitted the Government to build vats and purchase materials for use in those vats, that the difference between $582,400 and $782,400, a difference of $200,000, was to be used in the building of vats; and it simply occurred to me, without thinking particularly as to how many vats had been constructed by the people of the South, that it was for the purpose of building vats here and there throughout the South. I confess, Mr. President, that the Senator from Alabama has not yet, in my view, quite answered the question as to what is to be done with the difference between the $582,400 and the $782,400.

Mr. UNDERWOOD. Mr. President, if the Senator from Georgia will allow me, as I said in the beginning, I am not familiar with the estimates, and I will leave that to the members of the committee to answer.

Mr. SMITH of Georgia. Mr. President, the estimate of the Agricultural Department for this purpose, amounting to $657,000, will be found on page 41 of the Estimates of Appropriations for the Department of Agriculture for the Fiscal Year Ending June 30, 1917, Prepared for the Use of the Committee on Agriculture, House of Representatives.

Mr. STERLING. Well, Mr. President——

Mr. SMITH of Georgia. Excuse me, I will go on and finish what I have to say, and I think the Senator will understand it when I get through. That was the estimate of the Agricultural Department as to what they needed. Anyone interested in knowing why this increase was made would only have to read the note following the estimate. From that he would have found out why the Agricultural Department wished the increase. It was because the eradication of the tick is a work that should not be postponed from year to year. If money enough were spent for tick eradication, in a couple of years the entire work might be accomplished.

The States and the communities are contributing so much to the work and there is such an interest in the work that the department feels that the Government should spend more in directing the work.

I want to say, Mr. President, that the work has been continued in the State in which I live just as the Senator from Alabama [Mr. UNDERWOOD] has described it in his State. The vats have been built by the communities and not out of Government money. They have been built by the counties; and men with farms of considerable size build vats on their own farms for themselves exclusively. I have not heard of the Government building any vats in Georgia, except experimental or instruction vats.

This bill does not allow the Government to build vats generally. It limits their construction to Government land and in connection with expositions and fairs. The Government has no land in Georgia. Georgia is not a public-land State, and there is practically no Government land throughout that section. It is not like the northwestern section, with which the Senator from South Dakota is familiar. I think that language came down from past bills, when the tick was being fought in sections where the Government did own large bodies of public land.

Mr. GRONNA. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from North Dakota?

Mr. SMITH of Georgia. Certainly.

Mr. GRONNA. May I suggest to the Senator from Georgia that the department is prohibited by act of Congress from building vats except for demonstration purposes?

Mr. SMITH of Georgia. Well, I am sure that they have never built any in my State except for demonstration purposes.

Mr. GRONNA. I was just going to suggest that the vats have been built, as the Senator from Alabama [Mr. UNDERWOOD] has stated, by the counties and by communities.

Mr. SMITH of Georgia. And very much more has been spent locally than the Government has contributed. The Government's contribution has really been but a small part of the expenditures in this work.

The Senator from South Dakota asks why this increase. It is not for the purpose of building vats, for the act of Congress forbids that, but it is for the purpose of progressing more rapidly with the work and contributing more rapidly to its completion.

Now, let me read what the Secretary of Agriculture said on this subject before the House committee:

> The question is whether we shall get rid of it relatively quickly or whether we shall let the work drag. It is not a question of an indefinite continuance of appropriations or of endless annual increases, but of

larger appropriations over a few years instead of smaller ones for a long period. We can get rid of this nuisance with a less aggregate expenditure in the long run if we combat it vigorously. The time required will depend on the amount of money at the disposal of the Federal authorities and the active cooperation of the States. With the proper attitude on the part of the people, with ample funds from communities or from the States, or both, and with the requisite Federal appropriation to meet any amount they may put up, we can rapidly exterminate the cattle tick and get through with the business.

The House committee in their report then say:

Deeming it wise, in the interest of economy and of the rapid increase of the meat supply, that the work should be pushed as rapidly as possible, the committee believes that the increase recommended is fully justified. As showing the interest of the States in the work and their realization of its importance, attention is called to the fact that the States and counties now under quarantine are planning to expend during the next fiscal year, in cooperation with the Federal Government, approximately $975,000.

New language has been added to make $75,000 of the appropriation immediately available, so that preliminary work looking to the wise expenditure of the increase in the appropriation may be undertaken before the beginning of the next fiscal year.

In connection with the estimate for an appropriation of $657,000, the department says:

Many of the State legislatures have greatly increased, and in some cases have more than doubled, their appropriations to carry on the work in cooperation with the Department of Agriculture. During the present calendar year, up to September 15, 37,308 square miles of territory had been released from Federal quarantine for cattle ticks, and, effective December 1, an additional area will be released, which in all probability will bring the amount up to 50,000 square miles freed from ticks and released from quarantine during the calendar year 1915. As a result of increased activities and educational work, active steps will be taken during the year 1916 in the eradication of the ticks, and more money and more men will be urgently needed to successfully carry on the work in the various States under quarantine.

So that really it is a question of getting over the territory and getting rid of the tick. The more money that is spent, the more rapidly the ground will be covered. As the States are doubling their appropriations, and as the Agricultural Department saw the opportunity for using more, they asked for more.

Now, I will state how the increase happened in the Senate. The chairman of the committee was very deeply interested in the tick fight, and made statements about facts within his own knowledge, and the increase was made on the motion of the chairman of the committee. But the Agricultural Department and the Secretary asked $657,400 by their first suggestion, and the Secretary himself said on the hearing that if we could give him more it would really be an economy, and he would get rid of the tick at less cost to the Government.

Mr. RANSDELL. Mr. President, I should like to corroborate what my brethren from the cattle-tick States have had to say about the efforts of the local people. Just about one week ago the Legislature of the State of Louisiana passed a most stringent law making it a serious criminal offense for anyone to refuse to dip his cattle. The people are determined to eradicate the cattle tick from that State, and they are doing everything in their power along that line.

You know that people must regard it as very serious when they make it a crime to refuse to dip cattle. I live in the extreme northeast part of the State, and I have a small herd of cattle. I have dipped them persistently every 21 days for the past two years except in the cold weather. The dipping vats were all built by the parish of East Carroll, in which I live. The Government had nothing to do with building those vats. There was a specialist employed by the Government who went around East Carroll and the adjoining parish, from place to place, instructing the people how to dip their cattle and trying to see in a personal way that the cattle were properly dipped. The Government furnished the educational agency. The people themselves furnished the expense. The laborers to take the cattle to the vats, the vats themselves, all the great expense of this eradication, was furnished by the people; and, as I said a moment ago, they have now gone to the great length of making it a criminal offense not to dip cattle.

Mr. President, is this a national question? Let me give you a few facts to show you that the whole Nation is interested in it. This work was undertaken in 1906—and I speak with some knowledge, because I had the honor of introducing the first bill ever introduced in the American Congress for eradicating the cattle tick. My bill proposed to appropriate $100,000 for that purpose. It was introduced in the spring of 1906, when the honorable gentleman from New York, Mr. Wadsworth, was chairman of the Committee on Agriculture of the House. The people of New England at that time—and I am glad to see the distinguished Senator from New Hampshire here—were very much interested in the eradication of the gypsy moth, and they asked at the same time $100,000 to eradicate it. We did not get very much encouragement for either of those appropriations from the chairman of the House Committee on Agriculture, and before it was settled the people of New England, fighting the gypsy moth, and the people from the South, fighting the cattle tick, were working hand and hand. The result was that the bill carried $82,500 to begin the work of gypsy-moth eradication and $82,500 to begin the work of cattle-tick eradication. I have the act in my hand.

Mr. GALLINGER. Mr. President——

The VICE PRESIDENT. Does the Senator from Louisiana yield to the Senator from New Hampshire?

Mr. RANSDELL. I gladly yield.

Mr. GALLINGER. I think the Senator would be a little more accurate—but I do not want him to think that I am against this appropriation—if he said that the boll-weevil and the gypsy-moth appropriations went hand in hand.

Mr. RANSDELL. I beg pardon; I remember it well. I have the act here. On the same page is $82,500 to prevent the continued spread of gypsy moth and brown-tail moth, and in the very next paragraph there is $82,500 to assist, in cooperation with the State authorities, in eradicating the ticks transmitting southern cattle fever.

Mr. GALLINGER. Is there not likewise an appropriation for the boll weevil?

Mr. RANSDELL. There may have been. I do not recall that. I know that the Government has from time to time made appropriations for eradicating boll weevil.

Mr. GALLINGER. Yes; there is no question about it. It has been in every appropriation bill for a great many years.

Mr. RANSDELL. We have appropriated considerable money and we have done a great work in eradicating the boll weevil.

I want to say, in speaking of the gypsy moth, that I was delighted to assist in getting an appropriation for it in 1906, and I am still delighted to assist in getting annual appropriations for it. We carry in this bill for the gypsy moth—not the eradication of it, because they say you can not eradicate the gypsy moth—$305,050. Last year the bill carried $310,000 for the same purpose. Here is what the Entomologist, Dr. Howard, says about it in answer to the chairman of the House Committee on Agriculture:

The CHAIRMAN. In answer to Mr. HAWLEY'S question, you say it is not your hope to ever exterminate the gypsy and brown-tail moths?

Dr. HOWARD. I am afraid we shall never be able to exterminate them.

The CHAIRMAN. Your position now is one of control?

Dr. HOWARD. Our position is now one of control and protection to the rest of the country.

The CHAIRMAN. Quarantine and control?

Dr. HOWARD. Quarantine and control. We have protected the rest of the country. There is no doubt about that. The appropriations that Congress has made for the past eight years have undoubtedly relieved the country from a great scourge.

The CHAIRMAN. This appropriation, therefore, may as well be considered a permanent appropriation, you might say?

Dr. HOWARD. I fear so. It may be that the parasites will reduce the species to such a number that we can rely simply on quarantine measures.

And so forth.

Now, Mr. President, we are giving, and according to that testimony we probably shall give, for all time, something like $300,000 a year to prevent the gypsy moth from spreading to the balance of the United States. I, for one, say that if we can prevent that awful pest, which is now such a scourge in New England, from spreading to the rest of this Nation, we will have made a very wise expenditure of public funds, and the New England people can get my vote for it just as often as they need it, and for as much more as the department says is needed.

Mr. President, let me give you a few figures to show you that this cattle-tick pest in the South is a national evil. These figures from the Department of Agriculture show that the average weight of cattle in the States of Florida, Georgia, Louisiana, Alabama, and Mississippi in 1915 was 340 pounds, 419 pounds, 471 pounds, 500 pounds, and 550 pounds, respectively. Please listen to these figures, now. That was the average weight of cattle in the southern cattle-tick area. "Ridiculously small weights," you will say. Of course you will. Here are the weights in the West where they have no ticks. The cattle of Wyoming, Idaho, and Montana, which are tick-free States, average 985 pounds, 966 pounds, and 938 pounds, respectively. The average values of cattle in these ticky States are, in Georgia $18, in Florida $18, in Alabama $20, in Mississippi $22. In a few of the tick-free States the average values of all cattle are as follows: Wyoming, $64; Montana, $60; Ohio, $56; Illinois, $56; Indiana, $54.

The value of cattle in the tick-free States is more than twice the value of cattle in the tick States.

Is it because the animals are any better? Is it because the sun shines brighter in those States, or the rain is sweeter, or the grass more nutritious? No, Mr. President, it is because in those States they have not this terrible enemy of cattle life. It is because in the southern tick States we have this awful pest; no animal can thrive when it has a cattle tick upon it,

when that tick is giving it fever, a fearful disease which kills a great many thousands of them.

A few years ago, sir, it was estimated by the Department of Agriculture that the cattle tick in the South caused an annual loss of $65,000,000 to $75,000,000. Is not that a national question—an annual loss of $65,000,000 to $75,000,000? Southern agriculturists estimated that loss at $100,000,000 to $150,000,000 every year. We are talking now constantly about the "high cost of living," the high price of meat and foodstuffs of every sort. If we could eradicate the cattle tick from the South—as, thank God, we are rapidly doing now—we would have a splendid area, producing animals ten times, indeed I believe fifty times, as fast as we are producing them now, and the whole American people would be the beneficiaries.

Why should we not give this additional appropriation, Mr. President? The committee has asked that it be done. The Secretary tells you that if it is done he can do the work more rapidly. I can speak personally of my own State, and I tell you that last year we were doing this eradication work in only a few parishes of Louisiana. There was opposition to it among some of the farmers of the State. But now we have passed a stringent law, and we are determined to drive the tick into the Gulf of Mexico. We can not do that without considerable additional help from the Government. We must have a number of trained men, experts, to go there and assist our people, and I have no doubt that other Southern States are in the same position as Louisiana. Why wait a dozen years for something that can be done in three or four?

I certainly hope this provision will be allowed to remain in the bill.

Mr. VARDAMAN. Mr. President, I shall not detain the Senate very long because I am quite sure that it is not necessary for me or any other Senator to speak to this amendment in order to defeat it; but I was somewhat shocked at the discordant note which my amiable and much-respected friend, the honorable Senator from South Dakota [Mr. STERLING] sounded a few moments ago. It does not accord with my preconception of that honorable gentleman.

Mr. President, the statesman who thinks along sectional lines, whose thoughts are affected by the geography of his residence, or whose heart is too small to embrace in its kindly consideration the people of every section of this Republic is an object of commiseration to me. The voice of sectionalism at this time is as discordant with the spirit of this age in America and as much out of place to-day as the voice of the donkey in a French opera.

Now, I am not a member of the Committee on Agriculture and Forestry. I wish I were, because I think it has to do with matters of more vital concern to the material interests of the people of this Republic than any other committee of the Senate. As I have said on former occasions, every dollar carried in this bill which is to be invested in the interests of the agriculturists of this country will bring larger returns than any other money which this Government appropriates. I do not care whether this policy of exterminating ticks is carried out in North or South Dakota, Florida, Mississippi, or Alabama, if it adds to the farmer's wealth, to his happiness, and his prosperity it contributes to the well-being of every man, woman, and child in the Republic.

This is no place to practice parsimony. You are not giving anything. You are simply making an investment for the benefit of all the American people. I do not know whether this money is going to be expended in the building of vats or not; but if it is going to be expended that way; if it is going to improve the breed of cattle; if it is going to increase the number of cattle; if it is going to add to the prosperity of the people of the South, it will necessarily add to the total wealth of the people of the United States, because you can not benefit the people of Minnesota without at the same time in this way helping the people of my own State. You can not contribute to the well-being of the agriculturists of the State of Washington without helping the citizens of Alabama and Florida. A successful experiment by the Department of Agriculture in one section of the country will be taken advantage of and, therefore, benefit the farmers of the entire Republic.

The thing in which I am interested is whether the money is going to be invested for the purposes for which the appropriation is made. I have voted for every measure that has been proposed looking to the improvement, the amelioration of the condition of the farming classes and the advantage of the agriculturists of the United States, and I do not care whether the money is to be spent in the North, in the South, or in the East, or in the West. I never ask a question as to that.

When the time comes that I find my mind so distorted by passions or sectional prejudices that I can not see in the light of true altruism all questions which come before this body for solution, then I shall feel that I am no longer fit to perform well the proper functions of an American Senator. The question with me, I hope, shall always be whether or not it is best for the people of America, not the people of the South, the North, the East, or the West, but for the people of America.

Those considerations have controlled me in the past, and, so help me God, they shall control my vote in the future so long as I have the honor of being a Member of this honorable body.

Mr. STERLING. Mr. President, just one word suggested by a statement made by the Senator from Mississippi.

I am sorry indeed that he has evinced so much sensitiveness in regard to the amendment I have proposed. I must say, however, that I do not consider it very material whether I am the object of the Senator's commiseration for the stand I have taken or not, although I appreciate, of course, his regard and his respect. But I would have the Senator understand that I, too, have some sense of my obligation as a Senator. I appreciate the position and feel its responsibility quite as much as the Senator from Mississippi feels the responsibility of this high place. Feeling that responsibility, Mr. President, after looking at the Book of Estimates and what the Secretary of Agriculture had estimated and recommended, looking, too, at the bill as it was presented to the Senate by the committee, and seeing an increase of $200,000 over the estimate made by the Secretary of Agriculture for this service, not having had opportunity to go further into the matter, and yet not saying now that that would have changed my opinion, I offered this amendment, and that is all there is to it.

I did not intend at all to reflect upon the patriotism or the energy of the people of any particular section; but I thought in these times of stress, of extraordinary demands upon the Treasury, when if ever there is need for economy, indeed under all the circumstances as I saw them, and which I have already explained, this amendment was justifiable and proper. It is for that reason that I introduced it, and I have no apology whatever to offer to the Senator from Mississippi.

Mr. KENYON. Mr. President, a few days ago the Senator from Mississippi [Mr. VARDAMAN], in the course of the debate, paid a tribute to the State of Iowa. I was not in the Chamber at the time, or I should have at that time expressed my personal thanks, and the appreciation of the people of my State, for the kindly expression of the distinguished Senator from Mississippi, who has such a warm place in the hearts of our people.

I wish to place in the RECORD, along the same line, without stopping to read it, an article by Herbert Quick, in the American Magazine of July, 1916, on the subject of "Can any State beat Iowa?" I ask that it may be published in the RECORD.

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter referred to is as follows:

[From the American Magazine of July, 1916.]

THE GLORY OF THE STATES—CAN ANY STATE BEAT IOWA?—BEFORE STARTING AN ARGUMENT, READ HOW WONDERFUL IOWA IS.

[By Herbert Quick.]

When a father prepares a festival for his children, he keeps back his most perfect gift for the last. After all the things have been presented which affection can prepare, or filial hope anticipate, the climax of generosity is reached when the last and most precious gift is discovered, a beneficence conferred in a seeming extravagance of giving. In the gradual ascent to the apex of perfections in uncovering the varied regions of the world to his children, the All-Father's masterpiece is Iowa.

Nothing has been left undone by nature to complete the work. First, Destiny covered Iowa with the waters of the sea, and for millions of years there dropped to the dark levels of this primordial ocean the lime, the gypsum, and the clays which form the basis and provide for the renewal of her soil. There fell also the sandstones for her buildings, when man should come to make them. Then the seabed rose, the waters receded, and in the hot, moist breath of the Carboniferous era were laid down the coals, so that when man came he might find the sun's heat stored for him, clay for that heat to convert to brick, and lime, gypsum, and clay to combine with heat into that liquid rock which pours like water and turns to living stone.

But His hand was stretched out still. The clays and ledges and sands were then no better than those of any other land. They would not do for the Masterpiece. So there came on the earth a great chill, and the waters were made into a plow, and with that plow of ice the granites of the north were ground up that their potash might be made soil, and the phosphates were mingled with the potash, and through all ran the lime; and the glacial plow passed over Iowa and made of her a great plain of smooth tilth, and strewed it with black drift fit for the pigmy plows of man.

Then Destiny waited while the waters made channels for themselves. And the swamps dried up. And for millions of years the forces of nature stored nitrogen in the black soil, and filled it with vegetable mold like that which delighted the children of Israel when they spied out the Promised Land of Canaan, and reported that it was a goodly land.

And there it lay, a great green savanna, veined with tiny embroideries of forest along the streams, its ground swell the unending succession of low and rounded hills, its ripples the shadows made by the wind in the waving grass. Destiny kept Iowa one vast, cleared field fit for the plow. Destiny laid the Missouri along her western border and the Mississippi as her eastern boundary, that commerce might find them arms of the sea for her future trade. And God looked on His work and found it good; but in order that it might be superlative, He tilted the surface a little to the south so that the sun might the better work with the rain, and both with that matchless soil for the good of man.

And still Iowa was not yet born. It was not time. Iowa could not be the home of a free people so long as Liberty was obliged to remain "the mountain nymph." Now the motto "Montani Semper Liberi" on the great seal of our most typical mountain State is about the only thing that State offers which reminds us of the stern democracy of Switzerland or Norway, while Iowa contrives fairly well—even though her great sweep of plains would in a past age have invited the tyranny of an Attila or a Genghis Khan—to make good in a middling, muddling, American way on her heraldic declaration, "Our liberties we prize and our rights we will maintain." Destiny covered Iowa with her palm until Liberty could be safe on the plains, and thus make possible such States as Wisconsin, Kansas, Nebraska, Minnesota, the Dakotas, and Iowa, where, 500 years ago, if the land had been peopled by the white race, we should have seen a Poland, a Great Russia, or a Siberia.

Then the curtain was drawn aside from the Western Continent. And still Destiny was not ready for Iowa. American institutions had to be developed and somewhat perfected. At last the hour struck for the discovery of Iowa. It was like the unveiling of a lovely picture—a great undulating green sea enameled with flowers. Not parched by drought like the regions to the west. Not sodden and swampy like the rain-soaked forests to the east. Not stony and sterile like regions farther south. Not in the region of fugacious summers of the north—but just in the right place. In the heart of the empire of corn, the realm of wheat, the kingdom of the paddock, the pasture, the meadow, and good brown earth, where winter is cold enough to rest and revivify the soil and summer warm enough and long enough to flood the world with produce.

To the unveiling of Iowa came all the peoples of America. This gives the Hawkeye the power to understand all America. Up along the rivers came the cavaliers from Kentucky and Virginia, and the woodsmen of Missouri and Tennessee. There came also the Southern Hoosiers from Indiana, and the long Suckers from Egypt. Iowa was settled as a southern State. Her river cities were southern. The first business life of Iowa was southern, and her great men were southern in their sympathies and characteristics. South of the "Q" one still finds the political and social life profoundly affected by the early settlers of the Boone and Crockett stripe. Here and there are the descendants of the French voyageurs and coureurs de bois.

But there came sifting in through Illinois, Michigan, Ohio, and Wisconsin the sturdy stocks of New York and Pennsylvania—and the New England conscience in its migration from New England gave Iowa to local self-government and the common school. And after old-fashioned Americanism had become intrenched in the towns and on the farms, there came the best people of Europe—Danes, Northmen, Celts, Germans, British—and filled the State with their virile strains and their democratic philosophies.

God is the supreme opportunist. He proved it by keeping back the best lands in the world for the best peoples in the world and then turning the plant over to the stockholders—the people of Iowa.

Iowa's wealth is staggering. Her farms are worth more than all those of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New Jersey, Delaware, Maryland, West Virginia, South Carolina, Florida, Alabama, Arizona, Utah, Nevada, New Mexico, Montana, and Wyoming combined. Her farm buildings are of more value than all those in New Hampshire, Vermont, Rhode Island, Delaware, Florida, Louisiana, Montana, Idaho, Wyoming, Arkansas, New Mexico, Utah, Nevada, Oregon, Washington, and West Virginia combined. The live-stock industry in Iowa is now suffering from depression, but her live stock is worth more than all that of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New Jersey, Delaware, Maryland, Florida, Arizona, Utah, Nevada, West Virginia, Louisiana, and New Mexico combined.

She is fifteenth in population among the States and twenty-third in area, but she ranks first in total value of farm products, in value of live stock, in value of farm property per farm, in percentage of farm property improved, in percentage of total area in farms, in number of automobiles per thousand of population, in the value of her horses, in the value of her cattle, in the value of her swine, in poultry, in egg production, in farm implements, in tonnage of forage crops—in spite of the alfalfa of Kansas and the West—in corn production. Her wheat crop is of greater value than that of all Canada or the Argentine. Her corn crop is worth more in money than all the iron ore, or anthracite coal, or petroleum products, or the gold, copper, or silver of all the United States. Iowa is a poor apple State, she thinks, but she has more bearing apple trees than any two of the Pacific States, and in apple production falls below the States of New York, Pennsylvania, Michigan, and Missouri only. Her swine production is worth more than all the farm crops of any of the 11 Mountain and Pacific States except California. The cattle she markets every year are worth more than the whole tobacco crop of the United States. Her women and children sell more eggs every year than would buy all the oranges grown in the United States.

The swine of Iowa exceed in value all the farm crops of Maine, New Hampshire, Vermont, Massachusetts Rhode Island, Connecticut, New Jersey, Maryland, West Virginia, Florida, Delaware, Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, or Oregon.

The horses of Iowa, in spite of her automobiles, exceed in value the total farm crops of 27 States.

And now I come to Iowa's peril. She is too rich. God has turned over to her people the greatest plant for generating human happiness which the world has ever seen. He has given it to them under the most favorable auspices Will she prove herself equal to the task? Will she see to it that her wonderful soil is kept for her people and not for some of her people? Will she keep herself from going in an American way the downward road of Poland—a rich upper class living on an oppressed peasantry? Her boast that the increase of the farm-land values of the State in 10 years is greater than the increase in value of all the farm land in Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Arkansas, Louisiana, and Oregon combined is true, and, in a certain sense, a justifiable boast; but to the statesmen of Iowa it should be the warning of Iowa's greatest danger. When land becomes too precious, like jewels and gold, it passes from the possession of the poor.

The greatest possession of Iowa is not her wealth, nor her power of producing wealth, though both are stupendous. It lies in her people, in her free institutions, in her growing body of great traditions. She has produced many great men and women; but her greatest wealth is in that fine body of great men and women of whom the world does not hear. To them is committed the keeping of a State which is so wonderful that all its neighbor States make their proudest boast when they assert that those portions of them which lie next the Iowa border are "as good as Iowa."

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from South Dakota [Mr. STERLING].

The amendment was rejected.

EXTENSION OF PAYMENTS ON LAND ENTRIES.

Mr. JONES. Mr. President, I desire to submit a conference report. I think it will take but a moment, and I ask unanimous consent for its present consideration.

Mr. SMITH of Georgia. Mr. President, I think we had better not stop the consideration of the Agricultural bill.

The VICE PRESIDENT. This is a matter which, by the rules of the Senate, is privileged.

Mr. SMITH of Georgia. A conference report is privileged?

The VICE PRESIDENT. Certainly. The presentation of a conference report is always privileged.

Mr. GALLINGER. The presentation of the report is privileged, but not its consideration.

The VICE PRESIDENT. The conference report will be read.

The report was read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6057) to amend section 14 of the reclamation-extension act approved August 13, 1914, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter inserted by the amendment of the Senate insert the following: "that where the applicant for such acceptance is in arrears on construction charges, he shall at the time of acceptance pay such installments of the construction charge as he would have been required to pay had he been accepted this act within the time limit hereinabove fixed, plus the penalties that would have accrued had he so accepted, and such applicant shall thereafter be upon the same status that he would have been had he accepted the provisions of this act within the time limit hereinabove fixed"; and on page 2 of the bill, line 8, strike out the words "upon the"; and the Senate agree to the same.

M. A. SMITH,
HARRY LANE,
W. L. JONES,
Managers on the part of the Senate.
EDWARD T. TAYLOR,
JOHN E. RAKER,
M. P. KINKAID,
Managers on the part of the House.

Mr. SMITH of Georgia. Mr. President, my objection was misunderstood by the Chair. Of course, I understood that the presentation of the conference report was privileged; but the Senator from Washington also expressed a desire to have action taken upon it, and it was to that that I was objecting.

The VICE PRESIDENT. There is no doubt that if there is an objection the only way it can be taken up is by a motion. There being no motion——

Mr. JONES. Mr. President, we can adopt the report in just a second. I hope there will be no objection.

Mr. SMITH of Georgia. I withdraw my objection, then, Mr. President.

Mr. JONES. I move the adoption of the conference report.

The report was agreed to.

AGRICULTURAL DEPARTMENT APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12717) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes.

Mr. THOMPSON. Mr. President, I desire to call up an amendment which I have, on page 22, line 14, of the bill, and have it acted upon.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 22, line 14, it is proposed to substitute "sugar-plant" for "sugar-beet."

Mr. THOMPSON. Read the balance of the amendment, please.

The SECRETARY. On page 22, line 18, it is proposed to substitute "$51,495" for "$41,495," and after the word "*Provided*," in line 18, to insert:

That not less than $10,000 of this sum shall be used for the development and improvement of American strains of sugar-beet seed and for the establishment of a permanent sugar-beet seed industry in the United States: *Provided further*——

Mr. THOMPSON. I understand that the last paragraph of this amendment has been substantially adopted by the adoption of the amendment of the junior Senator from Michigan [Mr. TOWNSEND]. I desire to address myself briefly to the entire amendment.

Mr. SMOOT. Let the amendment be stated, so that we will understand just what the Senator alludes to.

Mr. SMITH of South Carolina. I should like to have the page and the line stated.

The SECRETARY. Page 22, line 14.

Mr. SMITH of South Carolina. Now, I should like to have the amendment stated.

Mr. TOWNSEND. Mr. President, will the Senator yield? As I understand, all the Senator is attempting to do is to change one word.

Mr. THOMPSON. I think that is what it will amount to eventually.

Mr. TOWNSEND. The latter part of the Senator's amendment has already been adopted by the Senate.

The VICE PRESIDENT. The amendment will be again stated.

The SECRETARY. On page 22, line 14, substitute "sugar-plant" for "sugar-beet," so as to read "for sugar-plant investigations."

On page 22, line 18, substitute "$51,495" for "$41,495."

Mr. SMOOT. That has been agreed to.

Mr. THOMPSON. The latter part of the amendment in substance has been agreed to.

The SECRETARY. After the word "*Provided*," in line 18, insert:

That not less than $10,000 of this sum shall be used for the development and improvement of American strains of sugar-beet seed and for the establishment of a permanent sugar-beet seed industry in the United States: *Provided further.*

Mr. THOMPSON. I will withdraw that part of the amendment, as it has been substantially adopted, but I desire to address myself briefly to the other portion of the amendment and the importance of the whole amendment.

Mr. President, the development of the sugar-beet seed industry in this country since the commencement of the European war has demonstrated what the American farmer can do when necessity requires. Before the European war not a pound of sugar-beet seed was raised in this country, and over a million dollars was spent every year in Germany and Austria for the purchase of sugar-beet seed to be sown in this country.

Since necessity has required the raising of the seed it has been developed that we can raise a better quality and in greater quantity per acre than can be done in Germany or Austria or any other country.

It was contended before necessity required the raising of the seed here that we did not have the proper soil nor the proper climatic conditions, and that the process of raising was too tedious and too expensive for the American farmer. All these theories have been completely exploded in the two short years of experimentation and investigation of the work in this country.

Mr. SMOOT. Mr. President——

Mr. THOMPSON. I yield to the Senator from Utah.

Mr. SMOOT. I will say to the Senator that as good beet seed as was ever grown in the world has been grown in the State of Utah. The climatic conditions are perfect, the soil is just as good as any soil in the world for the production of beet seed, but we found that it was very much cheaper to buy beet seed from Germany and Russia and Austria than to raise beet seed in the State.

That came about on account of the greater expense attached to the raising of seed. I will say that I have predicted many times that the time would come when the beet growers and the sugar manufacturers would be compelled to rely upon the raising of their own beet seed. That time has arrived. I am heartily in favor of the proposed appropriation, and expect to see before many years a good part of the beet seed needed in this country raised on American farms.

There is no question in my mind but that the seed can be raised in any part of this country wherever the beet can be grown successfully. The only question I have ever heard against the raising of beet seed was the heavy expense of doing so.

Mr. THOMPSON. Mr. President, I thank the Senator from Utah for the explanation he has made and the experience he has given relative to the raising of sugar-beet seed in Utah. I was about to remark that it has been demonstrated in every section where sugar beets can be successfully raised in this country that we can also raise the beet seed; and within two short years of experimental work we now raise one-third of the seed which is necessary for the sugar-beet acreage, which is gradually increasing in this country, amounting to 767,000 this year, an increase of 100,000 acres over last year.

Mr. PHELAN. I should like to ask the Senator from Kansas the reason for substituting the word "plant" for "beet"? Sugar plant and sugar beet mean substantially the same, do they not?

Mr. THOMPSON. The reason was suggested by the department itself. If the Senator will observe the language of the bill, he will see that this investigation includes the appropriation of money for not only the sugar-beet and sugar-beet-seed investigations, which is expressly stated in the bill, but $10,000 is provided for—

investigations in connection with the production of table sirup, including the breeding, culture, and diseases of cane, and the methods of manufacture, standardization, and marketing of sirup, and the utilization of cane by-products.

To clear up that language and to facilitate the work of the sugar investigation generally which has been carried on by the same department it has been suggested by Dr. C. O. Townsend, the pathologist in charge of the beet-sugar investigations, that this be done, so as to cover every scope of the work. It does not change in the least the appropriation for the investigation of the sugar-beet and sugar-beet-seed industry, in which I am just as much interested as the Senator from California.

Mr. SHAFROTH. I understand the amendment is to strike out the words "sugar beet" and insert "sugar plant." Why would it not be better to insert "sugar plant," making the investigation as broad as they may want to make it? It seems to me it would be better to insert that, instead of striking out "sugar beet," because I think the investigation ought to be very largely as to the raising of the sugar beet itself. I do not see why the words "sugar beet" should be stricken out and "sugar plant" inserted in lieu thereof, when the purpose would be better served by adding to the words "sugar beet" the words "sugar plant."

Mr. THOMPSON. The only reason for that is that the term "sugar plant" expresses the whole subject. It includes the sugar beet, and it would be superfluous to leave in the words if we interline the words "sugar plant," which includes "sugar beet," as I understand it. "Sugar plant" is a broader term and includes every investigation that can be made of the sugar industry.

Mr. PHELAN. If it is the recommendation of the department it would be agreeable to me as one interested in the industry.

Mr. THOMPSON. It is recommended by the department. As I said, it was recommended by Dr. Townsend, the pathologist in charge of the sugar-beet investigations, to facilitate the work in that department, including every phase of the sugar investigations for which this appropriation is made.

Mr. GALLINGER. Mr. President——

Mr. THOMPSON. I yield to the Senator from New Hampshire.

Mr. GALLINGER. Did I understand the Senator correctly to say that prior to the war the industry of beet raising was not carried on in this country to any extent?

Mr. THOMPSON. Not to any great extent.

Mr. GALLINGER. But during the past two years one-third of the required product has been raised?

Mr. THOMPSON. Yes, sir; that is my understanding.

Mr. GALLINGER. That comes, does it not, from the fact that the European war is a prohibitive tariff as between Germany and the United States?

Mr. THOMPSON. No; I think the tariff has nothing to do with it.

Mr. GALLINGER. I am not talking about the tariff; I am talking about the war being a prohibitive tariff.

Mr. THOMPSON. No; the tariff question does not enter into it when we can not get any seed at all from abroad. It arises from the fact that we can not import any seed at all.

Mr. GALLINGER. Of course we can not, but what is going to happen when the war is closed? Will you not then come again in competition with the cheaper product from Germany?

Mr. THOMPSON. I think not. I think when the war closes, as has been demonstrated by the experiments we have already made, that the people of this country can take care of themselves and can compete with Germany or any other country in the raising of sugar-beet seed or anything else.

Mr. GALLINGER. I am glad the Senator is so optimistic, but I think we will meet the same competition we had before.

The German product will be raised cheaper than we can raise it in this country, and the result will be that the Senator's dreams will not be fulfilled.

Mr. THOMPSON. We can produce sugar-beet seed in this country at a profit of about $50 to $100 per acre, which ought to be enough for anybody. Everybody knows that there has been very little importation of anything from Europe during the present war. This has been especially true respecting sugar-beet seed, so largely that in my old home town, Garden City, Kans., where 2,500 bags of seed were ordered a year ago only 63 bags were delivered. So it is a question of necessity in this country at the present time, by reason of the absolute inability of getting any seed from abroad.

I simply wanted to call the attention of the Senate and the country to the fact that it has developed that every claim which was made relative to the inability to raise seed in this country is not founded upon fact. While the European war has caused the necessity for raising and manufacturing a great many things in this country, we have shown that when we are obliged to we can do it just as well and as cheaply as any other country in the world. It is only an exemplification of the truth of the old axiom that "Necessity is the mother of invention."

It requires 140,000 bags of seed to plant the sugar-beet acreage in this country, and it would require an acreage of something like 14,000 to produce that amount of seed. We have now developed in two years nearly one-third of that acreage.

Mr. GALLINGER. And, Mr. President——

Mr. THOMPSON. And with another year or so of demonstration work I am satisfied that we can raise all the seed that is necessary to be raised in this country without the importation from any country, which is the result we all hope to attain.

Mr. GALLINGER. Will the Senator yield for a question?

Mr. THOMPSON. I yield to the Senator from New Hampshire.

Mr. GALLINGER. Can the Senator tell me what a ton of beet seed ordinarily sells at?

Mr. THOMPSON. I can tell what a pound sells at, and the Senator can figure it for a ton. Under ordinary conditions it is worth about 10 cents a pound, which would be $200 per ton. Under these extraordinary conditions its value is hard to estimate, but it ranges from 30 to 50 cents, if the seed is to be had at all.

Mr. GALLINGER. I ask the Senator if he is acquainted with the fact that Germany pays an export duty of $5 a ton on seed exported from that country?

Mr. THOMPSON. Yes; but this makes no material difference. I see that the Senator is unable to appreciate the fact that when there is absolutely no importation whatever of any article the tariff is not involved at all in the controversy. It is simply a question of getting nothing or producing it ourselves.

Mr. GALLINGER. When there is no exportation we do not need a tariff. The wall is built by the European war regarding this and a great many other things.

Mr. THOMPSON. There is one good thing, if no other, which has resulted to this country from the awful, causeless, and useless conflict in Europe, and that is the fact that it has impressed upon us the necessity of raising everything that we want to eat in this country and of manufacturing everything we need to wear and to use in our industrial pursuits. I hope the time will come when we will raise all the beet seed and sugar that we consume in this country, and then there will be no question of tariff in connection with the article.

Mr. SHAFROTH. Mr. President——

Mr. THOMPSON. I yield to the Senator from Colorado.

Mr. SHAFROTH. I should like to make an observation with relation to the statement made by the Senator from New Hampshire. I believe we are not going to have the competition we have had from Europe. You can not destroy, disable, and kill 10,000,000 men unless you make a shortage in labor, and whenever you make a shortage in labor you make a high price of labor, and the high price of labor is going to enter into the price of whatever they in future are going to export.

Mr. GALLINGER. I will ask——

Mr. SHAFROTH. Just a moment. Then add to that that Germany never will be able any more to give bounties for the exportation of anything that she may have. Then add to that the enormous taxation that is going to be imposed upon the land that raises sugar beets and sugar-beet seed. You will find that they are no longer going to be competitors with the United States. These factors are plain and clear, and for that reason our industry now is upon a very stable basis.

Mr. GALLINGER. With the permission of the Senator from Kansas, I will ask the Senator from Colorado if he does not know that every foot of ground in Germany to-day is being cultivated by intensive methods, and that they are raising to-day as much as they ever raised in the history of the world?

Mr. SHAFROTH. Oh, no.

Mr. GALLINGER. And even more.

Mr. SHAFROTH. Whatever they are raising there is raised, I think, largely by prisoners; and that is not a permanent condition.

Mr. GALLINGER. It is raised by children and women largely.

Mr. SHAFROTH. To some extent that is true, but you can not take out of the industrial army 10,000,000 men disabled and slain without its impress upon the price of labor. It is going to make a shortage of labor, and that shortage of labor, according to the principle of supply and demand, is bound to make a high price of the products that they attempt to raise.

Mr. GALLINGER. Of course that is speculation merely.

Mr. THOMPSON. Mr. President, I will yield the floor in a moment. The argument has branched off into a different direction from what I intended. In conclusion, I simply wish to have inserted in the RECORD, without reading, as a part of my remarks a letter from Mr. F. A. Gillespie, treasurer of the Garden City Sugar & Land Co., showing the difficulty to secure sugar-beet seed under present conditions, and also a letter from Dr. C. O. Townsend, pathologist in charge of the sugar-beet investigations, giving a history of the development of the sugar-beet seed industry in this country and offering suggestions as to improvements in the methods employed to lessen the cost of production.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

THE GARDEN CITY SUGAR & LAND CO.,
Garden City, Kans., June 20, 1916.

Hon. WILLIAM H. THOMPSON,
Washington, D. C.

MY DEAR SENATOR THOMPSON: My attention has been called to the fact that while there has been an appropriation made covering the investigations and other work in connection with sugar beets and sugar cane no appropriation has been made covering the beet-seed industry. The present war that is being waged in Europe, as you know, brought all beet-sugar companies to a severe realization of the fact that their entire industry is wholly dependent upon procuring seed from the present warring nations, and you are undoubtedly aware of the past efforts and the extraordinary expense that has been entailed to get what little beet seed has been procured. For instance, out of our contracts existing with beet-seed growers located within these warring nations, amounting in total to about 2,500 bags, we have secured the grand total of 63 bags of seed, and were it not for the fact that we had provided ourselves with sufficient seed for this year's crops before the war we would have been entirely unable to have planted any acreage this year, and our factory would have been put entirely out of commission. As it is, we do not know now at this writing where nor how we are going to procure our seed for the year 1917. Two or three concerns, including the Great Western Sugar Co., the Utah-Idaho Sugar Co., and the United States Beet Seed Co., are endeavoring to grow seed, and it appears to us that the Government should make an appropriation of a reasonable amount to assist in this work. * * *

* * * * * * * *

Yours, truly,

F. A. GILLESPIE,
Treasurer Garden City Sugar & Land Co.

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF PLANT INDUSTRY,
Washington, D. C., June 21, 1916.

GROWING OF BEET SEED.

Hon. W. H. THOMPSON,
United States Senate.

DEAR SENATOR THOMPSON: Replying to your inquiry relative to the situation in regard to the beet-seed industry in this country, I take pleasure in stating that sugar-beet seed is now being grown to some extent in Michigan, Colorado, Montana, Utah, Idaho, and California. The acreage in Michigan increased from approximately 60 acres last year to about 500 acres this year. In Colorado and Montana the acreage increased from approximately 240 acres last year to nearly 3,000 acres this year. There was also a large increase in the acreage in Utah and Idaho. However, only a small part of the seed required for planting each year is produced at present in this country. We are therefore still dependent upon foreign-grown seed for the planting of considerably more than half of our present acreage of sugar beets.

The efforts that have been made in the growing of sugar-beet seed in the past indicate that sugar-beet seed of superior quality may be produced in this country. If this is true of the spasmodic efforts that have been made in growing sugar-beet seed in the United States, it stands to reason that when well-established strains of American beet seed are produced under proper supervision and direction the yield and quality of the roots and of the seed itself will be greatly increased. If we were obliged to depend entirely upon our home-grown seed at the present time for our sugar supply, not more than one-tenth of the sugar consumed in the United States could be grown in continental United States. Our sugar-beet growers need not less than 140,000 bags of beet seed annually to meet their requirements. About 14,000 acres in seed annually would be necessary to supply this amount of seed. If the sugar-beet industry were to develop in this country to the extent of producing all the sugar required in the United States, together with the cane sugar now produced in the Southern States, more than 50,000 acres in beet seed would be required each year. The value of this seed crop under normal conditions would be at least $5,000,000. Under existing conditions more than $1,000,000 annually are being sent abroad for the purchase of sugar-beet seed.

The indications are that there is abundant soil located under suitable climatic conditions within the United States for the production of this seed. There is nothing mysterious or unusually difficult in the pro-

duction of sugar-beet seed. Like all other enterprises of this kind, close attention to details is necessary in order to keep up the high standard of quality and to increase the yield. The roots are selected in the fall, the leaves are removed, the roots stored by piling them on the ground and covering with earth to a sufficient depth to keep them from freezing; they are then planted in the spring, as early as soil and climatic conditions will permit. At the base of each leaf which developed the first year there is a bud which remains dormant during the winter and from which seed stalks are produced the second year. These stalks are more or less branched, and grow to a height of from 4 to 5 feet, and vary in number from two or three to several dozen per plant. The flowers are produced on these stalks, and especially on the branches, and usually occur in clusters of two to seven flowers per cluster. When the seed develops from these flowers and has matured, each flower cluster has formed what is known as a seed ball, containing usually from two to seven germs per ball. It is possible for a single plant to produce a pound or more of these seed balls. At present this seed is harvested by hand, thrashed, cleaned, and cured, and is then ready for planting.

The object of our investigations is not only to increase the sugar content of the roots produced from this seed, but also to reduce so far as possible the cost of seed production. The cost of producing a unit quantity of beet seed may be reduced either by increasing the yield per acre without materially increasing the cost of production or by actually reducing the labor cost per acre or per unit quantity. The average yield of beet seed per acre is approximately 1,000 pounds, while the possibilities are more than four times that amount. Hence it is fair to assume that the yield may be greatly increased when proper attention is given to details.

One of the largest items of expense in growing sugar-beet seed is that of planting the roots in the spring. This expense, we believe, can be greatly reduced by proper methods. There is also sometimes considerable losses in the spoliation of the beets during the winter. This can be eliminated by proper attention to details. The cost of harvesting the seed is likewise a heavy expense, inasmuch as the stalks are now cut by hand, a sickle being used for this purpose. These expenses and losses we feel sure can be greatly reduced by a careful study of conditions, but even with the present cost of growing the seed it is apparent that American-grown seed can compete with the imported seed, especially in view of the better germination and the improved quality of the seed when produced under proper supervision and direction.

Very truly, yours,

C. O. TOWNSEND,
Pathologist in Charge Sugar-Beet Investigations.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Kansas [Mr. THOMPSON].

The amendment was agreed to.

Mr. CUMMINS. Mr. President, I move to amend the bill by striking out all that part of it beginning with line 24 on page 108 of the original print to and including line 15 on page 123. The amendment I have proposed, and I do not intend to discuss it at any great length, because I have been convinced there is no disposition on the part of the Senate to modify the bill in any essential particular, is to eliminate that part of it which provides for the licensing of warehouses. It is known in the bill as part C, and it is termed the United States warehouse act.

My objection to the proposed legislation is, first, that it is unconstitutional as now expressed. Section 2 of part C, which is fundamental, says "that the term 'warehouse' as used in this act shall be deemed to mean every building, structure, or other protected inclosure in which any agricultural product is or may be stored for interstate or foreign commerce." I can not conceive that there is a lawyer in this body who will assert that this description of the warehouse that may be licensed comes this description of the warehouse which may be licensed comes within a stone's throw of the provision of the Constitution which authorizes Congress to regulate commerce among the States.

It will be observed that every structure or building or inclosure in which an agricultural product is or may be stored for interstate or foreign commerce may be brought within the operation of the bill.

I do not at all dispute the fact that there are many warehouses so connected with commerce, so used as one of the facilities for transporting grain or other agricultural products from one State to another, or so connected with the general business of carriage that they fall within the constitutional power. I have no doubt whatsoever about that; but he who insists that any building or structure in which a product is or may be stored—agricultural products—which ultimately may pass into the channels of interstate commerce is within the power of Congress is simply calling upon his imagination rather than upon his knowledge of the constitutional provision.

I object to the bill for another reason. It is that this legislation will, in so far as any particular warehouse is brought within its provisions, supersede and abrogate all the State legislation upon warehouses; will render useless and futile all the legislation of the States with regard to warehouse receipts, their form, the obligation of the parties to them, and everything connected with the regulations which have been adopted by the States.

Mr. SMITH of Georgia. Mr. President, will the Senator from Iowa allow me to ask him a question?

Mr. CUMMINS. I will.

Mr. SMITH of Georgia. Could not the criticism which the Senator from Iowa has just made upon the bill be relieved by adding a section—say, section 34—providing:

That nothing in the provisions of part C shall affect the validity of State regulation of warehouses?

Mr. CUMMINS. Mr. President, I am not sure of that. The Supreme Court of the United States has held very many times that where Congress attempts to occupy a certain field of legislation its legislation is exclusive, and that State legislation, which may not be at all inconsistent or repugnant to anything that has been adopted by Congress, is, nevertheless, rendered null and void. The most prominent instance of the principle I have just suggested is in the case of Groninger against The Express Company which was decided a few years ago—three or four years ago—interpreting what is known as the Carmack amendment. That was an amendment added to the interstate-commerce law in 1906. It touched the effect of bills of lading issued by common carriers. It regulated the bills of lading only in one respect, namely, so as to make the initial carrier responsible for the loss or damage that might occur in carriage, no matter by what company or through what company or transportation line the damage happened. The Supreme Court, in passing upon that amendment, held that it abrogated all the laws of the States, all the judicial decisions of the States with respect to the liability of common carriers upon bills of lading, and rendered nugatory the statutes and decisions in more than one-half the States which had declared that a common carrier could not limit its liability for damage suffered on account of carelessness or negligence.

I infer from that decision—and it is the most pronounced, probably, of its kind—that if we pass this bill we have repealed the laws of all the States regulating warehouses and warehouse receipts in so far as the owners of warehouses ask for and receive a license from the Federal Government.

I need not say to Senators that this is a subject full of difficulty; I need not say to you that nearly every State—I think every State, probably—has a warehouse law, which has been developed through long experience and through much study, and that the statutes relating to warehouses and warehouse receipts are of the utmost importance in the business of the various States.

I do not question the right of Congress to adopt a code with regard to warehouse receipts and the rights of warehousemen and those who deal with them, so far as the receipts are issued for goods that are offered for shipment or are being shipped from one State to another; but this bill does not attempt to fully codify the law upon this subject. As I remarked about the previous measure, it is crude; it is imperfect; it is inadequate. It does not touch a great many of the vital phases of warehousemen's liability or the standing of warehouse receipts in the commerce of the world. I think it is simply absurd and ridiculous for the Congress of the United States to pass a law of this sort without the most serious consideration, without the completest study of the proposal on the part of some committee especially designed to study and consider matters of this character.

Why, suppose a bill of this kind were introduced. It would either be referred to the Committee on the Judiciary or to the Committee on Interstate Commerce, and the whole subject would be most carefully examined. This part of the bill has not been studied at all, simply because it has been added, through a vicious and indefensible practice, to an appropriation bill, and we are about to adopt it without half a dozen Senators in the body knowing what it contains or what changes it will make in the law of the land.

Mr. President, every lawyer knows that the American Bar Association has for years been considering the question of bills of lading and warehouse receipts, with the object of making, if possible, a uniform bill of lading and a uniform warehouse receipt throughout the country, so that the rights of all the parties to those instruments will be as well known in one part of the land as in another; but if any Senator would undertake to examine the code which has been proposed time and again by this association and would compare it with the proposal of this bill, he would be shocked to find how inadequate this proposed legislation is.

My third objection, Mr. President, is that we have here another set of grain inspectors. Not satisfied with what has already been done in the way of appointing inspectors throughout the country for the classification and grading of grain, the warehouse provision adds still another army of grain graders and inspectors. I read from section 11, on page 113:

SEC. 11. That the Secretary of Agriculture may, upon presentation of satisfactory proof of competency, issue to any person a license to classify any agricultural product or products, stored or to be stored in

a warehouse licensed under this act, according to grade or otherwise and to certificate the grade or other class thereof, or to weigh the same and certificate the weight thereof, or both to classify and weigh the same and to certificate the grade or other class and the weight thereof, upon condition that such person agree to comply with and abide by the terms of this act and of the rules and regulations prescribed hereunder so far as the same relate to him.

Mr. President, this not only introduces another body of grain inspectors and graders but it attaches the inspector to the particular warehouse that may be licensed, and it authorizes him to classify and grade grain in the warehouse, whether it is intended to be transported or carried beyond the State or whether it is intended to be used in the State in which it is graded. There is no limitation in that respect. The warehouseman himself must have a warehouse in which grain or other agricultural products may be stored.

I suppose that any warehouse would fall within that definition, because it is hard to conceive of a warehouse or a corncrib—and this would cover a corncrib just as completely as it would cover the most elaborate elevator or warehouse—in which there may not come at some time agricultural products which ultimately find their way into the channels of interstate commerce; but once the structure is brought within the terms of the law, then everything that is stored in the building and which may be the subject of a receipt is to be classified and graded by an inspector who may be employed under the terms of this act. It certainly can not be that Congress desires to adopt legislation so disastrous to the laws of the country and of such far-reaching effect without the most careful and reflective consideration.

I do not refer to other provisions of the bill. There are very many excellent things in the measure—that is, they would be excellent in the regulation of a warehouse—but until we are ready to present to the country a complete law upon this subject which can safely be substituted for the warehouse laws of the States, I sincerely hope that Congress will not embody this feature in an appropriation bill.

I have often heard, as all of you have, of a book known as "Every Man His Own Lawyer." It is generally conceded that whenever a man is his own lawyer he has a fool for a client. Now, this bill might very well be described as "Every Man His Own Warehouseman," for it is so broad and sweeping that if I care to put my corncrib at the disposal of my neighbor for the storage of his corn I may have a license under this measure as a warehouseman.

Mr. SHERMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Illinois?

Mr. CUMMINS. I yield to the Senator from Illinois.

Mr. SHERMAN. I am much impressed with what the Senator says, and I am in sympathy with his criticism. I should like to have the Senator, before he yields the floor, express his opinion as to the ability under the provisions of this bill of a warehouseman of what is commonly called class A or class B in the primary market centers to do business and not to be bankrupted. I call particular attention to the fact that under the provisions of this bill the warehouseman is made an absolute insurer. If lightning were to strike a warehouse in which a million dollars worth of grain was stored, under the provisions of this proposed act the warehouseman would be liable as an insurer, because under section 21, on page 119, is the following language—I do not want to take the floor away from the Senator, and do not want to subject him to a point of order——

Mr. CUMMINS. I am quite willing to have the Senator go ahead.

Mr. SHERMAN. The language of that section, without quoting it entire, provides that the warehouseman shall, on the presentation of a warehouse certificate and its proper indorsement, deliver the goods stored.

There is no exception; he shall deliver them; and if he does not deliver them he becomes liable and his license may be revoked. Under all the State acts—and they are based on long experience—in the primary markets where grain is stored in bulk and its identity lost, there is always some provision to limit liability. In the greatest primary grain market in the Western Hemisphere—Chicago—they have had a long experience not only in grain grading, but in the warehouse business, and the acts that properly safeguard both the warehouseman and the owners of the grain stored expressly exempt the warehouseman from liability for loss by fire, unless caused by the negligence of the warehouseman. It exempts him from liability for the destruction of grain by the heating or chemical change of the grain caused by the inherent qualities of the grain itself. In the smaller cities, where there is a man with $50,000 invested in the warehouse business, a large part of the grain of North Dakota or of Iowa might be in the ordinary course of business transported to Chicago, and so come within the limits of this act. A warehouseman could be utterly destroyed under the provisions of this bill by a stroke of lightning. It might consume the warehouse and he might lose his property, together with the entire contents, and he could not exempt himself by showing that it was utterly beyond his power to have prevented the loss.

Mr. CUMMINS. Mr. President, the Senator from Illinois emphasizes very clearly what I have already said. If we were to attempt to impose this law upon the people of Illinois without their consent, I do not think it would have a single supporter. Compare the elaborate law of Illinois—of which I know something—concerning warehouses with this meager and unsatisfactory provision, and one will be at once impressed with the entire inadequacy of this proposal. Why, in Illinois the warehouse business is of such magnitude and importance that, as I remember, the public-utility commission to which is given the administration of the regulation of railroads is called the railroad and warehouse commission.

I very sincerely hope that all of part C will be stricken out, and that we defer such legislation until some committee of the Senate is ready to consider an adequate bill upon the subject of interstate warehouses.

Upon my motion I ask for the yeas and nays.

The VICE PRESIDENT. Is the request seconded?

Mr. SMITH of Georgia. Mr. President, the motion is to strike out the entire measure, is it not?

Mr. CUMMINS. The whole thing.

Mr. SMITH of Georgia. If the motion is voted down, then, under the rules, will the provision still be subject to amendment?

The VICE PRESIDENT. Undoubtedly it will be subject to amendment.

Mr. SHERMAN. Mr. President, before this matter—which is of extreme importance to the primary grain markets—is voted on, I should like to discuss it a little. I do not want to undertake it at this time in the evening. If I am not running counter to any of the desires of the management of business here, I should like to offer some brief reasons why this portion of the bill would be exceedingly disastrous to the warehouse business. I will yield at any time when any Senator wishes to change the course of business or to move a recess. I do this because I am not always advised of the wishes of either the majority or those who assume very often to speak for the minority side of the Chamber.

Mr. SMITH of Georgia. Mr. President, if the Senator from Illinois will yield to me just a moment——

The VICE PRESIDENT. Does the Senator from Illinois yield to the Senator from Georgia?

Mr. SHERMAN. I do.

Mr. SMITH of Georgia. We wish to move that when the Senate separates to-day it shall be by recess until 11 o'clock to-morrow morning. I make that motion.

The VICE PRESIDENT. The question is on the motion of the Senator from Georgia.

The motion was agreed to.

Mr. THOMAS. What is the motion?

Mr. SMITH of Georgia. That when the session ends to-day it shall be by a recess until 11 o'clock to-morrow morning.

Mr. KENYON. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator from Iowa will state it.

Mr. KENYON. I should like to know at what time we will take a recess to-night?

Mr. THOMAS. At 8 o'clock.

Mr. GALLINGER. Oh, no.

Mr. SMOOT. Mr. President, I will ask the Senator from Colorado if he speaks with authority when he says that a recess is to be taken at 8 o'clock?

Mr. THOMAS. I am a member of the committee which so determined this morning. If it was changed, I am not aware of it.

Mr. GALLINGER. If the Senator will permit me, the Senator was not consulted, but some of us have had the assurance that we will take a recess about 6 o'clock to-night and take up the matter at a conference to-morrow.

Mr. THOMAS. That may be, Mr. President. I answered, as the Senator will notice, somewhat guardedly, because there may be some other arrangement, and I have no authority to speak for the committee, as the chairman has.

Mr. MARTIN of Virginia. Mr. President, I was not present at the meeting of the committee to which allusion has been made, but quite a number of Senators have complained that if the Senate was to be held as late as 8 o'clock it ought not to be done until after some notice had been given. I mentioned the matter to the chairman of the Democratic steering committee, and he said he thought there was reason in that, and that as far as he

was concerned he would expect the Senate to adjourn about 6 o'clock this afternoon. That is what the Senator from Indiana [Mr. KERN] told me. I think there is strong justification for that course, and that the Senate ought to adjourn about 6 o'clock.

Mr. SMITH of Georgia. Mr. President, the Senator will recall that on yesterday I brought this matter to the attention of the Senate, and gave notice that I would insist upon the Senate remaining together until we disposed of the bill; and when a Senator called attention to the fact that I had no authority to give such a notice, or that it did not amount to anything, I suggested that my sole object was that if to-day, upon seeking to press for a later session, the plea should be made that no prior notice of a late session had been given we wished to be prepared against such an objection.

Mr. GALLINGER. I am afraid the Senator from Georgia is revealing the secrets of executive sessions.

Mr. SMITH of Georgia. That statement was made as in legislative session.

Mr. MARTIN of Virginia. Mr. President, to take the sense of the Senate about this matter, I move that at 6 o'clock p. m. to-day the Senate take a recess until 10 o'clock to-morrow morning.

Mr. GALLINGER. Not 10, but 11.

Mr. MARTIN of Virginia. We had better commence——

Mr. SMOOT. I wish to say to the Senator that there are a number of committee meetings to be held at 10.30 to-morrow.

Mr. JAMES. It has already been agreed that when we take a recess it will be until 11 o'clock. That motion has already been agreed to.

Mr. MARTIN of Virginia. What was agreed to?

Mr. JAMES. That when we do take a recess it shall be until 11 o'clock to-morrow.

Mr. MARTIN of Virginia. Then I am willing to modify my motion, and move that we take a recess at 6 o'clock to meet to-morrow morning at 11 o'clock.

Mr. SMITH of Georgia. Mr. President, I hope the Senator will let us dispose of a few matters. There are two or three matters that Senators want to dispose of before that motion is made.

Mr. MARTIN of Virginia. Mr. President, I will withdraw the motion for the present. I was simply anxious to make some headway. I believe we will talk here until Christmas unless there is some new departure taken. I do not see any possibility of terminating the session unless we sit longer hours. We will have to work longer hours if we wish to end the work of this session before frost.

Mr. SMITH of Georgia. I understood that the Senator was objecting to working longer hours.

Mr. MARTIN of Virginia. Not at all. I said that as Senators complained that they had not had notice of this more stringent service——

Mr. SMITH of Georgia. But they have had notice.

Mr. MARTIN of Virginia. They have had the personal notice of the Senator from Georgia; and he can put that motion when he wishes, and we will see whether or not the Senate will support him. That is all there is to it.

Mr. SMITH of Georgia. Any Senator has a right to give notice that he intends to move to take a recess at a certain time.

Mr. MARTIN of Virginia. Certainly; and he has a right to take the sense of the Senate on the matter. It takes a vote of the Senate to control the sessions. It seems to me, in fairness, as so many protests have come in, that the course I have suggested should be taken.

Mr. SMITH of Georgia. I gave the notice from the committee in charge of this bill. It was entirely appropriate that it should be done without waiting for the steering committee——

Mr. MARTIN of Virginia. Entirely proper.

Mr. SMITH of Georgia. As the Senator from Virginia has given it when he was in charge of a bill.

Mr. MARTIN of Virginia. I have not objected to it at all. The Senator had a perfect right to do it, and the Senate has the right to act on it and to fix it as it sees fit.

Mr. SMITH of Georgia. That is true; but I object to the suggestion that no notice has been given, when Members in charge of the bill gave the notice. That is the custom.

Mr. MARTIN of Virginia. The Senator is entirely mistaken. I did not say that no notice had been given. On the contrary, I stated that the Senator from Georgia had given the notice and that it was for the Senate to say whether or not they would pursue the policy outlined in his notice. There was so much dissatisfaction, as I say, with holding the Senate here until 8 o'clock that the chairman of the Democratic steering committee told me he would expect the Senate to adjourn at 6 o'clock, and I made that motion. It is for the Senate to determine.

I move that at 6 o'clock the Senate take a recess until 11 o'clock to-morrow morning.

Mr. TOWNSEND. Why not make it now?

Mr. MARTIN of Virginia. There is a desire for an executive session, and I am willing to withhold that motion in order that there may be an executive session.

EXECUTIVE SESSION.

Mr. SMITH of South Carolina. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives by D. K. Hempstead, its enrolling clerk, announced that the House disagrees to the amendments of the Senate to the bill (H. R. 4767) authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products, requests a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. HELM, Mr. HOUSTON, and Mr. HINDS managers at the conference on the part of the House.

The message also announced that the House had passed a bill (H. R. 16763) to increase the revenue, and for other purposes, in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. WARREN. I present a telegram in the nature of a memorial from the Utah Chapter of the American Mining Congress remonstrating against the placing of a tax on copper. I ask that the telegram may be printed in the RECORD and referred to the Committee on Finance.

There being no objection, the telegram was referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

SALT LAKE CITY, UTAH, *July 7, 1916.*

Hon. F. E. WARREN,
United States Senate, Washington, D. C.:

We note that the Ways and Means Committee has reported favorably on a proposed bill to tax copper smelting and refining for additional revenue. We, representing the mining interests of Utah, seriously object to the passage of such a bill, classing the copper business as war industry. If the law is enacted it will seriously injure mining companies and be a great blow to mines in the Western States. Utah Chapter of the American Mining Congress solicits your earnest efforts to defeat this provision of the revenue act.

UTAH CHAPTER AMERICAN MINING CONGRESS.
A. B. APPERSON, *Governor.*

Mr. WARREN. I have a telegram from the Denver (Colo.) Post urging the enactment of legislation to provide arbitration for the difficulties between railroads and their employees. I ask that the telegram be printed in the RECORD and referred to the Committee on Interstate Commerce.

There being no objection, the telegram was referred to the Committee on Interstate Commerce and ordered to be printed in the RECORD, as follows:

DENVER, COLO., *July 10, 1916.*

Senator FRANCIS E. WARREN,
Washington, D. C.:

The unanimous opinion of the people throughout the West is utterly against the impending railroad strike, and the Denver Post urges you to help secure such legislation before Congress adjourns as will have this trouble settled, either by arbitration under the Newlands law or by Interstate Commerce Commission. Certainly there is strife enough in the world at present without our country becoming involved in any general railroad strike, which would be at this time a great national disaster.

THE DENVER POST,
By F. G. BONFILS.

Mr. VARDAMAN. I wish to ask the privilege of presenting, for the purpose of having printed in the RECORD without reading, a number of telegrams from bankers in Mississippi protesting against extraordinary taxation. This is the first voice I have heard from the people on the subject of bearing the expense of preparedness. But it is not the last voice that we shall hear. When the taxgatherers come around we shall hear a very lusty protest against that unnecessary burden.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

GREENVILLE, MISS., *July 11, 1916.*

Senator VARDAMAN,
Washington, D. C.:

We understand the Kitchin revenue bill increases the corporation tax from 1 to 2 per cent and continues bankers' special tax of $1 for each $1,000 of capital, surplus, and undivided profits. This seems discriminatory and grossly unfair. Want you to give the matter your attention.

FIRST NATIONAL BANK.

—

HATTIESBURG, MISS., *July 8, 1916.*

Senator JAMES K. VARDAMAN,
Washington, D. C.:

Kitchin bill doubles corporation income tax and fails to repeal special tax of $1 per thousand on the value of bank shares. We think it unjust

that this special tax be retained. All corporations should be taxed alike, banks having a hard time. We beg you to use your influence to have special tax on bank shares repealed.

FIRST NATIONAL BANK OF COMMERCE.

—

DODDSVILLE, MISS., *July 10, 1916.*

Senator JAMES K. VARDAMAN,
Washington, D. C.:

For God's sake use your influence to prevent any additional tax being imposed on banks. Little country banks have now more burden than can bear.

HENRY HART.

—

MERIDIAN, MISS., *July 8, 1916.*

Hon. JAMES K. VARDAMAN,
United States Senate, Washington, D. C.:

Inform Kitchin revenue bill, H. R. 16773, provides for increased corporation tax from 1 to 2 per cent and continues banks' special tax of $1 for each thousand capital, surplus, and undivided profits, which the banks consider manifestly unfair, as they should not be taxed in excess of other corporations. Your usual careful, prompt consideration earnestly requested.

WALKER BROACH,
First National Bank.

—

WEST POINT, MISS., *July 11, 1916.*

Hon. JAMES K. VARDAMAN,
Senate, Washington, D. C.:

We protest against the injustice of reenactment of special bankers' tax if corporation income tax is to be increased, and urge that you use all effort to eliminate former from the bill.

FIRST NATIONAL BANK.
BANK OF WEST POINT.
CITIZENS' BANK.

Mr. COLT presented a petition of the Rhode Island Bankers' Association, of Providence, R. I., praying for the adoption of certain amendments to the Federal reserve act, which was referred to the Committee on Banking and Currency.

Mr. PHELAN presented memorials of George R. Close and sundry other citizens of Napa County, and of sundry citizens of Lassen County, in the State of California, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

He also presented a memorial of the Board of Supervisors of Contra Costa County, Cal., remonstrating against the proposed inheritance tax, which was referred to the Committee on Finance.

PENSIONS AND INCREASE OF PENSIONS.

Mr. SMOOT (for Mr. JOHNSON of Maine), from the Committee on Pensions, to which was referred the bill (H. R. 16290) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, reported it with amendments and submitted a report (No. 654) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CULBERSON:

A bill (S. 6603) to amend section 245 of the Criminal Code of the United States; to the Committee on the Judiciary.

By Mr. McLEAN:

A bill (S. 6604) granting an increase of pension to Elizabeth Daniels (with accompanying papers); to the Committee on Pensions.

By Mr. BROUSSARD:

A bill (S. 6605) granting an increase of pension to Eugenia L. Williams; to the Committee on Pensions.

By Mr. SHERMAN:

A bill (S. 6606) granting a pension to Amanda B. Birch; and

A bill (S. 6607) granting an increase of pension to Edward Nugent; to the Committee on Pensions.

By Mr. GALLINGER (for Mr. GOFF):

A bill (S. 6608) granting an increase of pension to Jacob P. Marling; to the Committee on Pensions.

By Mr. SHERMAN:

A bill (S. 6609) granting a pension to Mary E. Bradshaw; to the Committee on Pensions.

By Mr. GALLINGER:

A bill (S. 6610) to provide for the payment of assessments for benefits for the opening of streets, avenues, roads, and alleys in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

A bill (S. 6611) granting an increase of pension to Jeremiah B. Davis (with accompanying papers); to the Committee on Pensions.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. WARREN submitted an amendment proposing to appropriate $7,000 for the completion of the Saratoga (Wyo.) fisheries station, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to appropriate $10,000 for general construction and finishing of the Court of Appeals Building adjacent to the courthouse, Washington, D. C., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. O'GORMAN submitted an amendment proposing to appropriate $500,000 for improvement of the East River, N. Y., with a view to providing a channel 35 feet deep from Long Island Sound to the navy yard, intended to be proposed by him to the naval appropriation bill (H. R. 15947), which was ordered to lie on the table and be printed.

PROPOSED GOVERNMENT ARMOR PLANT.

Mr. TILLMAN. I ask unanimous consent for the publication in the RECORD of the matter I send to the desk. It is from the Manufacturers' Record, of Baltimore, an acknowledged authority on such matters, and relates to the Government armor plant. The point of view by the Record is well worth very serious consideration. The bill providing for an armor plant, which passed both the House and Senate, was put in the naval appropriation bill, and contains the following provision:

said factory or factories to have an annual capacity of not less than 20,000 tons of armor; to be located at a place or places approved by the General Board of the Navy, with especial reference to considerations of safety in time of war.

The General Board of the Navy has had the matter under consideration for some time as to where the armor plant ought to be located. I have transmitted to them through the Secretary of the Navy all the matter I am asking to have published in the RECORD. It is of vital importance that all the information possible be had on this question. It will not be disputed that if, as the Baltimore paper contends, we could be cut off from our supply of ore on Lake Superior or elsewhere by war, then we ought, as a matter of common sense, to see to it that the plant we build is at a place where no such catastrophe can occur. The war in Europe has demonstrated the vital importance of munitions plants and an almost endless supply of ammunition, shells, and so forth.

Sound policy indicates the vital importance of having these in more places than one. They should be far enough from the border, and from the coast, too, to make it impossible for any enemy landing on our shores or invading us from the north to capture them. I do not believe it possible that the United States and England will ever go to war; but then no one can tell what might happen, and prudence, as well as statesmanship, makes us know that the armor factory which we are to construct ought to be located somewhere in the South, and that the manufacture of munitions should also be developed there.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

THE PROPOSED GOVERNMENT ARMOR PLANT—THE MISTAKEN POLICY OF THE BETHLEHEM STEEL CO. AND WHY THE GOVERNMENT SHOULD NOT ACCEPT ITS OFFER.

Starting some months ago with a threat to the Government that if the latter undertook to build an armor-plate plant the Bethlehem Steel Co., with a view to its amortization of the investment in its armor plant, would increase the price of its armor plate to the country—a threat which good judgment on the part of the officials of the Bethlehem Co. should never have permitted them to make—that company has steadily shifted its position from one proposition to another until it has now reached the point where it offers to sell armor plate at exact cost to the Government.

The fight of the Manufacturers' Record has certainly driven that company from its position of dictation to the Government, with which it began this campaign, to the position in which it has expressed its recognition of some of its mistakes in dealing with the public and to the point where it has made various propositions, each one of them more favorable to the Government than the preceding one.

The last proposition is to sell armor plate to the Government at cost.

The first proposition was to add largely to the cost of armor plate if the Government built its own plant.

The Manufacturers' Record has in this fight, we believe, at least saved the Government many millions of dollars. But that is not the thing for which we are fighting. We have been antagonizing the Bethlehem propositions on a far broader basis than that of the saving in the cost of armor plate, and with the best of personal feeling for its officers, but with a duty to the public above personal feelings or friendships.

The Manufacturers' Record antagonized the threat of the Bethlehem Co. and said that self-respect demanded that the Government should place itself in a position which would make impossible any similar threat in the future. The Manufacturers' Record, however, took the broader ground that, entirely outside of this threat, it was unwise to the danger point for all the armor plate of the country to be made in one limited area, all of it being centered in Pennsylvania and dependent upon sources of ore supply which could be instantly cut off in time of war.

As it is almost criminal folly for the Government to permit all the munition-making plants of the country to continue longer to be located immediately along the Atlantic coast, subject to capture by an invading enemy, so it is folly for it to permit all of its armor-plate making business to be in the same area and subject to the same dangers. This is the broad national viewpoint, as some munition plants should be

established in the Central South or in the Central West, far away from the Lake region or from dependence upon Lake ores.

This is not in any sense from a sectional point of view. If there are in the Central West as far out as Colorado better locations than the South, then the Manufacturers' Record emphatically advises that the best location should be selected. Some petty suggestions by narrow-minded people not familiar with the broad question have been raised to the effect that the Government could not profitably establish a plant in the South or West, and that the ores of that section were not suitable for armor, and that the Lake ores are not used in armor-plate making. These criticisms, which will be answered in full next week, are too petty to be given serious consideration.

The Manufacturers' Record is as much opposed to the Government accepting the charity of the Bethlehem Co. and getting its armor plate at cost as it was to the Government yielding to the threat of that company when it announced that it would advance the price of armor plate if the Government dared to build a plant of its own. The Bethlehem Co. appears in the foreground in this matter. We do not know whether other armor-plate companies are cooperating with it or not, but we believe they are not. If they are, we would extend to them exactly the same criticism we are giving to the open announcements of the Bethlehem Co.

Upon the announcement, in its desperate effort to prevent the building by the National Government of an armor-plate plant, that the Bethlehem Co. had offered to sell armor plate to the Government at cost, the editor of the Manufacturers' Record wrote to Charles M. Schwab and to President Grace, of the Bethlehem Co., and wired to Senator TILLMAN as follows:

BALTIMORE, MD., *June 21, 1916.*

Mr. CHARLES M. SCHWAB,
Chairman Bethlehem Steel Co., South Bethlehem, Pa.

MY DEAR MR. SCHWAB: This country has not reached a point where from an economic standpoint or from good business morals it is proper for it to make a dicker to change its avowed policy in order to buy any material at the cost of production. This, I think, you will readily recognize.

I am constrained, therefore, to feel that the Bethlehem offer to sell armor plate to the Government at cost in order to prevent the Government from building a plant of its own is from every point of view a mistaken one. It is, I think, as unfortunate as was the threat of the Bethlehem Co. to advance its price of armor plate if the Government should decide to build a plant when this Government-owned plant was first proposed last fall.

I wish you and your associates would consider this situation from the broad viewpoint of the extreme danger to the country, in the event of war, so long as our munition-making business, our armor-plate plants, and 95 per cent of our steel are wholly dependent upon an ore supply that could be instantaneously shut off.

If you for a moment say that there is no danger of the capture or the blocking of our ore supply, then you immediately say that there is no danger of war, and therefore no necessity for building up a navy and creating an army, and no reason, therefore, for making armor plate.

You know the industry too well not to recognize the dangers of the present situation. You know that in the event of war the entire limited supply of foreign ores could instantaneously be cut off. You know that the 50,000,000 tons or more of Lake Superior ores, which come through the Soo Canal, could be shut off with equal facility and without a moment's warning. And yet all of your plants and all other plants in the country producing munitions of war, and the steel plants that produce 95 per cent of the steel of the country, are subject to this danger.

The danger is exactly as real as the danger of war. If there is no danger of war with any outside power, then there is no danger of this upsetting of all the steel industry of the country. In that case, however, as just stated, there would be no necessity whatever for building a navy or constructing fortifications and equipping them with great guns.

Upon the iron and steel men, who have been enriched by the vast opportunities of this country and of the facilities which this country has afforded to them, rests a very serious responsibility. They can, to their own advantage and at the same time to the Nation's welfare, develop these industries in other sections. They can create enterprises away from the coast and not dependent upon Lake Superior or foreign ores for the production of war supplies, and so long as they fail to do so may I not suggest that they are failing as patriots to recognize their responsibilities to the Nation, though they are asking the Nation to develop an army and a navy to protect all interests, their's included.

Will you not give serious thought to this consideration?

Some great iron and steel man must take the lead, and whoever does so will do a patriotic work for the country which will forever redound to his credit. I shall be glad to see you and your associates lead in the matter.

Upon the announcement of the offer of the Bethlehem Co. to sell armor plate to the Government at cost, I felt that your proposition was so unsound from the economic standpoint of the Government's welfare, and from good business judgment, that I wired to Senator TILLMAN as per the inclosed copy. It directly antagonizes the position of the Bethlehem Co., and I trust that it may be helpful in defeating your plan; for, however much may be my esteem personally for you and your associates, I am constrained to say that it seems to me you are making a very serious mistake in this campaign in which you have so vigorously assailed the building of an armor-plate plant by the Government, and in doing this have created a widespread hostility to your interests and to the interests of other great industrial corporations.

Very truly, yours,

RICHARD H. EDMONDS, *Editor.*

TELEGRAM TO SENATOR TILLMAN.

BALTIMORE, MD., *June 21, 1916.*

Hon. BENJAMIN R. TILLMAN,
United States Senate, Washington, D. C.:

The offer of Bethlehem Steel Co. to sell armor plate at cost does not in the slightest change the situation that to permit all armor-plate and munition-making business to continue concentrated in a limited territory dependent wholly on Lake Superior ores, or on foreign ore, both of which could be cut off without a moment's warning in time of war, would be criminal folly on the part of our Government. If the Bethlehem Co. and other armor-plate makers would offer to supply armor without cost to the Government, this Nation would still be recreant to its responsibilities if it permitted existing conditions in iron and steel, munition and armor making to last any longer. It should be emphasized over and over again that about 95 per cent of the steel production of the United States comes out of ores from the Lake Superior region, which pass through a short canal which could at any moment be blocked by the explosion of a few sticks of dynamite. In such an event, the entire iron and steel industry and all interests dependent upon them throughout the country would instantaneously collapse, for the South and Southwest produce only about 5 per cent of the steel made in the United States. This condition should never have been permitted to exist prior to the war, but now that the world's attention has been called to this amazing situation and its danger brought to national attention by Europe's struggle, it will be unspeakable folly to permit it to continue longer. If the Bethlehem or other armor-plate makers want to show their patriotism, it should be done by building armor plate and munition plants far away from the coast and not dependent upon Lake Superior ores, or else in a spirit of broad national patriotism sink their own individual interests and encourage the Government to build such plants where they would be safe in time of war. Any other policy on the part of armor-plate or munition-making interests would indicate a lack of broad patriotism, which, for their honor and the honor of the country, it is to be hoped will never have to be charged against the great industrial leaders of the country.

RICHARD H. EDMONDS,
Editor Manufacturers Record.

TELEGRAM FROM SENATOR TILLMAN.

WASHINGTON, D. C., *June 21.*

MANUFACTURERS' RECORD,
Baltimore, Md.:

In reply to your wire, just received, the power to locate the armor plant authorized by the Senate and agreed to in the House naval appropriation bill is placed in the Secretary of the Navy, subject to the approval of the General Board. The Naval Committee has no power to change this responsibility. But I will call the attention of the Secretary to the strong argument presented in your telegram. I shall urge on him the wisdom of the facts you present, and no doubt he will give them serious consideration. Of course, you know already that materials for making armor plate are found in Alabama, Virginia, and in Pennsylvania, to say nothing about other places. If the Lake Superior ores were not obtainable, we still would not lack for material to make armor. But the structural steel and other steel needed by commerce and the business interests of the country would be very difficult to obtain, of course.

B. R. TILLMAN.

SECOND TELEGRAM TO SENATOR TILLMAN.

BALTIMORE, MD., *June 22, 1916.*

Hon. BENJAMIN R. TILLMAN,
United States Senate, Washington, D. C.:

Acknowledging yours of June 21, just received. You apparently have overlooked the fact that the entire steel industry of Pennsylvania is dependent on Lake Superior ores, excepting to the extent of a very small supply of foreign ores. Pennsylvania makes one-half of the steel produced in the United States, but all of this is made out of ores brought from Lake Superior district and a limited amount of foreign ores, the entire production of iron ores in Pennsylvania being too small to be given any consideration and amounting to only about 1 per cent of the total amount of ores used in the State. My contention has been to try to save the Government from making the fatal blunder of continuing armor-plate making in Pennsylvania, where all of it is now centered, since that State and its steel interests are just as dependent upon Lake Superior ores as are western steel-making districts. There are great iron-ore supplies in Alabama and Virginia, as you suggest, as well as in other Southern States, but it will take time to adequately develop them in order to save the Government from its present dependence upon Lake Superior ores, and this development should be begun on a large scale at once. Permit me to suggest that you are mistaken in supposing that "if the Lake Superior ores were not obtainable" the Government still "would not lack for material to make armor." The Government would be just as helpless and unable to secure the materials for armor-plate as would be the commercial interests of the country in their inability to secure "structural steel and other steel needed by commerce." When once the Lake Superior district supply has been shut off, Pennsylvania's iron and steel interests would collapse as completely as would iron and steel interests of the Lake Superior region, for all alike depend upon Lake Superior ores. The only possible salvation of the situation, and it will be a fearful mistake for the Government not to recognize this, is to build armor-plate and munition plants in the Central South or Southwest, so that all of these interests may not be dependent wholly upon one ore supply, as they are at present. Please do not overlook the fact that under existing conditions the Government could no more secure the materials for armor-plate making if the Lake Superior district were shut off than could the business interests of the country secure the material for structural iron and steel, and this likewise applies to guns, large and small, and to munitions of war. To fail to take account of this situation would be a mistake of incalculable possibilities of evil.

RICHARD H. EDMONDS,
Editor Manufacturers' Record.

President Grace, of the Bethlehem Co., published a letter which he had written Senator TILLMAN, offering to sell armor plate at cost, and, called forth by that, the following letter was sent to Mr. Grace:

BALTIMORE, MD., *June 23, 1916.*

Mr. E. G. GRACE,
President Bethlehem Steel Co., South Bethlehem, Pa.

DEAR SIR: In the first paragraph on the last page of the printed copy of your letter of June 10 to Senator TILLMAN you say:

"This question should not be determined with reference to the interests of the Bethlehem Steel Co., but with supreme regard to adequate national defense and sound public policy."

I inclose a copy of our Daily Bulletin, containing copies of a letter to Mr. Schwab and telegrams to and from Senator TILLMAN in regard to the proposition made by your company to provide the armor plate to the Government at cost. I have, at various times, invited the attention of the Bethlehem Co. to the danger of having all of our armor plate and munition plants located in a limited area in the East and dependent upon sources of ore supply which could be immediately cut off in time of war. I invite your attention to the statements made in the letter to Mr. Schwab and the telegrams to Senator TILLMAN.

In connection with the statement in your letter to Senator TILLMAN, to the effect that this question should be decided "*with supreme regard for adequate national defense and sound public policy*," it is with supreme regard for adequate national defense that I have pressed upon the country's attention the necessity of developing armor making and iron and steel production in other sections than those now dependent upon foreign and Lake Superior ores. I have discussed this subject wholly from the standpoint of adequate national defense. No one could be more fully aware of the danger of the present situation, with 95 per cent of our steel dependent upon ores the supply of which could be shut off at any moment in time of war, than you and your associates, and I am glad that in your letter to Senator TILLMAN you have taken the ground that this question should be determined not with reference to the interests of your company, but with supreme regard for adequate national defense and sound public policy.

I have repeatedly asked if, in view of the danger of the present situation, your company or other armor-plate companies would, individually or unitedly, agree to build in some other part of the country an armor-plate plant in order to give to the Government an assurance which it can not possibly have under existing conditions, if the Government did not build an armor plant. To this question I have not been able to secure any reply. I am sure that your company individually, or your company in connection with other armor-plate makers, could well afford, in the interest of the Nation's welfare, which means the protection of every dollar invested in all of the iron and steel interests dependent upon Lake Superior ores, to build an armor plant far away from existing plants and not dependent upon the same source of ores, if it was done even with the distinct understanding that it would not be put into operation except in a case of emergency. Nevertheless, I am sure that a plant of this kind, in connection with other iron and steel interests, could be made profitable, but if it did not make a dollar of profit, or if it did not go into operation, but should be built merely as a means of safety in time of need, it would be a wise investment on the part of the steel interests of the country.

The Government is proposing to spend hundreds of millions of dollars to enlarge its Navy merely to provide against contingencies. Manufacturing plants often have duplicate power facilities, so that in the event of accident to one the other can be immediately utilized, and this is considered a wise investment. Hydroelectric plants sometimes spend large sums to build auxiliary steam plants to be used in case of emergency should any disaster happen to their water-power plant. Would not the steel interests of the country, who have billions of dollars staked on getting a regular, unbroken supply of Lake Superior ores, be justified in following so wise an example? The iron and steel interests, the munition industries, the armor-plate makers, with all the billions invested in their plants and in interests dependent upon iron and steel, have not a single dollar invested as insurance against this danger by owning plants in other sections dependent upon other sources of ore, except the Steel Corporation, which has one plant in Alabama.

Permit me to quote an extract from a letter written yesterday to Secretary Daniels:

"With all of the armor plants now existing wholly dependent upon Lake Superior ores, with all of the munition factories in the country dependent upon the steel produced from Lake Superior ores, with every shipbuilding industry in the country, even including those on the Pacific coast and those at Norfolk and at Newport News, dependent upon steel from Lake Superior ores, with every locomotive plant in the country wholly dependent upon Lake Superior ores, and every steel-rail mill in the country, with the exception of one in Birmingham and one in Colorado, dependent upon Lake Superior ores, you can readily appreciate that the situation is one to alarm to a serious degree every thoughtful man."

In view of these facts and of that broad statement in your letter to Senator TILLMAN to the effect that this question should be decided with supreme regard for adequate national defense, may I not ask if it is possible to provide adequate national defense so long as you can not guarantee your supply of foreign ores or of Lake Superior ores to be available in time of war, and I need not remind those so well informed on this subject as you and your associates of the possibility of a complete cutting off of these sources of ore, which is certainly equally as great as was the possibility of Europe's awful struggle two years ago.

Very truly, yours,

RICHARD H. EDMONDS, *Editor*.

The Manufacturers' Record has received from Mr. W. S. Pilling, of Pilling & Crane, Philadelphia, dealers in iron, steel, and ores, a letter taking exception to some of these statements in regard to armor-plate making and the availability of the South for this industry. Mr. Pilling's letter and a reply which we think will entirely satisfy him that it would have been much wiser if he had never written it will appear in the Manufacturers' Record next week. If anybody else wants to take issue with the statements made by the Manufacturers' Record on these points, he is invited to come on.

—

THE ARMOR-PLATE QUESTION AGAIN—SOME CRITICISMS THAT LACK FOUNDATION—THE SOUTH'S ABILITY TO PRODUCE HIGH-GRADE STEEL.

As stated in the Manufacturers Record last week, Mr. W. S. Pilling, of Pilling & Crane, whose business is iron and steel and ores, has taken sharp exception to the campaign of the Manufacturers Record looking to the building of an armor-plate plant in the South. Mr. Pilling's letter hardly deserves the space it occupies or that necessary to reply to it; nevertheless, as he is afraid that we have not the fairness to publish his letter, we take great pleasure in permitting him to have his say, and in reply thereto giving some additional facts on the subject:

PILLING & CRANE,
IRON, STEEL, ORES, COAL, COKE.
REAL ESTATE TRUST BUILDING,
BROAD AND CHESTNUT STREETS,
Philadelphia, Pa., June 23, 1916.

EDITOR MANUFACTURERS RECORD:

I beg to acknowledge receipt of the editorial in your Daily Bulletin under date of June 22.

In this editorial you speak of the "sad lack of knowledge" on the part of Senator TILLMAN. This lack of knowledge, if it existed, would be quite pardonable, but I can not see how it is pardonable in respect to yourself. Senator TILLMAN is not supposed to be an iron manufacturer nor especially familiar with the steel trade. Your paper has posed as representing the iron interests, and you ought to be familiar with actual conditions. In the first place, armor plate is not produced from ore principally shipped from Lake Superior nor from abroad. Armor plate is produced from low-phosphorous pig iron, and the production of this quality of iron is from ores mined principally in the United States, and not in the Lake Superior district. In addition to this, you seem to lose sight of a very important fact, namely, that Lake Superior ores, if needed, can be shipped by all rail to any point in the United States where blast furnaces exist. It is quite true that this would mean some additional freight, but this factor is unimportant as compared with the value of the product. You should also know that there is no ore produced in Alabama which is suitable or could be used in the manufacture of armor plate, and even if there was such ore, it could be transported by rail to any of the now existing armor plants, some of which are sufficiently removed from the Atlantic seaboard to be immune from foreign attack or interference. It is, no doubt, quite pardonable on your part to endeavor to stimulate industries in the South and Southwest, as that has always been the function of your paper, but I can not see that you are justified in distorting facts nor in criticizing capable and patriotic men who have certainly presented to the Government a proposition which is so eminently fair and liberal that there would seem to be no just ground for criticism but only for approval.

I do not know that you have the fairness to publish this letter, but you are privileged to do so if you are willing to place the other side of the question before the public.

There is every reason why the South should be developed, but this development should be along the lines of natural resources, and not by forcing an industry into a locality where there are neither raw materials nor the skilled labor which are convenient to localities where this industry naturally flourishes.

W. S. PILLING.

Copy to Senator TILLMAN.
Copy to Mr. Schwab.

When Mr. Pilling suggests that the ore mined in the Lake Superior region could be suddenly shifted from water transportation to rail he displays a lack of knowledge of rail transportation and of the utter inability of the railroads to meet such a condition as to make the rest of his letter hardly worthy of serious consideration.

Mr. Pilling makes the statement that there is no ore produced in Alabama which is suitable or could be used in the manufacture of armor plate.

We did not specify Alabama, but have always referred to the South in general. Senator TILLMAN mentioned "Alabama and Virginia," and, therefore, we quoted from him in that respect; but the contention of the Manufacturers Record did not specify any one particular Southern State. But, as to whether Alabama ore is suitable or not, we leave Mr. Pilling to the tender mercy of the actual facts presented by Mr. James Bowron, president of the Gulf States Steel Co., Birmingham, and Mr. Paschal Shook, of that city. Mr. Shook calls attention to the fact that Alabama pig iron was tested satisfactorily under Mr. Corey's administration of the Carnegie Co. in the production of armor plate. Mr. Bowron says that Germany's armor plate is made from the same kind of steel that is now being produced in Alabama, and he shows the low phosphorous content of the steel which is being made in that State by his company, and doubtless by the Tennessee Coal, Iron & Railroad Co.

Mr. Pilling and the Iron Age are about on a par in their attempt to belittle this situation. The Iron Age, in referring to this discussion, says:

"Even allowing for every happening in this hysterical program for the blowing up of all the locks at Sault Ste. Marie—there are now three, with a fourth building—it would take only about 10 good trainloads of ore from Lake Superior mines to provide for the wants of the proposed armor-plate factory for an entire year, to say nothing of the millions of tons of ore that are carried in reserve in furnace yards and on Lake Erie docks. But, of course, while the hysteria is on, one must think of the possibility of all the railroads leading from Lake Superior to Central Western furnaces being blown up by bombs from enemy aeroplanes, and of every railroad and blast furnace and steel plant in the South being entirely exempt from any such visitation. There are some reasons for building an armor-plate plant in the South and for the establishment of munitions manufacture there, but those who ask serious consideration for them will want to separate them from this rubbish of putting the rest of the country's steel works out of business by dynamiting the Soo Canals."

As this is in keeping with Mr. Pilling's erroneous view, a few facts may possibly enlighten the Iron Age as well as Mr. Pilling.

The suggestions in regard to the possibility of the Soo Canal or canals being destroyed by dynamite is based on statements made by leading engineers, one of them for many years one of the foremost men in the Government service, entirely familiar with the whole situation. It is possible that these engineers know as much about the matter as either the Iron Age or Mr. Pilling.

The suggestion that 10 good trainloads of ore from Lake Superior would provide for the wants of armor plate indicates a degree of vacuity of mind difficult to comprehend coming from a reputable publication like the Iron Age. If the supply of Lake Superior ore were cut off, and no one can deny that this is feasible, the question at issue would not be simply finding enough ore to run the armor-plate plants, but to take care of the whole iron and steel industry dependent on Lake Superior ores. If a complete collapse of the iron and steel business to the extent of 90 to 95 per cent of the steel output of the country had been brought about by the capture of the Lake Superior district or the shutting off of the canal, neither the miners nor the railroads would be in any position to furnish ore to run armor-plate plants or any other steel plants in the region dependent upon these lake ores for their steel product. A collapse so severe as would then have taken place would put the armor-plate plants in Pennsylvania entirely out of business.

The Iron Age's suggestion of "hysterical program" is in keeping with the arguments used in England for many years against preparedness, for which England is now paying a fearful penalty. Does the Iron Age want to see this country follow the same policy?

The suggestion in Mr. Pilling's letter that Lake Superior ores could, if necessary, be shipped by rail to any point in the United States where blast furnaces exist displays a sad lack of proper consideration of the question of such importance to the Nation. It is not so much the question of getting a few thousand tons that might be needed for armor plate itself as it is of handling the Lake Superior ore to take care of the steel industry of the country. But suppose the Lake Superior ore district had been captured. That in itself would immediately settle this supposed argument of Mr. Pilling.

The shipment of Lake Superior ore by water amounts to over 50,000,000 tons a year. This ore goes to furnaces all the way, say, from Chicago, roughly 500 miles from the iron-ore region, to eastern Pennsylvania points, approximately 1,300 miles. Measuring the average distance and the quantity shipped to various points, these ores, if carried by rail, would have to be hauled an average of about 750

to 1,000 miles. It is conservative to put the amount at 800 miles. The facilities for handling this ore by rail are limited. The docking arrangements in the Lake region have been very largely built for water shipment and could not be easily adjusted to rail shipment. Existing railroads could not largely increase the handling of these ores except after many months of improving their facilities. But just how the facilities would be improved when the district had been captured or when the whole territory had been upset by the blocking of the canal no one of average intelligence has yet tried to figure out, because it is recognized as an impossibility.

If we take 800 miles as the average distance which these ores would have to be hauled, provided the canal had been blocked but that the mining region was still open, the entire traffic would amount to over 40,000,000,000 mile-tons. The total mileage of the Pennsylvania Railroad in its east and west lines is a fraction over 12,000 miles, and the total mile-tons for last year was 38,926,000,000 tons. Therefore railroad facilities, to get the 50,000,000 tons of ore out of the Lake Superior district to the furnaces now dependent upon these ores, would mean an amount equal to the entire traffic of the Pennsylvania Railroad suddenly thrown on to existing lines. Some of this traffic, of course, is now handled from the Lakes to Pittsburgh and to eastern Pennsylvania furnaces, but a moment's consideration by anyone would show the utter absurdity of supposing that in the event of a war this traffic of 40,000,000,000 mile-tons could suddenly be shifted from water transportation to rail transportation. Anyone who advances that argument has not much knowledge as to the railroad situation of the country nor as to the chaotic condition that the railroads of the whole East and West would be in in the event of war. Congestion on these roads has been bad enough of late without war conditions. It is a pity that so intelligent a publication as the Iron Age permits itself to publish so serious a blunder on so serious a question as that which concerns national welfare and thus bemuddle a situation of national importance and national safety.

The letters from Mr. Bowron and Mr. Shook are a complete and overwhelming answer of facts against Mr. Pilling's visionary and unsubstantial theories, and Mr. Bowron's statement about the lake and rail transportation applies with equal force to the Iron Age's mistakes on that point.

FACTS IN REGARD TO THE CHARACTER OF SOUTHERN-MADE STEEL AND OTHER MATTERS OF INTEREST TO THE PUBLIC AS WELL AS TO MR. PILLING.

GULF STATES STEEL CO.,
JAMES BOWRON, PRESIDENT,
Birmingham, Ala., June 26, 1916.

EDITOR MANUFACTURERS RECORD:

I am in receipt of your favor of June 24, inclosing copy of letter received by you from Mr. W. S. Pilling, of the firm of Pilling & Crane, dealers in iron, steel, ores, etc., in Philadelphia, dated June 23, 1916. I am impressed, after perusal thereof, with the idea that Mr. Pilling must be a professor of psychology, remembering the Scottish anecdote, "Sandy, what is psychology?"

"Jock, psychology is when ae feller undertakes to tell til anither thet whilka he dinna ken his ainsel."

If I ever saw this aptly illustrated, it is in the present case, where a dealer in iron, steel, and ores who is supposed to be "especially familiar with the steel trade," and one who "has posed as representing the iron interests and familiar with actual conditions," undertakes to write such nonsense to a poor newspaper man who is not supposed to be especially familiar.

It would seem from his letter that he is unaware that the States of Michigan, Wisconsin, and Minnesota are in the United States and that their shipment of ore is by the Great Lakes, commonly, for brevity's sake, designated as the Lake Superior district. If Mr. Pilling, who is a dealer in ores, will specify any other large source in the North of low phosphorous ores used in the production of steel, if would be a source of interest to the trade to have the location and the tonnage specified.

In the next place Mr. Pilling certainly should be aware of the fact that the mines tributary to the Lake district are largely arranged for lake shipment, and for that only, and that the terminals and necessary provision of hoppers, bins, trestles for railroad loading do not exist, and that it would be necessary, if water transportation were temporarily interrupted in time of war to build in and construct for at least a year the necessary railroad communications and facilities for shipment to take care of the transportation of 1,000,000 loaded cars per annum to take the place of the present water transportation. The cars themselves could not be provided within the time any more than could the necessary loading facilities.

In the next place Mr. Pilling makes a marvelous error for one so familiar with the trade, where he bases the quality of the finished steel upon the quality of the ore, utterly neglecting the transmutation resulting from the intermediate process. He should be aware that the principal sources of steel for the manufacture of armor plate and everything else in the German Empire is ore which is highly phosphoric; so much so that they find it necessary to manufacture both by the basic Bessemer process, where the excess phosphorus is burned in the converter, and by the relatively wasteful process known as the duplex, where the phosphorus is eliminated in the open hearth.

What the Germans can do Americans can do. As a matter of fact, this company has been for years manufacturing with perfect ease steel by the open-hearth basic process from highly phosphoric pig iron. The average of the pig iron which we produce at Gadsden is 1.15 per cent, which is considerably higher than that produced in the immediate Birmingham district, which does not exceed 0.85 of 1 per cent. Notwithstanding our high starting point, we have not the slightest difficulty in delivering steel of as low phosphorus as our customers desire. Taking heats within the past week or 10 days, I give you the following:

Heat No.	Phosphorus percentage.
6136	0.017
6135	.025
6134	.012
6133	.018
6132	.012
6131	.016
6130	.015
6129	.021
6128	.016
6127	.014
6126	.016
6125	.015

These are sufficient as an example. I could give you ten times as many if it were necessary.

Starting with this low-carbon, low-phosphorus steel, any additional qualities may be given to it that may be desired for the purpose contemplated in its completion.

It may be recarburized, or casehardened, or have such additions made as desired of nickel, chrome, vanadium, tungsten, or otherwise, to give it the desired hardness on its face, its own homogeneous softness and toughness making it perfect for the back.

There is nothing special in what we are doing. I am not in a position to speak for the operations of the Tennessee Coal, Iron & Railroad Co., a subsidiary of the United States Steel Corporation, but I do know that when I was an active officer thereof and we were making basic pig iron for the Carnegie Steel Co., Illinois Steel Co., and other northern concerns, we sent around the assistant to the general manager, Mr. Paschal Shook, to see the uses to which our customers were putting the steel produced from our pig iron. The phosphorous limit in this iron on our contract notes was that it should be under 1 per cent. When Mr. Shook came to Homestead works of the Carnegie Steel Co., he asked Mr. W. E. Corey if he would permit some of it to be used in the armor-plate department, to see how it worked, and this was done while he stayed there for a week, and worked perfectly satisfactorily.

I do not propose to enter into any controversy that might seem to reflect upon the Bethlehem Steel Co. I have the highest regard not only for the commanding technical ability of its management, but also for their patriotism, and I entertain personally a warm sympathy with Mr. C. M. Schwab and Mr. E. M. Grace in the way in which they have submitted their case to Congress.

That, however, is not at the present moment under discussion. I only wish to make it clear that in writing what I am doing I am not writing in any way to attack their plants, their methods, or their policies, but to say that which is true and which is known to all competent students of the situation, viz, that the Birmingham district possesses the necessary materials, the means of transportation, and the necessary men with experience and brain power to undertake any class of development of the iron and steel industry which the requirements of the United States may involve, whether the same be for military, naval, or transportation purposes, and that anyone who is quixotic enough to put a lance in rest and tilt against the Birmingham district might as well tilt, like the Spanish knight, against a revolving windmill. This district can not be harmed by the most thorough investigation of the truth, and any such letter as that from Mr. Pilling simply affords a text upon which the truth may be preached.

JAS. BOWRON, *President.*

SOUTHERN STEEL SATISFACTORILY USED IN THE MAKING OF ARMOR PLATE.

SHOOK & FLETCHER SUPPLY CO. (INC.),
PIG IRON, STEEL, ORE, COAL, COKE,
Birmingham, Ala., June 26, 1916.

EDITOR MANUFACTURERS RECORD:

Mr. James Bowron, president of the Gulf States Steel Co., invited me into his office this morning to read over some correspondence between himself and yourself and also a copy of a letter addressed to you by Mr. Pilling. I have read Mr. Bowron's reply, and agree with him fully in his position, and think he has very completely answered Mr. Pilling.

While in Mr. Bowron's office, and during a discussion of the armor-plate matter, I reminded him of a trip that I took North in 1896, soon after the Tennessee Coal, Iron & Railroad Co. began the manufacture of basic iron at Alice furnace, in Birmingham, and the shipment of this iron North to plants which had basic open-hearth furnaces. He has requested me to write you a letter in to-night's mail confirming statement I made to him with reference to the use of Alice iron at the Homestead steel works at that time, some of which was converted into steel that went into armor plate.

This incident will have no significance to steel men or to anyone entirely familiar with the steel business. It is a well-known fact and a well-established fact that the basic iron manufactured in the South is just as suitable for making basic open-hearth steel as any iron manufactured in the country. The usual limit of phosphorous in southern basic permits a little higher phosphorous than is probably found in the northern basic, but this element, as you know, and is well known to the steel trade, can easily be dealt with in the basic open-hearth furnace.

The first basic iron made in the South was at the Alice furnace of the Tennessee company in the summer of 1895. In 1896 I visited all of the plants in the North, not only in the Pittsburgh district and at Pencoyd, near Philadelphia, but also Cleveland, Ohio, Granite City, Ill., and other places, for the purpose of reporting on the use of Alice basic, which was then a new venture in the iron business of the South.

The Carnegie Co. had bought about 25,000 tons of Alice basic iron, which was shipped to Homestead. This iron was being used extensively in their mixture, and I had the pleasure of seeing it charged into the open-hearth furnace, cast into ingots, and these ingots rolled into the various forms of finished products manufactured at the Homestead plant, and also saw some of it made into ingots large enough for armor and these ingots taken to the armor-plate plant and forged into finished plates.

As stated, this is of no significance to the steel men, as the ability to make high-quality basic steel from Southern iron was demonstrated beyond question as soon as the furnace people of the South were able to meet the analysis specifications required by the steel.

P. G. SHOOK, *President and Treasurer.*

The Manufacturers Record recently received word from a leading metallurgist to the effect that the lowest phosphorus pig iron made in the United States was being produced by the Cranberry Furnace Co. at Johnson City, Tenn. In reply to an inquiry on that point, Mr. F. P. Howe, president of the Cranberry Co., writes:

"Low-phosphorous pig iron is usually sold under specifications that require that the phosphorous shall not exceed .035. We have no difficulty in keeping within that in pig iron manufactured from Cranberry ore. There is a furnace at Standish, N. Y., that makes low-phosphorus pig iron from Chateaugay ore magnetically concentrated, the phosphorus in which runs lower than ours, being frequently down to .025 or lower. Mr. Pilling is interested in the furnace which makes this iron."

We take it for granted that the Iron Age is aware of the fact that it is generally understood, and common sense would so dictate, if under existing Army conditions we were engaged in war with a strong power, and our Navy had been defeated, the Army would not make any attempt to defend any portion of the country from Maine to Carolina, knowing full well that it would be impossible within that section to repel an invading army from a country whose navy had already destroyed ours. This entire section, so it is generally stated, under existing conditions

would be abandoned to the enemy, and it would be the effort of the Army to make a rallying point beyond the mountains and there gradually build up a force sufficient to keep the invaders from overrunning the entire country. Under such conditions, of what value would be munition plants or iron and steel industries or iron-making enterprises anywhere in the East or Middle States? And without such establishments immediately available in the central South or West what hope could we have for ever creating an Army to save the whole Nation from being overrun?

It is to be hoped that this condition will never develop, but France and Belgium hoped and anticipated that their iron and steel regions would never be overrun and captured by the Germans.

Prudence demands that somewhere back of the mountain range and away from the possible destruction of an invading army will be built armor-plate and munition plants by the National Government, if individual enterprise refuses to undertake the work.

According to a Washington dispatch to the Iron Trade Review, the proposed naval building program "as recommended by the Senate subcommittee to the full Committee on Naval Affairs provides for four dreadnaughts and four battle cruisers for the coming fiscal year. This would call for practically 46,000 tons of armor, by far greater than any tonnage manufacturers have ever bid on. It exceeds by about 16,000 tons the annual combined capacity of the three armor-making plants in the United States."

If this program is to be carried out, where is the armor plate to come from; for the quantity needed, according to the Iron Trade Review, would far exceed the total capacity of existing plants? Will one of these armor-plate concerns agree to build a plant somewhere in the South or West to meet this situation and at the same time to meet the dangers of the location of existing plants, or will they all, by refusing to do this, compel the Government to build its proposed plant?

PRESIDENTIAL APPROVAL.

A message from the President of the United States by Mr. Sharkey, one of his secretaries, announced that the President had, on July 11, 1916, approved and signed the following act:

S. 3346. An act conferring jurisdiction on the Court of Claims to adjudicate the claims of the State of Massachusetts.

COTTONSEED STATISTICS.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 4767) authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. CHILTON. I move that the Senate insist upon its amendments and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to, and the Vice President appointed Mr. CHILTON, Mr. SHEPPARD, and Mr. LA FOLLETTE conferees on the part of the Senate.

HOUSE BILL REFERRED.

H. R. 16763. An act to increase the revenue, and for other purposes, was read twice by its title and referred to the Committee on Finance.

RECESS.

Mr. JAMES. I move that the Senate take a recess until to-morrow morning at 11 o'clock.

The motion was agreed to; and (at 5 o'clock and 55 minutes p. m., Tuesday, July 11, 1916) the Senate took a recess until to-morrow, Wednesday, July 12, 1916, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate July 11 (legislative day of July 7), 1916.

ASSISTANT TREASURER.

Robert I. Hunt, of Decatur, Ill., to be Assistant Treasurer of the United States at Chicago, Ill., in place of Irving Shuman, resigned.

PROMOTIONS IN THE ARMY.

QUARTERMASTER CORPS.

Lieut. Col. Albert D. Kniskern, Quartermaster Corps, to be colonel from July 1, 1916, subject to examination required by law, to fill an original vacancy.

Maj. William G. Gambrill, Quartermaster Corps, to be lieutenant colonel from July 1, 1916, subject to examination required by law, to fill an original vacancy.

Maj. Alexander M. Davis, Quartermaster Corps, to be lieutenant colonel from July 1, 1916, subject to examination required by law, vice Lieut. Col. Albert D. Kniskern, promoted.

CORPS OF ENGINEERS.

To be colonels with rank from July 1, 1916, to fill original vacancies.

Lieut. Col. Charles S. Riché, Corps of Engineers.

Lieut. Col. Thomas H. Rees, Corps of Engineers.

To be lieutenant colonels with rank from July 1, 1916, to fill original vacancies.

Maj. Robert R. Raymond, Corps of Engineers.

Maj. William B. Ladue, Corps of Engineers, subject to examination required by law.

To be lieutenant colonels with rank from July 1, 1916, to fill casual vacancies.

Maj. William J. Barden, Corps of Engineers, subject to examination required by law, vice Lieut. Col. Charles S. Riché, promoted.

Maj. Edward H. Schulz, Corps of Engineers, subject to examination required by law, vice Lieut. Col. Thomas H. Rees, promoted.

To be majors with rank from July 1, 1916, to fill original vacancies.

Capt. William H. Rose, Corps of Engineers.

Capt. Richard C. Moore, Corps of Engineers.

Capt. Lewis M. Adams, Corps of Engineers.

Capt. Charles R. Pettis, Corps of Engineers.

To be majors with rank from July 1, 1916, to fill casual vacancies.

Capt. William D. A. Anderson, Corps of Engineers, vice Maj. Robert R. Raymond, promoted.

Capt. Ralph T. Ward, Corps of Engineers, vice Maj. William B. Ladue, promoted.

Capt. John J. Kingman, detailed in the General Staff Corps, vice Maj. William J. Barden, promoted.

Capt. Robert P. Howell, Corps of Engineers, subject to examination required by law.

ORDNANCE DEPARTMENT.

Lieut. Col. George W. Burr, Ordnance Department, to be colonel from July 1, 1916, subject to examination required by law, to fill an original vacancy.

Maj. John H. Rice, Ordnance Department, to be lieutenant colonel from July 1, 1916, subject to examination required by law, to fill an original vacancy.

Maj. David M. King, Ordnance Department, to be lieutenant colonel from July 1, 1916, subject to examination required by law, vice Lieut. Col. George W. Burr, promoted.

SIGNAL CORPS.

Maj. Edgar Russel, Signal Corps, to be lieutenant colonel from July 1, 1916, to fill an original vacancy.

Capt. Basil O. Lenoir, Signal Corps, to be major from July 1, 1916, to fill an original vacancy.

Capt. William Mitchell, Signal Corps, to be major from July 1, 1916, vice Maj. Edgar Russel, promoted.

CAVALRY ARM.

To be colonels with rank from July 1, 1916, to fill original vacancies.

Lieut. Col. John B. McDonald, detailed in the Inspector General's Department.

Lieut. Col. Tyree R. Rivers, Thirteenth Cavalry.

Lieut. Col. Henry T. Allen, Eleventh Cavalry.

Lieut. Col. John W. Heard, detailed in The Adjutant General's Department.

Lieut. Col. William W. Forsyth, Fourth Cavalry.

Lieut. Col. John C. Waterman, Twelfth Cavalry.

Lieut. Col. George H. Cameron, detailed in the General Staff Corps.

To be colonels with rank from July 1, 1916, to fill original vacancies created by section 25 of an act of Congress approved June 3, 1916, "with a view further to equalize inequalities in past promotions of officers of the line of the Army," all to be additional officers in that grade.

Lieut. Col. Robert D. Walsh, Cavalry, unassigned.

Lieut. Col. George W. Read, detailed in The Adjutant General's Department.

Lieut. Col. De Rosey C. Cabell, Tenth Cavalry.

Lieut. Col. Farrand Sayre, Second Cavalry, subject to examination required by law.

Lieut. Col. Grote Hutcheson, Fifteenth Cavalry.

Lieut. Col. George O. Cress, Cavalry, unassigned.

Lieut. Col. Robert A. Brown, Fourteenth Cavalry.

Lieut. Col. Willard A. Holbrook, Eighth Cavalry.

Lieut. Col. Lewis M. Koehler, Ninth Cavalry.

Lieut. Col. Robert E. L. Michie, detailed in the General Staff Corps.

Lieut. Col. Selah R. H. Tompkins, Seventh Cavalry.

To be lieutenant colonels with rank from July 1, 1916, to fill original vacancies.

Maj. Charles C. Walcutt, jr., detailed in the Bureau of Insular Affairs.

Maj. Peter E. Traub, Cavalry, unassigned.

Maj. Jesse McI. Carter, Twelfth Cavalry.

Maj. Malvern Hill Barnum, detailed in the General Staff Corps.

Maj. Edmund S. Wright, Fourth Cavalry.
Maj. William H. Hay, Fifteenth Cavalry.
Maj. Stephen H. Elliott, Cavalry, unassigned, subject to examination required by law.

To be lieutenant colonels with rank from July 1, 1916, to fill casual vacancies.

Maj. John M. Jenkins, Eleventh Cavalry, subject to examination required by law, vice Lieut. Col. Tyree R. Rivers, Thirteenth Cavalry, promoted.
Maj. P. D. Lochridge, detailed in the General Staff Corps, vice Lieut. Col. Henry T. Allen, Eleventh Cavalry, promoted.
Maj. Nathaniel F. McClure, Fifth Cavalry, vice Lieut. Col. William W. Forsyth, Fourth Cavalry, promoted.
Maj. William C. Rivers, Second Cavalry, vice Lieut. Col. Daniel L. Tate, Fifth Cavalry, promoted.
Maj. Ellwood W. Evans, Tenth Cavalry, vice Lieut. Col. John C. Waterman, Twelfth Cavalry, promoted.
Maj. Thomas Q. Donaldson, detailed in the Inspector General's Department, vice Lieut. Col. Robert D. Walsh, unassigned, promoted.
Maj. Francis H. Beach, Third Cavalry, vice Lieut. Col. De Rosey C. Cabell, Tenth Cavalry, promoted.
Maj. Alonzo Gray, Fourteenth Cavalry, vice Lieut. Col. Farrand Sayre, Second Cavalry, promoted.
Maj. Alexander L. Dade, Seventh Cavalry, vice Lieut. Col. Grote Hutcheson, Fifteenth Cavalry, promoted.
Maj. John S. Winn, detailed in the Inspector General's Department, vice Lieut. Col. George O. Cress, unassigned, promoted.
Maj. Charles A. Hedekin, Fourth Cavalry, vice Lieut. Col. Robert A. Brown, Fourteenth Cavalry, promoted.
Maj. Francis J. Koester, detailed in The Adjutant General's Department, vice Lieut. Col. Willard A. Holbrook, Eighth Cavalry, promoted.
Maj. John D. L. Hartman, Third Cavalry, vice Lieut. Col. Lewis M. Koehler, Ninth Cavalry, promoted.
Maj. Robert L. Howze, Eleventh Cavalry, vice Lieut. Col. Selah R. H. Tompkins, Seventh Cavalry, promoted.
Maj. Guy H. Preston, Second Cavalry, vice Lieut. Col. Charles C. Walcutt, jr., detailed in the Bureau of Insular Affairs.
Maj. Edward Anderson, Third Cavalry, vice Lieut. Col. Melvern-Hill Barnum, detailed in the General Staff Corps.
Maj. George E. Stockle, Twelfth Cavalry, vice Lieut. Col. P. D. Lochridge, detailed in the General Staff Corps.
Maj. William T. Littebrant, First Cavalry, vice Lieut. Col. Thomas Q. Donaldson, detailed in the Inspector General's Department.
Maj. Matthew C. Butler, jr., Sixth Cavalry, vice Lieut. Col. John S. Winn, detailed in the Inspector General's Department.

To be majors with rank from July 1, 1916, to fill original vacancies.

Capt. Kirby Walker, Fourteenth Cavalry.
Capt. Claude B. Sweezey, First Cavalry.
Capt. Sterling P. Adams, Fourteenth Cavalry.
Capt. Julian R. Lindsey, Eleventh Cavalry.
Capt. Edmund M. Leary, Seventh Cavalry.
Capt. Julius T. Conrad, Fifteenth Cavalry.
Capt. Howard R. Hickok, Fifteenth Cavalry.
Capt. Samuel B. Arnold, First Cavalry.
Capt. Samuel McP. Rutherford, Tenth Cavalry.
Capt. George W. Kirkpatrick, Eighth Cavalry.
Capt. Cornelius C. Smith, Cavalry, unassigned, subject to examination required by law.
Capt. Joseph E. Cusack, Eleventh Cavalry.
Capt. Walter M. Whitman, detailed in the Quartermaster Corps.
Capt. Lincoln C. Andrews, Ninth Cavalry.
Capt. William R. Smedberg, jr., Second Cavalry.
Capt. John M. Morgan, Twelfth Cavalry.
Capt. Andrew E. Williams, Sixth Cavalry.
Capt. Walter C. Babcock, Thirteenth Cavalry.
Capt. Herbert B. Crosby, First Cavalry.
Capt. Benjamin B. Hyer, Fourth Cavalry.

To be majors with rank from July 1, 1916, to fill casual vacancies.

Capt. Mathew C. Smith, Ninth Cavalry, vice Maj. Peter E. Traub, unassigned, promoted.
Capt. Kenzie W. Walker, detailed in the Quartermaster Corps, vice Maj. Jesse McI. Carter, Twelfth Cavalry, promoted.
Capt. Harry H. Pattison, First Cavalry, vice Maj. Edmund S. Wright, Fourth Cavalry, promoted.
Capt. Francis LeJ. Parker, detailed in the General Staff Corps, vice Maj. William H. Hay, Fifteenth Cavalry, promoted.
Capt. George F. Hamilton, Second Cavalry, vice Maj. Stephen F. Elliott, unassigned, promoted.
Capt. William H. Paine, Fifteenth Cavalry, vice Maj. John M. Jenkins, Eleventh Cavalry, promoted.
Capt. John W. Craig, Twelfth Cavalry, subject to examination required by law, vice Maj. Nathaniel F. McClure, Fifth Cavalry, promoted.
Capt. Hugh D. Berkeley, Eighth Cavalry, vice Maj. William C. Rivers, Second Cavalry, promoted.
Capt. Albert E. Saxton, detailed in the Quartermaster Corps, vice Maj. Ellwood W. Evans, Tenth Cavalry, promoted.
Capt. Hamilton S. Hawkins, Fourth Cavalry, vice Maj. Francis H. Beach, Third Cavalry, promoted.
Capt. Frank Parker, Eleventh Cavalry, vice Maj. Alonzo Gray, Fourteenth Cavalry, promoted.
Capt. George Vidmer, Eighth Cavalry, vice Maj. Alexander L. Dade, Seventh Cavalry, promoted.
Capt. Casper H. Conrad, jr., Eighth Cavalry, vice Maj. Charles A. Hedekin, Fourth Cavalry, promoted.
Capt. Nathan K. Averill, Cavalry, unassigned, vice Maj. John D. L. Hartman, Third Cavalry, promoted.
Capt. Henry LaT. Cavenaugh, Tenth Cavalry, vice Maj. Robert L. Howze, Eleventh Cavalry, promoted.
Capt. Mortimer O. Bigelow, First Cavalry, vice Maj. Guy H. Preston, Second Cavalry, promoted.
Capt. William G. Sills, Fifteenth Cavalry, vice Maj. Edward Anderson, Third Cavalry, promoted.
Capt. August C. Nissen, Seventh Cavalry, vice Maj. George E. Stockle, Twelfth Cavalry, promoted.
Capt. Clyde E. Hawkins, detailed in the Quartermaster Corps, vice Maj. William T. Littebrant, First Cavalry, promoted.
Capt. James S. Parker, Fourth Cavalry, vice Maj. Matthew C. Butler, jr., Sixth Cavalry, promoted.
Capt. Joseph S. Herron, Second Cavalry, vice Maj. Walter M. Whitman, detailed in the Quartermaster Corps.
Capt. George B. Pritchard, jr., Fifteenth Cavalry, vice Maj. Kenzie W. Walker, detailed in the Quartermaster Corps.
Capt. Alvord Van P. Anderson, Sixth Cavalry, vice Maj. Francis Le J. Parker, detailed in the General Staff Corps.
Capt. Le Roy Eltinge, Eighth Cavalry, vice Maj. Albert E. Saxton, detailed in the Quartermaster Corps.
Capt. John B. Christian, detailed in the Signal Corps, vice Maj. Clyde E. Hawkins, detailed in the Quartermaster Corps.
Capt. George W. Moses, Eighth Cavalry, vice Maj. John B. Christian, detailed in the Signal Corps.
First Lieut. George M. Russell, Cavalry, unassigned, to be captain from June 20, 1916, vice Capt. John S. E. Young, Eighth Cavalry, retired from active service June 19, 1916.
First Lieut. Lewis Brown, jr., First Cavalry, to be captain from June 22, 1916, vice Capt. Charles T. Boyd, Tenth Cavalry, who died June 21, 1916.
Second Lieut. Hugh H. McGee, Second Cavalry, to be first lieutenant from June 20, 1916, vice First Lieut. George M. Russell, unassigned, promoted.
Second Lieut. Carleton G. Chapman, detailed in the Aviation Section, Signal Corps, from June 22, 1916, vice First Lieut. Lewis Brown, jr., First Cavalry, promoted.
Second Lieut. Joseph Plassmeyer, jr., Fifteenth Cavalry, to be first lieutenant from June 22, 1916, vice First Lieut. Henry R. Adair, Tenth Cavalry, who died June 21, 1916.
Lieut. Col. William S. Scott, First Cavalry, to be colonel from July 1, 1916.
Lieut. Col. Daniel L. Tate, Fifth Cavalry, to be colonel from July 1, 1916 (subject to examination required by law).

Second Lieut. Oscar A. Eastwold, Coast Artillery Corps.
Second Lieut. William H. Jouett, Coast Artillery Corps.
Second Lieut. Earl H. Metzger, Coast Artillery Corps.
Second Lieut. Lee O. Wright, Coast Artillery Corps, detailed in the Ordnance Department.
Second Lieut. Lewis A. Nickerson, Coast Artillery Corps, detailed in the Ordnance Department.
Second Lieut. Philip R. Faymonville, Coast Artillery Corps, detailed in the Ordnance Department.
Second Lieut. William C. Harrison, Coast Artillery Corps.

To be first lieutenants with rank from July 1, 1916, to fill casual vacancies.

Second Lieut. John S. Wood, Coast Artillery Corps, vice First Lieut. Alexander G. Pendleton, promoted.
Second Lieut. Robert H. Lee, Coast Artillery Corps, vice First Lieut. John C. Henderson, promoted.
Second Lieut. David McL. Crawford, Coast Artillery Corps, vice First Lieut. Edward W. Wildrick, promoted.
Second Lieut. Oscar J. Gatchell, Coast Artillery Corps, vice First Lieut. Alexander G. Gillespie, promoted.
Second Lieut. Cris M. Burlingame, Coast Artillery Corps, vice First Lieut. John S. Pratt, promoted.
Second Lieut. Raymond V. Cramer, Coast Artillery Corps, vice First Lieut. Edward J. Cullen, promoted.
Second Lieut. Sidney P. Spalding, Coast Artillery Corps, vice First Lieut. Pierre V. Kieffer, promoted.
Second Lieut. Leonard L. Barrett, detailed in the Ordnance Department, vice First Lieut. Joseph J. Grace, promoted.
Second Lieut. Stephen H. MacGregor, Coast Artillery Corps, vice First Lieut. George E. Turner, promoted.
Second Lieut. James Kirk, Coast Artillery Corps, vice First Lieut. Harry A. Schwabe, promoted.
Second Lieut. Robert N. Bodine, detailed in the Ordnance Department, vice First Lieut. Oscar A. Russell, promoted.
Second Lieut. James H. Johnson, Coast Artillery Corps, vice First Lieut. Walter J. Bättgenbach, promoted.
Second Lieut. John H. Lindt, Coast Artillery Corps, vice First Lieut. Charles O. Schudt, promoted.
Second Lieut. Bird S. Du Bois, Coast Artillery Corps, subject to examination required by law, vice First Lieut. Philip Mathews, promoted.
Second Lieut. Cyril A. Phelan, Coast Artillery Corps, vice First Lieut. Marcellus H. Thompson, promoted.
Second Lieut. Earl B. Hochwalt, Coast Artillery Corps, vice First Lieut. William R. McCleary, promoted.
Second Lieut. John W. Churchill, Coast Artillery Corps, vice First Lieut. William W. Rose, promoted.
Second Lieut. Byron R. Coleman, Coast Artillery Corps, vice First Lieut. John G. Hotz, promoted.
Second Lieut. Harry W. Stark, Coast Artillery Corps, vice First Lieut. Albert Gilmor, promoted.
Second Lieut. Stiles M. Becker, Coast Artillery Corps, vice First Lieut. Clarence A. Mitchell, promoted.
Second Lieut. Raymond G. Payne, Coast Artillery Corps, vice First Lieut. William P. Currier, promoted.
Second Lieut. Archie S. Buyers, Coast Artillery Corps, vice First Lieut. Horace F. Spurgin, promoted.
Second Lieut. William A. Borden, Coast Atrillery Corps, subject to examination required by law, vice First Lieut. Ralph D. Bates, promoted.
Second Lieut. Francis T. Armstrong, Coast Artillery Corps, vice First Lieut. Edward A. Brown, promoted.
Second Lieut. Edwin B. Spiller, Coast Artillery Corps, vice First Lieut. John G. Donovan, promoted.
Second Lieut. Cecil G. Young, Coast Artillery Corps, vice First Lieut. Guy L. Gearhart, promoted.

Second Lieut. Carl A. Waldmann, Coast Artillery Corps, detailed in the Ordnance Department, vice First Lieut. George A. Wildrick, promoted.

Second Lieut. Paul W. Evans, Coast Artillery Corps, subject to examination required by law, vice First Lieut. Allen Kimberly, promoted.

Second Lieut. Henry A. Wingate, Coast Artillery Corps, vice First Lieut. Howard K. Loughry, promoted.

Second Lieut. William C. Washington, Coast Artillery Corps, vice First Lieut. Thomas A. Clark, promoted.

Second Lieut. Alfred B. Quinton, jr., Coast Artillery Corps, vice First Lieut. William F. Dowd, promoted.

Second Lieut. Harold A. Strauss, Coast Artillery Corps, subject to examination required by law, vice First Lieut. Maxwell Murray, promoted.

Second Lieut. Cyril A. W. Dawson, Coast Artillery Corps, vice First Lieut. Geoffrey Bartlett, promoted.

Second Lieut. Walter O. Rawls, Coast Artillery Corps, vice First Lieut. William E. Shedd, jr., promoted.

Second Lieut. Francis A. Englehart, Coast Artillery Corps, vice First Lieut. James A. Gallogly, promoted.

Second Lieut. William A. Copthorne, Coast Artillery Corps, vice First Lieut. Royal K. Greene, promoted.

Second Lieut. Selby H. Frank, Coast Artillery Corps, vice First Lieut. Robert P. Glassburn, promoted.

Second Lieut. Robert H. Van Volkenburgh, Coast Artillery Corps, vice First Lieut. Paul J. Horton, promoted.

Second Lieut. Samuel J. Heidner, Coast Artillery Corps, vice First Lieut. Robert Arthur, promoted.

Second Lieut. Junius W. Jones, Coast Artillery Corps, vice First Lieut. John P. Keeler, promoted.

Second Lieut. Manning M. Kimmel, jr., Coast Artillery Corps, vice First Lieut. Lucian D. Booth, promoted.

Second Lieut. Vern S. Purnell, Coast Artillery Corps, vice First Lieut. Thomas F. McNeill, promoted.

Second Lieut. Robert M. Perkins, Coast Artillery Corps, vice First Lieut. George M. Peek, promoted.

Second Lieut. Lawrence B. Weeks, Coast Artillery Corps, vice First Lieut. Perry M. Gallup, promoted.

Second Lieut. William C. Foote, Coast Artillery Corps, vice First Lieut. William P. Wilson, promoted.

Second Lieut. Stewart S. Giffin, Coast Artillery Corps, vice First Lieut. Charles L. Williams, promoted.

Second Lieut. Ward E. Duvall, Coast Artillery Corps, vice First Lieut. Alexander J. Stuart, promoted.

Second Lieut. James B. Gillespie, Coast Artillery Corps, vice First Lieut. Chester J. Goodier, promoted.

Second Lieut. Redondo B. Sutton, Coast Artillery Corps, subject to examination required by law, vice First Lieut. John E. Townes, jr., promoted.

Second Lieut. Francis J. Toohey, Coast Artillery Corps, vice First Lieut. Robert E. Vose, promoted.

Second Lieut. Charles L. Kilburn, Coast Artillery Corps, subject to examination required by law, vice First Lieut. Dean Hall, promoted.

Second Lieut. Joe Eikel, Coast Artillery Corps, vice First Lieut. John S. Williams, promoted.

Second Lieut. Robert D. Brown, Coast Artillery Corps, vice First Lieut. George Ruhlen, jr., promoted.

Second Lieut. Edward O. Halbert, Coast Artillery Corps, vice First Lieut. Junnius Pierce, promoted.

Second Lieut. Harry L. King, Coast Artillery Corps, vice First Lieut. Henry W. T. Eglin, promoted.

Second Lieut. Augustin M. Prentiss, Coast Artillery Corps, vice First Lieut. Halver G. Coulter, promoted.

Second Lieut. Russell A. Osmun, Coast Artillery Corps, vice First Lieut. West C. Jacobs, promoted.

Second Lieut. Lester E. Moreton, Coast Artillery Corps, vice First Lieut. James W. Lyon, promoted.

Second Lieut. La Rhett L. Stuart, Coast Artillery Corps, vice First Lieut. Harold Geiger, promoted.

Second Lieut. Alfred E. Larabee, Coast Artillery Corps, vice First Lieut. Rodney H. Smith, promoted.

Second Lieut. John A. Brooks, jr., Coast Artillery Corps, vice First Lieut. Albert L. Loustalot, promoted.

Second Lieut. Albion R. Rockwood, Coast Artillery Corps, vice First Lieut. Richard Donovan, promoted.

Second Lieut. Frank L. Hoskins, Coast Artillery Corps, vice First Lieut. Sanderford Jarman, promoted.

Second Lieut. John H. Jouett, Coast Artillery Corps, vice First Lieut. Clair W. Baird, promoted.

Second Lieut. Joseph D. McCain, Coast Artillery Corps, vice First Lieut. Edward W. Putney, promoted.

Second Lieut. Eugene Villaret, Coast Artillery Corps, vice First Lieut. Gilbert Marshall, promoted.

Second Lieut. Reiff H. Hannum, Coast Artillery Corps, vice First Lieut. Louis L. Pendleton, promoted.

Second Lieut. Harold F. Loomis, Coast Artillery Corps, vice First Lieut. Thomas A. Terry, promoted.

Second Lieut. Leland H. Stanford, Coast Artillery Corps, vice First Lieut. Edward N. Woodbury, promoted.

Second Lieut. James C. Waddell, Coast Artillery Corps, vice First Lieut. Ray L. Avery, promoted.

Second Lieut. Richard B. Paddock, Coast Artillery Corps, vice First Lieut. Edward A. Stockton, jr., promoted.

Second Lieut. Charles C. Griffith, Coast Artillery Corps, vice First Lieut. James H. Cunningham, promoted.

Second Lieut. James B. Haskell, Coast Artillery Corps, vice First Lieut. Allison B. Deans, jr., promoted.

Second Lieut. James P. Hogan, Coast Artillery Corps, vice First Lieut. Robert R. Welshimer, promoted.

Second Lieut. Gooding Packard, Coast Artillery Corps, subject to examination required by law, vice First Lieut. William W. Hicks, promoted.

Second Lieut. Glenn P. Anderson, Coast Artillery Corps, vice First Lieut. Eugene B. Walker, promoted.

Second Lieut. Adam E. Potts, Coast Artillery Corps, vice First Lieut. Karl F. Baldwin, promoted.

Second Lieut. Henry S. Aurand, Coast Artillery Corps, vice First Lieut. Charles K. Wing, jr., promoted.

Second Lieut. Harold E. Small, Coast Artillery Corps, vice First Lieut. Robert O. Edwards, promoted.

Second Lieut. Henry B. Sayler, Coast Artillery Corps, vice First Lieut. Robert N. Campbell, promoted.

Second Lieut. Albert H. Warren, Coast Artillery Corps, vice First Lieut. Guy A. Mix, promoted.

Second Lieut. John F. Kahle, Coast Artillery Corps, vice First Lieut. John H. Pirie, promoted.

Second Lieut. Reinold Melberg, Coast Artillery Corps, vice First Lieut. Eugene Reybold, promoted.

Second Lieut. Clarence B. Lindner, Coast Artillery Corps, vice First Lieut. Hugo E. Pitz, promoted.

Second Lieut. John H. Cochran, Coast Artillery Corps, vice First Lieut. Thomas C. Cook, promoted.

Second Lieut. Logan W. Searles, Coast Artillery Corps, vice First Lieut. Olin H. Longino, promoted.

Second Lieut. John K. Meneely, Coast Artillery Corps, vice First Lieut. Peter H. Ottosen, promoted.

Second Lieut. Joseph J. Teeter, Coast Artillery Corps, vice First Lieut. Edgar H. Thompson, promoted.

Second Lieut. John S. MacTaggart, Coast Artillery Corps, vice First Lieut. Samuel H. McLeary, promoted.

Second Lieut. Martin J. O'Brien, Coast Artillery Corps, vice First Lieut. John N. Reynolds, promoted.

Second Lieut. Joseph C. Haw, Coast Artillery Corps, vice First Lieut. Louis D. Pepin, promoted.

Second Lieut. Iverson B. Summers, jr., Coast Artillery Corps, vice First Lieut. Rufus F. Maddux, promoted.

Second Lieut. Clifford R. Jones, Coast Artillery Corps, vice First Lieut. Herbert A. McCune, promoted.

Second Lieut. John B. Wogan, Coast Artillery Corps, vice First Lieut. Lincoln B. Chambers, promoted.

Second Lieut. Clesen H. Tenney, Coast Artillery Corps, vice First Lieut. Willis C. Knight, promoted.

Second Lieut. Frank E. Emery, jr., Coast Artillery Corps, vice First Lieut. John R. Ellis, promoted.

Second Lieut. Edward C. Wallington, Coast Artillery Corps, vice First Lieut. John Mather, promoted.

Second Lieut. Carl E. Hocker, Coast Artillery Corps, vice First Lieut. Chester R. Snow, promoted.

Second Lieut. Richmond T. Gibson, Coast Artillery Corps, vice First Lieut. Robert E. M. Goolrick, promoted.

Second Lieut. Edward B. Hyde, jr., Coast Artillery Corps, vice First Lieut. Walter P. Boatwright, promoted.

Second Lieut. Walter W. Hess, jr., vice First Lieut. John P. Smith, promoted.

Second Lieut. Thomas J. Brady, Coast Artillery Corps, vice First Lieut. Harry R. Vaughan, promoted.

Second Lieut. Herbert R. Corbin, Coast Artillery Corps, vice First Lieut. Abney Paine, promoted.

Second Lieut. Hubert R. Harmon, Coast Artillery Corps, vice First Lieut. Edwin K. Smith, promoted.

Second Lieut. Joseph D. Coughlan, Coast Artillery Corps, vice First Lieut. Clarence T. Marsh, promoted.

Second Lieut. Charles H. Chapin, Coast Artillery Corps, vice First Lieut. Thomas D. Sloan, promoted.

Second Lieut. William P. Cherrington, Coast Artillery Corps, vice First Lieut. John B. Maynard, promoted.

Second Lieut. Charles R. Finley, Coast Artillery Corps, vice First Lieut. Jacob Frank, promoted.

APPOINTMENTS IN THE ARMY.

DENTAL CORPS.

Acting Dental Surg. Eugene Milburn to be dental surgeon with the rank of first lieutenant from June 14, 1916, to fill an original vacancy.

Acting Dental Surg. Claudius Gordon Baker to be dental surgeon with the rank of first lieutenant from June 15, 1916, to fill an original vacancy.

PORTO RICO REGIMENT OF INFANTRY.

Capt. Orval P. Townshend, Porto Rico Regiment of Infantry, to be lieutenant colonel from June 3, 1916, to fill an original vacancy.

Capt. John M. Field, Porto Rico Regiment of Infantry, to be major from June 3, 1916, to fill an original vacancy.

Capt. Edwin J. Griffith, Porto Rico Regiment of Infantry, to be major from June 3, 1916, to fill an original vacancy.

Capt. Miles K. Taulbee, Porto Rico Regiment of Infantry, to be major from June 3, 1916, to fill an original vacancy.

PROMOTIONS IN THE NAVY.

Ensign William J. Butler to be a lieutenant (junior grade) in the Navy from the 7th day of March, 1915.

Ensign Anson A. Merrick to be a lieutenant (junior grade) in the Navy from the 5th day of December, 1914.

Ensign Frederick Baltzly to be a lieutenant (junior grade) in the Navy from the 7th day of September, 1915.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 7th day of June, 1916:

Henry L. Abbott,
Cullen H. Want,
Carl T. Hull,
Thomas G. Berrien,
Hamilton V. Bryan,
Elroy L. Vanderkloot,
George B. Junkin,
Louis J. Roth,
Philip C. Ransom, and
William Masek.

Wilfred W. Hawke, a citizen of Pennsylvania, to be an assistant surgeon in the Medical Reserve Corps of the Navy from the 5th day of July, 1916.

Boatswain William De Fries to be chief boatswain in the Navy from the 21st day of December, 1915.

Passed Asst. Surg. Harry Shaw to be a surgeon in the Navy from the 28th day of April, 1915.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 11 (legislative day of July 7), 1916.

POSTMASTERS.

MASSACHUSETTS.

James Y. Deacon, Nantucket.
John F. McManomin, North Chelmsford.

MICHIGAN.

James R. McCarty, Mackinac Island.
H. Kirk White, Owosso.

MINNESOTA.

Margaret M. Briggs, Princeton.
Catherine I. Cashman, Eden Valley.

NORTH DAKOTA.

Peter Hengel, Anamoose.
Thomas Rowan, Sherwood.
Della C. Tolan, Mayville.

WITHDRAWALS.

Executive nominations withdrawn July 11 (legislative day of July 7), 1916.

First Lieut. Robert F. Tate, Eighth Cavalry, to be captain.

First Lieut. Sebring C. Megill, Cavalry, detailed in the Signal Corps, to be captain.

Second Lieut. Robert S. Donaldson, Thirteenth Cavalry, to be first lieutenant.

NOTE.—The above-named officers were nominated to the Senate for said promotions on June 22, 1916, and their nominations were confirmed by that body on June 29, 1916.

HOUSE OF REPRESENTATIVES.

TUESDAY, *July 11, 1916.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou who art the inspiration of every worthy thought, pure aspiration, and earnest endeavor, give to us great thoughts and help us to weave them into deeds commensurate with the light Thou hast given us. Be with us through the remaining hours of this day, quicken all our activities, and make us profitable servants that we may add to the world's treasures and make it richer that we have lived and wrought, "For whosoever will save his life shall lose it; and whosoever will lose his life for My sake shall find it." Thus inspire, guide, and support us in the spirit of the Master. Amen.

The Journal of the proceedings of yesterday was read and approved.

EXTENSION OF REMARKS.

Mr. DALE of Vermont. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Vermont rise?

Mr. DALE of Vermont. I rise to ask unanimous consent to extend my remarks in the RECORD on the subject of the response of the National Guard.

The SPEAKER. The gentleman from Vermont asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. HUDDLESTON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the repeal of section 4716 of the Revised Statutes.

The SPEAKER. The gentleman from Alabama asks unanimous consent to extend his remarks on the subject of repeal of section 4716 of the Revised Statutes. Is there objection? [After a pause.] The Chair hears none.

LEAVE TO ADDRESS THE HOUSE.

Mr. HENSLEY. Mr. Speaker, I ask unanimous consent that I may be permitted to address the House for five minutes immediately after the gentleman from Tennessee [Mr. BYRNS] has concluded.

The SPEAKER. The gentleman from Missouri [Mr. HENSLEY] asks unanimous consent to address the House for five minutes immediately after the conclusion of the remarks of the gentleman from Tennessee [Mr. BYRNS]. Is there objection? [After a pause.] The Chair hears none.

COTTON PRODUCTS STATISTICS.

Mr. LEVER. Mr. Speaker, I would like to call up the bill H. R. 4767, with Senate amendments, and ask unanimous consent that the House disagree to the Senate amendments and ask for a conference.

The SPEAKER. The Clerk will report the title of the bill.

The Clerk read as follows:

H. R. 4767. An act authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products, with Senate amendments.

Mr. LEVER. Mr. Speaker, I am asking that the Senate amendments be disagreed to and a conference be asked.

The SPEAKER. The gentleman asks unanimous consent to disagree to the Senate amendments and ask for a conference. Is there objection? [After a pause.] The Chair hears none.

The SPEAKER appointed the following conferees: Mr. HELM, Mr. HOUSTON, and Mr. HINDS.

PENSION OFFICE APPROPRIATIONS.

The SPEAKER. The gentleman from Tennessee [Mr. BYRNS], under the special order, is recognized for 30 minutes. [Applause.]

Mr. BYRNS of Tennessee. Mr. Speaker, I have asked the indulgence of the House in order that I might make a reply to several statements that have appeared in the Washington city papers accredited to the Pension Commissioner criticizing Congress and particularly the subcommittee which prepared the legislative, executive, and judicial appropriation bill, for its action in the appropriations made for that particular bureau. I regret that I have not had the opportunity to make reply at an earlier date. In what I shall say I do not intend to criticize the Pension Commissioner personally, for personally he is a very agreeable gentleman for whom I have great respect, but I do wish to say something in regard to the statements made, which I consider both remarkable and unusual, because it is the first time within my knowledge that a subordinate, either high or low, in any of the executive departments, has undertaken to criticize directly

and inferentially in the newspapers, Congress and one of its subcommittees, because it saw fit to exercise its constitutional function, and its own judgment in making the appropriations for his bureau rather than to permit him to write the appropriations to suit himself.

No one can dispute the fact that during the past four years Congress has been exceedingly liberal in its recognition of the Union soldier and the services rendered by him in behalf of the Union during the Civil War. Its legislation in his behalf has far exceeded any that was enacted during any of the preceding years. In May, 1912, the Sherwood pension bill, which provides for a more liberal pension, based on age and service, was enacted into law. A law has also been passed providing for an honor roll or an additional pension for those soldiers who rendered distinguished and particular service during the Civil War. A change has been made in the method of paying pensions, so that the pensioner now receives his payment by the simple method of a check from the Pension Office in Washington rather than by the indirect and troublesome voucher system, through the medium of a branch disbursing office. The House has passed a bill raising the pensions of all widows of Civil War veterans from $12 to $20 per month. Congress has also passed many thousands of special bills, raising pensions of those whose physical disabilities and financial condition in its judgment, justify a greater pension than that allowed under the general law. In addition to the foregoing general and special legislation in the interest of the Civil War veterans, Congress has passed other and additional legislation in the interest of the soldiers who have served the country in all of its various wars. It has appropriated every dollar necessary for the payment of the pensions of all persons upon the pension roll, and the adequacy of the appropriations is attested by the unexpended balance which has been returned to the Treasury each year. It has also appropriated every dollar necessary for the work of the Pension Bureau in Washington through which the pension laws are administered, and the pension payments are made. The adequacy of the provision for the bureau is attested by the fact that the work of the bureau is current, and the payment of the pensions is prompt and efficacious.

It is true that I did not vote for some of these measures when they were up for passage; but, coming from the South, as I do, I wish to say that I have always been in favor of a liberal pension for those old soldiers who fought for the Union when their physical and financial conditions justify it. And in saying this I am sure I speak for a generous Southland, from which all traces of bitterness growing out of the Civil War have long since passed away and which to-day is as devoted and as loyal to the flag and the Union as any other section of this great country. [Applause.]

In view of this record I have been very much surprised to read repeated statements in the form of interviews in the Washington City papers by the Commissioner of Pensions, in which Congress has been, in effect, taken to task because it did not allow all the appropriation for a clerical force in the Pension Bureau which this particular official desired. As to the propriety of a subordinate official in an executive department criticizing Congress in the public press because, forsooth, it did not see fit to grant his demands for an increased force I shall have nothing to say, except that, in my judgment, it is, to say the least, unbecoming in a bureau chief, who is charged with the administration of the law, to make declarations in the newspapers criticizing Congress in the exercise of its constitutional function in making appropriations for his bureau, especially when the matters complained of are due to his own lack of proper administration rather than to the inadequacy of the appropriations made by Congress. But, as one who has had something to do with the framing of the legislative, executive, and judicial appropriation bill, which carries the appropriation for the Pension Bureau, I feel that it is proper that I should place in the RECORD the true facts and show the error into which this particular official has fallen. Shortly after the said bill became a law there appeared several statements in the papers of this city, one of which I will quote. It reads as follows:

Commissioner of Pensions Saltzgaber has served notice upon the employees of his bureau that 67 places are to be dropped from the rolls July 1.

This notice has caused much heart burning and unrest in the bureau. He says:

"An arbitrary cut in force is provided by law, and the commissioner is powerless," he says, "to continue the rolls above the number provided."

Acting on the knowledge that a cut would be necessary July 1, the commissioner has saved all vacancies that occurred in the bureau.

As a result 42 vacancies have been held open during the year.

This means that only 25 employees will be dismissed. This number will possibly be slightly further cut by resignations or death.

Commissioner Saltzgaber stated to-day that every effort has been made to find places for those who must be dropped in the other departments and bureaus of the Government here.

These efforts have met with little success, because other offices have declined to take the older employees and have not had salaries available that were high enough to attract the younger ones.

THIRD CUT IN THREE YEARS.

The cut in the Pension force July 1 will be the third in the last three years. Congress abolished 145 positions July 1, 1914, and 93 positions July 1, 1915.

Commissioner Saltzgaber and other administration officials protested further reduction at this time, but the legislative bill wiped out 67 positions.

The commissioner believes the cut will work hardship on a number of deserving employees who have given their lives to the Government service, and he frankly dreads the day of reckoning for them.

Cut in the number of places on the Pension Office rolls has been made by Congress on the ground of diminishing work with diminution of the pension rolls through deaths.

Had this ended the attempt at what it would appear was intended as a propaganda I should have said nothing; but quite recently other and more direct criticism has been made, taking Congress to task for its action with reference to the force, and particularly the subcommittee, of which I happen to have the honor to be chairman. I quote from the Evening Star of June 29 as a sample of these statements which were made in all of the Washington City papers, and which were possibly carried in other papers:

Ten clerks have been "let out" at the Pension Office, and there are to be a series of reductions in salaries or demotions in grade in that branch of the Government service, according to information obtained to-day by a reporter for the Star.

Commissioner Saltzgaber confirmed this statement to-day, saying that the coming reductions will take effect July 1, as the result of action, which he tried to prevent, recently taken by the subcommittee of the House Appropriations Committee before which he appeared to assist in making up the "budget" for the coming appropriations for the office.

As a result of the impending changes, there is a nervous tension among all the clerks of the office, among whom has spread a rumor that there will be about 50 reductions, and some of whom believe that influence of the right kind in Democratic circles may save them. In the course of a statement made to-day by Commissioner Saltzgaber he spoke frankly of the problems which have confronted the office and explained the conditions which made it necessary for this course to be taken.

BLAMES HOUSE COMMITTEE.

The commissioner maintained that the root of the matter is to be traced to the subcommittee of the House Appropriations Committee, before which he appeared to get the appropriation for this year's budget. He stated that this committee insisted that the office was carrying a surplusage on its force; that the salaries paid made too high a total; and that it was advisable to reduce both the number and the sum.

"We made the best fight we could," said the commissioner, "and I personally voiced my opinion that every man on the force was profitably employed at a proper salary. We almost were sustained by the Senate committee, but failed by two votes. The appropriation we obtained from Congress was based upon the figures deemed correct by the subcommittee of the House for our force and their salaries."

The commissioner went on to explain that with the given sum only a fixed number of clerks could be paid a predetermined salary, and that it had become his duty to reduce the force and the salaries in certain instances. Ten clerks had been "let out," he said, already, and the necessary reductions are to be made in the near future.

One would infer from the last sentence of this quotation that more than 10 employees were to be ultimately dropped, whereas I have a letter from the commissioner, dated July 3, in which he states that only 9 were actually dropped from the rolls.

Those familiar with the force in the Pension Office have recognized for many years the fact that it is overloaded with clerks, and that the force should be radically reduced in the interest of economy and good government. This was true before the passage of the Sherwood pension age-and-service act, which has largely reduced the work of the office by the automatic increase of pensions. It was true to such an extent that a Commissioner of Pensions, a number of years ago, in his report commented upon it. Neither he nor Congress, however, ever wished to pursue the drastic remedy of discharging the old soldiers and other faithful employees of the Pension Office by depriving them of their positions.

But to relieve the situation that commissioner did recommend that a law be passed which would provide that in the future no vacancies should be filled until the force was reduced to a proper basis. In accordance with that recommendation Congress made such provision, and it was carried in the appropriation bills for 1907, 1908, and 1909. The action of Congress in changing the method of paying pensions and in the passage of the Sherwood law has resulted in a very steady and rapid decrease of the work of the bureau, and the subcommittee on the legislative, executive, and judicial appropriation bill has been endeavoring for several years to reduce the cost of operating that bureau. Accordingly in 1914 and 1915 the appropriation act included a provision that not more than one-fourth of all the vacancies occurring in the Pension Bureau, either by death, resignation, or transfer, should be filled except by promotion.

Under this provision the commissioner was dropping all the lower-grade places and rapidly raising the average salary of the bureau. The committee therefore incorporated in the current legislative, executive, and judicial appropriation bill a provision intended to prevent more than 25 per cent of the vacancies being filled by promotion or otherwise.

At the hearings before the subcommittee of the House and Senate the Commissioner of Pensions strenuously opposed this provision, stating (House hearings, p. 613) that "our people are all profitably employed. We strained ourselves last year and the year before in order to make a good showing, and we reduced the force really more than we should have done." He also complained (Senate hearings, p. 167) that the limitation on promotions "is a grave injustice to employees" and "prevents recognition of merit," although the fact that employees of the Pension Bureau (including messengers and laborers) will receive in 1917 an average salary of $1,310 a year shows that the appropriation is more than ample to enable the commissioner to pay fair salaries to all the employees if he distributes the places justly. This average salary is far above the average in most Government offices, and is $25 more than the average pay of the Pension Bureau for the last fiscal year. So the truth is that the clerks remaining in the Pension Bureau during this fiscal year will receive an annual average increase of approximately $25, or a total of about $27,000 more than they received last year.

The commissioner has not limited his resistance to protests, but, according to the records of the Civil Service Commission, the law was actually disobeyed during the last year by filling more than 25 per cent of the vacancies. In July, 1915, the first month of the fiscal year 1916, three vacancies occurred, two at $400 (one by resignation and one having been dropped from the rolls) and one at $1,200 by death. Under the law referred to the commissioner was not entitled to fill either of these places, but the records show that he did fill the larger-salaried vacancy at $1,200. This was not done by drawing from the civil-service rolls at the lower initial salary; nor did he promote any one of the lower-paid clerks in the bureau, but a female clerk in the Indian Office drawing $900 was transferred and given the salary of $1,200. In August eight vacancies occurred. These, with those occurring in the preceding month, would have authorized the filling of two places, one of which, as I have stated, had been anticipated in July, leaving only one that could be filled under the law. But, notwithstanding this, three additional places were filled by transfers from other bureaus in the department. Two female clerks in the Indian Office drawing $900 each were transferred to the Pension Office at salaries of $1,200 and $1,000, respectively, and another female clerk in the Geological Survey, drawing $1,000, was transferred to the Pension Office at $1,200. In September 7 vacancies occurred, making a total of 18 for the three months, and which would have authorized the filling of four places under the law. But, as we have seen, these places had been anticipated, contrary to law, in the two preceding months. Notwithstanding this, three new places were filled in the Pension Office by the transfer of a female clerk from the Geological Survey, drawing $1,000, to the Pension Office at a salary of $1,200, and a male clerk, drawing $900 in the Indian Office, to a position paying $1,000 in the Pension Office, and another male clerk, drawing $720 in the Bureau of Mines, to a position in the Pension Office paying $750.

In October, 6 vacancies occurred, making a total of 24 for the four months, which would have authorized the filling of 6 places under the law. But, as we have seen, 7 places had already been filled. Notwithstanding this, he filled 2 new places, 1 by reinstatement at $1,200 and the other by the transfer of a clerk from the Secretary's office, drawing $1,200, to the Pension Office at a salary of $1,400.

Thus, in the first four months of the last fiscal year three more places were filled than were authorized by law. This filling of places continued each month, with the single exception of November, until February, or just about the time the subcommittee of the House Committee on Appropriations began its hearings, when he had an excess of four above the number authorized by law. After this no further places were filled. But so many had been previously filled in plain violation of the law that on May 1, although 51 vacancies had occurred, 14 of them had been filled, or two in excess of the number authorized, one by reinstatement, two by appointment, and the others by transfers from other bureaus, all but three of whom were transferred at salaries in excess of those they were receiving in their former places of employment.

I have cited these facts from the records in order to show why the committee saw fit to recommend a change in the wording of the 25 per cent provision, and also in answer to the alleged assertion of the commissioner that in anticipation of a cut in the force on July 1 he had "saved all vacancies that occurred in the bureau." I may say that the commissioner in his estimates not only did not recommend the dropping of the vacancies actually existing in the office, but he asked Congress to appropriate for all of them for the present fiscal year. And it was only after his attention had been called to the matter at the hearings, and while sitting at the committee table, that after some figuring he suggested that 30 clerks of the $1,000 and $900 class could be dropped. It appeared, too, that the estimates for the Pension Office included 27 high-salaried clerks who perform no service in that office but for a number of years have been detailed to other branches of the department. I do not say that these clerks are not needed where they are employed, but I do say that they should be carried on the rolls where they are actually rendering service. They should not be estimated for as being required in the Pension Office when, as a matter of fact, they are performing services elsewhere. This is a practice which, I regret to say, is too frequently followed, but which Congress has been trying for a long time to correct. In view of what has been said, it is perfectly apparent that had these places been saved in anticipation of a reduction on July 1, which, as the commissioner says, he expected, it would not only not have been necessary to have let 10 clerks go, as the commissioner says he was compelled to do on July 1, but there would have been other vacancies to be filled by appointment.

I repeat that no one who has given a close study to the details of the Pension Office will deny that there has been a largely excessive force in that office in view of its rapidly decreasing work. Last year Congress provided an appropriation of $4,000 for labor-saving machinery, equipments, and supplies necessary to demonstrate and improve methods of paying pensions, which it was confidently claimed would ultimately save a hundred thousand dollars a year in two divisions of the Pension Bureau, and might reasonably be expected to save $20,000 the first year. This appropriation did not obligate the commissioner to accept the system if it did not do what was claimed for it. It was merely for the purpose of showing whether or not the system would reduce the cost and improve the result of the work. Notwithstanding this action of Congress and the claims made in behalf of this system, the commissioner did not use the appropriation but permitted it to lapse. In the hearings he gave as his reason that he was opposed to it, and for that reason declined to use the appropriation as directed by Congress, stating in explanation of his action that "there was a matter of sentiment against the operation of that system if its value consisted in simply reducing the number of our employees." I am unable to understand how a bureau chief who is interested in good administration should so flagrantly disregard the desire of Congress to reduce the cost of operating his bureau. Pension laws have been passed and the Pension Office created for the benefit of the old soldiers, and not merely for the purpose of providing places for fortunate employees. Certainly everyone who is interested in the old soldiers prefers to see the money appropriated for pensions paid to them rather than have a large amount diverted for the payment of an unnecessary large number of clerks, and it was in this spirit and with this idea that Congress enacted the provision referred to.

But, I regret to say, that in this attempt there seems to have been no serious effort to render assistance. It has been confidently asserted that the employment of the system proposed would easily result in a decrease in two divisions alone of 100 clerks, and yet the commissioner declined to use the appropriation provided, which would have served to demonstrate the truth or error of that fact, which was admitted by one of the officers in the bureau, in a prepared statement regarding a plan proposed by the Bureau of Efficiency for paying pensions and auditing accounts of pension payments.

Is it little wonder that the committee, having received no assistance from the commissioner by way of estimate or suggestion, should have felt compelled in the interest of the public service to recommend the provision carried upon the present legislative, executive, and judicial appropriation bill, and which was concurred in by the Senate and the House? It works no injustice to any employee in the Pension Bureau, and I repeat, that if it had been administered with due regard to both the spirit and the letter of the law, and in the interest of economy and good government, there would not have arisen any necessity for the discharge of a single clerk in the Pension Office at the beginning of the present fiscal year. Neither does it deprive the commissioner of making any proper promotion of the clerks in his office, whose services entitle them to it, if he will but exercise his discretion of equalizing the clerks in accordance with their ability to render service.

I wish to repeat with all emphasis that no one desires to see any clerk in the Pension Office who has rendered, or is rendering, faithful service discharged. More especially does this

apply to any old soldier there employed, although he is drawing a pension and has been favored during all these years over his comrades to the extent of the salary he is drawing. However, it might well be contended that in granting pensions for military service all old soldiers should be treated alike and that a favored few who are appointed to the Federal service, largely through political influence, should not be given an average of $1,310 per annum more than their hundreds of thousands of comrades without rendering a fair return in service. But it was with this idea in view that Congress enacted the provision that only 25 per cent of the vacancies occurring should be filled, prefering in this humane way to gradually reduce the force year by year, rather than by following the more drastic method of lopping them all off at once.

In conclusion, let me say that it is difficult for me to understand how a public official, who is charged with the duty of administering such an important bureau, should have failed to take into consideration not only the question of economy in the operation of the bureau but also the interest of the pensioners themselves, and so arrange the affairs of his office as to meet the reductions which he, himself, states that he anticipated would be made on July 1 without injustice to anyone of the great number of faithful employees employed in that bureau.

It is even more difficult for me to understand how such an official could see his way clear to criticize Congress and one of its committees through the public press for having adopted a provision and made an appropriation which, if properly administered, could not possibly have worked an injustice to any employee of the Government, and which was so clearly in the interest of the public service. [Applause.]

Mr. ASHBROOK. Mr. Speaker, will the gentleman yield?

The SPEAKER. Will the gentleman from Tennessee yield to the gentleman from Ohio?

Mr. BYRNS of Tennessee. I yield to the gentleman.

Mr. ASHBROOK. I have followed my friend very carefully, and I fail to discover where the commissioner has been guilty himself of serious criticism of this committee. If I am not mistaken, the criticism the gentleman objects to is largely that of the newspapers and not of the commissioner.

Mr. BYRNS of Tennessee. But if the gentleman had listened——

Mr. ASHBROOK. I have listened patiently from beginning to end.

Mr. BYRNS of Tennessee. If the gentleman had listened to the quotations which I read, he would have seen that they were based on the express statements of the commissioner and that the papers state that he blamed the subcommittee and claimed that its action resulted in great distress to his bureau.

Mr. ASHBROOK. The gentleman undoubtedly has had as much experience with the newspapers as I have had, and therefore he should make due allowance for what some reporter may happen to say.

Mr. BYRNS of Tennessee. I will say to the gentleman that at least one of these quotations is largely made up from what purports to be a literal quotation from the commissioner, placed in quotation marks. I contend that it is exceedingly unbecoming, to say the least, and improper for any bureau chief in an executive department to undertake to criticize Congress or any one of its committees in the newspapers merely because it did not see fit to allow him all the clerks he asked for his particular bureau; and I think I have shown that in the appropriations made for the Pension Bureau there was not only an adequate provision made, but, in the interest of those employed, there was an appropriation made that was even larger than was necessary to carry on the work of that bureau.

Mr. ASHBROOK. I would like to inquire whether or not the gentleman made inquiry of the Commissioner of Pensions as to whether he really made the statement alleged to have been made by him in the public press?

Mr. BYRNS of Tennessee. I have not. But those statements were made, and they were given prominent headlines, and I am sure the gentleman read them at the time——

Mr. ASHBROOK. As they always do when an employee is discharged.

Mr. BYRNS of Tennessee. And, not only by direct deduction but inferentially, they undertook to put upon Congress the burden of whatever criticism might result because any employee of that bureau had been dismissed, whereas I have shown—I think, conclusively—that if the law had been followed and these vacancies had been preserved, as the commissioner is quoted as saying was done, there would not have been any necessity for discharging any clerks in that bureau.

Mr. BYRNES of South Carolina. Mr. Speaker, will the gentleman yield there?

Mr. BYRNS of Tennessee. I will.

Mr. BYRNES of South Carolina. I want to ask the gentleman whether the commissioner ever denied the accuracy of the newspaper quotations?

Mr. BYRNS of Tennessee. Not to my knowledge.

The SPEAKER. The time of the gentleman from Tennessee has expired.

Mr. COOPER of Wisconsin. Mr. Speaker, I ask unanimous consent that the gentleman may have one minute to answer one question.

The SPEAKER. The gentleman from Wisconsin [Mr. COOPER] asks unanimous consent that the gentleman from Tennessee [Mr. BYRNS] may have one minute to answer a question. Is there objection?

There was no objection.

Mr. COOPER of Wisconsin. Did the commissioner or other official whom the gentleman from Tennessee has quoted impute anything in the way of wrongful motive to any Member of Congress?

Mr. BYRNS of Tennessee. I think if the gentleman will read the article that appeared in the Star he will find that while I would not say he imputed any wrongful motive he imputed to the subcommittee a disinclination to allow him the force necessary in the bureau; and my object in saying what I have this morning was to show that the subcommittee was more than liberal in recommending to the House the appropriation to which the House finally agreed.

Mr. COOPER of Wisconsin. If Congress reserves to itself the right in discussion to criticize executive officials without imputing wrongful motives to them, has not an official a right in a respectful way at any time to make similar criticism of Congress?

Mr. BRYNS of Tennessee. I have no objection, so far as I am concerned, to anyone in any department undertaking to criticize me in my representative capacity, nor, I am sure, has any Member of the House; but I do insist that when some one in an executive department goes out of his way to give interviews, and repeated interviews, in the Washington City papers which were possibly carried over the country, he ought to be careful to confine himself strictly to the facts, and not, as I contend in this instance, undertake to make statements which I am sure are not justified by the record. [Applause.]

The SPEAKER. The gentleman from Missouri [Mr. HENSLEY] is recognized.

Mr. HENSLEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HENSLEY. Mr. Speaker and gentlemen of the House, there is something peculiarly binding and compelling in that influence which is commonly called party loyalty. Not without the strongest and most sufficient reasons will men break away from their party and party associates and give their allegiance and support to another party. It makes it doubly hard where individuals have been the recipients of honors from time to time to turn against those with whom they have been associated so long, and upon the most friendly terms, and contribute their support to the election of another ticket.

Mr. Speaker, I say it requires great courage and patriotism to do this thing. I know how powerful the influences are to keep a Member regular upon all matters which come before Congress, and in some instances this influence is brought to bear in such a terrific way that it becomes thoroughly distressing to the individual.

And yet, this is exactly what a great body of Republicans did in the Sixty-first Congress in 1910. Men whose names I might mention were big enough, courageous enough, and, in some instances, at the sacrifice of their political lives, to go against all of these influences because they truly believed that things were in a bad way, governmentally speaking. They believed that the Government, in many regards, had been and was being removed from the great body of our people. They desired to restore the Government to the people. The people believed in these men, and they believed the charges preferred by them concerning conditions here at the seat of Government, which were at that time under the rule and domination of the "standpatters."

In two great national campaigns the issue was joined upon these charges, the fight made before the American people, and the verdict rendered by them. Many strong Republicans throughout our land, who placed their country higher than their party, acted in accordance with this information and belief, and voted against the reactionaries, which resulted in the Sixty-

second Congress being Democratic and the Sixty-third Congress overwhelmingly Democratic.

Now, Mr. Speaker, the question arises, Was that a false issue submitted to the American people? Were these charges untrue? Were the people misled, and did they make a mistake? Let us briefly and concisely sum up the case.

One of the things severely complained of by the progressive patriots was Cannonism in this House. They charged that legislation was controlled and often throttled by the autocratic power of the Speaker. Immediately upon coming into power the Democrats remedied this condition of affairs by restoring to the membership the right to select the committees of the House without any interference whatsoever from the Speaker. You would not take that power away from the membership of the House to-day and restore it to the Speaker, would you? That being true, were not the Progressives correct in the position they took upon that proposition?

You were in power in the Sixty-first Congress, yet you failed to enact the Sulloway bill, whilst in the Sixty-second Congress, with Speaker CLARK in the Chair, we passed the Sherwood pension law.

I have received no complaints from the old soldiers of my district because of the enactment of this legislation. This law enables them to enjoy some of the comforts in their old age to which they are entitled, and I am sure you would not repeal it, nor would these old patriots restore you to power in order that you might repeal it.

The Underwood tariff law passed the House by a vote of 255 to 104. Republicans voted for it, both here and in the Senate.

The manufacturers' associations had nothing whatever to do with the framing of that bill, nor were there any charges coming from any source regarding improper or corrupt influences exercised in connection with the passage of that law.

The income tax, which requires the wealth of the Nation to bear its just portion of the tax burden of the Government, and to that extent removes the burden from the backs of the poor, was enacted in connection with that tariff law. The people of the Nation for many years demanded an income-tax law yet, notwithstanding you were in undisputed control for 16 long years, you totally failed and refused to respond to their wishes and their demands.

The people will not repudiate the Democratic Party upon that issue, I feel sure.

You no doubt recall how you ridiculed the President when he courageously charged that a powerful and corrupt lobby infested the Capitol and was poisoning the very source and fountainhead of government. You did not believe the charge true, but the record of the investigating committee fairly reeks with testimony which supports the charge made by the President. I could cite many instances and quote from that record if time would permit.

Mr. Littlefield, of Maine, testified before the lobby investigating committee that he was made chairman of a subcommittee of the Committee on the Judiciary, and the duty of this subcommittee was to prevent certain remedial labor legislation from being reported out, and that there were enough Members who stood by him to effect that purpose.

For seven years he was chairman of this subcommittee, and his services were so acceptable to and appreciated by the National Association of Manufacturers that they put $18,000 into his campaign for his reelection to Congress and gave him $3,000 to defray his expenses to the Pacific Coast to recuperate his health. This sort of thing was not right; was not for the good of the Nation, but rather destructive of all good forms of government, and you all know it. And situations like this existed when we came into power.

The great banking houses of New York maintained a clerk, or secret agent, in the Treasury Department to keep them informed in advance upon all important rulings of the department affecting their interests. This was not done for the good of the whole people. Why did you not remove all these evidences of an invisible government while you were in power?

I hope this invisible government and power and its baneful effects to the American people have been destroyed forever, and if that has been accomplished that alone will entitle this administration and President Wilson to the continued confidence and support of the American people.

Thus far the Progressives seem to have been right in the position they took.

The laboring people of this Nation have for many years demanded legislation to which they were entitled, and when presented during this administration many of you on the other side of the aisle voted for it.

Let me inquire of you now, Was it good legislation? If it was not, why did you vote for it? If it was, then why did you not enact such laws when you were in power?

When I was a member of the Committee on Labor we reported out a bill creating a Department of Labor in the Cabinet, and to-day the Hon. W. B. Wilson, who was then the chairman of the Labor Committee, is Secretary of Labor.

The laboring people can well be congratulated upon the selection of Mr. Wilson for that place in the Cabinet, for the Nation could not have a more trustworthy or dependable servant.

"The proof of the pudding is the eating of it." Therefore I am submitting some of these issues as clearly and with as little unnecessary argument as I can.

We have practically put the Government upon the eight-hour basis throughout. The bill to which I refer passed the House without a roll call; no division upon it.

The bill creating the Children's Bureau passed the House without a roll call. On division vote, there were 177 yeas to 17 nays.

The anti-injunction law passed the House by a vote of 243 yeas to 31 nays. This piece of legislation will forever prevent the courts of the land from adjudging individuals guilty of contempt and throwing them into jail without giving them the right of a trial by jury simply because they were pursuing their constitutional rights to better their conditions in life.

The safety of railway employees bill passed the House without a roll call or division.

Mr. Speaker, the passage of all these wholesome laws were not accidental, but were in response to the popular and legitimate demands of the American people. Neither were they thought of and demanded only recently, but they have been demanded for many, many years, but demanded in vain.

The child-labor bill passed the House in the Sixty-fourth Congress by a vote of 337 to 48.

The currency law, which forever prevents Wall Street and the great big eastern banks from visiting paralyzing panics upon the Nation, was passed by a vote of 296 to 60.

Notwithstanding the deadly effects of the many panics through which the country has passed by reason of the defective banking laws, you never as much as attempted in a candid and earnest way to change the old, worn-out system which was largely based upon the bonded indebtedness of our country. Some have said the large banking interests prevented you from doing so. The issue of money under the old system was upon the indebtedness, which was in the main manipulated by the national banks holding the bonds of the Government.

The blessings to the Nation resulting from this piece of legislation is and will continue to be such that the people will not repudiate the party that has responded to their national wants and needs.

A whole speech might be devoted to this one piece of legislation and the prosperity and the security to our country by reason of this law.

In this connection I call attention to the rural-credits law, which when it gets into operation will enable the farmers of the land to borrow money for as low a rate of interest as 5 and 6 per cent. This is good legislation for all the people. If it is not, why did 295 Members vote for it and only 10 against it?

Why did you leave all of these beneficial laws to be enacted by the Democrats when they came into power? You certainly were in power long enough to respond to the needs of the people in all these lines, but you failed to do so.

For many years the people had demanded a change in the Constitution, so that they might have the right to vote directly for candidates for the United States Senate. It remained for the Democrats, when they came into power, to bring about and conclude this great reform. Certainly the people will not complain because of this.

I challenge any Republican to show during all the years you were in power such a list of accomplishments, so many beneficial laws favorable to the masses of our people, and, what is more, so thoroughly responsive to the demands of our people.

For years you charged that the Democratic Party was a party of negation; that if given power it would be unable to serve the Nation's needs, and I fear you made many of our good people believe this charge. But never again will they hearken to your voice upon such charges, for the vast majority of our people are more concerned about the Nation and its welfare than they are about the success of any party.

The masses want the people to rule this country and rule it wisely; and if one party is not obedient to the wishes of the American people and does not respond to their demands, they have the courage and manhood and patriotism to turn to another party for relief.

The Federal Trades Commission law passed the Sixty-third Congress without roll call or division.

This commission will forever put a stop to the old system of watering stocks and unloading them upon the people and then frequently squeezing the water out of the stocks, buying it back, and repeating this process from time to time. It controls the issue of stocks and the conduct of many of the corporations of our country.

A law preventing gambling in cotton passed the House by a vote of 107 to 21.

In the next Congress we should extend this law and its operation so as to include all farm products, so that the farmer's produce will not be subject to the manipulation of gamblers from year to year.

The good-roads bill passed the House by a vote of 252 to 81. The subject of good roads is very near to the hearts of the American people, because there is nothing more important.

The record in nearly every instance is a silent but potential and convincing proof of your confidence in Democratic policies, and it should forever estop you, my Republican friends, from railing and complaining to the American people.

The Lever agricultural extension bill passed the Sixty-third Congress, and upon that issue there was no roll call.

This law permits the States of the Nation to participate in appropriations from the Federal Government and the cooperation by State agricultural experts with our Federal experts in demonstrating and working out many vital questions which are of great importance to the farmers of our country.

The grain-grades bill also passed with no opposition.

The fact of the matter is that the war news has crowded out of the press of the country these internal matters to such an extent that we find few people are advised with reference to the magnificent record, progressive and responsive, passed by the Democratic administration, which the people have been sorely in need of for many years, yet were unable to get while you were in power.

The Clayton anitrust law, which prevents the great trusts and combinations of our country from crushing and putting out of business all small and competing concerns, passed the House in the Sixty-third Congress by a vote of 245 to 52, every Democrat voting for it, with 35 Republicans.

On the question of preparedness this administration has increased the appropriations both to the Navy and the Army several hundreds of millions of dollars. The fact is that the amount carried in the appropriation bills to support this arm of the Government is such that it will be almost impossible to expend it and put it to proper use between now and the time when the next Congress will be, as usual, called upon to provide for these wants.

No one can challenge us upon the great record that this administration has made in providing for the national defenses. And what is more, we are placing the burden for these increases upon incomes, inheritances, and a tax upon ammunition. We are not putting a stamp tax upon gasoline, notes, checks, telegrams, and so forth.

That revenue bill, to meet the emergency which now confronts the country, passed the House by a vote of 240 against 140, 39 Republicans voting for it.

It provides for a tariff commission also, so that the tariff can be treated scientifically in the future as the needs of our country require, thus removing all complaint by the business men of our country that the agitation of that question interferes with and disturbs business.

As to the old charge that has been made so frequently in years past with reference to the rule of Democracy being synonymous to panics and hard times, I need only call your attention to the fact that the resources of this Nation increased in a single year, from March, 1915, to March, 1916, $2,271,000,000, and that the aggregate resources of the national banks of the United States exceeds by $3,000,000,000 the combined resources of the central banks of England, France, Russia, Germany, the Netherlands, Switzerland, and Japan; and the wage scale throughout the United States has been advanced to such an extent that I need not dwell upon that; and the price of all farm products are such that all the farmer need concern himself about is the production of sufficient stuff to get to the market.

Now, Mr. Speaker, what will history record concerning the Progressives of 1910 and 1912 as to their purposes, their courage, patriotism, as well as statesmanship? I maintain they were right, and a vast body of the people of this Nation agreed with them in those campaigns to such an extent that the standpatters, the reactionaries, carried only two little States in 1912—Utah and Vermont. Such a pitiable showing for a great historic party to make.

History will say you were right then, but what will it say if you surrender now by returning to the same old party leaders in 1916 that you contended so courageously against in 1912?

If they are returned to power, have you any assurance that they have reformed and will do different in the future from what they did in the past? Can you teach the "old boys" new tricks? Can the leopard change his spots and the Ethiopian his skin? You may have all your work to do over again.

Having been so courageous heretofore, are you, my friends, right sure you are not actuated by political expediency now in returning to the reactionaries rather than compelling them to obey that law of physics which says the larger body attracts the smaller?

I can not believe that those millions of Progressives who voted with you four years ago, when they examine the record and find how progressive this administration has been along the lines they so much desired and to which you gave your support, will surrender now and confess by their action and their votes, as some of you seem to believe, that they were not in dead earnest then, and that they did not have the best interest of our country at heart. No, I say; I do not believe it, for I have confidence in the people irrespective of their party affiliation.

Now, as to the foreign policy of this administration—by the grace of God we all can boast of that. There is glory enough in it for President Wilson to cause his name to be emblazoned upon the pages of history as a man who, above all things else, desires for the sake of right to be right before God and his country.

He finds time to think of the misery and to be concerned about it, of the privations and sufferings of all, and of the horrors and the hell entailed upon a people by war, and he has sought to honorably avoid war.

Now, what is the position your party takes upon these matters? Upon a careful perusal of the Chicago platform, upon which Judge Hughes was nominated, one is led to believe that the great Republican Party really wants to criticize President Wilson because he was not more vigorous in demanding our rights against Germany.

I can not believe this is true. Now, Mr. Speaker, there are degrees of vigor that might have been employed. How vigorous would you have wished President Wilson to have been? As vigorous as Mr. Roosevelt in many speeches counseled? We all know, I am sure, just how vigorous he would have been if he had been President, but God only knows what the fate of millions of our boys would have been under his administration of the foreign affairs of this country.

Many people have been clamoring by words and deeds, individually as well as collectively, that we join England and the allies in that terrible war against Germany, but that issue will not strike a responsive cord in the breasts of the millions of parents of the country.

Is that the character of vigor you desired and would have employed had you been in power? I can not think so.

Is it possible, notwithstanding the reports that have come thick and fast concerning Mr. Hughes's desire to receive the German vote of the Nation, that there is some secret compact and understanding between those two gentlemen—Mr. Hughes and Mr. Roosevelt—upon this vital question?

Mr. Roosevelt from his speeches would have you believe that an individual can not sympathize with one of the parties engaged in that awful war without being disloyal to this country. He has abused this administration because it did not respond in opposing Germany at the instant it invaded Belgium. His language has been especially severe and bitter against those who have sympathized with one side in that war.

Every citizen worthy of the name should be an American first, last, and all the time. He should be ready to serve, even unto death, in order to perpetuate the glorious liberties of this Nation, purchased by the blood of our fathers and sanctified and made grander by the tears and prayers of our mothers. A citizen may sympathize with one or the other side engaged in that terrible war raging across the water, but I refuse to believe that any citizen will permit his sympathy to affect his loyalty to the Stars and Stripes of this our glorious land.

How many fathers and mothers of those boys who would have been contending in the trenches of Europe in that awful slaughter of mankind, had we joined either side, are complaining at the course pursued by President Wilson?

How many fathers and mothers will find it in their hearts to criticize, yea to repudiate, Mr. Wilson by voting against him because their boys are at home and not either dead, dying, or suffering in that terrible war, which is only a quarrel between the rulers of those nations, most of whom are closely related?

Do you suppose the mothers of this land, on the morning of the election in November, will embrace their boys and press a kiss upon their foreheads and then turn and tell the father to go

and vote against Woodrow Wilson because he has been responsive to the heart throbs and prayers of the millions of mothers and fathers all over this land?

I doubt whether there are any of you gentlemen on that side of the House who, when you consult your inmost consciences, really feel any regrets because Woodrow Wilson has been in the White House.

I doubt whether you know of any person whom you would rather have had there than him during these terrible troublesome times.

I am certain the American people have no regrets and will not now desire to "swap horses while crossing a stream." I wish there were some way by which our people might find out whether or not the rebellions in Mexico are financed in the main by so-called Americans, as well as other citizens who are residing at a safe distance from the trouble down there, who hold large property interests in that unfortunate country.

We all regret exceedingly that conditions are in such a way in Mexico. The clear purpose of President Wilson is to cooperate with the authorities in Mexico to suppress and keep down outlawry in every way possible, and to prevent incursions into our country by bandits is the one purpose we have in that country.

For four long years, between 1860 and 1865, a terrible war raged between the States. How would our people have felt had some other great and powerful nation intervened during that period? And for us to intervene now, at the instance of those who hold millions of acres of land in Mexico, gotten by concessions of various kinds, would be subversive to every principle of our Government.

This is the exact position President Taft took upon this question.

No citizen of our country but who knows that the loss of lives of our boys for such purposes by intervention would simply enhance the value of those interests and would not add luster to a single star in Old Glory. Thousands of our boys would be sacrificed, and hundreds of millions of indebtedness saddled upon the taxpayers of this country in order to sustain a few adventurers and to protect their fortunes.

We have no Missouri boys to offer up upon that altar. But in case President Wilson is driven to that extremity, all other means having failed, and Congress declares war, every boy and man of fighting age not only in Missouri but all over this broad land will respond instantly to a call to colors to sustain our honor and our integrity.

President Wilson with his great wisdom and superb courage will resort to every honorable means to save this Nation the horrors of war. [Applause.]

TRANSPORTATION OF THE NATIONAL GUARD.

Mr. HAY. Mr. Speaker, I am directed by the Committee on Military Affairs to report a privileged resolution (H. Rept. 942).

Mr. SPARKMAN rose.

The SPEAKER. For what purpose does the gentleman from Florida rise?

Mr. SPARKMAN. To call up a conference report.

The SPEAKER. There are three things pending. Really the gentleman from Florida [Mr. SPARKMAN] has the right to the floor, but the gentleman from Virginia [Mr. HAY] has a matter that can be disposed of very readily, a privileged resolution, and the gentleman from New York [Mr. FITZGERALD] has a little bill that he wants to get through, that will not take much time. If the gentleman from Florida will waive his right for a few minutes we will dispose of all three. The Chair wishes he would, because these things ought to be passed. The Clerk will report the resolution offered by the gentleman from Virginia [Mr. HAY].

The Clerk read as follows:

Resolution (H. Res. 292) directing the Secretary of War to transmit to the House of Representatives certain information relating to the troops of the National Guard mustered into the service of the United States.

Resolved, That the Secretary of War be, and he is hereby, directed to transmit to the House of Representatives full information as to the following matters:

First. Whether the troops of the National Guard mustered into the service of the United States and on their way to Mexico have been, or are being, transported in cars lacking sufficient sleeping space.

Second. Whether such cars have been, or are being, used to transport said troops without light.

Third. Whether said cars have been sidetracked and delayed en route to accommodate private business.

Fourth. Whether the troops en route have been subsisted by the Government in accordance with the United States Army Regulations or have been obliged to seek food of citizens, and whether the supply of drinking water in the cars has been sufficient.

Fifth. Whether cars used for the transportation of National Guard troops mustered into the United States service were inspected to protect the health and safety of the troops assigned to them, and by whom.

Sixth. Whether, being mustered into the service of the United States, the troops of the National Guard are equipped with arms and accouterments required by Army Regulations for actual service in time of war.

Mr. HAY. Mr. Speaker, I ask for a vote. The committee reported the resolution with the recommendation that it do pass.

The SPEAKER. The question is on agreeing to the House resolution.

The House resolution was agreed to.

Mr. HAY. Now, Mr. Speaker, I have a further privileged resolution of inquiry which the committee has reported, with the recommendation that it do pass.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

Resolution (H. Res. 274) directing the Secretary of War to furnish the House with certain information regarding the National Guard of Arizona, New Mexico, and Texas.

Resolved, That the Secretary of War is hereby directed, if not incompatible with the public interest, to send to the House of Representatives the following information:

First. How many officers and men were enrolled in the National Guard of Arizona, New Mexico, and Texas, respectively, at the time when they were ordered into the service of the United States?

Second. Of the officers and men so enrolled, how many failed to present themselves in response to the order of the President, and how many others refused to perform service?

Third. How many recruits have been accepted in lieu of those officers and men who failed to respond or to perform service?

Mr. HAY. Mr. Speaker, the gentleman from Massachusetts [Mr. GARDNER], the author of the resolution, desires to offer an amendment, and I will yield for the purpose of the offering of the amendment, but not for the purpose of debate.

The SPEAKER. The gentleman will send up his amendment.

Mr. GARDNER. It is to be added at the end of the resolution.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

Amendment by Mr. GARDNER: Add at the end of the resolution the following:

"Fourth. What was the net loss or gain in numbers in the National Guard of the above States, during the 10 days prior to the issuance of the order of the President?"

The SPEAKER. The question is on the amendment of the gentleman from Massachusetts [Mr. GARDNER].

The amendment was agreed to.

The resolution as amended was agreed to.

DESTITUTE AMERICAN CITIZENS IN MEXICO.

Mr. FITZGERALD. Mr. Speaker, by direction of the Committee on Appropriations I report the following bill, and ask unanimous consent for its present consideration in the House as in Committee of the Whole House on the state of the Union. (H. Rept. 941.)

The SPEAKER. The gentleman from New York asks unanimous consent for the present consideration of a bill which the Clerk will report.

The Clerk read the bill (H. R. 16911) making appropriation for the relief and transportation of destitute American citizens in Mexico, as follows:

Be it enacted, etc., That for the relief of destitute American citizens in Mexico, including transportation to their homes in the United States, there is appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $300,000, to be expended under the direction and within the discretion of the Secretary of State, and to be available for the fiscal years 1916 and 1917: *Provided*, That American citizens to whom relief is extended or transportation is furnished hereunder shall pay to or reimburse the United States all reasonable expenses so incurred respectively on their account if financially able to do so.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. MANN. Is that reported with an amendment?

Mr. FITZGERALD. The bill is reported without amendment.

Mr. CANNON. Mr. Speaker, I do not care for consideration of the bill in the House under the 5-minute rule, but I should like a little time.

Mr. FITZGERALD. We can consider it in the House, if the gentleman will indicate how much time he wants to use——

Mr. CANNON. I do not like to be handicapped and I do not like to burden the House. I do not think I will use more than 5 or 10 minutes, but, still, I might want 30 minutes, depending upon circumstances.

Mr. FITZGERALD. There is a conference report pending.

Mr. MANN. I do not think the gentleman will have any difficulty getting the time he wants.

Mr. FITZGERALD. There is no objection, so far as I am concerned, to the gentleman from Illinois having such time as he desires.

Mr. MANN. I do not believe there is a man in the House who would object to my colleague talking at any time.

Mr. CANNON. I do not care to burden the House.

Mr. FITZGERALD. How much time does the gentleman want to occupy? If he will indicate, I shall ask it for him.

The SPEAKER. The first question is, Is there objection to the present consideration of this bill? [After a pause.] The Chair hears none. Now the gentleman from New York [Mr. FITZGERALD] also asks that this bill be considered in the House as in Committee of the Whole. Is there objection to that? [After a pause.] The Chair hears none. The gentleman from New York will proceed.

Mr. FITZGERALD. Mr. Speaker, there has already been appropriated and expended for the purpose of removing American citizens from Mexico the sum of $740,000. The latter part of last month, because of the situation existing in Mexico, it was believed desirable that American citizens should leave there. At that time there was available about $40,000 of previous appropriations. Orders were issued to the American consuls throughout Mexico to notify American citizens and to aid them in every manner possible to remove to the United States. The result has been that obligations have been incurred in excess of the money that was available. As nearly as can be ascertained, it is estimated that there are about 5,000 American citizens still in Mexico to whom assistance must be rendered by the Government in order to transport them to the United States. On an average it takes about $60 per person to provide the transportation, subsistence, and, in some instances, depending upon the season of the year, some clothing, because of the changes of climate.

This matter is pressing. It is important that our citizens be given this help. It is impossible to predict with any certainty the course of events in Mexico, and for that reason the recommendation is made that the appropriation be made.

Unless some one has a question to ask, I shall make no further statement.

Mr. COX. I want to ask a question that is hardly relevant to this. How is the Government getting along with its collections from various individuals for money which the Government spent to get them back from Europe? At last accounts there were quite a number of suits pending.

Mr. FITZGERALD. The last statement I recall is to the effect that the Government will recover about 90 per cent.

Mr. COX. This is twice now that we have appropriated money to bring people out of Mexico.

Mr. FITZGERALD. Four times.

Mr. COX. I wonder if they will go back down there again if we get them home this time?

Mr. FITZGERALD. The representative of the State Department said that some of those taken out previously had gone back, but there is no way of telling just how many persons there are who have done that, and it is not believed that there are a great many.

Mr. COX. Then this money that is sought to be appropriated is to bring home Americans who have been down there?

Mr. FITZGERALD. Who have been down there. Under the law all American citizens residing there are registered with the American consul, and in that way it has been possible to obtain somewhat definite information as to the number.

Mr. COX. If they ever go back any more, I do not think we ought to spend 5 cents to bring them back.

Mr. BURNETT. Would the gentleman object to an amendment saying that those who go back after this resolution is passed shall not have their expenses paid when it is necessary for them to come out again?

Mr. FITZGERALD. That question was discussed, and the practical impossibility of administering such a provision would make it undesirable, as well as the fact that the number who have gone back is comparatively small out of the great number who have been brought out.

Mr. BURNETT. But, with the rather peaceful condition now, would not a great many of them go back? I notice in the press that a number have gone back who had come out, and that they are returning to their work. It seems to me that there ought to be something to hedge against that possibility.

Mr. FITZGERALD. The information before the committee was not to the effect that they have gone back. Of course there are some persons who simply cross the border, and probably will continue to do so; but this bill is to bring persons from distant portions of Mexico, not just across the line.

Mr. BURNETT. I suppose that the most of them are working people who go down there for employment?

Mr. FITZGERALD. Yes; and have been there for some time.

Mr. BURNETT. Mr. Speaker, I shall not offer any amendment; but if another resolution comes up in the future for any such purpose, I give notice that I shall offer an amendment that it shall not apply to those who have gone in there after the adoption of this resolution.

Mr. GOODWIN of Arkansas. May I ask the gentleman if this is for American citizens in Mexico now being returned to their respective homes?

Mr. FITZGERALD. They are sent to their homes or some designated place to which they desire to go in order to be located.

Mr. CANNON. Mr. Speaker, this appropriation makes in round numbers something over a million dollars appropriated for the purpose of bringing destitute American citizens to the United States. The appropriation that is made is exhausted, and they are now performing this duty without appropriation, and I have no criticism for that, because existing conditions require that destitute American citizens wherever they be in danger, are entitled to the protection of the National Government even to bringing them out from a sovereign Government—putting the emphasis on the sovereign.

It is hard for me to talk of existing conditions as an American citizen for fear that, inconsequential as I am as one Representative in the American Congress, I may say something that would give trouble to some ignorant parties in Mexico or elsewhere that might cause the loss of life or loss of property. So in perfectly cold blood I am going to talk a few minutes about the conditions that render this appropriation necessary. As a Member of the coordinate branch of the Government I have as much right to talk as has the Executive. [Applause on the Republican side.] I shall do it without malice, but I want to talk plainly.

The Executive under our Constitution is the Commander in Chief of the Army and the Navy. He is over all generals, over all naval officers, and supreme as a commander in chief. Most military commanders in time of stress do not make their orders through the newspapers, and that would be well, it seems to me, for the President of the United States, Commander in Chief of the Army and Navy, just under these conditions to recollect that there are some things that had better not be ordered or indicated through the newspapers. [Applause on the Republican side.]

The whole Mexican situation has not met my approval or the approval of this side of the House or the approval of that side of the House or the approval of the American people. It is almost, if not quite, three years ago when a sovereign Government, our Government, without any declaration of war, without any authority, unless it is justified under the Monroe doctrine, said to the President of a sovereign Government—Mexico—"Get out." It was a de facto government, a sovereign Government, with more power than has existed in Mexico from that time to this. [Applause on the Republican side.] But it took a year for Carranza and Villa, with the aid of the United States, directed by the President, to get Huerta out. As I said once before, he evidently had red blood.

Well, it was force then in Mexico. The Commander in Chief, our President, wanted them to have a constitutional election down there, and he directed that anybody could be a candidate except Huerta. That is stretching the Monroe doctrine tolerably far, is it not? [Laughter and applause on the Republican side.] You all recollect what happened. You all recollect that no sooner was Huerta out than the other bandits fell out and fought and fought, with the destruction of property of American citizens and the taking of lives of American citizens. Our Secretary of State said, "We did not invite you to go down into Mexico; take care of yourselves." I think I give his language in substance. In the fullness of time Mr. Bryan got out. I do not know whether he fell out with the President or the President fell out with him on this account, but he fell out. [Laughter and applause on the Republican side.]

It ran along until our President recognized Carranza as the de facto government, and still there was no law and order in Mexico. Other nations recognized the de facto government of Carranza.

The SPEAKER. The time of the gentleman from Illinois has expired.

Mr. MANN. Mr. Speaker, I ask unanimous consent that my colleague may proceed for 15 minutes.

The SPEAKER. The gentleman from Illinois asks unanimous consent that his colleague may continue for 15 minutes. Is there objection?

There was no objection.

Mr. CANNON. Well, it went from bad to worse. An embargo levied by our Government as against Huerta was raised and all the arms that Carranza and Villa wanted went in.

Now, jump over a considerable period. One of these bandits, Villa, crossed the border and killed our soldiers and citizens. There was justly great excitement and indignation. Then it was that the Commander in Chief of the Army and Navy—the President—ordered Gen. Pershing to cross the border and catch that

bandit. Well, he was invading a sovereign country. Public sentiment, I think, justified him in going. You all know what happened. Then at Carrizal our boys in blue in the Regular Army were killed or taken prisoners.

Well, those who survived had been sent back, it is so said, and those who are dead, Americans, have been passed by as still dead—soldiers and American citizens. Now, that was by the order of Carranza. Has he ever revoked that order? Has he ever apologized for that order? And that action, with subsequent action upon his part, caused the President of the United States to issue a proclamation, under which and by virtue of subsequent law enacted, 125,000 of our people have been drafted into the public service, and a great lot of them are now down upon the border. That is a threat at least, is it not? What is the President going to do with them? I just ask these questions. We are still getting out the destitute American citizens—and that is right, and I am for this bill—but I just want to read a little bit here from a speech from the Commander in Chief of the Army and Navy of the United States—the President—made, not down upon the border, not by orders sent out, but to a popular assemblage. In the course of that speech in Detroit yesterday he said:

> I hear some men say that they want to help Mexico, and the way they propose to help her is to overwhelm her with force. That is the wrong way as well as the long way. After fighting them you would have a nation full of justified suspicion. Thus you would not help them. You would shut every door against you. What makes Mexico suspicious is that she thinks we do not want to serve, but possess her.

Good God! Have we not given evidence, line upon line, precept upon precept, in Congress and out of Congress, by public sentiment and by proclamation of the President, and by all of our action for three years past, that we do not want to possess her? I quote further from the President's speech:

> And she has justification for these suspicions in the way some gentlemen have sought to exploit her possessions.

I suppose some one of these 5,000 that we are getting out, some one probably other than those 5,000, but some one, he does not mention whom. Again, to further quote, he says:

> I will not serve these gentlemen, but I will serve all Americans by trying to serve Mexico herself. The way to establish our sovereignty is to respect hers.

The President added that he believed in the old Virginia bill of rights, which declared that a country may do as it chooses with its own Government. This information, the President said, was for those gentlemen who would "butt in."

Mr. Speaker, that bill of rights is all right in Virginia, but the trouble is that it does not apply to Mexico, for there is no responsible government in Mexico. Does Villa represent it? Does Carranza represent it? Does Zapata represent it?

What are we doing down there, if there is responsible sovereignty in Mexico, with the Regular Army and a hundred thousand drafted men upon the border? What are we doing there if it is a responsible sovereignty, or with this appropriation, spending over a million dollars to bring out of there destitute American citizens? Stop and think a minute. Does the Virginia bill of rights apply to Mexico in her condition? No; no more than it does to Haiti, no more than it does to Nicaragua, and let me call your attention to the fact that in Haiti by force the President has set up a government and has made a treaty with it, and is supporting it by our soldiers; and in Nicaragua we have seized and are collecting the revenues, and by what right? There is no written law in statute or Constitution that gives us the right. I suppose the President justifies under the Monroe doctrine. The trouble with the President is that there is no responsible sovereign power in Mexico. It shifts from day to day, and yet we are not to use force. Good God, if we are not to use force, then call home the hundred thousand boys that are down there. [Applause on the Republican side.]

Do you want to go in? I am not anxious for war, God knows. I wish that we could be protected, as I said once before, and as I say now, and I wish that they could be protected, but, in my judgment, with the cooperation of the President—and I am quite sure this side of the House is ready to cooperate and I believe that side is ready to cooperate—we can take possession of Mexico and restore law and order and protect the lives and property of our citizens, and when a stable government is organized the United States can make a treaty with it as we have done with Cuba—that if Mexico does not preserve law and order the United States shall do so. "Butt in," says the President. Who is "butting in"? [Laughter on the Republican side.] Who journeys a thousand miles inland to talk about not using force when the boys in blue are down there? What are they there for except to use force if it is necessary?

Mr. Speaker, there are other things that I might say before this Congress adjourns. If the spirit moves me, belonging to Friends' meeting as I did when a boy, and still believing somewhat in the discipline of that meeting, I suppose I may ask for an hour before the Congress adjourns to talk upon this subject, and I only talk now to see if I can say something that will affect your President and mine, and to suggest that he will best serve this great Republic by forgetting for a month or two months that he is a candidate for the Presidency, and that he could best secure his election by not making his proclamations to popular audiences and talking about men "butting in." [Applause on the Republican side.]

The SPEAKER pro tempore (Mr. ADAMSON). The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FITZGERALD, a motion to reconsider the vote by which the bill was passed was laid on the table.

RIVER AND HARBOR APPROPRIATION BILL.

Mr. SPARKMAN. Mr. Speaker, I call up the conference report on the bill H. R. 12193, the river and harbor appropriation bill, and I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER pro tempore (Mr. FITZGERALD). The gentleman from Florida calls up the conference report on the river and harbor appropriation bill and asks unanimous consent that the statement may be read in lieu of the report. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will read the statement.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (NO. 918).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 12, 16, 25, 28, 33, 42, 43, 44, 55, 66, and 85.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 4, 5, 6, 9, 10, 14, 15, 18, 19, 20, 21, 23, 24, 34, 35, 36, 37, 38, 39, 46, 50, 51, 52, 53, 54, 56, 57, 59, 60, 62, 64, 65, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 78, 81, 82, 83, 86, 88, and 89, and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: Strike out item and insert:

"Harbor of refuge at Duck Island, Conn.: For restoring depth behind Duck Island Breakwater, $71,000."

And the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In the proposed amendment before the word "Commerce" insert the words "War and the Secretary of"; and the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Government iron pier in Delaware Bay near Lewes, Del.: For maintenance in accordance with the report printed in House Document No. 1059, Sixty-fourth Congress, first session, $10,000: *Provided*, That hereafter said pier shall be open to public use under regulations to be prescribed by the Secretary of War: *Provided further*, That the provision of the act of March 3, 1891, authorizing the transfer of said pier to the Treasury Department is hereby repealed."

And the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In the proposed amendment strike out the figures "$78,000" and insert the figures "$60,000"; and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment as follows: In the amended paragraph strike out the word "For" in line 1, page 17, and insert in lieu thereof the words "Continuing improvement and for"; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In the amended paragraph strike out the word "Texas" in line 11, page 22, after the words "Washita River," and insert the word "Oklahoma"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In the proposed amendment strike out the figures "$30,700" and insert the figures "$30,500," and strike out the word "fourteen" after the word "and" and insert the word "thirteen"; and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Harbors and connecting waters of the Great Lakes, with a view to determining what additional improvements would be necessary in order to permit these waterways to accommodate vessels able to pass through the Welland Canal when enlarged by the Dominion of Canada, including report as to the character and drafts of vessels which may be expected to use the canal when so enlarged."

Transfer item so modified to the survey section of bill (sec. 2).

And the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "*Provided*, That the pierhead for marking the east end of the east breakwater extension provided for in the existing project shall be located at the east extremity of the breakwater as now built, said pierhead to be constructed with funds heretofore appropriated for the construction of said breakwater"; and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: Strike out all of the proposed amendment and the figures "$17,000" in the preceding item and insert in lieu thereof, after the word "maintenance," the following: "$20,400: *Provided*, That of this amount $3,400 may be expended for dredging above Ogden Street Bridge"; and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: In the proposed amendment strike out the figures "$10,000" and insert the figures "$4,000"; and the Senate agree to the same.

Amendment numbered 31: That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment as follows: Strike out all of proposed amendment and the figures "$25,000" in the item immediately preceding and insert in lieu thereof, after the words "St. Clair" and the comma, the figures and language following: "$108,325: *Provided*, That of this amount the sum of $83,325 may be expended for the purpose of securing a channel in St. Clair River along the water front of Port Huron, Mich., in accordance with the report printed in House Document No. 782, Sixty-fourth Congress, first session"; and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Duluth-Superior Harbor, Minn. and Wis.: Continuing improvement by enlarging the Superior Harbor basin in accordance with report printed in House Document No. 651, Sixty-fourth Congress, first session, $180,000: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials or work as may be necessary to complete said project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $180,000, exclusive of the amounts herein and heretofore appropriated."

And the Senate agree to the same.

Amendment numbered 40: That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: In the proposed amendment strike out the words "and Round Lake" where they last occur, near the close of the paragraph; and the Senate agree to the same.

Amendment numbered 41: That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: In the proposed amendment strike out the words "shall be immediately" and insert in lieu thereof "may, in the discretion of the Secretary of War, be"; and the Senate agree to the same.

Amendment numbered 45: That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment as follows: In the proposed amendment strike out the figures "$100,000" and insert in lieu thereof "$75,000"; and the Senate agree to the same.

Amendment numbered 47: That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment as follows: In the proposed amendment strike out the figures "$28,000" and insert the figures "$14,000"; and the Senate agree to the same.

Amendment numbered 48: That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Los Angeles Harbor, Cal.: Continuing improvement by the construction of a diverting dam for the protection of Los Angeles and Long Beach Harbors in accordance with the report printed in House Document No. 462, Sixty-fourth Congress, first session, and subject to the conditions set forth in said document, $500,000."

And the Senate agree to the same.

Amendment numbered 49: That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment as follows: In the item proposed insert after the word "*Provided*" the words "this appropriation is made on the condition precedent that"; strike out the word "donates" and insert the words "shall donate"; and the Senate agree to the same.

Amendment numbered 58: That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment as follows: In the proposed amendment strike out the word "survey"; and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: In the proposed amendment strike out the colon and the words "For survey," after the word "Georgia," and insert a comma; and the Senate agree to the same.

Amendment numbered 63: That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment as follows: In the proposed amendment strike out the words "Ship Channel from" and insert in lieu thereof the word "From"; and the Senate agree to the same.

Amendment numbered 77: That the House recede from its disagreement to the amendment of the Senate numbered 77, and agree to the same with an amendment to read as follows: In the proposed amendment, after the word "thereof," insert the following:

"As a part of the examination which the Secretary of War is hereby required to make, he is directed to report whether access to the river at St. Paul Harbor, by persons and shippers desiring to use the same for the purposes of transportation or travel thereon, is so completely dominated by private control as to materially impede or burden traffic originating or terminating there; and, if he shall so find, he is further directed to report what steps are necessary to free said landing place from such improper control or obstruction, and also if, in his opinion, it is advisable for the United States to acquire the fee simple to the said landing place and the approach thereto, by condemnation or otherwise."

And the Senate agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: In the proposed amendment strike out the words "beginning in or near lot 1 of section 24, township 144 north, range 25 west of fifth principal meridian, thence southerly and terminating in or near section 22, township 55 north, range 27 west of the fourth principal meridian"; and the Senate agree to the same.

Amendment numbered 80: That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"State of Kansas, floods in: Investigate the flood periods of the Kansas River and its tributaries, the Cottonwood and Neosho Rivers in the State of Kansas by an examination of the territory and from data already gathered by governmental, State, private efforts, and by the board of engineers of the War Department, and to devise some general plan which will best guard against the recurrence of floods and diminish their damaging effects upon

the lower valleys of the Kansas, Arkansas, Missouri, and the Mississippi Rivers."

And the Senate agree to the same.

Amendment numbered 84: That the House recede from its disagreement to the amendment of the Senate numbered 84, and agree to the same with an amendment as follows: In the proposed amendment strike out the words "That a survey of the" and the words "is hereby ordered to be made"; and the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Weymouth Fore River, Mass.: Completing improvement, including the removal of the small shoal south of the west end of Peddocks Island, in accordance with the report printed in Senate Committee Document No. 13, Sixty-third Congress, third session, and subject to the conditions set forth in said document, $200,000."

Transfer the item thus amended to page 2 of bill, following line 21, for "Weymouth Fore River, Mass."

And the Senate agree to the same.

S. M. SPARKMAN,
GEO. F. BURGESS,
W. E. HUMPHREY,
Managers on the part of the House.

JAMES P. CLARKE,
JOS. E. RANSDELL,
KNUTE NELSON,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference of the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, submit the following written statement explaining the effect of the action agreed on:

The rivers and harbors bill as it passed the House carried cash appropriations in the sum of $37,898,410, and continuing-contract authorizations amounting to $1,710,000, a total for the House bill in cash and authorizations of $39,608,410. The amount added by amendment in the Senate was $4,840,475, of which $3,825,525 was in cash appropriations and $1,014,950 in continuing-contract authorizations, making the total of the bill as it passed the Senate $41,723,935 in cash and $2,724,950 in continuing-contract authorizations, a total of $44,448,885 for the bill. As a result of the conference the amount involved in the Senate amendments has been reduced from $4,840,475 to $3,277,675, a net reduction of $1,562,800, making the total of the bill as it now stands, cash and authorizations, $42,886,085.

The following statement shows the action taken by the conference on each of the Senate amendments:

Amendment No.	Page of bill.	Action of conference.
1	3	New London Harbor, Conn.: Item adopts project and appropriates $170,000 for its prosecution, subject to conditions. House conferees recede
2	3	Harbor of refuge at Duck Island, Conn.: Item appropriates $71,000 for restoring depth of 16 feet in anchorage area behind Duck Island. House conferees recede.
3	3	Narrows of Lake Champlain, N. Y. and Vt.: Item adopts project. Senate conferees recede.
4	5	Black Rock Harbor, N. Y.: Item consolidates project for Tonawanda Harbor and Niagara River with that for Black Rock Harbor and extends 23-foot depth over a portion of the former project, the work to be done with funds heretofore appropriated and authorized. House conferees recede.
5, 6, 7	9	Crum River, Pa.: Items 5 and 6 make slight verbal changes. Item No. 7 provides for construction and maintenance of bridge over Crum River, expense to be borne by abutting property owners. House conferees recede, with amendment making the construction satisfactory to the Secretary of War.
8	11	Government iron pier, Harbor of Lewes, Del.: Item provides for maintenance and use of the pier under regulations to be prescribed by the Secretary of War. House conferees recede, with amendment providing the work shall be done in accordance with the report printed in House Document No. 1059 (64th Cong., 1st sess.); also repealing provision in act of Mar. 3, 1891, transferring pier to the Treasury Department.
9	11	Elk and Little Elk Rivers, Md.: Item provides that dredging be carried up to Bridge Street Bridge at Elkton. House conferees recede.
10	14	Savannah River at Augusta, Ga.: Item provides for continuing work heretofore begun by Government. House conferees recede.
11	14	Altamaha, Oconee, and Ocmulgee Rivers, Ga.: Item increases amount allowed by House from $53,000 to $78,000. House conferees recede with amendment reducing amount to $60,000.
12	18	Key West Harbor, Fla.: Item appropriates $50,000 for removing the middle ground. Senate conferees recede.
13	19	Pascagoula Harbor, Miss.: Item increases amount allowed by House from $35,000 to $80,000. House conferees recede with verbal amendment.
14	20	Passes at mouth of Mississippi River: Item increases amount allowed by the House from $600,000 to $1,000,000. House conferees recede.
15	23	Channel to Port Bolivar, Tex.: Item increases amount allowed by House from $25,000 to $50,000. House conferees recede.
16	24	Sabine-Neches Canal, Tex.: Item appropriates $70,000 for making a cut-off on Neches River. Senate conferees recede.
17, 18	25	Red River, Ark. and Tex.: Items increase amount allowed by House from $25,000 to $50,000. House conferees recede with verbal amendment.
19, 20, 21	25	Arkansas River, Ark. and Okla.: Item increases amount allowed by House from $200,700 to $234,700 and provides for bank protection at Pine Bluff and at Little Rock and vicinity. House conferees recede.
22	25	White River, Ark.: Item increases amount allowed by House from $30,500 to $30,700, and makes $8,000 appropriated in act of 1913 available unconditionally for work at De Valls Bluff. House conferees recede with amendment restoring amount to $30,500 and making verbal change.
23	25	Cache River, Ark.: Item strikes out House provision appropriating $3,000, and inserts provision declaring river to be nonnavigable. House conferees recede.
24	26	Tennessee River, Tenn., Ala., and Ky.: Item corrects typographical error. House conferees recede.
25	27	Tennessee River, Tenn., Ala., and Ky.: Item strikes out two House provisions, one providing that local interests pay all claims for flowage damages; the other prescribing type of dams according as the local interests may contribute toward flowage damages. Senate conferees recede.
26	27	Welland Canal, Dominion of Canada: Item directs investigation of character and draft of vessels to be accommodated by the canal when enlarged. House conferees recede with amendment transferring item to section 2 of bill.
27	28	Cleveland Harbor, Ohio: Item provides for construction of pierhead at end of east breakwater. House conferees recede with verbal amendment.
28	28	Arcadia Harbor, Mich.: Item appropriates $25,000 for improvement and rebuilding of old piers. Senate conferees recede.
29	29	Menominee Harbor and River, Mich. and Wis.: Item appropriates $16,000 for dredging above Ogden Street Bridge. House conferees recede with amendment consolidating item with preceding item in bill and reducing amount for this work to $3,400.
30	29	Saugatuck Harbor and Kalamazoo River, Mich.: Item appropriates $10,000 for maintenance. House conferees recede with amendment reducing the amount to $4,000.
31	30	St. Clair River, Mich.: Item appropriates $83,325 to secure additional channel along the front of Port Huron. House conferees recede with amendment changing title of project.
32	31	Duluth-Superior Harbor, Minn. and Wis.: Item appropriates $180,000 and authorizes contract for $180,000 to provide for enlarging the Superior Harbor Basin. House conferees recede with verbal amendment.
33	32	Illinois River, Ill.: Item provides for regulating the diversion of water from Lake Michigan, the fixing of reasonable tolls in connection with the proposed improvement of the river by the State of Illinois, and that the navigation features shall meet the approval of the Secretary of War and the Chief of Engineers. Senate conferees recede.
34	34	Government dike in Mississippi River opposite the city of Louisiana, Mo.: Item appropriates $15,000 for raising dike. House conferees recede.
35, 36	35	Mississippi River from Head of Passes to mouth of the Ohio River: Item 35 places the Ohio River from its mouth to mouth of Cache River under the jurisdiction of the Mississippi River Commission.

Amendment No.	Page of bill.	Action of conference.
35, 36	35	Mississippi River from Head of Passes to mouth of the Ohio River—Continued. Item 36 substitutes the word "are" for the word "is." House conferees recede from disagreement to both amendments.
37	36	Mississippi River from Head of Passes to mouth of the Ohio River: Item provides that the improvement of the Ohio River by the construction of locks and dams shall not be considered as transferred to or placed under jurisdiction of the Mississippi River Commission by amendment No. 35; and for a survey of the Atchafalaya River by said commission. House conferees recede.
38	36	Mississippi River from Head of Passes to mouth of the Ohio River: Item places the Arkansas River, from its mouth to its intersection, with division line between Lincoln and Jefferson Counties, Ark., under the jurisdiction of the Mississippi River Commission. House conferees recede.
39	38	Mississippi River from mouth of Missouri River to Minneapolis, Minn: Item increases the amount appropriated by the House from $1,200,000 to $1,500,000. House conferees recede.
40	39	Reservoirs at headwaters of the Mississippi River: Item provides for abandonment of that part of project between Gull Lake and Round Lake, and between Round Lake and Long Lake; and for the surrender of flowage rights to the parties entitled thereto. House conferees recede with amendment striking out the words "and Round Lake" in line 14.
41	39	Gasconade River, Mo.: Item provides that obstructions near Heckman's mill, at Pryors Bend be removed with funds from the amount appropriated by the House for said river. House conferees recede with amendment striking out the words "shall be immediately," and inserting in lieu thereof the words "may, in the discretion of the Secretary of War, be."
42, 43, 44	40	Missouri River: Items provide $25,000 in excess of amount allowed by House for bank revetment between Sioux City and Fort Benton. Senate conferees recede.
45	40	Missouri River: Item appropriates $100,000 for bank revetment at or near the city of Vermilion, Clay County, S. Dak., and provides that none of this amount shall become available until local interests shall have contributed an amount equal to one-third of the sum herein appropriated. House conferees recede with amendment reducing amount to $75,000.
46	41	Missouri River at St. Joseph, Mo.: Item provides that amount of local contribution shall not exceed two-fifths of total amount expended. House conferees recede.
47	41	Colorado River, Ariz.: Item increases amount allowed by House from $3,000 to $28,000 to provide for repair and enlargement of Government levee on the Gila River at Yuma. House conferees recede with amendment reducing amount to $14,000.
48	41	Los Angeles and Long Beach Harbors, Cal.: Item provides for building a diverting dam to protect harbors from silt deposits, appropriating $1,080,000 to complete. House conferees recede, with amendment reducing the amount appropriated to $500,000, the work to be done in accordance with conditions in project report.
49	42	San Diego Harbor, Cal.: Item appropriates $220,000 for enlarging the inner harbor, subject to the condition that 500 acres of tidelands known as Dutch Flats be donated to the Government. House conferees recede, with amendment stating conditions with greater certainty.
50	44	Tillamook Bay and Bar, Oreg.: Item provides for maintenance of the river from Bay City to Tillamook City. House conferees recede.
51	45	Willapa Harbor and River, Wash.: Item appropriates $100,000 cash and authorizes continuing contract for $247,950 to complete, subject to conditions set forth in project. House conferees recede.
52	46	Kahului Harbor, Hawaii: Item appropriates $100,000 cash and authorizes continuing contract for $150,000 to construct the west breakwater. House conferees recede.
53	46	Examinations, surveys, and contingencies: Item increases amount allowed by House from $250,000 to $350,000 to defray expenses of surveys added by Senate amendments. House conferees recede.
		SURVEY ITEMS.
54	47	Kennebec River, Me.: House conferees recede.
55	48	Point Judith Harbor of Refuge, R. I., landing place at: Senate conferees recede.
56	48	Point Judith Harbor of Refuge, R. I., removal of shoals: House conferees recede.
57	48	New York Harbor, N. Y.: House conferees recede.
58	49	Greenwood Lake, N. J.: House conferees recede.
59	49	Hackensack River, N. J.: House conferees recede.
60	50	SURVEY ITEMS—continued. Elk River, Md.: House conferees recede.
61	51	Front River, Ga.: House conferees recede with amendment striking out the words "For survey."
62	52	Key West Harbor, Fla.: House conferees recede.
63	52	Apalachicola Bay, Fla.: House conferees recede with amendment striking out the words "Ship channel."
64	52	Waterway between Sarasota Bay and Miakka River, Fla.: House conferees recede.
65	53	Mulberry Fork of the Warrior River, Ala.: House conferees recede.
66	53	Brazos River and Colorado River, Tex.—instrumental survey of: Senate conferees recede.
67	54	Trinity River near Liberty, Tex. House conferees recede.
68	54	Texas City Harbor, Tex.: House conferees recede.
69	54	Brazos River, San Antonio River, Colorado River, Trinity River, Red River, and the tributaries of these rivers, Texas, Arkansas, Oklahoma, and Louisiana: House conferees recede.
70	54	Sulphur River, Tex. and Ark.: House conferees recede.
71	54	Sulphur River and Days Creek, Tex. and Ark.: House conferees recede.
72	54	San Antonio River, Tex.: House conferees recede.
73	55	Arkansas River, from Little Rock to its mouth: House conferees recede.
74	55	Cache River, Ark.: Item strikes out House provision. House conferees recede.
75	56	Thunder Bay River, Mich.: House conferees recede.
76	56	Black Lake Harbor, Mich.: House conferees recede.
77	57	St. Paul Harbor, Minn.: House conferees recede with amendment directing investigation into the ownership and control of the waterfront property in St. Paul.
78	57	Traverse and Big Stone Lakes, Minn. and S. Dak.: House conferees recede.
79	57	Mississippi River, near Deer River, Minn.: House conferees recede with amendment striking out the words from and including the word "beginning," in line 21, page 57, to and including the word "meridian," in line 1, page 58.
80	58	Kansas River and its tributaries, the Cottonwood and Neosho Rivers, Kans.: House conferees recede with amendment confining the investigation to the Kansas River and its tributaries, the Cottonwood and Neosho Rivers.
81	58	Umpqua River, bar, and entrance, Oreg.: House conferees recede.
82	59	Yaquina Bay and Harbor, Oreg.: House conferees recede.
83	59	Youngs Bay, Oreg.: House conferees recede.
84	59	Columbia River, from mouth of Snake River to Priest Rapids: House conferees recede with verbal amendment.
85	60	Canal connecting Puget Sound with Grays Harbor, Willapa Harbor, and the Columbia River, Wash.: Senate conferees recede.
86	60	Virgin River, Nev.: House conferees recede.
87	61	Weymouth Fore River, Mass.: Item adopts project and appropriates $200,000 to complete. House conferees recede with verbal amendment.
88	62	Item authorizes the acceptance of donations for the purpose of illuminating the Statue of Liberty on Bedloe Island, New York Harbor: House conferees recede.
89	62	Item renumbering section of House bill: House conferees recede.

All of which is respectfully submitted.

S. M. SPARKMAN,
GEO. F. BURGESS,
W. E. HUMPHREY,
Managers on the part of the House.

Mr. SPARKMAN. Mr. Speaker, I wish to see if we can have some agreement as to time for discussion of this conference report, and I would suggest, Mr. Speaker, that the discussion of the report be confined to one hour.

Mr. HUMPHREY of Washington. Mr. Speaker, I have requests for 40 minutes on this side. I suggest the time be extended so as to make it 1 hour and 20 minutes. I do not reserve any time for myself but have requests for 40 minutes, and I want to yield that much.

Mr. SPARKMAN. Could the gentleman get along on 35 minutes if we make it 70 minutes?

Mr. HUMPHREY of Washington. I will say to the gentleman that requests have been made for 40 minutes, which I

think is reasonable, by two gentlemen, both members of the committee; one asked for 10 minutes and the other for 20 minutes, and I understand the gentleman from Wisconsin [Mr. STAFFORD] says he wants 5 minutes.

Mr. STAFFORD. I might wish to have five minutes.

Mr. HUMPHREY of Washington. So we had better make it an hour and 20 minutes, and the gentleman from Florida yield 5 minutes of that time to the gentleman from Wisconsin.

Mr. SPARKMAN. Then, Mr. Speaker, I ask unanimous consent that the discussion of this conference report be confined to an hour and 20 minutes, one half to be controlled by myself and half by the gentleman from Washington [Mr. HUMPHREY].

The SPEAKER pro tempore. The gentleman from Florida asks unanimous consent that debate upon the pending conference report be limited to an hour and 20 minutes, one-half of that time to be controlled by himself and one-half by the gentleman from Washington [Mr. HUMPHREY]. Is there objection?

Mr. HARRISON. Mr. Speaker, reserving the right to object merely for the purpose of asking a question, I have heard some talk that there will not be a vote this afternoon on the bill. Can the gentleman tell me anything about that?

Mr. SPARKMAN. My purpose, Mr. Speaker, is to have a vote this afternoon.

Mr. HARRISON. To vote this afternoon?

Mr. SPARKMAN. That is my purpose.

Mr. HUMPHREY of Washington. Mr. Speaker, reserving the right to object, I want to ask the gentleman from Florida out of his time will he yield five minutes to the gentleman from Wisconsin [Mr. STAFFORD], because I have not got five minutes to give?

Mr. SPARKMAN. I will; yes.

Mr. HUMPHREY of Washington. All right.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida that debate be limited to 1 hour and 20 minutes, half to be controlled by himself and half by the gentleman from Washington? [After a pause.] The Chair hears none, and it is so ordered, and the gentleman from Florida is recognized for 40 minutes.

[Mr. SPARKMAN addressed the House. See Appendix.]

The SPEAKER pro tempore. The gentleman from Wisconsin [Mr. FREAR] is recognized for 30 minutes.

Mr. FREAR. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER pro tempore. The gentleman from Wisconsin [Mr. FREAR] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. FREAR. Mr. Speaker, yesterday we voted in this House to raise additional revenue of $197,000,000 for the purpose of paying Government expenses, and I wish you would give me your attention for a few moments until I can explain to you some of the propositions that are contained in this river and harbor bill on which the conferees have reported favorably and which is to be paid for out of that direct-tax bill the House passed yesterday.

The two river and harbor bills for 1914 and 1915 reaching over $92,000,000 were defeated in the Senate last session and two substitute bills were passed for $50,000,000, making a saving of $42,000,000 over House bills passed for the larger amount.

The 1916 bill passed the House at $39,608,401. We secured 143 votes against the bill and 159 votes in favor of a $20,000,000 substitute, counting 10 pairs against the bill. In the Senate $4,840,475 was added, making $44,448,885, or a larger amount than contained in any waterway bill that has come before the House during the last three years. That bill passed the Senate by a close vote of 35 to 32. A change of two votes would have defeated the bill. On a proposed substitute of $30,000,000 the amendment was defeated in the Senate by one vote. The conference report on this bill carries $42,886,085, or $3,277,675 more than when it passed the House. No man who voted against the original bill can find excuse in voting for the conference report, but on the contrary every objection still exists with others added. It ought to be defeated and a substitute of 10 or 15 million dollars placed in the hands of the Secretary of War to care for emergencies. It may be said that one-half of the last substitute was wasted by Army engineers, as has been shown by an analysis of allotments, but the smaller the appropriation the smaller the waste, and Army engineers are no more wasteful than Congress, providing funds are restricted.

Mr. Speaker, when the River and Harbor bill passed the House many specific items of waste or extravagance were specifically pointed out. Gross misstatements of river traffic were also shown by an analysis of commerce reports furnished by engineers, and, generally speaking, a mere statement of facts presented an unanswerable argument of waste.

Over $9,000,000 in the 1916 bill is carried for the Mississippi River, counting $1,000,000 for the Passes, on which over $18,000,000 have been spent. Over $150,000,000 of Government funds have been sunk in and along that river, and the commerce has decreased 90 per cent while we were squandering that enormous amount of money.

Five million dollars of the 1916 bill is for the farcical Ohio River canalization scheme, apart from over a half million for open-channel work. About $50,000,000 has been squandered by the Government on the Ohio, and the actual river commerce is far less now than it was 20 or 30 years ago when expenditures were nominal.

Nearly $2,000,000 of the bill is for the Missouri River, on which over $20,000,000 has been spent, while the actual commerce in 1914 could have been carried by half a dozen trains, and the average haul was for only a few miles at a cost of $40 per ton, or more than the freight was worth.

The Beaufort Canal, which has an insignificant commerce, receives $1,000,000 in the 1916 bill. Millions are being squandered on this North Carolina scheme, and yet the only member on this floor who protested against the $2,000,000 appropriation for dependents of national guardsmen was a chief defender of the project.

Instead of commercializing patriotism, Congress has been too long commercializing political pork for the benefit of certain localities and at the expense of the country.

These four rivers and canals take $17,000,000 of the 1916 bill, while their actual commerce, apart from duplications, is trivial compared with a dozen harbors that can be named.

The Tennessee River carries $944,000 for another canalization scheme which benefits no one but water-power owners, contractors, and dredgers. All the actual waterway commerce amounts to less than 2 per cent of that handled at Ashtabula, Ohio, and yet we have spent $11,000,000 on this wasteful scheme.

In the 1916 bill is $710,000 for the Cumberland River, which floats only about 50,000 tons of actual commerce annually, or about 1 per cent of that handled by the little harbor of Ashland in my own State. Nearly $6,000,000 of Government money has been spent on the Cumberland in order to get that result.

The Arkansas, Ouachita, and Red Rivers receive about $1,000,000 in the 1916 bill, in addition to over $8,000,000 already spent by the Government. All the actual commerce on these three rivers combined does not amount to one-half of 1 per cent of that handled by either of the Chicago or Milwaukee Harbors.

The Trinity gets $250,000 and the Brazos $390,000 in this bill, or $640,000 for two streams that do not furnish half a dozen train loads of actual freight the year round. And we have spent nearly $4,000,000 developing a commerce that costs over $80 per ton to float on these dry rivers.

Mr. SPARKMAN. Mr. Speaker, will the gentleman yield?

The SPEAKER pro tempore. Does the gentleman from Wisconsin yield to the gentleman from Florida?

Mr. FREAR. After I get through my statement I will yield.

Mr. SPARKMAN. That is a very important point.

Mr. FREAR. I will yield when I get through my statement.

Mr. SPARKMAN. The gentleman will not get through in 30 minutes.

Mr. FREAR. Yes; I think I will. I will yield to the gentleman when I shall have finished.

Take all the streams named, a dozen or more, and add to them 100 other inland rivers and dry creeks contained in this bill—streams that do not carry lake or ocean craft—and the whole 120 or more rivers and streams do not float 20 per cent of the actual waterway commerce handled at the single Superior-Duluth Harbor. Yet we are giving about $25,000,000 of this 1916 bill to these deserted rivers, creeks, and shallow streams and canals.

Mr. Speaker, the bill that passed the House was a fair sample of annual pork barrels, with public funds distributed around to practically every State for votes to put it through. Poor, miserable, wasteful schemes are hitched on to a few commercial projects in order to get votes for the bill. That is not the reason given, but what Member believes $499,000 would otherwise be given for the Ouachita or $250,000 for the ridiculous Trinity, or $390,000 for the Brazos, or dribbling appropriations for a hundred other creeks contained in this measure.

The bill is here with a conference report raising the appropriation over $3,000,000. If time permitted, I would like to discuss all the amendments accepted by conferees, but can only point out their general character. Recently the Senate defeated

a resolution carrying $1,000,000 for dependents of National Guardsmen. That resolution passed this House with only five dissenting votes. It was defeated in the Senate, and among the votes cast against it are many of those who voted to place $3,000,000 more in the river and harbor pork barrel and to pass the bill.

Taken in inverse order, amendment 87, for Weymouth Fore River, Mass., carries $200,000, although an 18-foot depth at low water and 25 feet at high water has only cost $175,095. And let me say right here that the lobbyist for this scheme was in to see me this morning. The total amount expended in 1915 on this project was $1,837, and all that is asked for 1917 by engineers—$15,000—was placed in the original bill. This $200,000 gift is to a single private corporation and not asked for by engineers.

The mayor of Boston demands that every Massachusetts Member support the vicious $43,000,000 bill because a $200,000 amendment has been inserted by the Senate. Fore River Shipbuilding Corporation's lobbyist has been here constantly plugging for the $200,000, which is for this company's use alone, as shown by the engineer's 1915 report (p. 102). A joke on House Members consists in the fact that after securing the amendment the Senator voted against the bill, which was only carried by three votes. Now House Members are asked to pull the chestnut out of the fire by voting for a $43,000,000 bill in order to save $200,000 that is wanted by this private corporation and Boston's mayor. It is an angle of discreditable pork-barrel methods that speaks louder than words. I know that Kinguan has said it would be a good thing, but Kingman said the same thing about the $18,700,000 private water-power project at Muscle Shoals. Why did not Kingman ask for more than 12-foot depth at Weymouth, where the naval arsenal is located? Why did he give it to a private company and not to the Government arsenal 5 miles away?

The next Senate amendment carries $170,000 for New London Harbor. For many years the Government poured money into that harbor, only to find, after a 26-foot depth had been completed, that not a single public wharf was in existence. All belonged to the New Haven or Central Vermont Railroads. Then the Government insisted that a public wharf be built. This has been done by the State, and, although only three foreign boats visited New London in 1914, we are now asked for a 33-foot depth of harbor, ostensibly to ship grain expected through the Erie Canal.

Let me suggest that I am now speaking of northern projects. That is for the information of those who are inclined to criticize my statements on the ground of sectionalism.

I quote the reason offered by the document named in the bill. Yet not one bushel of grain was handled at New London in 1914. That amendment is expected to tie up a few New Englanders' votes for the infamous 1916 bill. It is claimed the Government is morally bound to keep some implied promise, but no one can pledge the Government to unnecessarily waste public funds.

Take $300,000 which is to be shifted from the Federal Treasury under an innocent-looking amendment for Tonawanda, up Niagara River.

An 18-foot channel has been furnished by the Government to Tonawanda. All the water traffic is carried by boats drawing 15 feet or less, but the Tonawanda Iron & Steel Co. wants 23 feet, just as New London, with 26 feet, wants 33 feet. The Tonawanda company says it can not compete with the Wickwire company on even terms, and the Government is asked to dredge Niagara and Tonawanda Creek 5 feet deeper.

Engineers say in the report it is not apparent that dredging is needed, but the Senate wants it and the Tonawanda company wants it, and the New York delegation is expected to vote for this bill in order to get it.

The Savannah River amendment asks for $33,000 and the Missouri River, up at Vermilion, in South Dakota, asks $75,000, and the White and Arkansas Rivers, in Arkansas, ask for $40,000 extra for revetting banks along these rivers. These appropriations are expected to hold votes for the bill. Men are expected to vote for the whole miserable proposition in order to help a few private owners who ought to revet river banks themselves, as they do in other States.

The Arkansas, which has been condemned by Army engineers, received $209,700 when the bill passed the House. When it got through the Senate another $25,000 had been added for "bank protection." The appropriation is not for bank protection, but for bank robbery, and there is no difference in principle, even though the Government owns the bank that is being robbed.

Take Pascagoula Harbor, which has received $1,299,499 from the Federal Treasury and lost over 33 per cent of its commerce last year. The actual commerce is 95 per cent logs and timber or timber products. Engineers once extravagantly recommended a Government appropriation of $383,000, of which the Pascagoula lumber mill owners were to raise $100,000. Pascagoula people objected to raising $100,000, although they were willing to take a gift unconditionally.

Engineers ask for $35,000 in 1916 for an actual commerce of about 31,000 tons, after deducting timber. In the Senate it was increased to $80,000 because a Senator declared, "Engineers say they do not need the amount, but the people of Pascagoula are very desirous the appropriation be made. I want it made."

No matter what the merits of the proposition, a Senator who opposed the bill granting aid to dependents of National Guardsmen said of Pascagoula's $80,000 appropriation, "I want it made." If that be senatorial courtesy, it is time to put a stop to such courtesy by killing such vicious amendments and the bill of which it is a part.

The White River, with less than 1,700 tons of saw logs and shells in 1914 at Devall Bluff, gets $38,500. Why and how no one knows. I ask any member of the conferees if this is not a loot of the Treasury for private purposes.

Two members of the Rivers and Harbors Committee say the Los Angeles item of a half million dollars is for reclaiming lands, and the item failed to receive consideration in the House commitee. It was put in by the Senate, although cut in two by the conferees, and we are asked to pass it without consideration, with a score of other amendments reaching over three millions.

This proposition ought to be discussed on the floor of the House, and discussed fully. It carries a large appropriation, and we should be advised as to its character and reason for the $500,000 that has been added in conference.

Mr. SPARKMAN. Mr. Speaker, will the gentleman yield there?

Mr. FREAR. I can not yield at present until I have completed my statement of the measure.

Mr. SPARKMAN. What member of the conference committee made that statement?

Mr. FREAR. If the gentleman will pardon me for accepting his invitation, I will say that one is the gentleman now addressing me, the chairman of the committee. He, however, said he believed it would be to the interest of the Government because of the land to be acquired by the Government.

Mr. SPARKMAN. I never said that in regard to Los Angeles Harbor.

Mr. FREAR. That was my clear understanding. I will accept the chairman's statement if I misunderstood the gentleman; but I was discussing that harbor, although he may have had another one in the same State in mind. However, this would not have been volunteered without the inquiry which I am glad has been made.

Let me say further that Chairman SPARKMAN has invariably been fair and frank with every member of the committee so far as my knowledge goes, and I appreciate his own fairness to me as a member of the committee.

Adding $300,000 for the upper Mississippi in addition to $1,200,000 placed in the bill by the House is a public scandal that can not be defended. Col. Townsend, of the Mississippi River Commission, asked that this work stop, but Senators have added to the pork placed in the House bill. I know of my own knowledge the money is being wasted, and I have had numerous letters from river men and people living on the river to the same effect. In 1914 the traffic fell off one-third in a single year, and the river has lost 90 per cent of its traffic.

Think of giving $75,000 for a washout at Vermilion, in South Dakota. It may help some private parties, but it should defeat anyone who countenances such an unconscionable loot of the Public Treasury.

Mr. Speaker, if time permitted I would like to discuss other Senate amendments to the bill, including the $247,950 given for sawmills on Willapa River, where the actual commerce, deducting logs, timber products, and sand, is only about 3,000 tons. Willapa has 107 population, but the amendment adding about a quarter of a million dollars to the bill pulls votes for the whole wasteful proposition. And I will say this in justice to those people: Those men out there on the Pacific coast generously contribute toward coast improvements, and that is in striking contrast with what is done with projects in other parts of this country.

All I can say is that Senate amendments add nothing to the good character of the bill. Generally speaking, they were refused by the House committee at the outset, but are for pork loaded up at the other end of the Capitol. As an evidence, the Senate added $100,000 for more surveys, making $350,000 in the 1916 bill for surveys. Think of the situation! Sixty-seven

officers, or about one-half of the engineering force on actual duty, give all their time to chasing over the country surveying infinitesimal creeks and wasteful harbor projects. It is the place where pork grabbing shines, and the other end of the Capitol is as bad as this end in compelling engineers to leave their military duties and chase from Dan to Beersheba, and from Salt Creek to the Muscle Shoals on land reclamation, private water power, and other indefensible ventures. The country needs these engineers in Mexico; Chairman HAY has said they ought to be with their commands, and yet the Senate adds more dry creeks and keeps them chasing on political missions instead of attending to legitimate military duties. When the National Guard left dependents uncared for the Senate refused to provide for a worthy purpose, but when it comes to caring for local pork the entire engineering force will be taken from the border if necessary to again survey the Trinity and the Brazos and the Red and Arkansas, and scores of newly discovered creeks and abandoned canals.

I am asking an impersonal question when I inquire, How many of you gentlemen would vote for this $43,000,000 bill if it were not for some piece of pork in it?

Is it any wonder Army engineers go wrong and recommend $18,700,000 Muscle Shoals frauds when they have such examples of wasteful methods at both ends of the Capitol? Is it worth the price?

Mr. HULBERT. Mr. Speaker, will the gentleman yield?

Mr. FREAR. Not at this moment. When I get through with an analysis of amendments I have offered I will do so. Mr. Speaker, it is expected that the New York delegation may vote for this bill because of the Diamond Shoals project.

Of the $512,000,000 raised for Government purposes last year by internal revenue over 20 per cent, or $105,000,000, in round numbers, was contributed by New York. Illinois, Pennsylvania, and Ohio gave $143,847,000, or nearly 50 per cent of the total was contributed by these four States.

Counting lake and ocean ports, the four States named handle four times as much waterway commerce as all other States in the country put together, excluding Wisconsin, which alone averages over 60,000,000 tons annually.

The river and harbor bill now gives a sop to New York for Diamond Shoals. Is it worth the price? What is New York getting for the $105,000,000 internal revenue it is giving to the Federal Treasury? Chief Black finally recommended Diamond Shoals after much wabbling; but it does not need Black's recommendation. Black recommended the $18,700,000 private water-power fraud at Muscle Shoals for immediate construction before he thought of Diamond Shoals. Black overruled Deakyne and Townsend, on the Missouri River, although he knew practically nothing about the river when recommending $1,500,000 in the 1916 bill for this land-reclamation scheme.

I speak of this in view of the showing that was made on the floor of the Senate in regard to Chief Black's lack of knowledge of the Missouri River. Black has recommended scores of wasteful projects, and New York is paying 20 per cent of all the bills. New York will get appropriations with or without Black. Pennsylvania gets a sop for the $45,000,000 she contributes in internal revenue, and yet Pennsylvania Members are urged to support the bill because of the Delaware River appropriation in exchange for the $45,000,000 contribution, which just pays for this river and harbor pork barrel.

Mr. Speaker, the people will soon learn how this bill is loaded, and that most of the pork goes to those who make slight contribution. In order to divide it up proportionately artesian-well streams, land-reclamation schemes, and private water-power grabs are linked together to get their share, irrespective of commercial requirements.

Have you read the speeches of TILLMAN and TAGGART and THOMAS and HUSTING? I am asking my Democratic friends. These distinguished Senators characterized the 1916 bill as a steal, and they showed wherein it was vicious and ought to be defeated. Have you read the speeches of KENYON, SMOOT, SHERMAN, and NORRIS? And now I am asking my Republican colleagues to give attention. These Senators said the 1916 river and harbor pork barrel is a fraud and steal, and called attention to the public revolt against such bills. They analyzed this bill. They showed wherein it is a humbug, and they recorded 32 votes against the bill. A change of 2 votes would have killed it. They may get it this time.

Think of the Senate that has winked at such bills for all these years, and yet defeated the last two bills. We pretend to be nearer the people. We claim to be close to the public pulse, and yet we put such bills up to the Senate. The country is sick of such humbugs. It is disgusted with the whole miserable river and harbor mess, and it expects us to defeat the bill.

Of three recent national conventions the Progressive convention repudiated the waterway lobby and denounced pork barrels. The Republican convention threw out the land-reclamation lobby and the contractors who have controlled so-called waterway planks in recent years. Not one word in favor of the time-honored fraud occurs in either platform. But the same old lobby was at St. Louis, and its Italian hand is seen in the Democratic platform.

I hope to see this bill defeated, aided by Democratic votes. I do not believe any man in this House would be personally dishonest. Then, why do we admit to the country legislative dishonesty when we pass this kind of a bill?

Mr. Speaker, let me say to my Democratic friends, if you wish to take away one of the strongest indictments against this administration, you will join in defeating this $43,000,000 barrel of bacon. The last two bills were defeated by Republicans in the Senate. What do you expect to get out of it? How much pork is the price of support? That is not my question, but that is the question which will be handed to you all over the country, and Democrats must answer.

Many Democrats have told me the bill is indefensible and ought to be defeated. Then let us defeat it and turn over a new leaf. Let us pass a small emergency appropriation and reduce enormous expenditures which are staring us in the face—double the expenditures of four years ago. You have just levied a $200,000,000 tax to cover nearly $100,000,000 for river and harbor and so-called flood-control bills. What a record.

We listen to homilies on patriotism. I have heard men give eloquent tributes to the flag and to a common country, but when men say they are for the flag with an appropriation it does no credit to their patriotism.

The country expects us to be legislatively honest, and the highest evidence of practical patriotism will be for us to defeat this bill. There should be but one standard. Men are sometimes persuaded or threatened by interested parties into doing things unwittingly that are wrong, but when brought face to face with a public steal, a waste of $25,000,000, enough to build a great battleship, there can be but one right course to pursue. Worthy projects are found in this bill, but what right have we to loot the Treasury either in prosperity or when the Government is in financial distress, as it is to-day?

Mr. Speaker, I have presented the case as concisely and frankly as I know how. I feel confident a vote will go to the country that will condemn this measure and all similar measures. I believe the people will indorse the action of every man who votes against the bill. I can not believe they will approve votes in its favor. I have no word of criticism against any Member, but after the exposure of this bill in both House and Senate no man can plead ignorance of its contents.

It ought to be defeated. I believe it will be defeated—if not here, then at the other end of the Capitol—and by its defeat we will take a long step in favor of honest legislative methods and public economy.

Mr. Speaker, I shall be glad to answer any question if my time is extended for two minutes, but I can not encroach further without unanimous consent. I am willing to answer any question.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. FREAR. If the gentleman will give me two minutes more, I will yield to answer a question.

Mr. DALE of New York. I ask unanimous consent that the gentleman's time be extended five minutes.

The SPEAKER pro tempore. The gentleman from New York asks unanimous consent that the order be extended five minutes, and that five minutes be given to the gentleman from Wisconsin.

Mr. SPARKMAN. I object.

Mr. FREAR. I should have been glad to answer the gentleman if I could have had my time extended.

Mr. SPARKMAN. I yield five minutes to the gentleman from Wisconsin [Mr. STAFFORD].

Mr. HUMPHREY of Washington. The gentleman from Wisconsin said he might not want to use the time.

Mr. SPARKMAN. I yield two minutes to the gentleman from Texas [Mr. HARDY].

Mr. HARDY. Mr. Speaker, I want to take two minutes, in order that I may ask leave to extend my remarks in the RECORD, and I wish to add a few words.

The SPEAKER pro tempore. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HARDY. I have listened to this tirade of the gentleman from Wisconsin [Mr. FREAR], who runs the whole gamut of reckless, false charges against every Member of this House who shall vote for this bill and against every public official of the United States who has made a report which supports this bill. I want to say that in making those charges he is making them against men whose reputation stands as fair as his own. And, furthermore, I wish to say that it is no credit to the gentleman from Wisconsin to make such charges; and when he says that many Democrats have told him that the bill is a steal and ought to be defeated, and yet they are going to vote for it, he ought to point out those men.

Mr. FREAR. I will name them to the gentleman.

The SPEAKER pro tempore. Does the gentleman yield?

Mr. HARDY. No.

The SPEAKER pro tempore. The gentleman declines to yield.

Mr. HARDY. The gentleman should name the Democrats who said this was a steal, and yet they would vote for it.

Mr. FREAR. Senator TILLMAN and Senator TAGGART.

Mr. HARDY. Does Senator TILLMAN say he is going to vote for it?

Mr. FREAR. I am referring to what they stated on the floor of the Senate, in the RECORD.

Mr. HARDY. Did he say it was a steal, but that he would vote for it?

Mr. FREAR. He did not vote for it; he voted against it.

Mr. HARDY. You said many Democrats said it was a steal, but that they were going to vote for it. I ask again, Who says that?

Mr. FREAR. The gentleman misunderstood me.

Mr. HARDY. I took down the gentleman's words. He may not have intended it that way, but he left the impression, and the whole tenor of the gentleman's tirade was to the effect that Members have stood on this floor and defended and voted for measures that they believed were steals; and I say all the gentleman's argument is along that line. It ought to be stricken from the RECORD.

The gentleman thinks it is popular to make such charges, and a man who feeds his vanity by seeing himself puffed in the papers as the hero of the antipork-barrel fight through his scandalous aspersions of all those who vote for river and harbor improvements does not measure up to a very lofty standard of statesmanship or manhood.

It is popular to make such charges in some quarters. It is popular, perhaps, in railroad circles, because if all improvements of rivers and canals is abandoned all the transportation that ought to go on rivers and canals will go on railroads, and go at railroad high rates. No man is so simple-minded—and, least of all, the gentleman from Wisconsin—as not to know that the actual cost of transportation by water, either on rivers or canals, when they are in reasonable navigable condition, is not half as great as the cost of transportation by rail. And yet the gentleman is here denouncing nearly every item of river improvement in this bill.

The SPEAKER. The time of the gentleman has expired.

Mr. HARDY. May I have two minutes more?

The SPEAKER. The gentleman from Texas asks unanimous consent for two minutes more. Is there objection?

There was no objection.

Mr. HARDY. With reference to the Trinity River, the gentleman from Wisconsin says there is a ridiculous appropriation for a river on which there is no transportation. Everybody knows that no transportation was expected; that there could not be any transportation until that waterway was opened from its upper reaches, where improvement was begun, to its mouth. The gentleman knows the facts connected with that improvement as well as anybody. He knows that by the advice of Senator Burton the arrangement was made that the improvement of that river should begin at Dallas and that the locks and dams should be built on down toward the Gulf. He knows there can be no navigation of any moment until you open the waterway all the way, but the gentleman knows that when that river is opened there will be transportation enough upon it to pay for its improvement many times over in the cheapening of the rates, as compared with rail rates, and that there will be no stream which will make a better return for its improvement than the Trinity River when that navigation is actually in operation. Yet the gentleman made his argument based on the present absence of freight on the Trinity, just as though he were speaking of a completed project.

It is such charges as these that fill the pages of the gentleman's voluminous speeches, one session after another, and I am getting tired of hearing them. [Applause.]

Mr. HUMPHREY of Washington. Mr. Speaker, I yield two minutes to the gentleman from Massachusetts [Mr. TREADWAY].

Mr. TREADWAY. Mr. Speaker, I was opposed to the river and harbor bill when it passed the House. At that time I offered a few reasons for my opposition to it. I see no reason to change those views at the present time. The conference report, as I have looked it over, simply shows an increase of the appropriations carried by our bill as it passed the House, nearly $4,000,000 more. If one was opposed to the original bill, it certainly follows that he ought naturally to oppose the conference report. Therefore I shall vote against the conference report. I had intended to make a few remarks on this subject, but I realize that it is an extremely warm afternoon, and there evidently has been a sufficient addition to the heat by some of the Members here. Therefore I will limit my remarks to a request for the privilege of extending them.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to extend his remarks. Is there objection?

There was no objection.

Mr. HUMPHREY of Washington. Mr. Speaker, as I have a little time left, I will take two or three minutes to reply to some extent to the statements made by the gentleman from Wisconsin [Mr. FREAR]. As I understood him, in his argument he insinuated, and perhaps stated directly—I am not sure, for I did not hear distinctly what he said—anyway, the drift of his argument was that the amendments went into the bill in the Senate for the purpose of getting votes. I will simply call his attention to the situation on the Pacific coast. California receives more additions in this bill than any other State, and both the Senators from California voted against the bill. Does that look as though they were trading for votes? The next largest item that went into the bill for the Pacific coast was for the State of Washington, offered by Senator JONES, and Senator JONES voted against the bill. I just want to call attention to the unfairness of the argument of the gentleman from Wisconsin.

He makes statements and asks you to draw conclusions, but when you attempt to analyze them you find as general propositions that his statements do not rest upon facts. It is like his whole argument made in the beginning when the bill was under consideration. He argued over and over again that because some harbor had a large amount of commerce and received but small appropriations that that was evidence that something was wrong, that that showed that there was pork in it. Such a statement is absolutely unfair, and the gentleman certainly must know that it is so.

Take a good many great harbors in this country that do a great commerce. They received no appropriation because they did not need it. I might just as well stand before the House and argue that Seattle for many years has been robbed of a just proportion of the river and harbor bill because she had never received any appropriation. She never needed any; we have plenty of water.

The gentleman made this argument and insisted upon it, pointing out the items, saying here is a place that has so much tonnage that receives so much appropriation, and here is another harbor that has ten times as much tonnage but does not receive practically anything. Such argument is absolutely unfair and unjust.

Now, I call attention to the arguments that those propositions went in to receive votes. I do not know whether they did or not, but I do know that the Senators who voted against the bill got the most items in the bill. If they did it under an agreement to vote for it, they got their appropriations under false pretenses, and the gentleman ought to go over to that body and call their attention to the fact that they ought to live up to their agreement, if his statements are true, because even a thief ought to keep his contract with the man that helps him to receive the plunder. [Laughter and applause.]

Mr. SPARKMAN. Mr. Speaker, I yield two minutes to the gentleman from New York [Mr. HULBERT].

Mr. HULBERT. Mr. Speaker, in recognition of the desire of Members to vote, I shall be appreciably brief. The remarks that I shall make are called forth by the statement made by the gentleman from Wisconsin [Mr. FREAR], who to-day has reiterated in the 30 minutes allotted to him all the arguments which he made upon the consideration of the bill, except that in the meantime there has been a Republican national convention, and the great waterway expert whom he has heretofore cited in support of his statements has been cast into the discard, and in his entire argument to-day he failed to mention him. [Laughter.]

The gentleman suggests that by the curtailment of appropriations in this bill a considerable amount of money might be saved for the construction of additional battleships, and in the same breath he emphasizes the fact that the Members from New York will vote for this bill because of the sop that is thrown to them in the shape of the East River improvement provided for. I want to say to the gentleman from Wisconsin that the East River improvement is not a sop to the Members

from New York. The East River improvement is a patriotic appropriation in this bill because with the improvement of the East River for a 35-foot channel you will thereby establish a marine trench which will necessitate doubling the number of vessels on the outside of New York Harbor in order to successfully blockade that port.

I want to say that I do not know of any more effective way to improve our naval status if we can not build battleships of our own, than to necessitate doubling the construction of battleships of the enemy by this East River improvement.

Mr. FREAR. Will the gentleman yield? I did not criticize——

Mr. HULBERT. I can not yield in 2 minutes. The gentleman would not yield to me in 30 minutes. Since the bill passed the House there has been included by the Senate a provision on page 48 for a survey of New York Harbor with a view to securing an increase in depth to 40 feet, and a suitable width in the north or Hudson River channel from deep water in the upper bay as far north as Spuyten Duyvil Creek.

I maintain that the inclusion of that item alone justifies any Member—not only from New York, but anywhere in the United States—to vote for this bill. A few days ago you read in the newspapers that the city of New York had an elaborate ceremony celebrating the completion of a new pier at Forty-fifth Street, North River, where they intend to dock vessels drawing 35 or 40 feet of water. It was evidently not known to or considered by the mayor of New York or any official in his official family that in the Hudson River opposite that pier we have only 22 feet of water at the present time; and although they have provided for a vessel of 40 feet draft, you can not dock a vessel that draws more than 20 feet, and unless you authorize the making of a survey in this bill it will not be possible to secure an appropriation to remove the obstructions until another Congress.

I repeat that that item not alone justifies, but suggests the necessity of every Member here voting for the conference report. This bill carries appropriations aggregating approximately $40,000,000. There are in the State of New York approximately 10,000,000 people. This bill appropriates for the State of New York more than $4,000,000. In other words, the State of New York in this bill receives an amount which is proportionate to its population with the whole United States. It is the most equitable bill ever presented, so far as New York City and New York State are concerned, and the gentleman from Wisconsin can not find any justification in saying that the Members from New York are going to vote for this because some sop has been given them. [Applause.]

Mr. SPARKMAN. Mr. Speaker, I yield two minutes to the gentleman from Indiana [Mr. CULLOP].

Mr. CULLOP. Mr. Speaker, money ought to be expended for improvement of certain of our harbors because of our commercial relations with the world. Certain rivers upon which the construction of improvements have already begun ought to be carried on that the money already expended shall not be wasted. If the bill was to stop with these requirements, it would be all right. But, gentlemen, we are carrying in this bill projects that will bring no return in the future. It is not sufficient to say that the Republicans carried out a scheme of this kind. That is no justification for appropriations contained in this bill. If that party did wrong when in power, the people administered the punishment it merited by defeating it. Their policies were repudiated by the people, and we ought to profit by their example. This measure contains projects upon which enormous expenditures are appropriated for, which can not be of value to the commerce of the country, and all money expended on such projects is wasted.

The Democratic Party was put in power in this Government to reform the evils the Republican Party had brought upon the Nation. [Applause on the Democratic side.] It therefore should exercise discretion in the management of public affairs, so as to meet the approval of the people, and hence avoid all waste of public money, all extravagant appropriations. Now, for instance, take the intercoastal canal, for which a large amount is contained in this bill. It is not a meritorious project, and no man can justify his vote for it. It will cost the people of this country for years and years large amounts of money and bring no return whatever. It would be better to apply the revenues of this Government to other things in building up the commerce and aiding the prosperity of the country, now the most marvelous the country has ever known. In this bill are projects that are unjustifiable, and some of the justification that is advocated here is because it is said the Republicans did the same sort of thing. This is not a good reason, and the man who relies on it to justify his vote will learn to his sorrow that the people will not regard it as sufficient.

Projects are contained in this bill for which large amounts are appropriated, and more will be given in the future if this policy of profligate waste is continued, which can never be of value to the people, and hence the money expended for their improvement is wasted. In some instances the amount in this bill appropriated this year for improvement would buy all the commerce that will be transported on them for the next 50 years. Does anyone believe such an expenditure can be justified? If there were only one or two of this kind, it would not be so serious, but there are many of that kind, and because of this fact, the measure is looked upon by the people with much disfavor and are severely criticizing the Congress for its passage. Many creeks are attempted to be improved and large sums are appropriated for that purpose, and yet all know full well that they can never become useful arteries of commerce, and are not the proper streams for public improvement, yet for some reason they are receiving favorable consideration in this great improvement system. Money thus expended is wasted, and this action will receive the condemnation of the people, which it deserves. If we now had the money which in the past has been wasted in appropriations for improving our rivers it would build for us the best navy in the world. It would buy us the greatest merchant marine that ever floated the oceans. It would be sufficient to equip us with ample ships to control the seas either in war or peace.

We have many rivers on which millions have been expended for improvement that now float no boats, and their improvements have been abandoned and the investment is lost. The public is the sufferer. The commerce is there more than ever before, but the railroads carry it to markets. Rivers may be improved, channels may be deepened so that the year around they will float large boats, but a boating stage of the river alone will not put boats on the river. Money is cautious, it will only be invested where it promises good returns on the investment, and experience teaches that on most of our rivers investments in steamboats pay no return, and hence capital will not invest. The products are there for transportation in larger quantities than ever before, but the railroads haul them to markets, because they touch all the market centers. The rivers do not. River transportation is growing smaller every year, and this is the reason for it. We should as well consider the facts as they exist, the reason for their existence, and understand there is no remedy for the conditions.

Let the Democratic Party here be careful how it handles the public affairs. The people are willing to pay for every needed and useful appropriation, such as will promote the public welfare and accelerate the prosperity of the country. They stand ready and willing to be taxed for every beneficial purpose, but they are unalterably opposed to useless and extravagant expenditures of public money and will object, strenuously object, to being taxed to raise revenues for all such expenditures.

In this they are manifestly right. The majority is always held responsible for the administration of public affairs. Our party is in the majority here, and it will be held responsible for all legislation enacted and all appropriations made; therefore we should exercise caution and care, to the end that whatever we do will be done for the best interest of the people of this country. In the passage of this measure I warn you now we can not defend it to the satisfaction of the people when arraigned at the bar of public opinion. Much of it is indefensible. Because of existing conditions throughout the world, we are compelled to make large expenditures for preparedness, a thing the Republicans neglected to do when in power, and we have inherited, because of their neglect, the duty of preparing our country, both on land and sea, so as to prevent invasion if it should be assailed by some foreign foe. In order to do this large expenditures are required, and hence larger revenues must be raised and much of the expenditure provided for in this bill, even if necessary, could be deferred to a future time, and I earnestly submit it should be postponed. The people would approve such a course, and hence I do hope the conference report will not be adopted. I shall vote against its adoption, and I urge my Democratic colleagues to do likewise. Time taken to consider and revise this matter can do no harm but, on the contrary, may do much good. The people can study the matter over and then instruct us to carry out their wishes about the same. Counsel with the people, get their views and learn their wishes, and then act accordingly, and the country will be the better satisfied concerning the matter.

Mr. SPARKMAN. Mr. Speaker, I yield two minutes to the gentleman from Louisiana [Mr. DUPRÉ].

Mr. DUPRÉ. Mr. Speaker, first I will ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. DUPRÉ. Mr. Speaker, I would like to use my two minutes to answer the arguments of the gentleman from Indiana [Mr. CULLOP], as they are easily disposed of, but I think I can devote them to a better purpose. [Laughter.]

I desire to call the attention of this House to the recent decision of the Supreme Court of the United States in the case of Cubbins against The Mississippi River Commission, the organ of the court being the distinguished Chief Justice. He not only brought to the consideration of that case a wide range of legal learning, but, as a native Louisianian, he has a lifetime's familiarity with the Mississippi River and the Mississippi Valley. I want to read to this House a brief passage from that opinion, which sounds like an answer to some of the contentions we are continually hearing on this floor. I desire to state that the italics are my own.

In fact, the nature of the assumption upon which the argument rests is shown by the contention that the building of the levees under the circumstances disclosed was a *work not of preservation but of reclamation*—that is, a work not to keep the water within the bed of the river for the purpose of preventing destruction to the valley lying beyond its bed and banks, but to reclaim all the vast area of the valley from the peril to which it was subjected by being situated in the high-water bed of the river. If it were necessary to say anything more to demonstrate the unsoundness of this view, it would suffice to point out that the assumption is wholly irreconcilable with the settlement and development of the valley of the river, that it is at war with the action of all the State governments having authority over the territory, and is a complete denial of the legislative reasons which necessarily were involved in the action of Congress creating the Mississippi River Commission and appropriating millions of dollars to improve the river by building levees along the banks in order to confine the waters of the river within its natural banks, and by increasing the volume of water to improve the navigable capacity of the river.

The great Chief Justice declares that the work of levee building is one of preservation, not of reclamation. [Applause.]

I append herewith the decision in full:

Supreme Court of the United States.

No. 299.—October term, 1915.

John F. Cubbins, appellant, *v.* The Mississippi River Commission and the Yazoo-Mississippi Delta Levee Board. Appeal from the district court of the United States for the northern district of Mississippi.

[June 5, 1916.]

Mr. Chief Justice White delivered the opinion of the court.

The conditions out of which this controversy arises are substantially the same as those which were relied upon in Jackson *v.* United States (230 U. S., 1). We therefore here make a briefer statement of the topography of the country with which the case is concerned and of the other general conditions involved than we would do if such were not the case, since if a fuller statement as to any particular aspect is desired, it can be readily found by a reference to the report of that case.

The complainant as the owner of a piece of land on the east bank of the Mississippi River adjacent to Memphis, Tenn., on his own behalf and on behalf of others owning similar land in the same locality, commenced this suit against the Mississippi River Commission and 15 local State levee boards operating on the river between Cape Girardeau, Mo., and the mouth of the river at the Gulf of Mexico, 3 of these boards being organized under the laws of Missouri, 4 under the law of Arkansas, 1 under that of Tennessee, 1 under the law of Mississippi, and 6 under the law of Louisiana.

It was alleged that in flood seasons when the water in the Mississippi River rose above its natural low-water banks, such water would flow out and over the vast basins in which the alluvial valley between Cape Girardeau and the Gulf formed itself and would then either by percolation gradually flow back into the river or be carried over and through the basins by the streams flowing through them into the Gulf of Mexico, where such streams emptied. It was further alleged that the land of the complainant, when the river in the flood periods was thus permitted to discharge its waters, was so situated that it was beyond the reach of overflow from the river. It was then alleged that in 1883 the Mississippi River Commission acting under the authority of Congress had devised a plan known as the Eads plan, by which it was contemplated that on both banks of the river, except at certain places which were stated, a line of embankment or levees would be built which in times of high water or flood would hold the water relatively within the lines of the low-water banks, thus improving navigation by causing the water to deepen the bed, and saving the country behind the levees from inundation. It was averred that to further this plan the various State levee boards which were made defendants were organized and that all of them within the scope of their power and the limits of their financial ability had aided in carrying on this work and that as the result of their work and of the levees built by the Mississippi River Commission it had come to pass that from Cairo to the Gulf, a distance of about 1,050 miles, on both sides of the river, except at points which were stated, there was a continuous line of levee restraining the water from flowing out into the basins as above stated and which in many instances cut off the outlets connecting the streams which drained the basins and ultimately carried off the water to the Gulf. It was charged that this line of levees as a whole had been virtually adopted by the Mississippi River Commission, which body had assumed control of the whole subject, and that such body and all the State agencies cooperating were engaged in strengthening, elevating, renewing, repairing, and increasing the lines of levee so as to more effectually accomplish the purpose in view.

It was charged "that the effect of the closing by the defendants of the natural outlets along the said river, and the confining of the flood waters between the levee system as a whole is to obstruct the natural high-water flow of the water of said river in and along its natural bed for its entire length, thereby raising the level of the water to such an extent that said flood waters, within the last five years, have attained a sufficient height to flow over complainant's land, and when there is now a high-water stage in said river, the waters of said river accumulate, flow over, and remain standing upon and over said lands of complainant to a depth of from 4 to 8 feet, so that complainant is now being interrupted in the profitable use, occupation, and enjoyment of his said land." And it was further alleged that "said land is being covered with superinduced additions of sand, silt, and gravel, now from 6 inches to 3 feet in depth; the houses and fences thereon are being washed away, rendering the said land and the houses thereon unfit for occupancy, driving away the tenants, doing irreparable harm and injury to said land, impairing its usefulness, causing the practical destruction thereof, and destroying its market value."

It was averred that to obstruct the river as alleged was a violation of the legal rights of the complainant, since he was entitled to the natural flow of the river within its natural high or low water bed free from interference by the acts of the defendants. Averring that no proceedings had been taken to expropriate the land and that no offer to pay for the same had been made and that the acts complained of constituted a taking without compensation in violation of due process of law under the Constitution of the United States and that there was no adequate remedy a law, the prayer was for an injunction against the Mississippi River Commission and all its officers, employees, agents, and contractors wherever found and against all the local levee boards and their officers, employees, agents, and contractors perpetually prohibiting them from further building any levees, from enlarging, strengthening, repairing, or doing any act to maintain the levees already built and for general relief.

The bill was amended by alleging that the overflow of complainant's land as averred instead of having happened within five years had occurred within one year, and the original prayer was added to by asking that if it was found that the injunction prayed could not be granted the case be transferred from the equity to the law side and be converted into a law action to recover from the Yazoo-Mississippi Delta Levee Board, the local Mississippi board, which alone of the defendants had been served, the sum of $500,000 as the value of the plantation alleged to have been wrongfully taken.

A motion by that corporation was made to dismiss the bill on the ground that it stated no basis for relief, and in any event it alleged no ground for equitable jurisdiction since at best upon the theory that a cause of action was stated, there was plainly an adequate remedy at law. On the hearing the motion to dismiss was joined in by the Mississippi River Commission, and the case is here as the result of the action of the court below in dismissing the bill for want of equity.

At the threshold we put out of view as primarily negligible contentions as to whether in any event, in view of the vast public interests which would have been detrimentally affected, the injunction prayed could have been granted, and whether the suit should not have been dismissed so far as the Mississippi River Commission was concerned on the ground that it was really a suit against the United States without its consent and not a mere action against individuals acting as officers to prevent them from violating the rights of the complainant by taking his property without compensation. We say these contentions are negligible because underlying them all is the fundamental issue whether under the averments of the bill there was any right to relief whatever, and to that decisive question we come. Its solution involves deciding whether the complainant as an owner of land fronting on the river had a right to complain of the building of levees along the banks of the river for the purpose of containing the water in times of flood within the river and preventing it from spreading out from the river into and over the alluvial valley through which the river flows to its destination in the Gulf, even although it resulted that the effect of thus keeping the water within the river was by increasing its volume to so raise its level as to cause it to overflow the complainant's land.

While we are of the opinion that in substance a negative answer to the proposition must follow from applying to this case the doctrines which were upheld in Jackson *v.* United States (230 U. S., 1) and Hughes *v.* United States (id., p. 24), as the unsoundness of the distinctions attempted in the argument to be drawn between those cases and this, and the decisive application of those cases to this, will be more readily appreciated by a recurrence to the legal principles by which the controversy is to be governed, we address ourselves to that subject, looking at it in a twofold aspect: First, with reference to the rights and obligations of the landowners and the power of the State to deal with the subject; and, second, with reference to the power of the United States to erect levees to confine the water for the purpose of improving navigation as superimposed on the right of the landowners or that of the State authorities to construct such levees, if such right obtains; and if not, as independently existing in virtue of the dominant power to improve navigation vested in Congress under the Constitution.

1. Without seeking to state or embrace the whole field of the Roman law concerning the flow of water, whether surface or subterranean, or to trace the general differences between that law, if any, as it existed in the ancient law of the continent of Europe, whether customary or written, or as it prevailed in France prior to, and now exists in, the Code Napoleon, one thing may be taken as beyond dispute, that not only under the Roman law but under all the others the free flow of water in rivers was secured from undue interruption, and the respective riparian proprietors, in consequence of their right to enjoy the same, were protected from undue interference or burden created by obstructions to the flow, by deflections in its course, or any other act limiting the right to enjoy the flow or causing additional burdens by changing it. But while this was universally true, a limitation to the rule was also universally recognized by which individuals, in case of accidental or extraordinary floods, were entitled to erect such works as would protect them from the consequences of the flood by restraining the same, and that no other riparian owner was entitled to complain of such action upon the ground of injury inflicted thereby, because all, as the result of the accidental and extraordinary condition, were entitled to the enjoyment of the common right to construct works for their own protection.

Demolombe, after commenting upon article 640 of the Code Napoleon, generally dealing with the servitudes arising from the flow of water, and pointing out that under the Roman law, as well as under the ancient French law and the Code Napoleon, it was the duty of proprietors whose lands bordered upon or were traversed by rivers to permit the water of such rivers to flow their natural course unimpeded, and, quoting the Roman law, "fluminis naturalem cursum non avertere" (L. 1, Cod. de Alluvionibus) additionally states that under both the Roman and ancient law and under the Code Napoleon such proprietors were bound "to undertake to do no work the result of which would be to change the direction of the stream or enlarge its bed or to injure in any manner other proprietors whose lands border upon or are traversed by the stream." (Demolombe, vol. 11, No. 30, p. 36.) But the author at once proceeds to add that the principles thus stated in no way serve to prevent or to limit the right of proprietors whose lands border on or are traversed by rivers "from guaranteeing themselves against damage by defensive works constructed either upon the

border of the rivers or in the interior of their property against either the permanent and insensible action of the rivers or streams or particularly against the damage caused by the accidental or extraordinary overflow of their banks; 'Ripam suam adversus rapidi amnis impetum munire prohibitum non est' (L. 1, Cod. de Alluv.)." And proceeding, the author states that this right of the proprietors undoubtedly exists "even when the effect of the dikes or other works done will be, as is nearly always the case, to render the waters of the river more hostile and damaging to other properties, the owners of which would have no cause of complaint, because each one is entitled to do the same in his own behalf, as the right of preservation and of legitimate defense is reciprocal, since it is impossible to conceive that the law would impose upon the proprietors bordering upon streams an obligation to suffer their property to be devoured [by accidental or extraordinary overflows] without the power on their part to do anything to protect themselves against the disaster." Proceeding to elucidate and state the limitations by which the right thus universally recognized is safeguarded, the author says: "It is necessary, however, that the works constructed [for the purposes stated] do not encroach upon the natural bed of the watercourses; that they should be, of course, constructed in conformity to the police regulations, if any exist, and, finally, that they are in fact constructed by those who build them for the defense of their own property, because constructions would not be tolerated which had been erected by a proprietor upon his own land without any necessity whatever for his own protection, but with the only and disloyal purpose of injuring the property of others." Demolombe further states: "What I have just said of streams and rivers is equally applicable to accidental torrents of water which, like avalanches, may sometimes precipitate themselves upon certain properties. Such a case is likewise one of vis major, against which each one has a right by the natural law on his own behalf to seek to protect himself as best he may—a right which, as well said by the Court of Aix, is like that which obtains to resist the incursion of an enemy, without being preoccupied as to what may be the result or the wrong suffered by a neighbor who may not have had the foresight to successfully avoid the disaster." The author then proceeds: "These principles, which are sustained both by reason and by conceptions of equity, have been for all time recognized both in the Roman law and in our ancient French jurisprudence. They are to-day supported by the unanimous accord of the decided cases and of the opinions of authors. (Comp. L. 2, sec. 9, ff. de aqua et aquæ; L. unic., ff. de ripa munienda; L. 1, ff. ne quid in flum. publ.; Coepolla, tract. 2 cap. XXXVIII, No. 2; Troncon, sur l'art. 225 de la cout. de Paris; Henrys, liv. IV, tit. II, quaest. 75; Domat, Lois civiles, liv. II, tit. VIII, sec. III, No. 9; Aix, 19 mai, 1813, Raousset, Sirey, 1814, II, 9; Duranton, tit. V, No. 162; Pardessus, tit. I, No. 92; Garnier, tit. III, No. 677; Daviel, tit. I, Nos. 384–386, et tit. II, Nos. 697, 698; Taulier, tit. II, p. 361.)

See Mailhot *v.* Pugh (30 La. Ann., 1359), where some of the authors referred to by Demolombe and others are quoted and one or more of the adjudged French cases enforcing the limitation are stated and commented upon.

That the general right to an unrestrained flow of rivers and streams and the duty not to unduly deflect or change the same by works constructed for individual benefit as qualified by the limitation as to accidental and extraordinary floods which prevailed in Rome and on the Continent and which to-day govern in France as stated by Demolombe, also obtained in Scotland, was recognized in 1741 in the case of Farquharson *v.* Farquharson (Morr. Dic., 12787). And the character of the limitation of the rule is well illustrated by Menzies *v.* Breadalbane (3 Bli. (N. S.), 414, (H. L.)), where it was held that it did not apply to a case where a structure was erected in the established high-water channel of a stream. It is apparent also from the opinions in Nield et al. *v.* London & Northwestern Railway Co. (L. R. 10, Ex. 4; 44 L. J., Ex. 15), and the statement found in Coulson on the Law of Waters (3d ed.), pages 177 et seq., that the limitation as to accidental and extraordinary overflows likewise exists in England.

In this country it is also certain without going into a review of decided cases that the limitation is recognized, although it is true to say that much contrariety and confusion exist in the adjudged cases as to when it is applicable, some cases extending the rule so far as to virtually render the limitation inoperative, others extending the limitation to such a degree as really to cause it to abrogate the rule itself. But into these differences and contrarieties it is not at all necessary to enter, since there is no decided case, whatever may be the difference as to the application of the limitation, holding that it does not exist, and when in fact the very statement of the general rule requires it to be determined whether that rule as correctly stated would include situations which the limitation if recognized would exclude. We place in the margin a few of the many adjudged cases from which the situation just stated will be made manifest. (Burwell *v.* Hobson, 12 Gratt. (Va), 322; Cairo, etc., R. Co. *v.* Brevoort, 62 Fed., 129; Crawford *v.* Rambo, 44 Ohio St., 279; O'Connell *v.* East Tennessee, etc., R. Co., 87 Ga., 246; Taylor *v.* Fickas, 64 Ind., 167; Shelbyville & Brandewine Turnpike Co. *v.* Green, 99 Ind., 205; Mailhot *v.* Pugh, 30 La., 1359.)

Were the overflows in this case accidental and extraordinary, is then the proposition to which the case reduces itself. That the volume of water from the vast watershed which the Mississippi River drains and which by means of percolation and tributaries reach that river, is susceptible now and again of being so simultaneously drained off from the watershed into the river and thus so vastly increasing the amount of water to be carried off in a given time as to cause the overflow of the valley which the river traverses and to thereby endanger the enormous interests concerned, is too well known to require anything but statement. But that the possibilities of such a result do not when such overflows occur cause them to be not accidental is to say the least persuasively established by the ruling in Viterbo *v.* Friedlander (120 U. S., 707). And leaving aside this view, it is obvious from the situation and the causes which in the nature of things may accidentally bring about the emptying into the river at one and the same time of the volumes of water from all the vast sources of supply which drain the expansive watershed into the river, in the absence of which accidental unison there could be no flood, that the accidental character of the unity of the conditions upon which the flood depends serves to affix that character to the result—the flood itself. But assuming, as we think it must be assumed, that the words accidental and extraordinary are to be taken as relating to the river; that is, as alone embracing conditions not usually there occurring and not ordinary to the stream in its usual condition having regard to the flow through its natural bed, whether in high or low water, that view would be here irrelevant, since there is no suggestion of any bed of the river in high or low water except the space between the natural banks along which the levees were built, unless the whole valley be considered as such bed. *Indeed from the face of the bill it is apparent that the rights relied upon were assumed to exist upon the theory that the valley through which the river travels, in all its length and vast expanse, with its great population, its farms, its villages, its towns, its cities, its schools, its colleges, its universities, its manufactories, its network of railroads—some of them transcontinental—are virtually to be considered from a legal point of view as constituting merely the high-water bed of the river and therefore subject, without any power to protect, to be submitted to the destruction resulting from the overflow by the river of its natural banks.*

In fact, the nature of the assumption upon which the argument rests is shown by the contention that the building of the levees under the circumstances disclosed was a work not of preservation but of reclamation; that is, a work not to keep the water within the bed of the river for the purpose of preventing destruction to the valley lying beyond its bed and banks, but to reclaim all the vast area of the valley from the peril to which it was subjected by being situated in the high-water bed of the river. If it were necessary to say anything more to demonstrate the unsoundness of this view, it would suffice to point out that the assumption is wholly irreconcilable with the settlement and development of the valley of the river, that it is at war with the action of all the State governments having authority over the territory, and is a complete denial of the legislative reasons which necessarily were involved in the action of Congress creating the Mississippi River Commission and appropriating millions of dollars to improve the river by building levees along the banks in order to confine the waters of the river within its natural banks, and by increasing the volume of water to improve the navigable capacity of the river.

2. Although in view of the conclusion just stated it is unnecessary to refer to the power of Congress to build the levees under the paramount authority vested in it to improve the navigation of the river, we can not fail to point out the complete demonstration which that power affords of all want of legal responsibility to the complainant for the building of the levees complained of. In this connection it is to be observed that the complete application of this power is in the reason of things admitted by the erroneous assumption upon which alone the arguments proceed in seeking to avoid the effect of the well-defined limitation as to accidental and extraordinary floods; that is, the erroneous contention as to the high-water bed of the river which we have disposed of. We say this since it is apparent that if the property in the valley were to be treated as in the bed of the river, that would be true also of the property of the complainant, hence causing it to come to pass that as to such property so situated there would be no possible lawful ground of complaint to arise from the action of Congress in exerting its lawful power over the bed of the river for the improvement of navigation.

These conclusions dispose of the case without the necessity of recurring, as we proposed at the outset to do, to the rulings in the Jackson and Hughes cases, but in the light of the principles we have stated, we direct attention to the fact that the attempt to distinguish the Jackson case upon the ground that relief was there denied because the proprietor on one side of the river, who complained of the increase of the flood level and injury to his land from the levees erected on the other side or from the levee system as a whole, had himself erected a levy to protect his property and therefore was estopped, is without foundation. It is plain when the context of the opinion in the Jackson case is considered that the denial of the right to relief in that case was rested not upon the conception that a right existing on one side of the river was destroyed by estoppel and a right not existing on the other was conferred by the same principle, but upon the broad ground that the rights of both owners on either side embraced the authority without giving rise to legal injury to the other, to protect themselves from the harm to result from the accidental and extraordinary floods occurring in the river by building levees if they so desired. Additionally when the principle laid down in the Jackson case is illustrated by the ruling which was made in the Hughes case, it becomes apparent that the contention here urged as to the identity between the great valley and the flood bed of the river was adversely disposed of, since under no view could the ruling in the Hughes case have been made except upon the theory that the bank of the river was where it was found and did not extend over a vast and imaginary area.

Affirmed.

Mr. Justice Pitney concurs in the result.

A true copy.

So the conference report was agreed to.

The Clerk announced the following pairs:

For this vote:

Mr. McLAUGHLIN (for conference report) with Mr. PAGE of North Carolina (against conference report).

Mr. HART (for conference report) with Mr. GOULD (against conference report).

Mr. CANDLER of Mississippi (for conference report) with Mr. HAMILTON of New York (against conference report).

Mr. KINCHELOE (for conference report) with Mr. RICKETTS (against conference report).

Mr. PATTEN (for conference report) with Mr. CANNON (against conference report).

Mr. NOLAN (for conference report) with Mr. McCLINTIC (against conference report).

Mr. LOFT (for conference report) with Mr. HUSTED (against conference report).

Mr. CARLIN (for conference report) with Mr. DEMPSEY (against conference report).

Mr. McGILLICUDDY (for conference report) with Mr. SMITH of Michigan (against conference report).

Mr. WILSON of Florida (for conference report) with Mr. GRAHAM (against conference report).

Mr. CARTER of Oklahoma (for conference report) with Mr. CHIPERFIELD (against conference report).

Mr. SUMNERS (for conference report) with Mr. PARKER of New York (against conference report).

Ending July 17:

Mr. BAILEY with Mr. FAIRCHILD.

Ending July 22:

Mr. CALLAWAY with Mr. PETERS.

For the session:

Mr. DEWALT with Mr. McFADDEN.

Until further notice:

Mr. FIELDS with Mr. GRAY of New Jersey.

Mr. BURGESS with Mr. MOSS of West Virginia.

Mr. RAYBURN with Mr. KAHN.

Mr. HOUSTON with Mr. GUERNSEY.

Mr. BUCHANAN of Illinois with Mr. KEARNS.

Mr. GREGG with Mr. STEENERSON.

Mr. GLASS with Mr. SLEMP.

Mr. WEBB with Mr. MILLER of Pennsylvania.

Mr. CANTRILL with Mr. LANGLEY.

Mr. FINLEY with Mr. NORTH.

Mr. SLAYDEN with Mr. McKINLEY.

Mr. BARNHART with Mr. AUSTIN.

Mr. KEY of Ohio with Mr. LAFEAN.

Mr. HOWARD with Mr. KELLEY.

Mr. HENSLEY with Mr. GLYNN.

Mr. DOREMUS with Mr. FORDNEY.

Mr. DAVENPORT with Mr. CRAGO.

Mr. MAHER with Mr. PORTER.

Mr. SISSON with Mr. ROBERTS of Massachusetts.

Mr. MURRAY with Mr. LOUD.

Mr. SHACKLEFORD with Mr. PRATT.

Mr. OGLESBY with Mr. POWERS.

Mr. STOUT with Mr. WASON.

Mr. BRUMBAUGH with Mr. FREEMAN.

Mr. GANDY with Mr. CAPSTICK.

Mr. HAY with Mr. COPLEY.

Mr. HEFLIN with Mr. GRIEST.

Mr. SAUNDERS with Mr. KREIDER.

Mr. RUBEY with Mr. HUTCHINSON.

Mr. POU with Mr. BEALES.

Mr. PHELAN with Mr. TILSON.

Mr. STEELE of Pennsylvania with Mr. HAYES.

Mr. SMITH of Texas with Mr. TEMPLE.

Mr. STEELE of Iowa with Mr. HOWELL.

Mr. ASHBROOK. Mr. Speaker, I hurried to the Chamber as soon as the bell rang, but when I got here the second call had passed my name.

Mr. MANN. That is the result of the gentleman's having the letter "A" as an initial.

Mr. ASHBROOK. The minority leader is right. Mr. Speaker, I would like to have it appear in the RECORD that I would have voted "no" if I had gotten here in time.

The SPEAKER. The gentleman does not bring himself within the rule.

The result of the vote was announced as above recorded.

On motion of Mr. SPARKMAN, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

RURAL CREDITS.

Mr. PARK. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. PARK. To ask unanimous consent to address the House.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. PARK. Mr. Speaker, having received a large number of requests from my constituents for information as to the provisions of the rural-credits bill, I beg to submit a statement of the law which will soon be put in operation.

Since I have had the honor of representing my district in Congress, I have advocated, and have desired to vote for, some measure that would enable the farmer to borrow money at a lower rate of interest. The lack of power to borrow money at a low rate of interest on long time has handicapped the development of our rural sections. I believe that a proper rural-credits system will do more for the development and prosperity of our country than any other one measure before the American Congress. I voted for the bill, not because all of its provisions met my approval, but because I believed that it

was a long step in the right direction toward securing for this country a farm-credits system, and believing that we can perfect the measure later on by amendment. [Applause.]

There are some provisions in the bill which I do not approve of, for the reason that I do not believe they will be to the best interest of the farmers. I believe the machinery of the act to be too cumbersome and the system of operating farm-loan associations expensive. I believe that the Government should have established its own agencies at the smallest possible cost, and loaned the money direct to the farmers, without red tape and without creating profit-making middlemen, and introduced a bill eliminating these undesirable features, which was approved by the farmers' union, the grange, and alliance of farmers, but a majority of the House thought differently about these provisions.

I believe that the tenant farmer should be enabled to secure aid to make it possible for him to acquire his own farm and thereby independence for himself and family. However, only the future can demonstrate who is right; and so great is my belief in the lasting good of the rural-credits system that I now feel that all friends of rural credits should join heartily in trying to make this system a success, in order that the best results to the farmers of our country may be secured. Therefore, with this purpose in view, Mr. Speaker, it is not my intention to discuss the merits of this legislation at this time but simply to explain in a general way the provisions of the bill and point out how farmers can take advantage of its terms, hoping that it will be helpful to my constituents. [Applause.]

RURAL-CREDITS LEGISLATION SIMILAR TO FEDERAL RESERVE ACT.

The rural-credits bill which has become law is based on the same general plan under which the banking and currency system, recently enacted by Congress, is operating with such wonderful success. As the banking and currency act provides for a system to aid the business, industrial, commercial, and manufacturing needs of the country, it is believed that the same kind of a system put in operation to meet the requirements of agriculture will accomplish a like result. The Federal reserve act has proved a phenomenal success. The best authorities admit that without this law we would now be in the throes of the greatest panic ever known in this country. It is believed that the rural-credits act will prove a like success. The banking and currency law provides for a central board, known as the Federal Reserve Board, at Washington, and divides the United States into 12 districts and establishes a Federal reserve bank in each district. The rural-credits act provides for the establishment of a Federal farm-loan board of five members at Washington—four members and the Secretary of the Treasury—divides the country into 12 districts, and establishes a Federal farm-loan bank in each district. Each system is backed by the Government and they are very similar.

METHODS OF ORGANIZATION.

The Federal farm-loan board consists of five members, four to be appointed by the President with the consent of the Senate, and the Secretary of the Treasury as an ex officio member. The members of this board can not be officers or directors or own any interest in any other kind of banking business. A loan registrar is appointed by this board in each of the land-bank districts, and it also appoints such appraisers and examiners in each district as may be required. All of these, with the exception of the appraisers, are Government officials and their salaries and expenses are paid by the Government. This board organizes and charters the Federal land banks, and has general supervision and control of the entire system.

FEDERAL LAND BANK.

The United States is divided into 12 districts, and a bank with not less than $750,000 capital stock is established in each of these districts. In the beginning these banks are to be managed by five temporary directors selected by the Federal farm-loan board; afterwards, in a general way, as the directors in the Federal Reserve System are selected. Anyone may subscribe to the capital stock of these Federal land banks, but if it is not subscribed within 30 days, then the United States Government will purchase it. The Government will not share in the profits. The stockholders of the land banks, who are the borrowers themselves, share in the profits.

NATIONAL FARM-LOAN ASSOCIATIONS.

The act provides for the formation of national farm-loan associations. These associations are formed by 10 or more borrowers, who associate themselves under the act as a corporation, and they select a secretary-treasurer, a president, vice president, five directors, and loan committee. Before a farmer can secure a loan he must become a member of one of these farm-loan associations. The secretary-treasurer is the business manager of the association, and is the only officer of the local organization who shall receive a salary. When the application for a charter is forwarded to the Federal land bank, an appraiser is sent to the locality to appraise the lands included in the application, when, if found eligible for loans, the charter will be granted. The purpose of the association is to solicit loans, pass upon the character of the borrower, and give a final estimate of the value of the lands proposed for security.

HOW LOANS ARE OBTAINED.

Assuming that a loan association has been organized in your neighborhood, the method of securing a loan will be as follows: The borrower would make an application to the association for membership and for a loan. The directors of the association would first vote upon his application for membership. If his application for membership be accepted, then a committee of three members of the association would appraise or place an estimate upon the value of the land offered for security and make a written report to the association. The secretary-treasurer of the association would forward the application for the loan and the report of the loan committee, together with the description of the land and abstract of title, to the land bank. This report being favorable, the bank will lend the applicant not exceeding 50 per cent of the value of his land and 20 per cent of the insurable value of his buildings and improvements for a period of not less than 5 nor more than 40 years. The borrower would send his mortgage through his association to the land bank, and the land bank would send the money to the borrower through the secretary-treasurer of the association. Subsequent payments of both interest and principal would be made by the borrower to the secretary-treasurer of his local association. Thus the borrower will deal directly and entirely with his local association, whose members are composed of his own neighbors, located in his immediate locality. It is left with the borrower to determine the period for which the loan is granted. However, the rate of interest is determined by the farm-loan board.

HOW THE RATE OF INTEREST IS FIXED.

The land bank has power to borrow money through the sale of bonds, which are issued free from taxation and are as well secured as United States Government bonds. It is believed that there will be found a ready market for these bonds at a 4 per cent interest rate. In order that this low rate of interest may reach the farmer borrowers, the land bank will be compelled to loan to borrowers at a rate not exceeding 1 per cent above that at which these bonds are issued. Furthermore, the farm-loan board is authorized to reduce this margin below 1 per cent if an economical administration of the system will permit such a reduction. Thus, every effort has been made to enable land banks to borrow money at the lowest possible rate, and then compel these banks to loan money to the farmers at a rate only slightly above the rate which the bank itself is required to pay. In no case can the interest exceed 6 per cent. In this manner farmers can borrow money without leaving their own neighborhood and transact all business incident to securing a loan with officers of the association, who are neighbors.

IMPORTANCE OF LOW INTEREST RATES.

It might be well to add a word here as to the importance of lower interest rates. Too great importance can not be attached to a reduction in the interest rates which the farmers of our country are now compelled to pay. Mr. Taft, while President, made a statement to the effect that the farmers of the United States owed a mortgage debt of over $6,000,000,000, upon which they are paying an annual rate of interest, including commissions and renewal fees, of 8½ per cent. Assuming this estimate to be correct, there is an annual charge resting upon the Nation's agriculture from this source alone of more than $500,000,000. Various other estimates have been made from time to time. There are no reliable official records which give the entire mortgage indebtedness of the farmers of our country. Neither is it possible to determine with any degree of certainty the average rate of interest.

HOW THE ACT WLL AFFECT GEORGIA.

According to the 1910 census, there were 291,027 farms in Georgia, of which 98,628 were operated by owners or part owners, and of this latter number 18,257 farms were mortgaged at a value of $12,600,000. This indicates an exceedingly small percentage of them in comparison with those mortgaged in many other States. The average rate of interest paid on these mortgages was 8½ per cent, exclusive of commissions, and the total amount paid by these farmers in interest on their mortgaged farms was $1,071,000. Should these mortgages be transferred to the Federal system on a basis of 6 per cent, the farmers of our State who now have their farms mortgaged will be saved $315,000 in interest annually. If they get a 5 per cent rate,

which we hope will be possible, $441,000 will be saved annually. While these figures—which necessarily can not be absolutely accurate—indicate that the proportion of farms mortgaged in Georgia is comparatively small, it does not necessarily follow that this indicates a good condition. The proportion of farms mortgaged in 1910 was higher in Iowa and Wisconsin than in any other State, and yet those two States are among the most prosperous in the country from an agricultural standpoint and the value of farm land there is probably greater than in any other State in the Union and the interest rate cheaper.

RESTRICTIONS ON LOANS.

Loans may be made only for the purpose of purchasing land for agricultural uses, or for the purpose of providing equipment and live stock necessary for farming, or to improve farm buildings, or for improvement on farm lands, or to liquidate the indebtedness of owners of land already mortgaged. Loans may be made only upon duly recorded first mortgages on farm lands and improvements. These loans are made for 50 per cent of the value of the land and 20 per cent of the value of improvements. A loan can only be made to those who are engaged in the cultivation of the farm to be mortgaged or shortly to become so engaged. However, there is an exception made whereby any farmer may mortgage his land to secure money to pay off his debts which he actually owes at the time this law goes into effect. The amount of any one loan shall not exceed $10,000. Borrowers are required to state in their applications for what purpose the money is borrowed.

GOVERNMENT AID.

In establishing any cooperative business enterprise the greatest difficulty is to secure the initial capital, and, on account of the fact that all of the shareholders are borrowers, this difficulty is emphasized in this situation. Under this act a corporation is organized in which every stockholder seeks to secure a loan without advancing any capital with which to found or organize it. To overcome this difficulty the United States Government is required to advance $750,000 to each one of the 12 banks, making a total of $9,000,000 advanced to the entire system in the United States. While this money will be repaid to the Government ultimately, no interest or dividends are paid for the use of it. The system is thereby founded with sufficient cash capital and at the same time no burden of interest or dividend charges is imposed.

This $750,000 advanced to each land bank is not intended to form any part of the permanent capital of that bank, but is a revolving fund to be loaned to the farmer. Should it become necessary, the Secretary of the Treasury is authorized to deposit as much as $500,000 in any Federal land bank at any time, so that it may not be hampered in its operations. It will thus be observed that every precaution is taken to make the system a success.

HOW STOCK IS ISSUED AND DIVIDENDS PAID TO SHAREHOLDERS.

In order to make the organization truly cooperative, every borrower is required to hold stock in proportion to his loan; that if one person borrows $2,000 and his neighbor borrows $1,000, the former should hold twice as much stock as the latter. With his application for a loan each borrower agrees to subscribe to the stock of the local association to the amount of 5 per cent of his loan. The local association forwards its member's application for the loan to the district land bank and agrees to subscribe a like amount to the stock of the land bank. Thus when a $1,000 loan is granted to Mr. A the land bank retains out of the face of the loan the amount of the stock subscribed, which is $50, issues the local association $50 in par value of stock in the land bank, and transmits $950 in current funds. The local association then issues to Mr. A $50 of stock in the association and turns over to him the $950 cash received from the land bank. The association must pay Mr. A dividends on the $50 of stock issued to him, and in turn receives dividends on the $50 of stock which it holds in the land bank. The land bank has issued bonds to the amount of $1,000, which it has sold to the public. It pays interest to its bondholders on this amount and receives interest from Mr. A on the face of his mortgage, which is $1,000. The land bank also has $50 in cash, which it deducted from the face of the loan to pay for the stock issued to the local association when it received Mr. A's application. This sum of $50 is invested, and its income helps to pay the dividends on the corresponding shares of stock. When Mr. A's debt is paid in full, the land bank cancels the stock of $50 held by the association, paying the association its par value; likewise the association cancels its stock issued to Mr. A and pays him the $50 par value. Mr. A is no longer a borrower in the system; he is no longer a stockholder. He does not now help to create any business for the system, and he is not entitled to share longer in its dividend distributions. This illustrates that the system is purely mutual and cooperative, that it is owned solely by the borrowers, and that every cent of its earnings which are distributed as dividends are paid directly to the borrowers in proportion that their loans bear to the total amount of loans made by the land bank.

JOINT-STOCK COMPANIES.

There is a provision in the bill which authorizes the organization of joint-stock companies for the purpose of making loans on farms. These banks are not permitted to make loans except to farm borrowers. The Government contributes no money to the joint-stock banks and purchases no stock in them. Joint-stock land banks are organized and financed by persons seeking the stock of the bank as an investment. The capital stock must be at least $250,000 paid in cash capital before a charter is granted. The joint-stock bank is authorized to issue bonds on land mortgage in the same manner as the Federal land banks. The interest rate charged by the joint-stock bank shall not exceed 6 per cent. The interest charged shall not exceed 1 per cent over the amount of interest for which the bonds are sold. If the bonds sell for 4 per cent the interest charged shall be 5 per cent, and so on. The material difference between the joint-stock banks and the Federal land banks consists in the fact that the Federal land banks are operated by the Government, and the borrowing farmer gets the profits, while in the joint-stock banks the borrower does not share in the profits, and all dividends are paid to the shareholders who invested their money in the joint-stock bank. No stock is issued to the borrower in the joint-stock bank.

HOW SHARE CROPPERS AND RENTERS WILL BE BENEFITED.

I believe that this act will prove the greatest impetus ever given agriculture in this country, inasmuch as it will encourage those who now rent their farms to save and become farmers in their own right, and will cause a great number of men now engaged in other businesses that are less profitable to become farmers, and will make it possible for all farmers to obtain necessary finances.

Under this new law the man who now rents his farm may purchase one in two ways: He may either save up 50 per cent of the cost of his farm, and then mortgage it under the bill on long time and use the money in paying for the land, or he may be able to get the owner of the land to let him have the title, and mortgage it for 50 per cent of its value, and turn this over as his first payment, then execute a second mortgage to the landowner for the remainder of the purchase money, and then work it out instead of paying rent.

REPAYMENT—AMORTIZATION—PLAN.

The term "amortization" means a method of paying a debt in such a way as to extinguish both principal and interest at the close of a given period. Under this plan the annual payments are all of the same amount, and the last payment liquidates the debt in full. The regular payment is larger than the interest charges on the principal borrowed, so that each payment discharges a part of the debt. To illustrate, if a man borrows $1,000 at 5 per cent interest, the annual interest charge will be $50. If the borrower pays only $50 per year, he can never reduce the original amount of the loan; he will always owe $1,000. Under the amortization plan, if he will pay $80.24 per year, $30.24 more than the yearly interest charge, he will pay his debt in full at the end of 20 years. In this manner the loan of $1,000 has actually been paid off with $604.80 if you compute simple interest at the rate of 5 per cent. Therefore a farmer may borrow $1,000—or more on the same scale of repayment—on an unrecallable contract for 20 years at a rate of interest a little above 3 per cent. As this is the simple-interest rate, he will actually receive under this law, if he will agree to make an annual payment of $80.24 per year. A simple computation proves the correctness of this result. Twenty payments of $80.24 each would amount to $1,604.80. This sum pays both principal and interest. Deduct the principal—$1,000; it leaves $604.80, which has been paid for interest in 20 years. This is an average of $30.24 per year, or an average rate of 3.02 per cent, which is slightly more than 3 per cent. This result is really accomplished by the yearly reduction, which is made in the principal, and by constantly decreasing the annual interest charge. The rate given—3.02 per cent—represents, however, the average rate of interest paid during the entire period if computation be made on the original principal of $1,000, which is the usual method of borrowing money. It will, therefore, be seen that this plan is best adapted to long-time contracts.

Under this bill the borrower can choose the length of time he wishes his debt to run, provided the period is not less than 5 nor more than 40 years. The rate of interest will be the same, whether he chooses a long or a short period of repayment, but

the annual installment will vary. The annual payment will be larger for a short period than for a longer one on the same size loan at the same rate of interest. Therefore if a man borrows $1,000 at 5 per cent interest, and agrees to pay the debt in 20 years, and his neighbor borrows a like amount at the same rate of interest and agrees to pay his debt in 36 years, their annual payments would be different. The man who chose 20 years would be required to pay $80.24 per year, whereas the one who made his loan for 36 years would pay annually $60.43. This plan will be understood by an examination of the following table showing the repayment of a loan of $1,000 in 20 years at 5 per cent.

Annual periods.	Total annual payment.	Interest at 5 per cent.	Paid on principal.	Amount of principal still unpaid.
1	$80.24	$50.00	$30.24	$969.76
2	80.24	48.48	31.75	938.00
3	80.24	46.90	33.34	904.67
4	80.24	45.23	35.01	869.66
5	80.24	43.48	36.76	832.90

14	68.39	50.50	17.89	823.89
15	68.39	49.43	18.96	804.93
16	68.39	48.29	20.10	784.83
17	68.39	47.08	21.31	763.52
18	68.39	45.81	22.58	740.94
19	68.39	44.45	23.94	717.00
20	68.39	43.02	25.37	691.63
21	68.39	41.49	26.90	664.73
22	68.39	39.88	28.51	636.22
23	68.39	38.17	30.22	606.00
24	68.39	36.36	32.03	573.97
25	68.39	34.43	33.96	540.01
26	68.39	32.40	35.99	504.02
27	68.39	30.24	38.15	465.87
28	68.39	27.94	40.45	425.42
29	68.39	25.52	42.87	382.55
30	68.39	22.95	45.44	337.01
31	68.39	20.22	48.17	288.84
32	68.39	17.33	51.06	237.78
33	68.39	15.26	53.13	184.65
34	68.39	11.07	57.32	127.33
35	68.39	7.63	60.76	66.57
36	70.56	3.99	66.57	.....
Total	2,464.21	1,464.21	1,000.00	.....

An examination of this table will show that if a farmer borrows $1,000 for 36 years at 6 per cent interest, by the payment of $68.39 per year all the debt and interest is fully paid at the end of that period.

The law will permit loans to run for at least 40 years. I urge borrowers to accept a reasonably long period of repayment. The curse of farm-mortgage debt under present conditions has been the pressure to repay within a short period. It has entailed hardships on the family. It has robbed the children of an education. It has prevented the taking of short vacations and trips of travel, made debt an oppressor, and has given a mortgage a destructive influence over the destinies of the family of the debtor. Yet under former conditions these influences could not be avoided. This law does away with these evils. It provides a mortgage contract that can not be recalled. No foreclosure can take place, except for failure on the part of the debtor to fulfil the conditions of his contract. No renewal charges or commissions can be demanded. Every payment reduces the principal of your debt and you have the assurance of knowing that if your regular annual payments are made your debt will be discharged at the end of the contract period without any additional payments on your part. Should a borrower desire to make heavier payments at any time, he may do so and thus shorten the period of his contract. He can pay off his entire debt at any time he may wish to do so. Therefore, he does not lose any freedom by making a long-time contract; he is only insuring himself against pressure to pay out large amounts and thereby deprive himself and family.

No doubt Congress will amend this law from time to time as the needs of the farmers are shown. I trust it will not be long before we can add to this legislation and give to the farmers who do not own land a credit system that will enable them to easily purchase a home and finance their crops without paying the exorbitant rates of interest under the present system. [Applause.]

LEAVE OF ABSENCE.

By unanimous consent, Mr. BAILEY was granted leave of absence for one week, on account of important business.

Mr. MANN. Mr. Speaker, I give notice now I shall object to everything except the regular business. I ask for the regular order.

EXTENSION OF REMARKS.

Mr. BORLAND. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Missouri rise?

Mr. BORLAND. To ask unanimous consent that I may extend my remarks in the RECORD on the conference report on the river and harbor bill.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend his remarks on the conference report on the river and harbor bill. Is there objection? [After a pause.] The Chair hears none.

GENERAL DAM BILL.

The SPEAKER. The House automatically resolves itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3331, and the gentleman from Kentucky [Mr. JOHNSON] will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3331, with Mr. JOHNSON of Kentucky in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of the bill the title of which the Clerk will report.

The Clerk read as follows:

An act (S. 3331) to amend an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906, as amended by the act approved June 23, 1910, and to provide for the improvement and development of waterways for the uses of interstate and foreign commerce.

The CHAIRMAN. When the committee rose section 10 had been passed over for the purpose——

Mr. ADAMSON. It went to the heel of the bill, though, Mr. Chairman. We had finished section 11.

The CHAIRMAN. The Clerk will report section 12.

The Clerk read as follows:

SEC. 12. That where, in the judgment of the Secretary of War, the public interest requires or justifies the execution by any grantee of contracts for the sale and delivery of water power or electrical energy for periods extending beyond the life of the grant, but for not more than 20 years thereafter, such contracts may be entered into upon the approval of the said Secretary, and thereafter, in the event of the exercise by the United States of the option to take over the plant in the manner provided in either section 10 or 11 hereof, the United States or its new grantee shall assume and fulfill all such contracts.

Mr. SMITH of Minnesota. Mr. Chairman, I move to strike out the last word. I wish to ask the chairman of the committee why it is that this power is left to the Secretary of War alone, and why not use the words he has been using, which would permit anybody hereafter constituted to execute that same power, instead of confining it to the Secretary of War alone?

Mr. ADAMSON. I do not understand the gentleman's question.

Mr. SMITH of Minnesota. In section 12 it is provided—

That where, in the judgment of the Secretary of War, the public interest requires or justifies the execution by any grantee of contract for the sale and delivery of water power—

The Secretary may permit the grantee to execute contracts for the delivery of the power beyond the life of the grant.

Now, why does the gentleman not use the term that the Secretary or any other body that may be hereafter constituted having jurisdiction over it?

Mr. ADAMSON. Well, the scheme of this bill gives jurisdiction to the Secretary of War of all this——

Mr. SMITH of Minnesota. Yes; but in certain sections you provide that the Secretary of War or such other body as may hereafter be constituted may have the power to do certain things.

Mr. ADAMSON. I do not remember that.

Mr. SMITH of Minnesota. There are certain sections of the bill that contain this language, namely, "to such body or such body as may be authorized by Federal statute."

Mr. ADAMSON. Regulation of rates? It means Congress might hereafter change that and Congress might hereafter change this.

Mr. SMITH of Minnesota. But if it is well to use it in the one case, why do you not use it in the other? That is the question.

Mr. ADAMSON. Well, the matter was not presented to me at all. I do not think it is necessary. Congress can change it at any time in the future it desires.

Mr. CULLOP. Will the gentleman permit?

Mr. SMITH of Minnesota. Certainly.

Mr. CULLOP. In section 5, page 28, it prescribes that the charges may be fixed by the Secretary of War. Then, in section 7, in regard to certain things, it uses the term "the Secretary of War and the Chief of Engineers." If you will notice section 7 you will find there the words "Chief of Engineers" are joined with the words "Secretary of War."

Mr. SMITH of Minnesota. I understand that.

Mr. CULLOP. But in section 5 all of the charges are to be fixed or regulated by the Secretary of War. Consequently it was used here with the thought that he was the one who was the proper person to pass upon the transfer of contract or any other business that these men might have with the Government.

Mr. SMITH of Minnesota. Suppose a commission was created hereafter?

Mr. CULLOP. Then the law would have to be changed so that it would harmonize with whatever subsequent law might be enacted on the subject.

Mr. ADAMSON. That is right.

Mr. ESCH. In line 21 you use the language that "the contract shall not extend for more than 20 years after the termination of the grant." Now, in the western mountain countries no doubt many of these powers will be used in irrigating lands, and the man who owns land and depends upon a water supply should not be limited to a 20-year contract. He wants it in perpetuity.

Mr. ADAMSON. I will say to the gentleman that this is taken from the western bill that passed the House.

Mr. ESCH. I realize that.

Mr. ADAMSON. And the committee adopted this language in order to accommodate ourselves to their idea.

Mr. ESCH. I understand that; but that does not explain the situation as to why there should be a limitation where a man wishes to use it for the irrigation of his land. He wants a grant in perpetuity.

Mr. STAFFORD. Will my colleague yield?

Mr. ESCH. Yes.

Mr. STAFFORD. This presupposes a grant of not only 20 years but of 50 years, the original life of the grant. The 20 years is beyond that—70 years in all. If the gentleman will permit further, this provision, as I recall, was incorporated in the public lands water-power bill, so that in case a lease of power should expire, say, 10 years prior to the 50-year expiration of the lease, a new lease could be entered into 10 years prior to the expiration of the original lease; that would extend those leases not more than 20 years beyond the original term.

Mr. ADAMSON. I will say that the purpose in both cases is to take care of the users of the water until there can be a renewal of the grant. That is the purpose of both bills.

Mr. STAFFORD. I agree with the gentleman, but it will run for more than 70 years when you consider the time when it may be initiated.

Mr. ADAMSON. The grant was 50 years, and the Secretary of War permits this extension of 20 years, and during that 20 years certainly a new provision will be made to take care of it.

The Clerk read as follows:

SEC. 13. That the persons constructing, maintaining, or operating any dam or appurtenant or accessory works in accordance with the provisions of this act shall be liable for any damage that may be inflicted thereby upon private property, either by overflow or otherwise, and the United States shall in no event be liable therefor. The promotion of navigation for the benefit of interstate commerce being the paramount purpose and consideration for this legislation and the improvement contemplated therein, any grantee hereunder failing to secure necessary property rights, easements, and agreements by contract may acquire all such rights, either to use or damage any dam sites, lock sites, lands, or property of others necessary to the construction, maintenance, or operation of any such dam or diversion structure or of the works appurtenant or accessory thereto by the exercise of the right of eminent domain by condemnation proceedings in the district court of the United States for the district in which such land or other property may be located, or in the State courts. The practice and procedure in any action or proceeding brought for that purpose in the district court of the United States shall conform as nearly as may be with the practice and procedure in similar actions or proceedings in the courts of the State where the property is situated.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word, for the purpose of obtaining information.

I assume if a person has prior rights on a technically navigable stream in the use of a water power, if there is an application made to the Secretary of War for the development of a more extensive proposition, it rests with the Secretary of War to determine whether he should be vested with the right to grant to this grantee the power to condemn the prior rights of some other owner of a similar dam site upstream.

Mr. ADAMSON. I think that would depend on whether it was in use or designed to be put in use. The proposition is to reach those dam sites that have been acquired by holders who held them unimproved to prevent competition. We want to reach them and improve them.

Mr. STAFFORD. And the power of exercising the right of eminent domain virtually rests with the Secretary of War in authorizing him to approve the project?

Mr. ADAMSON. No; I think not. I do not think he has anything to do with that. He approves the project and then the movant takes the risk. I do not apprehend that any movant or litigant in any court would concede any site where the owner would improve the site just as well.

Mr. STAFFORD. If the grantee, with the approval of the Secretary of War, had the privilege to go ahead with the improvement of this initial dam site, why, then, under the reading of this section he would have the right to proceed by eminent domain to condemn another prior dam site.

Mr. ADAMSON. There is no such power conferred by the approval of the Secretary of War. The Secretary of War simply approves those plans for the benefit of navigation, but the burden is on the applicant himself to take care of the property.

Mr. CULLOP. Mr. Chairman, this section does not apply so much to taking over other interests as to taking the necessary property to complete any site already begun. Some man may have land which he is unwilling to sell, but which is needed for the development of the property, and this gives the right to condemn in that event. But if a property has once been dedicated to a public purpose you can not dedicate it to another public purpose until the first is entirely abrogated. That is the well-settled law.

Mr. STAFFORD. I direct the gentleman's attention to this phraseology in lines 14, 15, and 16:

May acquire all such rights, either to use or damage any dam sites, lock sites, lands, or property of others necessary to the construction, maintenance, or operation of any such dam or diversion structure or of the works appurtenant or accessory thereto by the exercise of the right of eminent domain by condemnation proceedings.

Mr. ADAMSON. That has no reference whatever to the approval of the Secretary of War.

Mr. STAFFORD. No; but it does refer to the power of the grantee, after he once has the right, to go ahead with the condemnation proceedings of other dam sites.

Mr. CULLOP. Oh, no.

Mr. STAFFORD. Or other dam sites now in existence. What does the language refer to, then?

Mr. CULLOP. It gives the right, where some site has already been provided or secured, that in the event of the establishment of the property under consideration, which may injure that, the rights of the parties are preserved by this section of the statute, and not otherwise.

Mr. ADAMSON. Mr. Chairman, under this provision he gets the right to build a dam in a navigable stream from the Secretary of War. If he fails by his lawsuit to get his property, he does not build the dam. That is all there is to it.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 14. That in case of the development, generation, transmission, or use of power or energy under an approval given under this act, including leases under section 19 hereof, wholly within a State which has not provided a commission or other authority having adequate power to regulate rate, charges, and service to the consumers of electrical energy and the issuance of stock and bonds by public-utility corporations engaged in power development, transmission, and distribution, the control of rates, service, and charges to consumers and stock and bond issues shall be vested in the Secretary of War, or committed to such body as may be authorized by Federal statutes until such time as the State shall provide a commission or other authority for such adequate regulation and control: *Provided*, That the control of the Secretary of War or other Federal authority shall cease and determine as to each specific matter of control described in this section so soon as the State shall have provided a commission or other authority for the regulation and control of that specific matter.

Mr. ESCH. Mr. Chairman, I offer an amendment, to add a letter "s" to the word "rate" in line 9. I think it is a typographical omission.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin [Mr. ESCH].

The Clerk read as follows:

Amend, page 35, line 9, by striking out the word "rate" and inserting the word "rates."

Mr. ADAMSON. That is right.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ESCH. Mr. Chairman, I offer another amendment. In line 22, before the word "regulation" insert the word "adequate."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin.

The Clerk read as follows:

Amend, page 35, line 22, by inserting before the word "regulation" the word "adequate."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SMITH of Minnesota. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Minnesota moves to strike out the last word.

Mr. SMITH of Minnesota. This is the section that has to do with the regulation of rates and service, as well as the issuance of stocks and bonds; and I find in this section the language that I called the gentleman's attention to a few moments ago, on line 12, which reads as follows:

The control of rates, service, and charges to consumers and stock and bond issues shall be vested in the Secretary of War, or committed to such body as may be authorized by Federal statute until such time as the State shall provide a commission or other authority for such adequate regulation and control.

Mr. ADAMSON. That language, Mr. Chairman, is in two places. It is not only in this section, but in section 4, where provision is made for the regulation of interstate projects. But that does not render it not necessary that it should be included at the other place, as the gentleman has suggested, because, as was stated by the gentleman from Indiana [Mr. CULLOP] so pertinently, whenever a different arrangement is made by law in that same enactment you can provide just these functions. You can provide just as this is, if necessary. You do not know what it will be that you want to do.

Mr. SMITH of Minnesota. Why not insert it here?

Mr. ADAMSON. There has always been some difference as to who or what authority should regulate these rates. Some people insisted on the Interstate Commerce Commission doing it. So, as a palliation and a compromise, we provided that it may be the Secretary of War or such other authority as might be provided by law.

Now, as to the other section that the gentleman from Minnesota talks about, we thought the Secretary of War could manage that at present; but if it is found that a different arrangement is necessary, "sufficient unto the day is the evil thereof," and we can provide the other authority and cover the whole subject at once.

Mr. SMITH of Minnesota. And this language that I refer to, "or committed to such body as may be authorized by Federal statute," is meaningless in this section, and the section will be just as good without it.

Mr. ADAMSON. The gentleman will notice that I did not write it. I took it from the Ferris bill, which was passed after full debate and solemnly adopted.

Mr. SMITH of Minnesota. I understand that this bill is made up of several other bills, and it does occur to me that in going over it, for that reason, we should be careful, because it has not that connected thought that we would get when a man sits down and writes a bill from beginning to end.

Mr. ADAMSON. This bill is a composite bill, Mr. Chairman. It is made up of a hundred opposite views and different ideas, and it is impossible on that account to make it as coherent and uniform as if a single mind had written it. What we want to do is to get through a bill on which we can secure an agreement.

Mr. CULLOP. Mr. Chairman, if the gentleman will permit, this now vests that regulation in the Secretary of War. Another body may be created for that regulation hereafter and then transfer the authority now vested in the Secretary of War to such a body as may hereafter be created. If the State has a commission for the purpose of regulating this rate, then the power of regulation is vested in the State commission which is clothed with that authority.

Mr. SMITH of Minnesota. But your reference to the referring of this "to such other body as may be authorized by Federal statute" has no meaning or purpose in this act.

Mr. ADAMSON. It means just that Congress may constitute another authority.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. SMITH of Minnesota. Mr. Chairman, I ask for an extension of five minutes. My time has been taken up by interruptions.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. CULLOP. It has no office just now. But here is what might be termed a charter of these institutions. Provision is now made, but that power may hereafter be constituted otherwise; it may be transferred to some other body, and then by the charter itself it is lodged in such body as may be subsequently created.

Mr. SMITH of Minnesota. But you could do the same thing with every other feature of the bill, where we are investing the Secretary of War with authority to do a certain thing. You do not need to use this language here any more than in any other portion of the bill.

Mr. CULLOP. As to that, I am not prepared to say that it should not be used in order to make it clear wherever it may be necessary.

Mr. SMITH of Minnesota. It has no purpose or effect here at this time.

Mr. CULLOP. No.

Mr. ADAMSON. Mr. Chairman, if the gentleman will yield, the language here and in section 12 has been solemnly approved by the House in the last few months.

Mr. SMITH of Minnesota. I am not criticizing it. I am simply calling attention to the use of certain language in this bill.

Mr. ADAMSON. It is for a different purpose entirely. The two cases to regulate rights constitute one case, while section 12, to which the gentleman alluded, passes upon the question of whether a man ought to have a chance to get a new lease. It is quite a different proposition, and I can not say that the House did not act wisely in adopting the language of the other bill.

Mr. SMITH of Minnesota. What is the number of the section having reference to the regulation of rates—the general section?

Mr. ADAMSON. It is at the beginning of section 4, and that same language is there contained.

Mr. SMITH of Minnesota. I call the attention of the chairman of the committee to this fact: Section 4 and section 14 are the sections——

Mr. ADAMSON. Which control rates.

Mr. SMITH of Minnesota. Which regulate rates and the issuance of stocks and bonds.

Mr. ADAMSON. That is correct.

Mr. SMITH of Minnesota. And are the only features of this bill which look to the regulation of rates and service.

Mr. ADAMSON. Those are the two sections.

Mr. SMITH of Minnesota. I will submit to the chairman of this committee that those provisions seem entirely inadequate for the purpose for which they are intended. I ask, What is there in this section that authorizes any individual to call the attention of the Secretary of War to the necessity of regulating rates and service?

Mr. ADAMSON. I do not think you need have any fear about that. When you give the Secretary of War power to adjudicate it, any man who suffers will certainly holler and go to him. There is no doubt about that.

Mr. SMITH of Minnesota. The gentleman's confidence in mankind is great, and I am glad it is.

Mr. ADAMSON. Yes.

Mr. SMITH of Minnesota. But a man may have his own ideas about these things. Congress ought to have some idea as to what it wants when it creates a rate-regulating authority, and the gentleman must admit that this is quite inadequate, when we want to place a law on the statute books that will make it possible for people to take advantage of it. It would be wholly in the discretion of the Secretary of War to write such rules and regulations as he saw fit concerning these rates. We are doing altogether too much of that kind of legislating. We are letting the executive departments of this Government write the laws. When we are considering a proposition as important as the regulation of a highly concentrated business—so highly concentrated that if we are fair with ourselves and the country we will admit that it is a natural monopoly and will have to be so conducted—is it not necessary to enact a law by which it can be adequately regulated. Does the turning of the whole proposition over to a Cabinet officer to do as he sees fit meet the test?

Mr. ADAMSON. Mr. Chairman, I ask unanimous consent for one minute, just to deplore the fact that the gentleman is displeased. Two committees of this House have adopted the language in all these cases. This House has passed every one of them within the last three months. I despair of being able to satisfy the gentleman.

The CHAIRMAN. Without objection the pro forma amendment will be considered as withdrawn.

Mr. CULLOP. Mr. Chairman, I move to strike out the last two words. I am somewhat in sympathy with the gentleman from Minnesota upon this subject. The fact that the House has written two bills in which it has used precisely the same language does not altogether meet this question. If this property is to be developed, a great many people in this country are to be affected by that development, and it is well enough to put all the safeguards into the legislation at the time it is enacted. Now, the people have some rights in this matter, and their rights ought to be carefully safeguarded. The provision of law authorizing regulation by commission is a good law, but if the law leaves it solely to the discretion of the commission the authority may be very grossly abused, and it is at times. I do not know whether there is sufficient provision here to authorize the people to petition for a change of rates after they are once fixed. If not, whenever application is made the grantee will immediately claim that he has made his investment upon the regulation prescribed at the time, and that to change that regulation will disturb his vested rights. If that should be true, then it would simply prevent the public from having changes that might be very necessary and essential to the proper use of these properties. If the gentleman has an amendment that will reach that identical question, which I do not believe is sufficiently covered in this bill, I for one shall be very glad to support it. Now, we all know that Congress has passed laws a good many times which very much resemble laws that were passed by former Congresses; but sometimes when the courts get hold of them they put an entirely different construction upon them from what the law-making body intended, and when they are construed, that construction has a very different effect from what was anticipated when the legislation was passed, and the objects of the legislation defeated. Water power in this country is in its infancy; it has wonderful possibilities; it will, when developed, revolutionize our industrial system, and hence this bill is of tremendous importance.

For this reason the greatest care should be exercised in preparing every provision in this measure. It is well to care for the investor in order that properties may be developed, but it is equally as important that the rights of the public be safeguarded in order that the people may not be oppressed. We owe a duty to them in this matter, a duty of the highest importance, and we should see to it that that duty is well performed. The investor will take care of himself and as a rule is always able to do so; but the consumer is less fortunate, and hence we should proceed with great care in order that advantage in the future may not be taken of him years hence when rights have been surrendered. This is a matter of such vast importance that we should consider it from every angle, and when the work is completed have it done so that great good will result and that hardship shall not be visited upon the consuming public.

This is the time now to incorporate in the measure every necessary provision to make it a workable law, and the safeguarding of all rights of all parties affected by it. If we make now such a law it will save trouble in the future and encourage the developing of systems which will prove of great benefit to the country.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

SEC. 15. That any grantee who shall fail or refuse to comply with the lawful order of the Secretary of War, made in accordance with the provisions of this act, shall be deemed guilty of a misdemeanor and, on conviction thereof, shall be punished by a fine not exceeding $1,000, and every month such grantee shall remain in default shall be deemed a new offense and subject such grantee to additional penalties therefor; and in addition to said penalties the Attorney General may, on the request of the Secretary of War, institute proper proceedings in the district court of the United States in the district in which such structure or any of its accessory works may, in whole or in part, exist, for the purpose of having such violation stopped by injunction, mandamus, or other process; and any such district court shall have jurisdiction over all such proceedings and shall have the power to make and enforce all writs, orders, and decrees necessary to compel the compliance with the requirements of this act and the lawful orders of the Secretary of War and the performance of any condition or stipulation imposed under the provisions of this act; and if the unlawful maintenance and operation are shown to be such as shall require a revocation of all rights and privileges held under authority of this act, the court may decree such revocation. In case of such a decree, the court may wind up the business of such grantee conducted under the rights in question, and may declare such dam and accessory works to be an unreasonable obstruction to navigation and cause their removal at the expense of the grantee owning or controlling the same, or may provide for the sale of the dam and all accessory and appurtenant works constructed under authority of this act for the further development of water power, and may make and enforce such other and further orders and decrees as equity demands; and, in case of such a sale for the further development of water power, the vendee shall take the rights and privileges and shall perform the duties which belonged to the previous grantee, and shall assume such outstanding obligations and liabilities arising out of the maintenance and operation of such dam and accessory works for power purposes as the court may deem equitable in the premises.

Mr. TREADWAY. Mr. Chairman, the passage of this bill is vital to the interests of a large portion of the people residing in the district I have the honor to represent. I thoroughly believe in the principle of cooperation between the Federal Government and private corporations for the development of the great water powers of our country. Conservation should not be defined as destruction and waste. The severity of the present law, being the act of June 21, 1906, as amended by the act approved June 23, 1910, has prevented the proper use of many great water powers and has made conservation a farce. In other words, those powers have been so rigidly conserved that they have not been used at all and are therefore absolute waste.

The bill now under consideration has had the careful study of the Government authorities and one of the leading committees of this House for an extended period, and would appear to open the way for employment of the great water powers and at the same time properly safeguard the interests of the Government.

I have several times spoken on the subject of Connecticut River navigation, and need not discuss it at length at the present time. The construction of a new lock and dam at Enfield, Conn., by private capital, the deeding of these when completed to the United States without cost, the payment of all claims for damages resulting from flowage rights, injury to water power, and from any other source can positively be done with satisfactory financial return upon the private capital invested under the conditions of this bill. The people living above the dam in Springfield, Holyoke, and Chicopee, Mass., will secure a channel 12 feet deep at mean low water, which will result in a large saving in freight rates as well as aiding in relieving the congestion of freight now such a serious detriment in that section.

I hope this bill will become law in the very near future, as I am anxious and eager to have its benefits applied to the problem of transportation in Holyoke, as well as the other places I have named. As soon as it becomes law I shall make strenuous efforts to have its benefits put into practical operation upon the Connecticut River.

I am reliably informed that a corporation stands ready to accept it provisions and build the necessary locks and dams, thereby being enabled to develop 35,000 or 40,000 horsepower, supplying a wide area with electric energy at a minimum of cost to the consumer. An appropriation by the Government of $1,870,000, as recommended in House Document No. 417, Sixty-fourth Congress, first session, will then secure the desired depth of water, 12 feet, from the Sound, through Hartford, to Holyoke, Mass. The people have patiently waited for the consummation of this project. The passage of this bill will hasten in securing for them this great boom to their prosperity and business success.

Mr. SMITH of Minnesota. I move to strike out the last word in line 1, page 36, and the first two words in line 2, of the same page, and to insert before the word "guilty" the word "is."

Mr. ADAMSON. If I understand correctly what the gentleman is driving at, I think he will reach it better by simply striking out the word "deemed" and leave it simply "shall be guilty." A man can not be guilty until he does something in the future.

Mr. SMITH of Minnesota. There seems to be some controversy over it, and I will withdraw the amendment.

The CHAIRMAN. Without objection, the amendment offered by the gentleman from Minnesota will be withdrawn, and the Clerk will read.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. GARNER having taken the chair as Speaker pro tempore, a message, in writing, from the President of the United States was presented by Mr. Sharkey, one of his secretaries, who also informed the House of Representatives that the President had, on July 11, 1916, approved and signed bills and joint resolution of the following titles:

H. R. 7430. An act for the relief of William Foglio;

H. R. 7617. An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes; and

H. J. Res. 257. Joint resolution permitting the use of certain hospital facilities belonging to the United States.

GENERAL DAM BILL.

The committee resumed its session.

The Clerk read as follows:

SEC. 16. That the Secretary of War is hereby authorized to examine books and accounts of grantees and to require them to submit statements, representations, or reports, including information as to capitalization, cost of locks, dams, and other aids to navigation, water rights, lands, easements, and other property acquired, production, use, distribution, and sale of power or energy, all of which statements, representations, or reports so required shall be upon oath, unless otherwise specified, and in such form and upon such blanks as the Secretary of War may require; and any person making any false statement, representation, or report under oath shall be subject to punishment as for perjury.

Mr. RAKER. Mr. Chairman, I should like to ask the gentleman from Georgia [Mr. ADAMSON] a question. In the last proviso—

And any person making any false statement, representation, or report under oath shall be subject to punishment as for perjury—

Does not the gentleman think that a little severe? Should it not have the usual qualifications, "knowingly, willfully," and so forth?

Mr. ADAMSON. I think that is understood. I do not think you can convict a man of telling a lie unless he knows he is telling it.

Mr. RAKER. The gentleman believes that this does not cover that point?

Mr. ADAMSON. My opinion is that unless he does it on purpose he is not guilty.

Mr. RAKER. I withdraw the pro forma amendment.

Mr. SMITH of Minnesota. Mr. Chairman, I move to strike out the last word. Section 16 provides that the Secretary of War may examine the books, and so forth, but he does not provide for what purpose he makes the examination.

Mr. ADAMSON. It is for the purpose of discharging the duties imposed upon him by this bill.

Mr. SMITH of Minnesota. When does he determine that his duty operates, what standard has he to enable him to tell when he is to examine the books and accounts, and for what purpose? Is it for the purpose of fixing rates, or what?

Mr. ADAMSON. There are two things required of him in this bill.

Mr. SMITH of Minnesota. He ought to be required to do it when he does it, and he ought to do it for some purpose.

Mr. ADAMSON. He is required to supervise the capitalization and the rates and practices, and I know of no other purpose.

Mr. SMITH of Minnesota. That is my objection to it, that he is authorized to supervise the issuance of stocks and bonds, and that is ineffective. It amounts to nothing. It is so much language and nothing else. If the grantee was required to secure from the Secretary of War a permit to issue stocks and bonds it would amount to something, but here it is so general in its scope that they could go on and issue all the stocks and bonds they wanted to, and what is the Secretary of War empowered to do? Nothing; he could not prevent them from doing it. They do not commit any misdemeanor by going on and issuing all the stocks and bonds they please. It is simply a phrase thrown into the body of the bill which is meaningless and useless. It clothes the Secretary of War with no power whatever. It is the same with this proposition. He may examine the records in the books, but for what purpose it does not say. Suppose I was the grantee and the Secretary of War should come to my premises and want to examine my books and records, I would want to know for what purpose he was going to examine them.

Mr. ADAMSON. All he would have to do was to explain that section 14 required him to supervise the issuance of stocks and bonds and the rates and practices, and I think the books would be forthcoming.

Mr. NORTON. Mr. Chairman, would the gentleman from Georgia object to inserting the following amendment: After the word "war," in line 15, page 37, insert "for the purpose of fixing rates and for regulating the issuance of stocks and bonds as provided for in this act," so that the section will read:

The Secretary of War, for the purpose of fixing rates and for regulating the issuance of stocks and bonds as provided in this act—

And so forth.

Mr. ADAMSON. That is the undoubted intention of it, and I have no objection.

Mr. COOPER of Wisconsin. Mr. Chairman, I move to strike out the last word. I want to ask the gentleman from North Dakota a question. Are there not other duties required of the Secretary of War than the mere fixing of rates and the issuing of stocks and bonds for which he might want to examine the books. Why not have the amendment read "to enable the Secretary of War to perform the duties required of him under this act"? We ought not to limit it to these two objects, because he has many other duties to perform for which it might be of great advantage to him to examine the books.

Mr. MANN. Will the gentleman from North Dakota yield further?

Mr. NORTON. Yes.

Mr. MANN. What object is there for us to limit the authority of the Secretary of War to call for these reports and examine the books? You give him authority to call for them with a limitation, which limitation may come up in a lawsuit.

Mr. NORTON. The question was raised as to whether he had authority at any time.

Mr. ADAMSON. If I was going to say anything I would say "for the purposes of this act."

Mr. STAFFORD. That is understood, is it not?

Mr. ADAMSON. That is what I thought.

Mr. MANN. If we were trying to make some outside corporation furnish a report, we would have to bring it within our legislative power, but that is not this case. Here is a corporation for which we are granting a franchise, and we can impose in that franchise any condition we please. Why should we put any limitation in at all? It can not hurt these people.

Mr. ADAMSON. I thoroughly agree with the gentleman from Illinois.

Mr. NORTON. Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Without objection, the gentleman from North Dakota withdraws his amendment.

There was no objection.

Mr. RAKER. Mr. Chairman, I offer the following amendment: On page 38, line 1, after the word "person," insert the word "willfully."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 38, line 1, after the word "person," insert the word "willfully."

Mr. ADAMSON. Mr. Chairman, I have no objection to that.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

SEC. 18. That the right to alter, amend, or repeal this act is hereby expressly reserved as to any and all dams which may be authorized in accordance with the provisions of this act. In such case the United States shall incur no liability for the alteration, amendment, or repeal thereof to the owner or owners or any other persons interested in such dam.

Mr. SMITH of Minnesota. Mr. Chairman, I move to strike out the last word for the purpose of making an inquiry of the chairman of the committee. What is the effect of the last paragraph of section 18—

In such case the United States shall incur no liability for the alteration, amendment, or repeal thereof to the owner or owners or any other persons interested in such dam—

if it is not to create that uncertainty and doubt which the chairman of this committee and the committee have tried to avoid, so as to induce capital to invest in this sort of business with some assurance that it will be stable?

Mr. ADAMSON. Mr. Chairman, I will state to the gentleman that it is provided in another part of the bill that these approvals are irrevocable, except for violation of conditions or the use of the Government, or some good cause; and it is believed that no Congress will ever revoke one of them unless it is wise to do so and justified at the time it does it. No one of us believes that Congress will ever confiscate any of these things unless it is proper to do so. If Congress ever deems it wise and justifiable to repeal the act so as to revoke one of these approvals, I dare say, as a good American and patriot, that there will be sufficient cause for it, and that there ought not to be any redress upon the part of the people who have incurred the displeasure of Congress by their wrongdoing. Grantees and capitalists have for a long time demanded that we make absolutely irrevocable these grants for a certain period of time, but that would be an abdication of sovereignty, and I do not believe that Congress will ever abdicate its sovereignty and control over these things. In other words, I believe Congress will always reserve to itself the right to pass on the circumstances in each case and decide whether or not it will revoke.

Mr. SMITH of Minnesota. The gentleman will notice that I am not calling attention to the first paragraph of the section which reserves to the Government the right to amend or repeal the act, but to the second paragraph, which provides:

In such cases the United States shall incur no liability for the alteration, amendment, or repeal thereof to the owner or owners or any other persons interested in such dam.

Mr. ADAMSON. I tried to answer that.

Mr. SMITH of Minnesota. Let me venture the statement that that section, while it appears to be just, will not meet the situation, and I will buy a hat, the best hat that can be purchased for the chairman of this committee if that portion of the section ever goes into a bill written by Congress.

Mr. ADAMSON. I do not know anything about that. I do not gamble. The gentleman may know more about it than I do, but I daresay that Congress will never abrogate one of these things unless it is right to do so. This language simply means it will not owe anything to anybody for doing so.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

SEC. 19. That the Secretary of War be, and he is hereby, authorized to enter into leases for the use of surplus water and water power generated at dams and works constructed wholly or in part by the United States in the interests of navigation, at such rates or on such terms and conditions, and for such periods of time, not to exceed 50 years, and with such provision for the periodical readjustment of rentals, as may seem to him just, equitable, and expedient, subject, however, to the provisions of this act governing the authorization, maintenance, and operation of power plants, and to all regulations governing the use and disposition of the power, so far as the same may be applicable; and all such leases, the parties thereto, and the terms and conditions thereof, shall be reported annually to Congress: *Provided*, That the said Secretary of War, in making such leases, other conditions being equal, shall give preference to the bid solely for municipal use of any municipal corporation or other public corporation not operated for profit.

Mr. SMITH of Minnesota. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment by Mr. SMITH of Minnesota: Amend section 19, page 38, by striking out all after the word "leases," in lines 10, 11, 12, and 13, and inserting in lieu thereof the following: "shall give preference to any municipal corporation or other public corporation not operated for profit."

Mr. SMITH of Minnesota. Mr. Chairman, the amendment which I offer is the amendment that was adopted in the House when the Adamson bill was under consideration during the last session of Congress, and I feel that it is a wise amendment. I feel that the language of the bill as reported does not do what evidently was intended to be done, and that is to give a preference to municipalities and States. Under the language in the bill as reported, a municipality would have to go into the open market and bid against hydroelectric companies, electric monopolies, if you may call them so. This would be equivalent to depriving them of any opportunity to get the power under any condition whatever, because it is well known, that if the municipality is compelled to go into the market and bid for this power, the company can pay any price that it wants to pay, run the price up just as high as it desires in order to get above the municipality, and then tax back on the municipality the excess cost the municipality compelled it to pay. I do not think that the committee wants to have such a feature remain in the bill. It is unjust; it is unfair; it does not mean what it is intended it should mean, which evidently is to give a municipality or a State a preference. There can be no preference where there is competitive bidding. You can not make a preference out of that sort of thing. This being the case I hope the chairman of the committee will adopt my amendment, which is the exact language of the amendment adopted by the House when the Adamson bill was under consideration last year.

Mr. ADAMSON. Mr. Chairman, I can not afford to accept any such amendment. I think the language in this paragraph is fair. The gist of it is taken from the Ferris bill that the House adopted a few months ago, and the distinguishing feature between it and the gentleman's proposition is that it must be "solely for municipal use" in order to give them a preference.

The Secretary of War has the discretion under this language, but the qualification is that to give a city advantage over any other bidder under the same conditions it must be solely for municipal use. The gentleman had the proposition up here at another time and the House voted it down during this session, and of course should vote it down every time it is proposed.

Mr. SMITH of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. ADAMSON. Yes.

Mr. SMITH of Minnesota. The matter I had up I intend to offer in a few moments. This proposition is entirely different from the one that I offered to the river and harbor bill.

Mr. ADAMSON. It is so nearly akin to it that I thought it was the same. It is of the same family and belongs to the same tribe, no doubt.

Mr. SMITH of Minnesota. Under the language of the bill is it the intention of the committee that there shall be a preference and at the same time that the power shall be put up and sold to the highest bidder?

Mr. ADAMSON. The language is express that preference shall be given to municipalities if they want it "solely for municipal purposes." If it is a subterfuge, if they are to use a little and let some trust or monopoly have the balance, the Secretary of War does not give them the preference. That is all there is in it, and it ought to stand as it is.

Mr. SMITH of Minnesota. Will the gentleman yield for another question?

Mr. ADAMSON. I will.

Mr. SMITH of Minnesota. What does the language "to the bid" mean?

Mr. ADAMSON. Well, I suppose it means what it says. The people who want it will make application and state what terms they want and what they are willing to do and pay. That is the common acceptation of the English language.

Mr. SMITH of Minnesota. The one who pays the most shall get it?

Mr. ADAMSON. No; that is not what it says. It says, "other conditions being equal."

Mr. SMITH of Minnesota. "Other conditions being equal"—that is, other conditions will have to be equal, and, besides that, it will have to bid more than anybody else?

Mr. ADAMSON. That is not what it says at all. "Shall give preference to the bid."

Mr. SMITH of Minnesota. Now, that is what the chairman on April 10 said in this House, that that ought to be done.

Mr. RAKER. Will the gentleman yield for a question?

Mr. SMITH of Minnesota. Certainly.

Mr. RAKER. What is the purpose of the gentleman's amendment?

Mr. SMITH of Minnesota. The purpose of my amendment is to make it possible for municipalities and States to get the privilege of using these powers without being compelled to bid against the Hydroelectric Trust. A permit should be granted for a public purpose without competitive bidding, and a fair and equitable price should be exacted for the permit. This is what my amendment aims to do.

Mr. RAKER. Is not that what this bill does?

Mr. SMITH of Minnesota. No, indeed. This bill provides that a municipality can secure one of these water-power Government dams when it pays the highest price and other conditions are equal. I submit that such a proposition does not amount to a preference at all; it is simply a play upon words that have a contrary meaning to that which they should mean.

Mr. ADAMSON. Will the gentleman yield?

Mr. SMITH of Minnesota. Yes.

Mr. ADAMSON. Other cities of these United States need this power, and it is the understood purpose of the gentleman from Minnesota that it is on account of his home cities—and, Mr. Chairman, I protest against altering the benevolent and fair terms in a general bill in order to accommodate any local situation.

Mr. SMITH of Minnesota. Mr. Chairman, the gentleman from Georgia [Mr. ADAMSON] is clearly in error when he attempts to confound my amendment or the section under consideration with any local situation.

The section under consideration authorizes the Secretary of War to enter into leases for the use of power generated at dams constructed wholly or in part by the United States, and the particular language of section 14 under consideration is a proviso that reads as follows:

That the Secretary of War in making such leases, other conditions being equal, shall give preference to the bid solely for municipal use of any municipal corporation or other public corporation not operated for profit.

My amendment changes that proviso so as to read as follows:

That the Secretary of War in making such leases shall give preference to any municipal corporations or other public corporation not operated for profit.

It will readily be seen that the phrases "other conditions being equal" and "to the bid" destroy the effect of a preference which the municipality or State will otherwise have if these phrases were not in the bill.

In order to understand just what the gentleman from Georgia [Mr. ADAMSON] is trying to accomplish by this provision of his bill I call attention to his remarks found on page 5837 of the CONGRESSIONAL RECORD, Sixty-fourth Congress, first session. On this occasion Mr. ADAMSON said:

I have no objection to their taking it—

Meaning the municipality—

if they bid more than anybody else and give better terms to the Government than anybody else. But I want the Government to make the best terms possible.

It is plainly to be seen from the gentleman's previous statement that at this time he is dodging the issue and does not know

what the section of his bill means or is withholding information from the committee.

The CHAIRMAN. The question is on the adoption——

Mr. KING. Mr. Chairman, I move to strike out the word "solely," in the eleventh line.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 39, line 11, strike out the word "solely."

Mr. ADAMSON. The gentleman is amending an amendment.

Mr. STAFFORD. That is to perfect the text.

Mr. KING. This is to the substance of the paragraph.

The CHAIRMAN. The amendment offered by the gentleman from Minnesota was to strike out and insert.

Mr. STAFFORD. The gentleman from Illinois is in order in offering an amendment to perfect the text, and he has the right to perfect the text before the motion of the gentleman from Minnesota is submitted.

Mr. RAKER. Mr. Chairman, may we have the amendment of the gentleman from Minnesota again reported?

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

There was no objection.

The amendment was again reported.

The CHAIRMAN. The Chair is of opinion that the amendment offered by the gentleman from Minnesota has now to be voted upon. The question is on its adoption.

The question was taken, and the amendment was rejected.

Mr. KING. Mr. Chairman, I move to strike out the word "solely" in line 11.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 39, line 11, strike out the word "solely."

Mr. KING. Mr. Chairman, it strikes me I may be wrong, perhaps—the distinguished chairman of the committee can explain—that that would prevent a municipality which was in the business of selling power to its inhabitants in competition with a private corporation from being preferred under this section, would it not?

Mr. ADAMSON. I do not think so. I think the idea is that a city may furnish its own citizens with light and power for municipal use.

Mr. KING. It says "solely for municipal use." Does that mean the use of the inhabitants or the use of the city of electricity for the purpose of lighting its particular buildings?

Mr. ADAMSON. If the city was to furnish its own plant and furnish its citizens, it would be for municipal use.

Mr. KING. Well, I ask for a vote on the amendment.

Mr. McARTHUR. May I ask the chairman a question?

Mr. ADAMSON. Certainly.

Mr. McARTHUR. Does the chairman want this amendment?

Mr. ADAMSON. No, sir.

The CHAIRMAN. The question is on the adoption of the amendment.

The question was taken, and the amendment was rejected.

Mr. SMITH of Minnesota. Mr. Chairman, I send to the Clerk's desk an amendment as a new paragraph.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. SMITH of Minnesota, to be inserted after the word "profit," on page 39, line 13:

"That the Secretary of War be, and is hereby, directed to make and enter into an agreement with the Municipal Electric Co., a public corporation organized and existing under the laws of the State of Minnesota, for the purpose of utilizing the hydroelectric power developed by the surplus waters not needed for navigation by the dam prescribed and provided for in House Document No. 741, Sixty-first Congress, second session, as adopted by Congress in the act entitled 'An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes,' approved June 25, 1910. Such agreement shall provide that for the privileges secured thereby said corporation shall pay to the United States the fair and proportional cost of maintenance of said dam, lands, and appurtenant works, and also pay in addition an annual sum, not less than 3 per cent, upon such amount as the United States shall have invested and expended in the completion of the project by which such water power is developed and maintained over and above the amount actually expended and which would have been expended in completion of the project for navigation only. Such amount shall be determined by the records in the office of the Chief of Engineers, and the said annual payments for rent and maintenance shall be made on or before the 2d day of January of each year; and the rent shall begin with the use of the power commercially by the said Municipal Electric Corporation, and not later than one year after said company has been notified by the Secretary of War that the water is available.

"The right shall be reserved to the United States and included in such contract for the United States to purchase and use such supply of said power as may be required for its own purposes on the same terms and conditions as the said power is sold or distributed to the members of said public corporation of the State of Minnesota."

Mr. ADAMSON. I make the point of order against it, Mr. Chairman.

The CHAIRMAN. The Chair will hear the gentleman on the point of order.

Mr. ADAMSON. It is a local proposition for an entirely different purpose and not germane to this bill at all. You might just as well undertake to provide for the private household of every man in the United States as to put that in for the benefit of those two cities. One is a general law and the other is a special benefit.

Mr. SMITH of Minnesota. It is not a special benefit. It is to carry out an agreement on the part of the Government to do a certain thing or enable the Secretary of War to do it.

The CHAIRMAN. The Chair will hear the gentleman from Minnesota [Mr. SMITH] on the point of order.

Mr. SMITH of Minnesota. Mr. Chairman, it is clearly within the purpose of the bill. The purpose of this bill is to enable us to develop the water-power resources of the country and to dispose of them as we develop them. The amendment which I propose has for its purpose the authorization of the Secretary or War, or it might have been somebody else, to dispose of water power that is in shape to be utilized. The Government has spent in the neighborhood of $2,300,000 on this project, and it should have been utilized some time ago. Now it comes to the point of passing a law that will authorize the Secretary of War to dispose of that power in the way that was contemplated at the time the project was undertaken.

The CHAIRMAN. House resolution 287 is a special rule for the bill S. 3331. The special rule says:

That no matter or provision contained in the bill shall be subject to a point of order, any rule or rules of the House to the contrary notwithstanding.

In the judgment of the Chair this bill then becomes a general legislative one, and the amendment of the gentleman from Minnesota [Mr. SMITH] pertains to the general subject. The Chair therefore overrules the point of order.

The question is on the adoption of the amendment.

Mr. SMITH of Minnesota. Mr. Chairman, I want to be just as brief as I can. This is a special matter that affects only the cities of Minneapolis and St. Paul and the State of Minnesota. But you must remember, gentlemen, that this is not a new proposition. The project was undertaken in 1910, and when it was undertaken the municipalities, the State, and the Federal Government came to an understanding as to what was to be done. The cities offered to build the dam and to donate all the flowage rights if the Government would permit them to use the power.

The Secretary of War, through the Chief of Engineers, reported that such an arrangement would not be satisfactory to the Federal Government for reasons stated, and that the Government should go on and complete the dam, and when completed the Government should offer to lease it to the cities of St. Paul and Minneapolis. I will read what the Secretary of War said at that time, through the Chief of Engineers:

The two cities of St. Paul and Minneapolis are deeply interested in the construction of a high lock and dam, and in addition are naturally the most desirable lessees of any surplus power that may be created thereby. Through assurances of reasonable and proper concessions to them in the matter of leasing such surplus power it is thought to be possible to secure a voluntary donation of the right of flowage over their lands.

* * * * * * *

That instead of inviting the cooperation of and entering into contractural relations with any private or municipal corporation for the execution of the work (a policy which experience has shown to be conducive to friction and misunderstanding and often attended by serious complications), the cost of construction should be borne by the United States alone, so that the control of the water power will be absolute, and it may be used, leased, or otherwise utilized as may be most advantageous to the interests of the Government.

Following that, he said "in making a lease the cities and the State should have reasonable concessions made to them."

Now, it is impossible under the general clause in the bill that is before us for the Secretary of War to make any concessions whatever to those cities. They have done their part. They have donated flowage rights. The State of Minnesota has donated to the Government valuable water-power rights, and now we are asking the Government to fulfill its part of the contract and to permit the Secretary of War to lease this power to the municipalities and the State, for public purposes only, at a reasonable rate of interest, without any competition, that the people of Minneapolis and St. Paul shall have the excess power to use upon paying to the Federal Government a reasonable compensation for the amount the Government has invested in the plant.

In view of the previous understanding, nothing can be fairer. We do not want this for nothing. We simply want the Government to live up to its agreement.

Now, then, what is the opposition to this proposition? In Minnesota there is something like 20 water-power developments

under control and management of one concern. We have more water power than any other State of the Union; that is, separate power sites.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SMITH of Minnesota. Mr. Chairman, I ask unanimous consent to have it extended 10 minutes.

Mr. ADAMSON. I do not like to deny the gentleman anything, but he has debated his bill before in this House and lost on it each time. I shall not object; but at the end of his time I shall ask the committee to vote down the proposition.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SMITH of Minnesota. This is not a personal matter with me. I am simply presenting to you the rights of my constituents in this proposition. You would think it was a personal matter to hear some people talk, but I assure you it is not. There is no personal feeling. You can vote this down just as often as you want to. My conscience is clear. Let me show you the opposition. There is but one concern in my State that has control of every water power in the State except this one. This is the Minneapolis General Electric, which is one of the subsidiary companies of the great Water Power Trust.

In connection with the high dam the management of the Minneapolis General Electric Co. has this to say:

The management of the Minneapolis Co. believe that they should be protected from competition so long as they serve the public fairly and so long as the rates charged are as low as those that could be fairly made by any other company operating on legitimate lines. The management believe that no water powers that would be serviceable in Minneapolis or St. Paul can be developed at a lower unit cost than those it controls, and none would have better operating conditions when built.

Mind you, it does not say, "None would serve the public cheaper," but "None could have better operating conditions when built." The letter proceeds:

Consequently the management believes that it is only fair and just that before a Federal permit be granted to other private interests to construct dams those interests should be required to demonstrate that when their proposed developments are completed they will be in a position to generate, distribute, and sell current at a lower figure than the existing companies can and are doing. We believe that in every case where a Federal license is requested and the power is to be used for public-service purposes a thorough examination should be made of the property by competent Government engineers, and no permit should be granted unless it can be shown that there is a market for the power that can not be provided for as well and as cheaply by the existing companies.

This letter was written by Frederick P. Royce, vice president of the Minneapolis General Electric Co., to Hon. Frederick C. Stevens, then a Member of Congress, on November 17, 1910, and contains the first suggestion of what is known as section 14 in the Adamson bill of last year, and what is known as section 19 of the Adamson bill of this year, and what is known as section 10 in the Shields bill of this year. It was the Royce letter that furnished the inspiration for these sections.

Now, gentlemen, if you feel that these municipalities should be deprived of the opportunity of getting this water power under these circumstances, I have nothing to say.

But let me say another word: The method that you are now pursuing is the only way that the Minneapolis General Electric Co. or any other company could get control of the water power at Minneapolis and the flowage rights. Let me read to you what the Board of Engineers said on this point:

If the high dam is not built as an aid to navigation, it is presumed to be impossible for the United States to condemn the additional land that will be needed for flowage purposes.

Now, then, the Board of Engineers that reported on this proposition clearly set forth that unless you could induce the cities of Minneapolis and St. Paul to part with their flowage rights you could not condemn the property because they had previously found the high dam was not necessary for navigation purposes. The plan that is now being pursued in this legislation was then devised by parties interested in seeing the General Electric Co. secure this power from the Federal Government, and it has been persistently followed ever since that time.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Minnesota [Mr. SMITH].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. SMITH of Minnesota. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 23, noes 30.

So the amendment was rejected.

Mr. RAKER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from California moves to strike out the last word.

Mr. RAKER. Mr. Chairman, the bill H. R. 408, reported by the House Committee on Public Lands, was a bill that received a great deal of attention last year and this year. Being a member of that committee, I am in a position to know that the committee gave very careful attention and painstaking consideration to the bill after long and exhaustive hearings.

The pending bill now under consideration, S. 3331, as amended by the House Committee on Interstate and Foreign Commerce, is something similar to the bill that was passed last year. The Committee on Interstate and Foreign Commerce has had hearings and full consideration of the provisions of this bill, and the Committee on Public Lands—and I say it to the credit of that committee—has approved of many of the valuable features of the House bill. The two bills are companion bills. One relates to the waters flowing over public lands and nonnavigable streams and the other relates to navigable streams, and the two together practically cover the development of hydroelectric power upon navigable and nonnavigable streams.

The terms of this bill, as it is now amended, protect the Government. The terms of the other bill protect the Government, protect the investor, and give to the consumer some chance of a reasonable price for his product and a good prospect for the development of this great and valuable property on the public domain as well as on our rivers, and will add much to the wealth of this country.

Practically, electrical-power development is in its infancy. We can remember but a few years ago when there were no plants of any considerable importance. You could go to the great city of San Francisco and find but one little one-story concern, known as the California Electric Co., that had made an expenditure of eight or ten thousand dollars. To-day you find great development in this country in every conceivable way along the line of hydroelectric power.

I believe both of these bills, with some amendments, will become laws, and their enactment will speak well of both sides of the House, and particularly of the Members who have given attention to this legislation, who favor the utilization of this power, which will give to the men who invest their money a fair return upon it and at the same time will give consumers a product at a reasonable price and add much to the material wealth of this country. [Applause.]

The CHAIRMAN. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

SEC. 20. That the provisions of this act shall not be construed as revoking or affecting any permits or valid existing rights of way heretofore given or granted pursuant to law, but at the option of the grantee any grant heretofore given for the development, generation, transmission, or utilization of power may be surrendered and the grantee given a grant for the same premises under the provisions of this act.

Mr. SMITH of Minnesota. Mr. Chairman, I want to make a statement, and I want to ask for a little time, not more than 10 minutes. I may be able to complete my statement in five minues.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to proceed for 10 minutes.

Mr. ADAMSON. What is the gentleman's purpose?

Mr. MANN. I hope no objection will be made to the gentleman's request. We passed over section 10, and I ask that after we conclude the disposition of section 10 the gentleman from Minnesota may have 10 minutes.

Mr. ADAMSON. I want to couple with that a request that the gentleman from Tennessee [Mr. SIMS] may have five minutes.

Mr. MANN. I hope the gentleman will not couple with it anything.

Mr. ADAMSON. I couple with that, Mr. Chairman, a request for five minutes for the gentleman from Tennessee [Mr. SIMS].

The CHAIRMAN. The Chair understands the gentleman from Illinois to ask unanimous consent that at the conclusion of the reading of the bill——

Mr. MANN. No; only section 10——

The CHAIRMAN (continuing). The gentleman from Minnesota may have 10 minutes. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 21. That the provisions of this act shall not apply to irrigation or power dams or grants to municipal corporations affecting the use of water or water power for municipal purposes or other projects under the jurisdiction of the Secretary of the Interior or the Secretary of Agriculture upon the public lands of the United States.

Mr. ADAMSON. Now, Mr. Chairman, it is in order to go back to section 10.

Mr. MANN. Section 10, as I understand, was read.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from California [Mr. KENT].

Mr. MANN. The gentleman from Georgia withdraws his amendment.

The CHAIRMAN. Does the gentleman from Georgia withdraw his amendment?

Mr. ADAMSON. No; it was adopted.

Mr. MANN. Oh, no.

The CHAIRMAN. Section 10 has not been adopted.

Mr. ADAMSON. I withdraw it, then, and will allow the gentleman from California [Mr. KENT] to offer his amendment.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Strike out section 10 and substitute the following:

"SEC. 10. At any time after the expiration of any grant made hereunder, upon six months' notice of intention to do so, given either before or after the expiration of the grant, the United States, or any person authorized by Congress, may take over the dam and locks and properties appurtenant to navigation and the properties used by the grantee for the generation and transmission of electrical energy which are dependent for their usefulness on the continuance of such grant: *Provided*, That by 'transmission' there shall be understood the wires, conduits, poles, or other devices used to convey electrical energy to the point of its application, but that nothing herein contained shall obligate the United States to purchase any property beyond such generating plant and transmission lines: *Provided further*, That the United States may also purchase at its discretion such lands and other property of any grantee acting under the terms of this act as in the judgment of Congress may be deemed advisable upon condition that it shall pay before taking possession, first, the actual costs of the dam and locks and all other aids to navigation constructed under the approval of plans and specifications, rights of way, water rights, lands, and interests therein purchased or taken over by it; and, second, the reasonable value of all other property taken over, including structures and fixtures acquired, erected, or placed upon the lands and included in the generation or transmission plant and which are dependent as hereinabove set forth, such reasonable value to be determined by mutual agreement between the Secretary of War and the grantee or owners of such property; and in case they can not agree by proceedings instituted for that purpose in the United States district court for the district in which said property or some part thereof is situated, but in no case shall the amount exceed the actual cost: *Provided*, That such reasonable value shall not include or be affected by the value of the franchise or good will or profits to be earned on pending contracts or any other intangible element: *Provided further*, That in case of war or other emergency, to be judged by the Secretary of War, the United States shall have the right hereby reserved to requisition and take possession of any or all of said property and operate the same for its own use and benefit as long as the necessity or emergency continues, and compensation for such use and occupation shall be determined and paid as heretofore provided in this section."

Mr. ADAMSON. I will ask the gentleman if agreeing to this amendment will make peace in the family and end the trouble over this section?

Mr. KENT. Other gentlemen have made other suggestions, but I do not think they will oppose this amendment.

Mr. ADAMSON. I have scrutinized the two versions of the section, and this looks to me like a case of tweedledee and tweedledum, as far as the merits are concerned.

Mr. KENT. I will take tweedledee and the gentleman can take tweedledum.

Mr. ADAMSON. Admiring the gentleman's great linguistic capabilities and deferring to his eminent ability, if it is any pleasure to my distinguished friend to use his language instead of mine, I will accept his proposition if it will make peace in the family.

Mr. STAFFORD. I wish to offer an amendment to the substitute.

Mr. ADAMSON. That may break up the harmony.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment to the amendment, which the Clerk will report.

The Clerk read as follows:

Strike out, in lines 18, 19, and 20 of the substitute offered by Mr. KENT, the following language: "the dams and locks, and all other aids to navigation constructed under the approval of plans and specifications."

Mr. ADAMSON. You might just add "and confiscate all the property."

Mr. STAFFORD. Mr. Chairman, I wish to point out the difference between the Ferris bill and the bill under consideration, as to what the Government would pay in case it should appropriate a dam, dam site, and appurtenances at the end of the 50-year period. I have in my hand the Ferris bill as it passed the House, and in section 5 you will find that we only provided for paying the actual cost. I will read the language:

First, the actual costs of rights of way, water rights, lands, and interests therein purchased and used by the lessee in the generation and distribution of electrical energy under the lease; and, second, the reasonable value of all other property taken over, including structures.

The phraseology as it is carried in the Adamson bill, as well as in the amendment offered by the gentleman from California [Mr. KENT] seeks to pay the actual cost of the dam and locks, not the reasonable value of the dam and locks, as is provided in the Ferris bill.

Mr. ADAMSON. Will the gentleman yield for a moment?

Mr. STAFFORD. I will be glad to yield.

Mr. ADAMSON. The distinction is this: For the things which the Government requires the lessee to do for the Government use and benefit, we provide that the Government shall pay him the cost, while for the things that the Government does not require for the Government benefit, but which the grantee builds for his own business, we do not pay any more than the reasonable value.

Mr. STAFFORD. After having adopted one rule in the Ferris bill, I think we should conform to that rule in this bill and not depart from it. You can not justify paying the actual cost, after 50 years use of a dam and of locks, when they have depreciated mayhap 25 or 50 per cent. Under the amendment that I propose you will have the same phraseology as that adopted in the Ferris bill, and you will provide for paying not for the actual cost of the dam and locks, which may have depreciated 50 per cent in the 50 years or 100 years of usage before the Government takes possession of them, but you will provide for paying the reasonable value of the dam.

I submit to any business man—and the gentleman from California who offers the substitute is a noted successful business man—whether after a grantee has used a dam and all the privileges connected with it 50 years, and it has deteriorated in value 50 or 75 per cent, the Government, when it appropriates that power, should pay the real value of it or the actual cost, which on the books of the corporation may have been wiped off in depreciation in a hundred years' usage. That, I say, is unfair, and the Government should not be asked to pay the actual cost on something that has deteriorated with 50 or 75 years' usage.

Mr. ADAMSON. The gentleman's argument might be sound if he would provide that the regulation of charges should be such as to allow the cost to be amortized.

Mr. STAFFORD. We are not attempting, by the amendment, to appropriate or confiscate any property but to provide for a reasonable value of the dams and locks, because under the second provision it will extend to dams, as there we pay the reasonable value of other property taken over, including structures and fixtures, which is identical in language with the Ferris bill.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. COOPER of Wisconsin. I have not a copy of the amendment furnished by the gentleman from California, but I call the attention of my colleague to the language in the original bill, page 32, which is that it shall not in any case exceed the actual cost—that is, it does not require that it shall be the actual cost.

Mr. STAFFORD. If the gentleman will take the amendment under consideration it is obligatory on the Government when it takes over the property, after 50 or 75 or 100 years' use, to pay the actual cost of the original investment. Does the gentleman from Wisconsin think that is fair after depreciation of many years?

Mr. COOPER of Wisconsin. I said I had not a copy of the amendment of the gentleman from California. I referred to the provision in the original bill.

Mr. STAFFORD. And the provision in the original bill is mandatory, and that is the objection I have to it—it is compulsory on the Government to pay the cost of the dam and locks and all other aids to navigation constructed under the approval of plans and specifications and rights of way, water rights, lands, and interests therein purchased and used by the grantee for the generation and distribution of electrical energy under the grant. Regardless of depreciation there is in value, the Government must pay not the actual value, but the actual cost.

Mr. ADAMSON. Mr. Chairman, can we not reach an agreement as to the time to be devoted to this amendment?

Mr. MANN. The amendment of the gentleman from California is not agreed to yet, and if it is not agreed to I want to offer an amendment myself.

Mr. STAFFORD. I do not think there is any necessity for an agreement; there is no disposition to prolong debate.

Mr. COOPER of Wisconsin. I can not consent, Mr. Chairman, as far as I am concerned, that a vote shall be taken on this vital point in one of the most important bills that has been before Congress without having time to examine it.

Mr. ADAMSON. I do not want to cut the gentleman from Wisconsin off from making a speech.

Mr. COOPER of Wisconsin. I do not want to make a speech; I want an opportunity to investigate this amendment on this very important subject.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. I ask that my time be extended five minutes.

The CHAIRMAN. The gentleman from Wisconsin asks that his time be extended five minutes. Is there objection?

There was no objection.

Mr. STEPHENS of Nebraska. Will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. STEPHENS of Nebraska. Does not the gentleman think the benefits of navigation would compensate the Government for the cost or for what it might pay for the dam at the end of 50 years?

Mr. STAFFORD. It is the right of the Government after 50 years to go in and appropriate the property and reimburse the owner for the actual reasonable value—not the cost, as I contend, for the value may have depreciated 50 or 75 per cent. You as a business man, exercising this right that is given under this bill, would not pay something for nothing.

Mr. STEPHENS of Nebraska. Would the gentleman consider that when the Government has had 50 years' benefit of navigation that it ought not to pay the cost of this dam?

Mr. STAFFORD. We should pay the reasonable value, because when the investor makes his investment in that proposition he bottoms it on the idea that he will only have the absolute use of it for 50 years. He will amortize the cost so that the value is wiped off completely when the Government takes possession of it. We ought not to be compelled to pay him 75 per cent in excess of something that we do not get.

Mr. COOPER of Wisconsin rose.

The CHAIRMAN. Does the gentleman from Wisconsin yield to his colleague?

Mr. STAFFORD. Mr. Chairman, I yield first to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Chairman, would it be carrying out the gentleman's purpose if we should say "by the reasonable value not exceeding the actual cost"?

Mr. STAFFORD. Very much so.

Mr. MANN. Would not everybody agree to that?

Mr. ADAMSON. I would be glad to agree to that.

Mr. STAFFORD. Then I will stop right there.

Mr. ADAMSON. My idea is that whenever you go to improving the property it rises in value.

Mr. MANN. Of course, the actual cost would include the repairs of 50 years, and no one wants to do that.

Mr. ADAMSON. Very well.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to withdraw my amendment and insert in lieu thereof an amendment inserting before the word "actual," in line 18, the words "reasonable value not exceeding the."

The CHAIRMAN. The amendment which the gentleman from Wisconsin now offers is an amendment to the substitute offered by the gentleman from California [Mr. KENT]?

Mr. STAFFORD. Yes.

The CHAIRMAN. Without objection, the gentleman from Wisconsin will be granted leave to withdraw his former amendment and substitute the one just offered.

There was no objection.

Mr. STAFFORD. Mr. Chairman, let the Clerk report the amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin to the amendment of the gentleman from California.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Line 18, before the word "actual," insert the words "reasonable value not exceeding the."

Mr. STAFFORD. That is all right.

Mr. ADAMSON. I do not object to that.

Mr. CULLOP. Mr. Chairman, in the second specification before the word "the" and after the word "second," should not the same qualification be inserted?

Mr. MANN. I do not think so, because that already provides for the reasonable value. The trouble with the first proposition was that it would include maintenance. Actual cost includes maintenance for 50 years, and no one wants to pay more than the reasonable value. Now, you put in the provision that it shall not exceed the actual cost.

Mr. FERRIS. I think that is better than any of the provisions we have had in any of these bills.

The CHAIRMAN. The question is on the adoption of the amendment of the gentleman from Wisconsin to the amendment of the gentleman from California.

The question was taken, and the amendment to the amendment was agreed to.

The CHAIRMAN. The question now is on agreeing to the amendment of the gentleman from California.

Mr. SHERLEY. Mr. Chairman, I recognize that we are not writing what is going to be the law in what we write into this bill to-day. This bill is going into conference, and out of conference will come of necessity a compromise between the views of the respective Houses. I am not altogether satisfied with section 10 as it is now proposed in the motion offered by the gentleman from California [Mr. KENT], but I am not prepared to offer an amendment. Section 10 contemplates the taking over of the property by the Government, or any person designated by it, after the payment of certain sums in compensation for the property taken over, and provides that possession shall not be had until after payment, and that failure to agree as to the terms shall cause the question of the amount to be paid to be determined by a suit in a court. That means, if it means anything, if there is a resistance on the part of the grantee, that before the Government or a new grantee gets hold of the property they will have to litigate through all of the inferior courts of the United States and through the Supreme Court as to the amount of compensation, which really means that you are proposing to extend the life of the grant anywhere from 5 to 10 or 15 years, according to the ingenuity of the lawyers who conduct the litigation. I believe the provision ought to provide for the taking over of the property, and then, of necessity, whether we so provide here or not, the grantee would have a right to recover the fair value of the property taken over, but would not have the right to interfere with the taking over of it while he was litigating over what the value was, and the difference is just the difference to which I called attention the other day, namely, the difference between the inertia of the Government being used for the benefit of the public or being used for the benefit of the grantee.

Here you simply make every obstacle that can be thrown in the way of advantage to the original grantee in extending the life of the grant instead of having the life of the grant end at 50 years. Now, men are very much concerned about curtailing too much the capital that is invested. The more I think about a lease of 50 years the more I believe it is too long a term, and if any man on earth will simply read the history of the last 50 years, or almost any 50 years of modern time, and see the change that has taken place, he will realize that half a century of exclusive grant is an exceedingly long time to give. I do not want to enlarge the time of it as you are doing by this provision, because you do not get possession until you have either agreed or have a lawsuit as to the value of the property that you take over, and if the grantee does not want to give it up, he is not going to agree on price, and if he goes to litigate and gets a good, ordinary, intelligent lawyer, he can litigate 5 to 10 years additional time onto his grant. I am not saying this now with the idea of rewriting this section, but, speaking for myself, I say it with the determination to oppose any conference report that comes in here that does not give the House a chance to vote on the two propositions to which I called attention originally—first, the right of the Government to charge for the use, and, second, a recapture clause that is a real one and which does not propose unnecessarily to extend the time. I am making this statement in order that the gentlemen in charge of the bill may understand at least my attitude and to say I shall not agree to send it into conference unless we have an understanding that those two matters are going to come up in such a form as to give the House a chance to vote upon them.

Mr. GREEN of Iowa. Will the gentleman yield for a question?

Mr. SHERLEY. Certainly.

Mr. GREEN of Iowa. I did not clearly understand the gentleman's second proposition.

Mr. SHERLEY. The recapture proposition we are dealing with here now. I want to have the Government able to take the property at the end of 50 years, and section 10 does not give it that power.

Mr. COOPER of Wisconsin. Mr. Chairman, I would like to say to the gentleman from Georgia [Mr. ADAMSON] I do not want to raise the point of no quorum, but we have been at work on this bill for several hours in intense heat and as I said a moment ago, the bill itself is without exception as important as any bill which has been before the Congress in a generation. We propose to turn over the enormous water-power possibilities of this continent for 50 years, and the importance of it can be illustrated in a very simple way. When I was a boy, and most of you here were boys, a man who owned a dam site put up a mill, and those who wished to be his customers had to come to the mill beside the water. To-day the man puts up a mill, and he sends that power 200 miles in every direction from that site. It gives him an unheard of power, a tremendous privilege, a privilege never dreamed of until within a very few years. The

proposition is absolutely new to the world, only two or three years old, or a very few years old. The transcendent importance of this proposed legislation is made plain and established by that illustration. Now then, with only 40 or 50 Members on the floor out of a membership of 435, after we have worked long and faithfully as we have done on this bill, I suggest to the chairman of the committee that the public business is in such condition that we can very well devote another day, or two if necessary, to the consideration of this measure.

Mr. DILL. Will the gentleman yield?

Mr. ADAMSON. Mr. Chairman, I desire just a few minutes in which to reply to my friend from Wisconsin [Mr. COOPER]. This subject is not a new one in this House at all. It has been thrashed over for several years. I myself thoroughly concur with the gentleman from Kentucky [Mr. SHERLEY] in his views about this and with the gentleman from Wisconsin [Mr. COOPER], and according to the language that is now proposed, taken in connection with the preceding section 9, the period absolutely ends at 50 years and the grantee is out.

Mr. SHERLEY. Section 10, as offered to be amended by the gentleman from California, provides that they shall not take possession until after payment. Theoretically your lease is ended. Yet I knew of a railroad company that had control of the streets of a city for many years after its lease and franchise had expired. That is what would happen here.

Mr. ADAMSON. If the gentleman will permit me to complete my statement, he will understand me, I think.

Mr. SHERLEY. I understand you, but I want you to understand this amendment.

Mr. ADAMSON. I fully understand that. The period ends in 50 years, but no man believes the Government will quit using it if it wants to navigate that stream. If it does not want to navigate the stream, of course it does not want to use it and need not buy that property.

Mr. SHERLEY. I am not talking about the navigability of the stream. I am talking about the Government getting control of the power that is developed there and stopping the grantee from using that power after the grant has expired.

Mr. ADAMSON. I will repeat a part of my statement, and then I will finish. The Government will be in possession of the part in which it is interested. The other fellow is out. He has no right to use it under the language already adopted. The Government does not have to have his electrical works, or his factory, or street railroad, and this amendment of the gentleman from California does not require the Government to buy them at all. The Government, if it intends not to renew his lease, or to sell it to somebody else, ought to pay for the improvement of the dam, as we have agreed on. In my judgment there is not any trouble about this language as it is now, but if the gentleman from Kentucky can make any suggestions of more effective language which will answer the purpose I shall be glad to hear them. And as to his suggestion about the conference report, he knows me well enough and my history as a conferee to know that I will never come back here with anything contrary to the will of this House.

Mr. SHERLEY. I am not quarreling with the gentleman's motive. I have never yet on this floor or elsewhere fought a case by impugning motives. I am interested in what I believe to be the vital points of this legislation. I do not propose to sin away my day of grace by getting into a jam here in the closing days of the session, when we will have to take a conference report or let the whole matter go. Therefore I am calling attention to the matter so that the conferees may know what the House may want.

Mr. ADAMSON. I am not saying a word about motives, but common sense. The gentleman knows me well enough that the Senate will not get my scalp. It is a question of what our duties are to the House.

Mr. SHERLEY. The gentleman understands perfectly well—we might as well be frank—the gentleman's view has not been in harmony with the view of the House touching a number of these matters.

Mr. ADAMSON. It has on this proposition.

Mr. SHERLEY. That might be so, but it is not true on the bill as a whole. We are practically hurrying this bill through—instead of taking several days, as we might well do—in order that it may go into conference. I have no objection to that, because I realize the bill has to be rewritten in conference, but before it gets in there I want the gentleman to understand my view as to what I think ought to come out.

Mr. ADAMSON. I want you to understand my views. One is that the report must be acceptable to this House.

Mr. GARNER. Will the gentleman yield?

Mr. ADAMSON. I have not finished my statement to the gentleman from Wisconsin [Mr. COOPER]. I hope he will not insist on the point of no quorum and prevent action here to-day. It is not my fault that we are hurried in this thing, but it is the fault of the managers of the House, who want to get through with business. And the gentleman from Kentucky has correctly stated it has to be thrashed out in conference, and the conferees must have authority to make an acceptable and workable bill. I do not think it is such a new proposition that the gentleman from Wisconsin ought to interfere with our approving it to-night.

Mr. COOPER of Wisconsin. Mr. Chairman, I do not know that I am interfering, at least interfering in any improper sense——

Mr. ADAMSON. Oh, I do not think so either——

Mr. COOPER of Wisconsin. When I exercise my legitimate functions here as a Representative to object to a vote on a proposition as tremendously important as the proposition involved in this bill is.

Mr. ADAMSON. I will withdraw the word "interfere," and I say I hope the gentleman will not object.

Mr. COOPER of Wisconsin. The gentleman also says that the managers of the House wanted to get through with their business. I am not aware that any managers of this House have got their business to transact here to the exclusion of the business of the public.

Mr. ADAMSON. One of the most distinguished of the managers is the gentleman.

Mr. COOPER of Wisconsin. One moment. Of course the gentleman has no right to interrupt me in that way if he is in his seat, and he ought not to do it on the floor.

Mr. ADAMSON. I am making a speech. [Laughter.]

Mr. COOPER of Wisconsin. I thought I had the floor.

Mr. ADAMSON. Oh, no. I got an extension of time.

Mr. COOPER of Wisconsin. Then I apologize to the gentleman from Georgia.

Mr. ADAMSON. I will withdraw the word "interfere" and say I hope the gentleman from Wisconsin will not object.

Mr. GARNER. Mr. Chairman, will the gentleman from Georgia give me his attention?

Mr. ADAMSON. The gentleman can have my attention, and lots of it.

Mr. GARNER. As I caught the statement of the gentleman from Georgia and the gentleman from Kentucky [Mr. SHERLEY], they do not agree as to the policy of the determination of the franchise rights.

Mr. ADAMSON. I think we agree.

Mr. GARNER. Let us see if you agree. I understand the gentleman from Kentucky to hold that at the end of 50 years this right ought to cease, and the gentleman from Georgia says it ought not to cease until the Government pays for the property.

Mr. ADAMSON. Oh, no.

Mr. GARNER. Does the gentleman contend that at the end of 50 years the Government ought to have the right to take over this property?

Mr. ADAMSON. Yes.

Mr. GARNER. Is the gentleman willing to write that into the law?

Mr. ADAMSON. It is there already.

Mr. GARNER. I want to get the viewpoint of the gentleman from Georgia, so that if he comes back as one of the conferees I will be able to understand it. My understanding is that at the end of 50 years the Government has the right to take this property.

Mr. ADAMSON. It has got it.

Mr. GARNER. And the gentleman from Georgia said, if the Government took over the property, it ought to be willing to pay for the power it had, it already having the navigation.

Mr. ADAMSON. It does not have to wait for the litigation to determine the value before it takes it over.

Mr. SHERLEY. There is the difference. The gentleman is talking about navigation. Nobody is talking about that in connection with this bill. We are talking about the water power. We want to have it so that at the end of 50 years the Government can get control of the water power, and not litigate 10 years as to the value of the property.

Mr. ADAMSON. I think it can under this language.

Mr. SHERLEY. I do not.

Mr. ADAMSON. If it can not, then I am willing to take advice.

Mr. SHERLEY. You should provide for the possession of it. The trouble is that men who want to take care of this phase, who at a moment's notice undertake to write amendments of this kind, may not succeed in doing what they desire. I have not the ability to undertake to say offhand what should be the exact language, but I know what I want, and I know when I see language whether it gives me that or not, and this language does not.

Mr. ADAMSON. It says the Government shall take it over 50 years after the completion of the dam.

Mr. SHERLEY. I know of a case where a railroad company had possession of the streets when, legally, the franchise had passed from the company; but the company still had possession, and it is more than nine points of the law, as lawyers know.

Mr. ADAMSON. The gentleman loses sight of the fact that the Government has possession of the dams and locks.

Mr. SHERLEY. It has possession for navigation purposes, and no other.

Mr. GREENE of Massachusetts. Mr. Chairman, I make the point of no quorum.

The CHAIRMAN. The gentleman from Massachusetts makes the point of no quorum. The Chair will count. Evidently there is not a quorum present.

Mr. ADAMSON. Mr. Chairman, if it is in order, I move a call of the House.

Mr. STAFFORD. There is no call of the House in committee.

Mr. MANN. Let it go over until Thursday.

Mr. ADAMSON. You can not get in Thursday.

Mr. MANN. Yes; you can come in automatically on Thursday.

Mr. STAFFORD. This is a privileged bill.

Mr. ADAMSON. Well, Mr. Chairman, it is getting late, and gentlemen are tired, and I am perfectly willing to study this matter over further. With the assurance that we can get in at some time in the future, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. JOHNSON of Kentucky, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (S. 3331) to amend an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906, as amended by the act approved June 23, 1910, and to provide for the improvement and development of waterways for the uses of interstate and foreign commerce, and had come to no resolution thereon.

BRIDGE ACROSS BAYOU BARTHOLOMEW, ARK.

The SPEAKER laid before the House the following message from the President of the United States, which was read:

To the House of Representatives:

In compliance with the resolution of the House of Representatives (the Senate concurring) of July 8, 1916, I return herewith House bill No. 12197, entitled "An act authorizing Ashley County, Ark., to construct a bridge across Bayou Bartholomew."

WOODROW WILSON.

THE WHITE HOUSE, *July 11, 1916.*

HOUR OF MEETING TO-MORROW.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow. Is there objection?

There was no objection.

MUNICIPAL OWNERSHIP OF STREET RAILWAYS.

Mr. JOHNSON of Kentucky. Mr. Speaker, the District Committee to-day reported out House bill 9219, relative to municipal ownership of street railways in the District of Columbia. The committee has filed its report, and I ask unanimous consent that the minority may have 30 days in which to file its views.

The SPEAKER. The gentleman from Kentucky asks unanimous consent that the minority of the Committee on the District of Columbia may have 30 days in which to file its views on the subject of ownership of street railways in the city. Is there objection?

There was no objection.

EXTENSION OF REMARKS.

Mr. SIMS. Mr. Speaker, I ask unanimous consent to print in the RECORD an article from the Chattanooga News, Chattanooga, Tenn., and a letter by the secretary of the Progressive Party, known as the Bull Moose Party in Tennessee.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD by publishing an article from the Chattanooga News. Is there objection?

Mr. STAFFORD. Reserving the right to object, Mr. Speaker, I think the RECORD is becoming too crowded with newspaper articles, and I object.

LIEU LANDS.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent that on Saturday, after the reading of the Journal and the disposition of other business on the Speaker's table, the bill H. R. 15096 be given a privileged status on that day. It is the so-called lieu-lands bill. It is unanimously reported by the committee.

Mr. ADAMSON. Mr. Speaker, I want to call the gentleman's attention to the fact that the Senate joint resolution has not been disposed of yet, and we have a rule prepared for that.

The SPEAKER. The gentleman from Oklahoma asks that on next Saturday after the reading of the Journal and the disposition of business on the Speaker's table H. R. 15096 be given a privileged status——

Mr. FERRIS. For that day?

The SPEAKER. For that day. Is there objection?

Mr. MANN. Reserving the right to object, I understand it is the expectation of the majority that we shall consider the bill to amend the law relating to campaign contributions, publicity, and so forth.

Mr. FERRIS. Let it be subject to that.

Mr. KITCHIN. We hope to take that up this week.

Mr. MANN. I shall object to anything else until that is disposed of.

The SPEAKER. The gentleman from Illinois objects.

LEAVE TO EXTEND REMARKS.

Mr. EDMONDS. Mr. Speaker, I ask unanimous consent to insert in the RECORD an address made by our colleague, Dr. FESS, at Independence Hall on July 4.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD by printing Dr. FESS's Fourth of July speech at Independence Hall. Is there objection?

Mr. FOSTER. Reserving the right to object, has not that been printed?

Mr. EDMONDS. No.

The SPEAKER. Is there objection?

There was no objection.

Mr. SMITH of Minnesota. I ask unanimous consent to extend in the RECORD the remarks that I made to-day.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to extend in the RECORD his remarks on the bill considered this afternoon. Is there objection?

There was no objection.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 2543. An act for the relief of the State of Kentucky; to the Committee on Claims.

ADJOURNMENT.

Mr. KITCHIN. I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 26 minutes p. m.) the House adjourned until to-morrow, Wednesday, July 12, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of War, submitting additional estimates of appropriations required by the War Department for the service of the fiscal year ending June 30, 1917 (H. Doc. No. 1279); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Acting Secretary of the Treasury, transmitting copy of communication from the Secretary of War submitting additional estimates of appropriations required by the War Department for the service of the fiscal year ending June 30, 1917 (H. Doc. No. 1280); to the Committee on Appropriations and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. FITZGERALD [from the Committee on Appropriations]: A bill (H. R. 16911) making an appropriation for the re-

lief and transportation of destitute American citizens in Mexico; to the Committee of the Whole House on the state of the Union.

By Mr. COOPER of Ohio: A bill (H. R. 16912) granting the consent of Congress to the county commissioners of Trumbull County, Ohio, to construct a bridge across the Mahoning River in the State of Ohio; to the Committee on Interstate and Foreign Commerce.

By Mr. HOPWOOD: A bill (H. R. 16913) authorizing the Secretary of War to donate to the Waynesburg Armory Board, Waynesburg, county of Greene, State of Pennsylvania, two bronze cannon or fieldpieces; to the Committee on Military Affairs.

By Mr. KETTNER: A bill (H. R. 16914) permitting the Needles & Oatman Bridge Co. to construct, maintain, and operate a bridge across the Colorado River between the States of California and Arizona; to the Committee on Interstate and Foreign Commerce.

By Mr. RUBEY: A bill (H. R. 16915) for the purchase of a site for a public building at Salem, Dent County, Mo.; to the Committee on Public Buildings and Grounds.

By Mr. PARK: A bill (H. R. 16916) to repeal an act to establish a uniform system of bankruptcy throughout the United States, approved July 1, 1898, and all amendments thereto; to the Committee on the Judiciary.

By Mr. GALLAGHER: Resolution (H. Res. 300) approving the action of the State Department in petitioning European Governments to make concessions for the relief of Poland; to the Committee on Foreign Affairs.

By Mr. SIEGEL: Joint resolution (H. J. Res. 262) authorizing the President of the United States to pay $100,000 and to present a gold medal, suitably engraved, to the discoverer of a specific preventive or remedy for infantile paralysis; to the Committee on Appropriations.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ALMON: A bill (H. R. 16917) for the relief of Elizabeth R. Howell, Anna R. Wells, Mary Barnes Richardson, Sarah R. Tatum, and Williams Richardson, as William Richardson, deceased; to the Committee on Claims.

By Mr. ASHBROOK: A bill (H. R. 16918) granting a pension to William Vanatta; to the Committee on Pensions.

By Mr. CHARLES: A bill (H. R. 16919) granting a pension to John A. Green; to the Committee on Invalid Pensions.

By Mr. COLEMAN: A bill (H. R. 16920) to correct the military record of John A. Swartzwelder; to the Committee on Military Affairs.

By Mr. ESCH: A bill (H. R. 16921) granting a pension to Betsey J. Truman; to the Committee on Invalid Pensions.

By Mr. EVANS: A bill (H. R. 16922) authorizing the Secretary of the Interior to sell and convey to the Great Northern Railway Co. certain lands in the State of Montana for division terminal yards and other railway purposes, and for other purposes; to the Committee on the Public Lands.

By Mr. HERNANDEZ: A bill (H. R. 16923) to correct the military record of Epigmenio Ramirez; to the Committee on Military Affairs.

By Mr. KAHN: A bill (H. R. 16924) for the relief of Harry B. Sepulveda; to the Committee on Military Affairs.

By Mr. KETTNER: A bill (H. R. 16925) granting a pension to Alvah H. Mitchell; to the Committee on Pensions.

Also, a bill (H. R. 16926) for the relief of James Y. Whitsitt; to the Committee on Military Affairs.

By Mr. LIEBEL: A bill (H. R. 16927) granting a pension to Helena G. Marso; to the Committee on Invalid Pensions.

By Mr. MATTHEWS: A bill (H. R. 16928) granting a pension to Michael Levi; to the Committee on Pensions.

By Mr. NEELY: A bill (H. R. 16929) granting an increase of pension to Dorothy Fisher; to the Committee on Invalid Pensions.

By Mr. OLDFIELD: A bill (H. R. 16930) granting a pension to George W. Douthitt; to the Committee on Pensions.

By Mr. RICKETTS: A bill (H. R. 16931) granting a pension to Mary J. Bowen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16932) granting an increase of pension to Samuel Holderman; to the Committee on Invalid Pensions.

By Mr. RUSSELL of Missouri: A bill (H. R. 16933) granting an increase of pension to Samuel O. Stanley; to the Committee on Invalid Pensions.

By Mr. SPARKMAN: A bill (H. R. 16934) for the relief of W. H. Overocker; to the Committee on Claims.

By Mr. SMITH of Michigan: A bill (H. R. 16935) for the relief of Jabez Lumbert; to the Committee on Military Affairs.

By Mr. STEELE of Iowa: A bill (H. R. 16936) granting an increase of pension to Thomas Dennis; to the Committee on Invalid Pensions.

By Mr. SWIFT: A bill (H. R. 16937) for the relief of Harriet F. Hibben; to the Committee on Claims.

By Mr. CRISP: A bill (H. R. 16938) for the relief of W. H. Whittle; to the Committee on War Claims.

By Mr. WHEELER: A bill (H. R. 16939) granting a pension to Louisa Powell; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of Chamber of Commerce of the United States of America, in re railroad situation in the United States; to the Committee on Interstate and Foreign Commerce.

By Mr. DICKINSON: Petition of E. E. Wall & Sons, of Leeton; Millard Hobbs and W. B. Wallace, of Holden; H. Leob & Bros., of Rich Hill; and E. P. Caldwell, of Burlington Junction, all in the State of Missouri, protesting against passage of House bill 16307, relative to register for pure-bred stock; to the Committee on Agriculture.

By Mr. HAYES: Petition of sundry citizens of the State of California, against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. KENNEDY of Rhode Island: Petition of sundry women of the State of Rhode Island, favoring passage of the woman-suffrage amendment; to the Committee on the Judiciary.

By Mr. LIEBEL: Papers to accompany House bill 16927, granting pension to Helena G. Marso; to the Committee on Invalid Pensions.

By Mr. LINTHICUM: Petition of Clinton T. Johnson, of Baltimore City, Md., favoring Federal censorship of motion pictures; to the Committee on Education.

Also, memorial of the Society of Friends of Baltimore, Md., against House bill 108, relative to transfer of interests of Indians in Oklahoma; to the Committee on Indian Affairs.

By Mr. LONDON: Petition of members of Farmers' Educational and Cooperative Union of Gregory County, S. Dak., demanding a limitation of individual ownership of land; a system of cooperative banks, with Government money; Government purchase and Government ownership and operation of railroads, telephone, and telegraph systems, hydroelectric plants, oil wells, and coal mines; and abolition of all special privileges to private interests from the Government; to the Committee on the Judiciary.

Also, petition from the City Central Committee, Local Los Angeles, Socialist Party, at Los Angeles, Cal., calling upon the President and Congress to withdraw the United States troops from Mexico; to the Committee on Military Affairs.

By Mr. SANFORD: Papers to accompany House bill 16907, granting an increase of pension to Martin Lockwood; to the Committee on Invalid Pensions.

Also, papers to accompany House bill 16906, granting an increase of pension to Lawrence O'Toole; to the Committee on Invalid Pensions.

By Mr. STEENERSON: Petition of State banks and bankers of St. Paul, Minn., against establishment of the branch banking system in the United States; to the Committee on Banking and Currency.

Also, petition of Minnesota Bankers' Association, opposing continuation of special bankers' tax and against increased corporation tax; to the Committee on Ways and Means.

By Mr. STINESS: Petitions of Mary E. Longley, Nettie E. Bauer, Kathine H. Austin, and Mary Mangell, of Providence, R. I., and the Pawtuxet Valley Woman Suffrage League, of Rhode Island, favoring the Susan B. Anthony amendment; to the Committee on the Judiciary.

Also, petition of Anna O. Heath, Emily B. Ellis, and Ava C. Neuesher, of Providence, R. I., favoring the Susan B. Anthony suffrage amendment; to the Committee on the Judiciary.

By Mr. TIMBERLAKE: Petition of members of Woman's Missionary Society of Berthoud, Mead, and Loveland, Colo., favoring bill to prohibit export of rum, etc., to Africa; to the Committee on Alcoholic Liquor Traffic.

By Mr. TINKHAM: Petition of members of Old Schoolboys' Association of Boston, favoring national defense; to the Committee on Military Affairs.

By Mr. VOLSTEAD: Petition of State banks and bankers of St. Paul, Minn., against branch banks; to the Committee on Banking and Currency.

SENATE.

WEDNESDAY, *July 12, 1916.*

(Legislative day of Friday, July 7, 1916.)

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

WILLIAM HAROLD KEHOE.

Mr. JAMES. On behalf of my colleague [Mr. BECKHAM], I report back favorably with amendments from the Committee on Military Affairs the bill (S. 6279) for the relief of William Harold Kehoe, and I submit a report (No. 655) thereon. I ask unanimous consent for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendments were, on page 1, line 5, to strike out the word "late," and in line 6, after the words "West Point," to insert "upon the graduation of the class of 1917, of which he was a member," so as to make the bill read:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized, by and with the advice and consent of the Senate, to appoint William Harold Kehoe, a cadet at the Military Academy at West Point, upon the graduation of the class of 1917, of which he was a member, to the position of second lieutenant of Infantry of the Army, and to place him upon the retired list with the pay of a retired second lieutenant of Infantry.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The message also announced that the House had passed a bill (H. R. 16911) making an appropriation for the relief and transportation of destitute American citizens in Mexico, in which it requested the concurrence of the Senate.

CALLING OF THE ROLL.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll and the following Senators answered to their names:

Ashurst	Curtis	Lane	Sheppard
Beckham	Fletcher	McCumber	Sherman
Brady	Gallinger	Martin, Va.	Smith, Ariz.
Brandegee	Gronna	Nelson	Smith, Ga.
Bryan	Harding	Norris	Smoot
Catron	Hardwick	O'Gorman	Sterling
Chamberlain	Hollis	Owen	Thomas
Chilton	Husting	Phelan	Townsend
Clapp	James	Pittman	Underwood
Clark, Wyo.	Jones	Pomerene	Vardaman
Clarke, Ark.	Kenyon	Ransdell	Wadsworth
Culberson	Kern	Saulsbury	Williams
Cummins	La Follette	Shafroth	Works

Mr. KERN. I desire to announce the unavoidable absence of my colleague [Mr. TAGGART]. He is paired with the junior Senator from Vermont [Mr. PAGE]. This announcement will stand for the day.

I also desire to announce that the Senator from Montana [Mr. MYERS] is absent on account of continued illness.

Mr. TOWNSEND. I desire to announce the absence of my colleague [Mr. SMITH of Michigan] on important business. He is paired with the Senator from Missouri [Mr. REED]. This announcement may stand for all votes to-day.

The VICE PRESIDENT. Fifty-two Senators have answered to the roll call. There is a quorum present.

HOUSE BILL REFERRED.

H. R. 16911. An act making an appropriation for the relief and transportation of destitute American citizens in Mexico was read twice by its title and referred to the Committee on Appropriations.

RIVER AND HARBOR APPROPRIATIONS—CONFERENCE REPORT.

Mr. CLARKE of Arkansas. Among the messages just received from the House of Representatives, there is one announcing the adoption by the House of the conference report on the river and harbor bill. I am advised that it is altogether probable that the pending bill will be disposed of by the hour of 2 o'clock. I give notice now that at 2 o'clock I shall ask the Senate to consider the conference report on the river and harbor bill.

HOURS OF DAILY SESSIONS.

Mr. KERN. I desire to announce that at a meeting of the representatives of both sides of the Chamber this morning it was agreed that the Senate should, until otherwise ordered, meet at 10 o'clock in the morning and remain in session until 6.30 in the afternoon. I make this announcement with the statement that we shall endeavor to carry out the arrangement.

Mr. GALLINGER. Will the Senator make it read "until otherwise ordered" those shall be the hours?

Mr. KERN. I will make that motion, then, that until otherwise ordered the Senate shall meet each day at 10 o'clock in the morning and continue in session until 6.30 p. m.

Mr. GALLINGER. Not later than 6.30.

Mr. SMOOT. I wish to ask the Senator from Indiana whether it has been agreed that we shall have morning hours at any time?

Mr. KERN. There was no agreement on that subject.

Mr. SMOOT. Then if there is no agreement, I give notice now that I shall object to unanimous consent for the passage of any bill or resolution, with the exception of the bill that may be regularly before the Senate.

Mr. KERN. I think an arrangement can be readily made, although it was not discussed this morning, that a morning hour will be observed twice a week.

Mr. SMOOT. With that understanding I have no objection.

Mr. GALLINGER. That was not definitely but tentatively agreed to.

Mr. JAMES. It was mentioned at the time.

Mr. KERN. Let that be understood, then, if there be no objection.

Mr. POINDEXTER. Mr. President, I make the point of order that the Senate is not in order. I am very much interested in the arrangement proposed, but we can not hear in this part of the Chamber what is going on.

The VICE PRESIDENT. The Chair can not help that. The Chair can not make Senators sit down.

Mr. BRANDEGEE. Mr. President, if I can have the attention of the Senator from Indiana for a moment, I should like to ask him a question. The Senator from Indiana, if I understood him correctly, suggests that probably there will be made an agreement that there shall be a morning hour at least two mornings each week——

Mr. KERN. Yes; two mornings each week.

Mr. BRANDEGEE. During the continuance of the order which is asked for by the Senator. I would suggest that if there are to be only two chances each week for the transaction of morning business when the conferees on this question meet to make any agreement about it they specify the days of the week upon which the morning hour shall be had, so that Senators may have notice and be here with their business ready to be transacted.

Mr. KERN. It is presumed that Senators will be present every morning.

Mr. BRANDEGEE. It is presumed, but inasmuch as only 52 out of 96 are here now, and we are making an agreement to bind the absentees also, I think it would not be unwise to specify the days when the morning hour is to be had and to make it a part of the order of the Senate.

Mr. KERN. I would not be averse to that and we will consider it.

Mr. GALLINGER. We can agree to that.

The VICE PRESIDENT. The Senator from Indiana moves the following order:

Ordered, That the hour of daily meeting of the Senate be 10 o'clock a. m. until otherwise ordered, and that the Senate remain in session each day not later than 6 o'clock and 30 minutes p. m.

Mr. GALLINGER. That is right.

The VICE PRESIDENT. The question is on the motion of the Senator from Indiana.

The motion was agreed to.

AMENDMENT OF FEDERAL RESERVE ACT.

Mr. OWEN. Mr. President, I wish to give notice that after the disposition of the conference report on the river and harbor bill, I shall ask the Senate to permit the disposition of the proposed amendment to the Federal reserve act.

AGRICULTURAL DEPARTMENT APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12717) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes.

Mr. SMITH of Georgia. Mr. President, I wish to call just briefly the attention of the Senate to the warehouse bill, which was under consideration at the hour the Senate took a recess.

Senators will observe that under the provisions of this bill licenses to the warehouses are permissive and in no sense compulsory. You will also find that section 29 of the bill prevents the measure from in any wise interfering with the warehouse systems organized under State or local authority, but provision is made for cooperative action between the Federal Government and the States in which warehouses are organized under State legislation.

I confess that I am more familiar with the details of the bill this morning than I was yesterday, as I have refreshed my recollection with regard to it. It does not undertake to force a Federal warehouse system upon any State or upon any person. It is intended to make permissive by the owner of any warehouse procurement of Federal license. If license is voluntarily obtained, the bill subjects the warehouse to certain regulations and requires for its use certain specified contracts.

In preparing these specifications and regulations regard has been had to legislation already passed in 32 States, and the plan conforms to practically a uniform system of warehouses in 32 States.

Mr. SHAFROTH. In 32.

Mr. SMITH of Georgia. In 32 States, and the plan conforms to practically a uniform system of warehouses in 32 States.

The purpose of the bill is really to facilitate rural credits. It is to aid the farmer in procuring money at the least possible cost. It is to make entirely available to the farmer the benefits of the Federal reserve system.

It will be remembered that last year the Federal Reserve Board provided that certain paper, based upon stable agricultural products as security, should be received by Federal reserve banks and discounted for banks that charged not over 6 per cent for the money loaned to the farmer. It is believed that through this bill facility will be had to utilize the paper of the farmer secured by a warehouse receipt issued from Federally licensed warehouses in the big banks of the country, and that the banking institutions in the large cities and the large banks will be brought within reach of agricultural business and extend credits at low rates of interest to the farmer. Warehouse certificates will have an established status, and with that as security the farmer's note will be good not only in local banks, where the farmer is personally known, but in the banks of the centers of commerce.

This is the great object of this bill. I know that a great deal of labor has been bestowed upon it. A subcommittee representing both sides of the House of Representatives, without any regard whatever to politics, worked upon it in the other House. Active cooperation was given to this committee by the attorney of the Agricultural Department and the director of the Market Division. The bill was accepted by the other House, I think, by an overwhelming majority. This particular branch of the bill was not assigned to me for special investigation on the Agricultural Committee, but I had been studying the question during the past two years. After very carefully considering the bill again since we adjourned yesterday, I find it contains largely the provisions that were worked out in conference some time ago.

I believe the bill will be a substantial help to facilitate the producer of staple products in the marketing of his crops, in retaining a portion of his crop for sale at such date as he may desire to sell it; that it will advance the status of the farmer, and will substantially advance it when he needs credit. It will greatly contribute to solve the problem of rural credits by bringing cheap money within the farmers' reach.

Mr. NELSON. Mr. President, I am listening with great interest to what the Senator from Georgia is saying, but I desire to suggest that I think there is one serious defect in the bill; that is in failing to require these warehouses to insure for the benefit of the men whose products they store. Under the warehouse system in Minnesota not only are the warehousemen required to take out a license and to give bond, but they are also required to insure the contents of their warehouses for the benefit of the parties who hold the warehouse receipts. A failure to make such provision is one of the defects of this bill; and unless language to that effect be inserted, these warehouses will not be on so solid a footing as will be other warehouses which have an insurance system in operation.

Mr. SMITH of Georgia. I shall be glad to have the Senator from Minnesota present an amendment upon that line. I am in no way so wedded to this bill that, if an improvement can be made, I would not gladly accept it. I see the bill does provide that the Secretary of Agriculture shall require bond from warehousemen. I suppose that the bond and security required from them would guarantee the protection of the assets, and that, in connection with that bond, insurance would be required by the bonding company. My own view was that, as an incident to the bond given by the warehouse, the insurance would follow. I do not know any bonding company which bonds warehouses without requiring the insurance in advance and the delivery of the policy of insurance to the bonding company. That has been my observation of the mode of procedure by which the bonding companies bond the liability of warehouses. If, however, the Senator from Minnesota will prepare a brief amendment along that line, I shall be glad to accept it and to carry it to conference. Unless the matter has been already safeguarded in that respect, I fully agree with the Senator that it should be.

Mr. CUMMINS. Mr. President, will the Senator from Georgia give us his opinion with regard to this point: He has stated that section 29 of the bill attempts to preserve the State law relating to the subject under consideration; suppose the State law is in direct conflict with the provisions of this proposed statute, which will prevail?

Mr. SMITH of Georgia. I do not see how a warehouse could obtain a license from the Government without complying with the requirements of this act.

Mr. CUMMINS. The requirement is simply good repute. There are no requirements for obtaining a license except that the warehouseman must be a reputable citizen and have a structure in which he stores agricultural products. He is not required, of course, as has been suggested, to give bond. However, I repeat my question. In the operation of the warehouse the State law requires certain things, while this proposed law requires certain other things in direct antagonism; which law will prevail—the law of the State or the law of the Federal Government?

Mr. SMITH of Georgia. I do not see, as a practical proposition, that the requirements could be in antagonism. There might be additional requirements by the State law, which the warehouse would also be called upon to comply with.

Mr. CUMMINS. No matter what the Senator from Georgia may think about it, there are antagonisms. For instance, in the respect pointed out by the Senator from Illinois [Mr. SHERMAN] yesterday, this law requires the warehouseman to respond under all circumstances; he is an insurer of the products stored or deposited with him. The laws of many of the States—and I have some familiarity with the laws of two or three—do not so require; but, on the contrary, they fix the liability of a warehouseman upon an entirely different basis. Now, what law will control the situation?

Mr. SMITH of Georgia. I answer that question with no embarrassment whatever. If the warehouseman desires simply to avail himself of the State statute, he would not apply for this license. If he applies for this license, he would become liable to the extent of its provisions.

Mr. CUMMINS. That means, therefore, that every warehouseman under this proposed act will be bound by the provisions of the Federal law, and that the State law, certainly in so far as it is inconsistent with the Federal law, must give way.

Mr. SMITH of Georgia. Not at all. I do not think the Senator's conclusion is sound. The State law remains without interference. The owner of the warehouse can continue to do business under the State law, in no way impeded by this national act.

If he desires, however, a Federal license, if he desires to change his status from that which he occupies under the State law, he can voluntarily do so. The bill does not repeal the State law; it leaves the option to the warehouseman to continue under the State law, with no more restriction than the State law places upon him, or he can, if he wishes, apply for a Federal license. Then, if he obtains and keeps that license he incurs the additional liability, and additional value is given to his warehouse certificates; but it is expressly declared that no State statute is repealed; that no interference shall follow with any State regulation. Licensing under this provision is purely an optional act on the part of the warehouse owner.

Mr. CUMMINS. I agree to that, and so stated yesterday more than once; but I further stated that when the warehouseman became a licensee under this act he would be bound by the Federal law upon that subject, and would not be bound by the State law; that, as to him, there would be no State law governing the conduct of his warehouse, because he had transferred his obligation from the State to the Federal Government by applying for a license.

Mr. SMITH of Georgia. I differ with the Senator from Iowa to this extent: I do not believe that this act would relieve the warehouseman of any responsibility placed upon him by the State law unless this act so provides. It is expressly declared that it shall not interfere with any State law. It is not in-

tended to supersede the provisions of the State law placing requirements upon him. It may impose additional requirements, which he voluntarily assumes.

Mr. SHERMAN. Mr. President, I wish to add to what the Senator from Iowa [Mr. CUMMINS] has said, and also to show more particularly what the effect would be if this section were to remain in the act; especially, I wish to add something to what the Senator from Georgia [Mr. SMITH] has explained.

This will introduce a double set of warehousemen in such a State as I, in part with my colleague, represent. In Illinois we have built up a system of inspection and warehousing since 1869 and 1870 under the local laws of the State. Forty or 50 years ago the grain market in the city of Chicago became of considerable importance to that city, to the State of Illinois, and to the neighboring States. So, following constitutional authority given in 1870, regulations were made and warehouses were put under the railroad and warehouse commission. That was done by an act which has been in force for a great many years in that State. Nearly all of the warehouses in Chicago are incorporated under the laws of the State of Illinois. They are handling the grain trade, so far as warehouse storage is necessary; their liabilities are fixed under the statutes of that State and under Federal and State court decisions where the questions have been litigated in great detail.

I can not give this entire section my support, because it will in a very material way interfere with the conditions which now govern the storage of grain in Chicago and in other primary markets of that kind. It introduces a double set of liabilities. Of course, this is merely a permissive provision. It is not obligatory upon a warehouseman to take out a Government license, but if he is engaged in storing grain which becomes subject to the regulations of interstate trade and does not take out a license under the Department of Agriculture, he thereby renders himself liable to suspicion or criticism, and, in effect, morally, whether it does legally or not, it compels the warehouseman to apply for the license and subject himself to the liabilities provided in part C.

Here is where the material difference occurs. Before I very briefly explain that, I only wish to say that part C is the introduction to what I consider will later be an attempt to absorb by the Agricultural Department the entire subject of the storage of grain. There will follow what was attempted in connection with the inspection of grain. Originally it was the purpose in that case to take over the matter of grain inspection and make it practically a bureau of the Department of Agriculture.

Under the laws which have been worked out at considerable length, liabilities have been fixed and rates of storage have been provided by statute. The maximum rates, just as the maximum schedules of carriers by land, are provided. The liabilities here fixed are in section 21, as follows:

SEC. 21. That a warehouseman conducting a warehouse licensed under this act, in the absence of some lawful excuse, shall, without unnecessary delay, deliver the agricultural products stored therein upon a demand made either by the holder of a receipt for such agricultural products or by the depositor thereof if such demand be accompanied with (a) an offer to satisfy the warehouseman's lien; (b) an offer to surrender the receipt, if negotiable, with such indorsements as would be necessary for the negotiation of the receipt; and (c) a readiness and willingness to sign, when the products are delivered, an acknowledgment that they have been delivered if such signature is requested by the warehouseman.

This seems to me to impose the liability of an insurer. What the term "in the absence of some lawful excuse" means, no one is able to satisfactorily define at this time; but if the warehouse should be burned, whether by the negligence of the warehouseman or otherwise, is not the question. It might be struck by lightning; it might be destroyed in a general conflagration in the city for which no negligence attached to the warehouseman; still he is required to become responsible to the owner of the warehouse receipt. It is true that he can, if he wishes, insure the grain stored, but if it be insured it is an additional charge which must be carried by the warehouseman, and can not be covered under the ordinary rates of storage now paid.

The warehouse rates are high on grain. The usual rates for storing merchandise in the city of Chicago in an ordinary fireproof building, applied to grain in a warehouse, would be no measure of the premium charged to carry the risk by fire insurance companies.

I now read from the railroad and warehouse act of the State of Illinois, under which warehouses are incorporated and conduct their business. Many millions of bushels of grain pass through the warehouses annually. Their liabilities to the property owners and their duties to the general public have been worked out in great detail by various acts of the legislature and I do not believe there is any complaint from the general public of the service afforded by the warehouses in the primary markets, such as St. Louis, Memphis, Minneapolis, and Chicago.

The statute that regulates this business has been the result of experience. Originally the act, like all other acts, was written with no great detailed knowledge of the requirements, but the act has been perfected by 40 years of actual experience in storing grain—the experience of the warehouseman himself and of the public that patronize the warehouseman. From section 148 of this act I read the following measure of liability of a warehouseman, which is entirely different, as the Senator from Iowa has suggested, from the liability imposed by section 21 of part C of this bill.

Section 148 is as follows:

No public warehouseman shall be held responsible for any loss or damage to property by fire while in his custody, provided reasonable care and vigilance be exercised to protect and preserve the same; nor shall he be held liable for damage to grain by heating, if it can be shown that he has exercised proper care in handling and storing the same and that such heating or damage was the result of causes beyond his control; and in order that no injustice may result to the holder of grain in any public warehouse of classes A or B it shall be deemed the duty of such warehouseman to dispose of, by delivery or shipping, in the ordinary and legal manner of so delivering, that grain of any particular grade which was first received by them, or which has been for the longest time in store in his warehouse; and unless public notice has been given that some portion of the grain in his warehouse is out of condition or becoming so, such warehouseman shall deliver grain of quality equal to that received by him on all receipts as presented.

Warehouses are classified under this act so as to cover the kind of grain referred to in this bill as fungible grain. I need not explain at length what fungible grain is. It is understood by the trade in warehouse centers to be a delivery of a like kind of grain and not the identical grain that was delivered to the warehouseman by the owner. Wherever grain grades are dealt in, fungible grain is present. It only means that a like grade of the grain, although entirely different in its identity, shall be delivered and shall satisfy the warehouse receipt. The legal obligation has been met when grain, although of a different identity, but a like grade, is delivered. So, understanding that condition of the grain trade, section 135 of the act referred to was framed:

Public warehouses of class A shall embrace all warehouses, elevators, and granaries in which grain is stored in bulk and in which the grain of different owners is mixed together, or in which grain is stored in such a manner that the identity of different lots or parcels can not be accurately preserved, such warehouses, elevators, or granaries being located in cities having not less than 100,000 inhabitants. Public warehouses of class B shall embrace all other warehouses, elevators, or granaries in which grain is stored in bulk and in which the grain of different owners is mixed together.

Public warehouses of class C are not affected, because they are general warehouses for the storing and keeping of other kinds of merchandise.

Unless this part C and the sections referred to are amended I shall vote to strike out the whole of the part. It introduces a system of warehousing that creates confusion and that serves no useful purpose. It will only serve to embarrass the warehousemen that are already in business. They are now governed by rigid regulations. A warehouseman can not be a dealer in grain. His service is confined exclusively to receiving and storing grain. He is more or less the beneficiary or the victim of good inspection or bad inspection, as the case may be; the beneficiary if it is good inspection, and if it is bad inspection he may be called to account, because if he delivers a grade of grain that is palpably beneath that mentioned in the warehouse receipt he might possibly be held to a strict legal liability for the difference in the grades. So no one in that country or in any primary market is any more vitally concerned in good inspection, in the proper preservation of grades, than the warehouseman himself, because he may be at any time called upon to respond.

I wish to say here that some popular misconception exists in regard to the method of inspection in many of the States. Particularly as to the method in my own State, there seems to be a most vital misunderstanding. There is no such thing as a private inspector in Illinois. Not in the grain market of Illinois can you find a private inspector that is authorized to grade grain. Every inspector in that State is a public officer. He is appointed by the public utilities commission by its grain department. The old railroad and warehouse commission, under which all of these grades were made and the warehousing of that State done, has been superseded by the public utilities commission, which is a body that has the same jurisdiction but many added powers. In the inspection of the grain in Chicago, Peoria, East St. Louis, and Decatur, which are points covered by the public service, every grain inspector is a public officer. He gets in under an examination of his fitness. Some of them have been in business for 30 years as inspectors for the State. They are not subject to the ordinary spoils system that may prevail either in the State or the Federal service. A grain in-

spector enters the service, and it depends upon him, if he is a fit inspector, whether or not he remains an inspector for life. He can keep his place. Politics never interferes with him. The only thing that gets him his place and that keeps him his place is that he shall be able to grade the grains that come into the market. The board of trade has nothing to do with him. The grain exchanges of that country have no more to do with the licensing of a grain inspector than you or I have. I have nothing to do with him. No political influence can in any manner obtain the appointment or the discharge of an inspector.

I have been connected with the public service in some capacity in that State for 25 years, either as a member of the legislature or otherwise, and I wish to say to the Members of this body that at no time or place within 20 years have I ever sought, nor would I have been able, to influence in the slightest degree either the appointment or the discharge of a grain inspector in any one of the inspection points of that State. Complaints may be made—they are made by grain exchanges frequently—as to the lack of knowledge or ability on the part of an inspector, and they lead to an investigation. If sustained, the inspector is removed from the service. It is only on fitness for the service that he receives his appointment, and he can hold it in the same way. Ordinarily, if complaints are made, they are made by elevator men, by the local shipper at some place who does not get the proper grade, or by a grain exchange. If a board of trade member buys grain on in inspection, and dissatisfaction arises upon an actual examination of the grain, or when it is milled, or when it is taken to a seaboard point for the export trade, and a reinspection is had, and it is shown that the inspection has been improper, and that the grade is not right, then it is followed back until the inspector that graded the car is found, and then complaints are filed, and he may be separated from the service.

So that our service there, both the warehousing and the inspection service, is purely a public service, carried on by public officers, in which there is not a taint of politics.

The board itself is made up of men of all political parties. Some of them, like the members of the Interstate Commerce Commission, change as their terms expire and the new administration comes in, and it is very likely that the prevailing party appoints some one to fill the vacancy. But in the men that actually render the service there is no more politics in the grading of grain or the warehousing of Chicago than there is in a safety-appliance inspector who goes out on the road under the direction of the Interstate Commerce Commission to examine air brakes.

So I believe that these provisions of part C will serve no useful purpose unless it would be as a foundation for the absorption of the warehouse business where they handle grain that enters into interstate trade.

Mr. CUMMINS. Mr. President, I have but a word to say in addition to the suggestions I have already made.

I would not have the least objection to a national system of warehouses. I feel about this, as I did about the former provision, that it ought to be complete and general. This is neither. This is optional, incomplete, and I think would be very unsatisfactory in operation.

In addition to the objections that I have already made, I beg to say that this is another measure for the appointment of inspectors of grain, and it is not provided in this bill that the inspectors under the State service shall be appointed or licensed, but anyone can be licensed under this bill to inspect the grain. It is provided in section 15 of the bill—

> That grain, flaxseed, or any other fungible agricultural product stored for interstate or foreign commerce, or in any place under the exclusive jurisdiction of the United States, in a warehouse licensed under this act shall be inspected and graded by a person duly licensed to grade the same under this act.

If, therefore, an elevator located in a small community in any State were licensed as a warehouse, the grain that would be deposited in the elevator or warehouse must necessarily be inspected by some one licensed to do that work in that community; and it would be simply increasing the confusion which I think is certain to arise in the operation of what is known as the United States grain-grades act. In many respects this is duplicate legislation, but it is not guarded as the grain-grades act has now been guarded through amendments which have been offered and adopted on the floor of the Senate.

I can not give my consent to the construction of the Constitution which is adopted and apparently defended by those who are responsible for this measure. I can not agree that any building or structure in which there is or may be stored a product which may ultimately pass into transportation from one State to another is within the constitutional power. I do not believe that an elevator or warehouse of that sort is a facility of interstate commerce. I can not agree that we have any power to regulate a warehouse unless it is a facility of interstate commerce; and I do not believe that even then we can authorize the inspection or grading of any other grain or agricultural product in it save that grain or product which is, when graded, a part of interstate commerce.

The reasons that I have already given for my opposition to this kind of legislation will not be strengthened by repetition, and therefore I care to say nothing further about it.

At the conclusion of my remarks yesterday I asked for the yeas and nays upon my amendment whenever it might be voted upon. They were not ordered, I think. Other matters intervened, so that the RECORD does not show that the request for the yeas and nays had been seconded. I ask now for the yeas and nays upon my amendment, no matter when it may be voted upon.

The yeas and nays were ordered.

Mr. SHAFROTH. Mr. President, I want to say just a few words in closing this matter, if we are going to take a vote upon it.

The Senator from Iowa seems to think this measure is very ill considered. He seems to consider this as some kind of a measure that some member of the committee has put on the Agricultural bill as a rider, and that it has not received careful consideration. I will state to the Senator that this is the Moss bill as it passed the House of Representatives in the Sixty-third Congress, and was reported favorably by the Committee on Agriculture in the House on the 21st day of January of this year. It has received very careful consideration upon the part of the Agricultural Committee and in the discussion of the question in the Sixty-third Congress, so that it is not an immature bill. They have had the advice and the continued consultation of the Agricultural Department with relation to this matter, and particularly that department which is provided for as to marketing and rural organization.

Mr. President, I want to say just a few words now as to this warehouse act. It seems to me that the question of its constitutionality is very largely eliminated by the fact that this is not a compulsory measure. No warehouseman now operating under State laws need take advantage of this act. It is purely discretionary upon his part. Consequently, when he enters this system he does it with his own consent, and agrees to all the provisions and terms of the act. That these warehousemen will come in I have no doubt, because of the great advantage that is offered and will be offered by reason of being connected with a bonded warehouse of the United States Government. That is one of the advantages which every warehouseman will see. He will want to have his certificates offered in the market at as high a price and cashed at the banks at as little discount as possible, because he knows that the farmers and other people who store grain there will want that advantage; and therefore the grain will not go to the State warehouseman, but will go to this warehouseman who consents to give a bond to the United States Government for the faithful carrying out of the provisions of this act. That insures uniformity both as to receipts and as to the terms and conditions and as to the charges that may be made.

There is chaos in the market at the present time. One warehouseman can charge a higher rate for the storage of grain or other products than another warehouseman may. There has to be an investigation as to these matters when questions arise concerning the purchase of certificates. That chaos brings an absolute necessity, if we want to have cooperation and if we want to have the best available results from these warehouses, to make a uniform system so that when a person gets a receipt—what is called a warehouse receipt—he will know exactly what his rights are, he will know what charges are to be made upon the grain, he will know how long it has been there, he will know various other matters that are indispensable to the lending of money on these certificates.

Mr. CUMMINS. Mr. President——

Mr. SHAFROTH. I yield to the Senator.

Mr. CUMMINS. What becomes then of the argument made by the Senator from Georgia that all State laws and regulations shall remain in force?

Mr. SHAFROTH. They remain in force as to any person who wants to remain under the State system. That is true, there is not any doubt about that; they need not come into it.

Mr. CUMMINS. Precisely. We are now getting to the point. I construe the bill to remove a warehouseman's license under it from the operation of a State law. I so stated yesterday. But the Senator from Georgia seemed to think that even after he had been licensed by the Federal Government he still remains subject to the State law.

Mr. SMITH of Georgia. The Senator did not exactly understand me. My position was that he would be required, if he took this license, to comply with all the provisions of this act, and if the State had placed some additional burden upon him

he might be required to perform that, too. The warehouseman and the party receiving the certificate would know all the requirements of the act were complied with.

Mr. CUMMINS. But this act says in words that nothing contained in it shall relieve the licensee of any State law or regulation. That is a perfectly futile declaration, I agree. I do not see how the Senator from Georgia makes the distinction which he has just stated. But, however, I pass that.

I ask the Senator from Colorado if it is not true that the House defeated this bill twice, inasmuch as he has suggested that the House passed it once?

Mr. SHAFROTH. I was not aware that it did that. Anyway, the last time I understand it approved it.

Mr. SHERMAN. Mr. President——

Mr. SHAFROTH. I yield to the Senator from Illinois.

Mr. SHERMAN. I will say that the warehousing business is essentially local rather than national, to begin with. The only semblance of the foundation for Congress to exercise its power on a warehouse for grain is that the grain is engaged in interstate trade. A warehouse might be entirely local in character. Much of the grain stored in the principal grain markets in warehouses—I will not say the majority but much of it—never will get into interstate trade at all. Much of the grain that is brought from the southwest to market from the Oklahoma, Kansas, and Missouri wheat fields goes to St. Louis and is stored in warehouses there. The wheat is milled in St. Louis and never goes out of the State after reaching the warehouses there. The same is true of Illinois. In those cases in no essential particular is the warehouse business connected with interstate traffic.

It depends upon the intent of the owner. The owner of a warehouse certificate is as uncertain and indefinite or of just as transitory a character as the owner of a $10 bill, because it is as negotiable as any other negotiable instrument and passes by delivery. The title of the grain passes by delivery in the trade. What the owner of the warehouse receipt will do with it depends entirely upon his privileges at the point where he desires to use it, and he may or may not engage in interstate trade.

Now, the query in my mind is raised by the statement of the Senator from Colorado on the right of the Government to fix charges. I would rather if I were a warehouseman have the Government fix my charges for storage than have the State's legislature fix it. So it does not rest on the question of the reasonableness or extortion of the charges that are made by the warehouses; it is not the essential character of the occupation itself; but there is no proper power of Congress to regulate a warehouseman who stores grain to be milled in the State where his warehouse business is carried on. So it is separated and becomes a question of the intent of the holder of the warehouse certificate whether it becomes the subject of congressional regulation or not.

Mr. SHAFROTH. Mr. President, the answer to all that is plain, and it is this: The warehouseman need not take out a license unless he wants to, and he is not discriminated against in any way by reason of not doing it. The right of saying, "I shall operate under the State law" is preserved in this bill.

In addition to that, as an individual depositor of grain there he does not have to go to a United States Government bonded warehouse to do it if he is not going to have the grain enter into interstate commerce or foreign trade. The result will be that he can keep his grain at other places.

This is not prohibited in any sense upon his part. When he says "I want this," it is by reason of some advantage that he gets, and that advantage is in the fact that when he gets the receipt he knows it has a better standing at every bank where he wants to raise money, where he wants to make a sale of that warehouse receipt. They can rely upon the uniformity of the rules that exist all through the United States, as will be provided under the provision of this act. For that reason it is worth more to him and for that reason he will prefer to deposit his grain there. That being the case, nobody can complain, nobody can object, it seems to me.

Mr. President, one of the greatest advantages of this bill is the fact that if you will notice through the provisions of the bill there are requirements of publicity, requirements of how much grain you have, how much is stored, and consequently when all these reports are made to the United States Government you can tell to almost a bushel how much wheat, how much corn, how much rye, how much oats is in existence in storehouses.

There has been a great advantage on the part of speculators that they would get by inquiry—by a system of information due to themselves to determine whether or not a corner can be made on corn or a corner on wheat—but with this publicity giving the exact number of bushels of wheat and corn and rye and all the products stored in these warehouses the farmer is just as good a judge, and probably a better judge, as to what the market value should be and as to whether a corner can be made or not. Those are advantages which the Federal law would give and which can not exist under the State laws, one State requiring one thing, hardly any of them requiring publicity, and thereby having a confusion and a difficulty in obtaining the facts, so that it is almost impossible to do any business, nor would he undertake that feature of an investigation.

Mr. President, I know that with a Federal provision of this kind there would be uniformity of rules and regulations throughout the entire United States. There would be uniformity in the same kind of care and the same kind of attention. As it is now, when a warehouse receipt of a State is presented you do not know what care and attention has been given in that State. You know that perhaps Illinois, being a fine market, has a peculiarly fine system of inspection and a fine system of care and attention, but you do not know what Colorado has, you do not know what Utah has, and consequently it is all at sea and all has a tendency to discount the very instrument that the farmer wants to present either for discount or for sale.

Then, again, there are the uniform charges, as I said before—the uniform knowledge that exists as to the quantity that is in store or the exact date that it is in store.

Mr. SHERMAN. Mr. President——

Mr. SHAFROTH. I yield to the Senator.

Mr. SHERMAN. Uniformity of charges would be as impossible as uniformity of rent. What would be a reasonable charge in one place, a thousand miles from that point would be impossible, the warehouseman could not support his business on it.

Mr. SHAFROTH. That is to be controlled by rules and regulations. In certain zones or in a certain character of place where a warehouse is situated there probably would be permission given to charge a higher rate than at a certain other point where large quantities are handled. All that can be done by regulation, and the information will be ascertained by anybody in a minute or by simply a telegram to the Department of Agriculture of the United States Government.

Mr. SHERMAN. There is not a grain dealer in any of the four primary market points in my State that does not have the storage charges all over North America in his office pigeonholed, and he can turn to it just as quickly as you would turn to a dictionary to find the spelling of a word.

Mr. SHAFROTH. But the farmer has not.

Mr. SHERMAN. The farmer never will have the detailed knowledge of the grain trade that the grain dealer has.

Mr. SHAFROTH. That may be, but you will find that when he is going to make some sale he will know what the charges are there in the warehouse where he is going to store, and he is going to find out whether it is a proper charge or not, and he is going to have the schedules which the United States Government will issue with relation to these charges.

Mr. CUMMINS. Mr. President——

Mr. SHAFROTH. I yield to the Senator.

Mr. CUMMINS. I do not refer now to the argument of the farmer. That is not very conclusive upon the farmer, because the farmer does not deposit grain in the terminal market to any great extent. The Senator from Colorado has already said he does not want these things established in the local communities and does not expect it. I ask the Senator this question of law. I was rather surprised at the view taken by the Senator from Colorado. Does he think that the consent of the parties to the transaction can enlarge the constitutional power of Congress? That is to say, could a given community engaged in purely intrastate business be regulated by a law of the United States if they were to consent to the passage of a law concerning their affairs?

Mr. SHAFROTH. No, Mr. President, it is like the jurisdiction of a court. Jurisdiction is not conferred by consent, I concede that. But the Senator has admitted time and again that where these warehouses are used for the purpose of aiding and assisting interstate and foreign commerce, they are just and proper within the constitutional power of the United States Government.

Mr. CUMMINS. Precisely.

Mr. SHAFROTH. The Senator has said that several times.

Mr. CUMMINS. This law does not limit licenses to any such condition.

Mr. SHAFROTH. That is true, but——

Mr. CUMMINS. Nor does it limit the certificates that are to be issued upon the grain or products stored in them to grain destined for interstate commerce. If you have one grain of wheat in an elevator that is intended to go beyond the State, then the warehousemen can issue these certificates under inspection by a Federal officer for all the product in the elevator with-

out regard to its association or connection with interstate commerce.

Mr. SHAFROTH. Mr. President, in answer to that I will say that when the Senator concedes that warehousemen who are engaged in interstate and foreign commerce come within the constitutional provision referred to it seems to me he must admit that where something that is incidental to that is also included in the warehouse it can and must of necessity go with it. We had a discussion on the nitrate plant where it was conceded by all that the United States Government under its constitutional power has the right to manufacture explosives for the United States Government, and it was said that it also involved the question of selling when the plant was not needed by the Government in a time of peace. No one contended but that incidental power to manufacture a product to be used for a commercial purpose, even coming in competition with private business, was really included within the greater power of the Government to see that the plant is not run at a loss after it has been constructed for governmental purposes.

That being the case, these warehouses being proper instruments of distribution under the interstate commerce clause, it seems to me there can not be a negative, nor can there be excluded deposits of grain made there that may be intended by the owners who deposit it not to be for interstate commerce.

Mr. SHERMAN. Mr. President——

Mr. SHAFROTH. I yield to the Senator.

Mr. SHERMAN. Before the Senator leaves that subject, I wish to ask if there is any act of Congress or any power in Congress which fixes a warehouseman's liability on warehouse receipts.

Mr. SHAFROTH. Yes; where it is used in interstate commerce. It seems to me it comes within the scope of transactions of that kind.

Mr. SHERMAN. I wish to call the Senator's attention to the fact that the warehouse receipt is a negotiable instrument calling for the delivery of specific merchandise of a given kind whereas a promissory note is for the payment of money of the United States. A negotiable instrument can not be regulated by Congress. That has been repeatedly adjudicated by the proper authorities. A warehouse receipt is like a bill of exchange, or a draft, or a check, or a promissory note or any other negotiable instrument. It is wholly subject to the regulation of the State in which it is made and is not a proper matter for congressional action.

Mr. SHAFROTH. I can see very readily why promissory notes do not come within the rule. No one has ever claimed or contended that promissory notes become the subject of interstate commerce, but in the other instance it does. It seems to me that the grain becomes a subject of interstate commerce, and the evidence of the deposit of the grain would also come within the rule of that provision of the Constitution.

Mr. SHERMAN. The liability of a warehouseman for negligence is a matter of local regulation by the laws of the State and the supreme court's decision of that State. It would be impossible to fix a liability on the warehouse receipts any more than upon an insurance policy. Neither life policies nor fire policies are matters of congressional interference; they are purely matters of the State within the local laws of the State and the adjudication of the courts of last resort. The warehouse receipt is in precisely the same list.

Mr. SHAFROTH. If a person wants to keep the warehouse receipt under State laws, he has the privilege under this act to do it; but whenever you have the power, which seems to have been conceded by everyone in this debate, to have a warehouse as an instrument of interstate commerce, it seems to me that all the incidents that flow from the keeping of it will necessarily follow as a part of it and as being authorized under interstate commerce.

Mr. President, just one more word and then I am through, and that is as to the influence which the Government will have as to where the warehouses will be located. A condition existed at the breaking out of the European war by which it was found that the people of the South wanted to preserve their cotton, because there was no market in which to sell it, and they found there were plenty of warehouses in the South for that purpose, but they were not located at the right places. They had been put under the authority of the State legislature and under, probably, individuals. The result was that where there was a quantity of space they were unable sufficiently to be accommodated by reason of the fact that they were not located conveniently.

There is nothing in this act which would compel the erection of a warehouse in any one place. I take it when this cooperation is made to exist between the States and the National Government, and these people voluntarily go into the system, they will advise with the Department of Agriculture as to where in their judgment would be the best points for the erection of these warehouses. It would have a wholesome tendency, in the interest of economy, to keep warehouses where they are needed, and it thereby obviates the loss of money and capital invested by reason of the fact that they were located in a useless place.

So, Mr. President, it seems to me that if there is an act on the statute book that is intended for the interest of the farmer, giving him better security, giving him more certainty of knowing what he has, giving him uniformity of charges as far as possible, it is in the provisions of this act; and he will know when he gets his grain in a bonded warehouse that the United States Government will protect it. By reason of that fact you will find that they will uniformly have the warehouses in the State transferred to a license under the Federal administration in pursuance of the provisions of this warehouse act.

For that reason, it seems to me, the benefits to the farmer and the benefits to the warehousemen are all one way, and that this provision is in their interest.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Iowa [Mr. CUMMINS] to strike out what is known as the warehouse clause of the bill. The yeas and nays have been ordered on the amendment, and the Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CLAPP (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS]. In his absence, and not knowing how he would vote, I am disposed to withhold my vote for the present.

Mr. CLARK of Wyoming (when his name was called). I withhold my vote because of the pair which I have with the senior Senator from Missouri [Mr. STONE], who is absent.

Mr. CURTIS (when his name was called). I have a pair with the junior Senator from Georgia [Mr. HARDWICK], and therefore withhold my vote.

Mr. GRONNA (when his name was called). I have a general pair with the Senator from Maine [Mr. JOHNSON]. Not knowing how he would vote on this question, I will withhold my vote.

Mr. SUTHERLAND (when his name was called). I inquire whether the Senator from Arkansas [Mr. CLARKE] has voted?

The VICE PRESIDENT. He has not.

Mr. SUTHERLAND. I have a pair with that Senator, and for that reason withhold my vote.

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "nay."

Mr. WADSWORTH (when his name was called). May I ask if the junior Senator from New Hampshire [Mr. HOLLIS] has voted?

The VICE PRESIDENT. He has not.

Mr. WADSWORTH. I have a pair with the Senator from New Hampshire, and I therefore withhold my vote.

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the junior Senator from Arkansas [Mr. ROBINSON], which leaves me free to vote. I ask that this announcement stand for the day. I vote "nay."

The roll call was concluded.

Mr. CURTIS. Mr. President, I have been requested to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Maryland [Mr. SMITH];

The Senator from New Mexico [Mr. FALL] with the Senator from West Virginia [Mr. CHILTON];

The Senator from Vermont [Mr. PAGE] with the Senator from Indiana [Mr. TAGGART];

The Senator from Michigan [Mr. SMITH] with the Senator from Missouri [Mr. REED];

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY]; and

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS].

Mr. JAMES. I desire to inquire if the junior Senator from Massachusetts [Mr. WEEKS] has voted?

The VICE PRESIDENT. He has not.

Mr. JAMES. I have a pair with that Senator, which I transfer to the junior Senator from Oklahoma [Mr. GORE] and vote. I vote "nay."

Mr. LIPPITT (after having voted in the affirmative). I find that the Senator from Montana [Mr. WALSH], with whom I am paired, is not present. I therefore withdraw my vote.

Mr. SHERMAN (after having voted in the affirmative). I wish to inquire if the senior Senator from New Jersey [Mr. MARTINE] has voted?

The VICE PRESIDENT. He has not.

Mr. SHERMAN. I have a pair with the senior Senator from New Jersey, and therefore will withdraw my vote.

Mr. DU PONT (after having voted in the affirmative). I have a general pair with the junior Senator from Kentucky [Mr. BECKHAM], who is not in the Chamber, and I will therefore withdraw my vote.

Mr. OVERMAN (after having voted in the negative). I should like to inquire if the junior Senator from Wyoming [Mr. WARREN] has voted?

The VICE PRESIDENT. He has not.

Mr. OVERMAN. I have a general pair with that Senator; but I transfer that pair to the senior Senator from Indiana [Mr. KERN], and will let my vote stand.

Mr. CHAMBERLAIN (after having voted in the negative). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence I transfer that pair to the Senator from Maryland [Mr. LEE] and will let my vote stand.

The result was announced—yeas 10, nays 40, as follows:

YEAS—10.

Cummins	Jones	Nelson	Works
Gallinger	Kenyon	Smoot	
Harding	Lodge	Townsend	

NAYS—40.

Ashurst	Husting	Owen	Smith, Ga.
Bankhead	James	Phelan	Smith, S. C.
Borah	Johnson, S. Dak.	Pittman	Sterling
Brady	La Follette	Poindexter	Swanson
Broussard	Lane	Pomerene	Thomas
Bryan	McCumber	Ransdell	Thompson
Catron	Martin, Va.	Shafroth	Tillman
Chamberlain	Norris	Sheppard	Underwood
Fletcher	O'Gorman	Shields	Vardaman
Hitchcock	Overman	Smith, Ariz.	Williams

NOT VOTING—45.

Beckham	Goff	McLean	Smith, Md.
Brandegee	Gore	Martine, N. J.	Smith, Mich.
Chilton	Gronna	Myers	Stone
Clapp	Hardwick	Newlands	Sutherland
Clark, Wyo.	Hollis	Oliver	Taggart
Clarke, Ark.	Hughes	Page	Wadsworth
Colt	Johnson, Me.	Penrose	Walsh
Culberson	Kern	Reed	Warren
Curtis	Lea, Tenn.	Robinson	Weeks
Dillingham	Lee, Md.	Saulsbury	
du Pont	Lewis	Sherman	
Fall	Lippitt	Simmons	

So the amendment of Mr. CUMMINS was rejected.

The VICE PRESIDENT. The bill is still before the Senate as in Committee of the Whole and open to further amendment.

Mr. GRONNA. Mr. President, I wish to offer an amendment. On page 107, line 10, after the word "shall," I move to insert the word "knowingly," so as to read:

SEC. 9. That any person who shall knowingly violate any of the provisions of sections 4 or 7 of this act—

And so forth.

Mr. SMITH of Georgia. Mr. President, I think we can accept that amendment.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. NELSON. I desire to offer an amendment to which I call the attention of the Senator from Georgia. On page 111, in line 22, after the word "act," I move to add the words, "including a requirement for fire insurance," so that the provision, commencing with line 17, will then read:

Said bond shall be in such form and amount, shall have such surety or sureties, subject to service of process in suits on the bond within the State, District, or Territory in which the warehouse is located, and shall contain such terms and conditions as the Secretary of Agriculture may prescribe to carry out the purposes of this act, including a requirement for fire insurance.

Mr. SMITH of Georgia. Mr. President, we will accept that amendment. I do not know that it is necessary, but I am glad to have it in the bill for further consideration.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. SHEPPARD. I desire to give notice that I shall ask for a separate vote in the Senate on the amendment which was offered by the Senator from New York [Mr. WADSWORTH], in line 3, on page 57, of the bill.

Mr. ASHURST. I desire to give notice that I shall ask for a separate vote on the amendment proposed by the Senator from Louisiana [Mr. BROUSSARD], on page 78, line 17.

Mr. CATRON. I should like to inquire of the Chair if it is necessary to give notice of a separate vote on any item when the bill reaches the Senate?

The VICE PRESIDENT. The technical phrase is "reserve the amendment," but the notice that a separate vote will be demanded in the Senate serves the same purpose.

Mr. CATRON. I reserve the right, then, to have a separate vote in the Senate on the amendment on page 78, line 17, proposed by the Senator from Arkansas [Mr. CLARKE].

Mr. SMOOT. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 30, line 22, it is proposed to strike out the semicolon after the words "United States" and to insert in lieu thereof a colon and add the following:

Provided, That investigations in forestry and forest utilization may be authorized by the Secretary of Agriculture in Mexico, Central and South America.

And, on page 41, line 9, to strike out "$78,728" and insert in lieu thereof "$103,728."

Mr. SMITH of Georgia. I should like to have the amendment stated once more.

The Secretary again stated the amendment.

Mr. BORAH. Mr. President, I should like to ask the Senator from Utah to explain the amendment.

Mr. SMOOT. I will be glad to do so.

Mr. GALLINGER. Particularly the Mexican part of it.

Mr. SMOOT. Mr. President, the amendment involves an appropriation of $25,000, and authorizes the Forest Service to make original investigations in forestry and forest utilization in tropical America to obtain information needed by business interests of the country. Vast quantities of forest products—dyewoods, gum, resin, mahogany, rosewood, and all kinds of timber—are annually imported into the United States from these countries. There has been no extensive investigation made of the woods of South America and Mexico, from which we get so much of our hardwood, about one-third of the hardwood of the world coming from those countries. The business interests of the United States are becoming more and more dependent upon tropical America for hardwoods, and have asked the department on many occasions for reports upon the availability of hardwoods in those countries and where they could most profitably be procured. Up to the present time there has been but a meager investigation made on the part of our Government—none, I may say, with the exception of a casual survey made by, I think, a party of one or two Government representatives. The department feels that an investigation of this kind would be of immense benefit to this country, because everyone knows that the hardwoods of America are getting scarcer and scarcer and that we shall be obliged to go elsewhere to obtain them.

I call attention to the fact that in the Philippine Islands the investigations which have been made there—and they have been made under the provisions of Agricultural appropriation bills in the past—have demonstrated that there are woods in those islands that can be used in this country most profitably. South American dyewoods, gums, and hardwoods are all needed in this country, and I believe that with the expenditure of this amount of money—and that is also the belief of the department—the desired information can be given to the various business interests in this country which use this class of material.

I had my attention called, Mr. President, the other day to the discovery of what is called "pipa" in Panama, which the experts believe will take the place of sisal. The plant is found in a wild state; the fiber is taken from the leaves. It is finer and stronger than sisal, and it is claimed that it can be produced for less money per pound.

Mr. POINDEXTER. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Washington?

Mr. SMOOT. I yield to the Senator.

Mr. POINDEXTER. The Senator's amendment provides for investigations in forestry. What the Senator is now speaking of is the utilization of forest products. I do not understand the Senator's purpose in proposing to have an investigation of forestry in Mexico and Central America, which is quite a distinct proposition from the utilization of the woods and forest products of which the Senator is now speaking.

Mr. SMOOT. No, Mr. President; I will admit that what I had reference to in referring to the discovery of fiber in Panama has nothing whatever to do with the amendment that I have offered. I was only calling attention to this question to show that through investigations that may be made of the forests of the South, not only may a product of the kind it referred to be discovered, but there may be other discoveries that will be of great advantage to the United States. I am not asking for an appropriation for that purpose, but I am referring to this particular product for the purpose of showing that there may be in that unexplored country other articles that would be of inestimable value to the people of the United States.

The amendment on page——

Mr. SMITH of Georgia. Let us dispose of this first. The other is an increase of the appropriation.

Mr. SMOOT. They both go together. The first part of the amendment provides for the investigation, on page 30, beginning on line 22, and the increase of $25,000 is carried in the appropriation as named in my amendment. The appropriation found on page 42 is that which takes care of the general expenses of the Forest Service.

Mr. SMITH of Georgia. The Senator increases it from $78,000 to $103,000?

Mr. SMOOT. Yes; the increase is $25,000. I will say to the Senator that the amount has not been estimated for. It is a new question that was brought to my attention but a few days ago, when I was asked to introduce the amendment. I am perfectly aware that a point of order will lie against the amendment.

Mr. SMITH of Georgia. Mr. President, it may be true that we would be glad to have this information; but it strikes me as rather novel to put our Agricultural Department and its agents into a foreign country to investigate their resources.

Mr. SMOOT. It is being done in a limited way at present, I will say to the Senator, in a few of the South American countries. My amendment, however, gives specific authorization and makes an appropriation directly for that purpose. I will say to the Senator that it is broadening an investigation that has already taken place in a very limited way.

Mr. SMITH of Georgia. It seems to me very doubtful as to whether our Agricultural Department ought to be sending representatives into foreign countries. We have our Consular Service and our duly accredited consuls, and if, under our Consular Service, it is found necessary to acquire information of this kind——

Mr. CLARK of Wyoming rose.

Mr. SMITH of Georgia. I yield to the Senator from Wyoming.

Mr. CLARK of Wyoming. I was going to say to the Senator that I see no difference in principle between the investigation which the Senator from Utah contemplates in his amendment and the investigations that are already being carried on all over the world, substantially, by our Agricultural Department in seeking out new kinds of grasses or forage or fruits that can be made available for production in this country. The Agricultural Department all the time has representatives abroad seeking out, for instance, sorts of grain that will do best in the arid regions of this country, grasses that will produce more nutriment than the grasses we already have, and so forth. It has its agents substantially all over the world now, aside from our Consular Service.

Mr. SMITH of Georgia. This goes beyond that, very decidedly. That is a matter of looking to see what seeds they have in order that we may plant their seeds here. It is a study of conditions abroad in order that we may introduce improved methods here. This proposition is, through the Department of Agriculture, to investigate the products of that country which are to enter into commerce, and which we are subsequently expected to buy. It occurs to me that clearly it falls within the service of our consular representatives and the State Department, and that it is not a line of work in which the Agricultural Department should be engaged. It might perhaps be well to enlarge the services of our consular representatives in this line; but it belongs to our foreign relations and to our commerce, and not to our agriculture.

I do not think it ought to pass in this way, and especially I do not think it ought to be passed coming from the floor without careful consideration. Of course it is subject to a point of order, and I think the point of order really ought to be made. I do not think we ought to introduce a new line of work in this way upon the floor; and I make the point of order.

Mr. SMOOT. Mr. President, will the Senator withhold the point of order just a moment?

Mr. SMITH of Georgia. I withhold it.

Mr. SMOOT. I think this question no doubt will come before the Congress in the very near future, and I believe that when it is fully understood there will be no objection to it. I have here a summary made by the department, showing the results of immediate economic importance to the United States, and also a summary of the scientific results that are likely to be accomplished. I am not going to take the time of the Senate to read it, but I shall ask that these two summaries be printed in the RECORD as part of my remarks, as showing just what the department expects to accomplish if this undertaking is authorized by Congress, either now or at some subsequent time.

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter referred to is as follows:

Results of immediate economic importance:
1. Estimate of forest resources of economic importance to the United States.
a. By-products, such as tannin products, dyewoods, gums, resins, oils, Brazil nuts, etc.
b. Mahogany and other cabinet woods.
c. Cigar-box cedar and substitutes for the same.
d. Heavy timbers, such as greenheart, purpleheart, violet wood, etc.
2. Exploration of forests with a view of finding species which, like the Dipterocarp family in the Philippine Islands, can be used as substitutes for the conifers and thus open a new source of supply of general construction timbers.
3. Investigation into the possibilities of utilizing the tropical forests.
4. Present methods of utilization of the timber resources of tropical America with the view of determining the possibilities for American logging and sawmill machinery.
5. Search for trees whose introduction may be of economic value to the United States.

Scientific results:
1. Preparation of a more accurate map showing the extent and classes of forest areas.
2. Contribution to our knowledge of the forest resources of the world with special reference to the conservation movement in the United States.
3. Collection of commercial samples of wood, whose botanical identity is known, for testing of their physical and mechanical properties at the forest products laboratory at Madison, Wis.
4. Collection of herbarium and museum specimens of trees, woods, and other forest products.
5. A more intimate botanical and biological knowledge of the tropical tree species—their ranges, their growth and dimensions, their soil and climatic requirements, and their uses.
6. A knowledge of tropical silviculture—methods of management, utilization, and preservation of tropical forests.
7. Contribution to our knowledge of tropical forests and their relation to physical and biological factors.
8. Contribution to our knowledge of the relation between tropical forests and the regulation of water resources.
9. Contribution to our knowledge of land laws governing the disposal of public domain in tropical America.
10. Knowledge of existing forest organizations in the different South American countries.
11. Publication of results.

Mr. VARDAMAN. Mr. President, may I ask the Senator what sum of money he is asking for this purpose?

Mr. SMOOT. Twenty-five thousand dollars. I am perfectly willing, though, if the Senator thinks it is too much, to have it reduced.

Mr. SMITH of Georgia. No; it is not the amount. I do not think the Agricultural Department ought to engage in this work independently of the Consular Service.

Mr. SMOOT. The Forest Service is under the Agricultural Department and we appropriate for that purpose. Does the Senator know that this same department has made an investigation of all the woods of the Philippine Islands?

Mr. SMITH of Georgia. But they belong to the United States, and that is their proper province.

Mr. SMOOT. I am aware of that; but I am only stating that to show what may be accomplished, and with a great deal more benefit to the United States, if this same investigation is made in South America. I will say that woods in the Philippine Islands that were thought to be absolutely useless have through these investigations been shown to be profitable not only to the Philippine Islands but to the manufacturers of wood products in this country.

Mr. SMITH of Georgia. The Senator misunderstands me if he thinks I object to gathering the information. I regard it as of very doubtful propriety, however, to gather it in this way. It is changing the Agricultural Department into a service that properly belongs to our Consular Service and involves it in diplomatic and consular, rather than agricultural, work.

Mr. SMITH of South Carolina. Mr. President, a point of order. The Senator from Georgia and the Senator from Utah both admit that this item is subject to a point of order, and as the Senator from Georgia has made it I will make it now—that it provides for an appropriation without an estimate.

The VICE PRESIDENT. The point of order having been made that the amendment is not estimated for, the point of order is sustained.

Mr. OWEN. Mr. President, I wish to call the attention of the Senator from Illinois to a point of order that he made, on page 127, in the Blair case. The amendment was designed to relieve a case of peculiar hardship, and, as I understand, it met the approval of the committee. I wish to appeal to the Senator to withdraw the point of order, as this man has been practically ruined, and it is impossible to get a general provision on the bill.

Mr. SMOOT. What page is that?

Mr. OWEN. Page 127. The Senator from Illinois [Mr. SHERMAN] made the point of order against it.

Mr. SHERMAN. Mr. President, we have endeavored by some general provision to provide for the payment of claims in the case of dipped cattle resulting in damage to the owner. We have prepared an amendment of that sort, and we have gone so far as to present it to the committee for its consideration. It appears, however, upon an examination of the question, that the incorporation in the bill of a general provision of that kind would open the way to some million and a half or two million

dollars' worth of claims in years past, and it would be an injustice to the Government.

In this particular case the gentleman is 74 years old, and all of his means were invested in his herd of cattle, and it would be a very great hardship, bankrupting him. I am ready to, and do, withdraw the point of order that I made.

Mr. GALLINGER. Mr. President, I will renew the point of order. It is a private claim on an appropriation bill.

The VICE PRESIDENT. The unfortunate part about it is that the Chair sustained the point of order, and the Chair does not see how he could withdraw his ruling.

Mr. GALLINGER. The Chair could not very well do so.

Mr. STERLING. Mr. President, I note that in lines 12 and 13, on page 107, the words "or carelessly" were stricken out by amendment, but a little further down, in line 15, the words "or carelessly" occur again. I think, perhaps, it is an oversight that the bill has not been amended in that respect, and I move that the words "or carelessly," as they occur on line 15, page 107, be stricken out.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 107, line 15, after the word "knowingly," it is proposed to strike out the words "or carelessly."

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. GALLINGER. Mr. President, I do not know but that those words should be likewise stricken out in line 22, page 106, unless there is some differentiation between the two sections. In this provision it relates to an inspector who "has been found to be incompetent, or has knowingly or carelessly graded grain improperly." I do not think those words "or carelessly" amount to much.

Mr. STERLING. I will say to the Senator that there is this difference between the two sections: In the section from which he has just read the careless act is made a cause for dismissal of the inspector, and he, perhaps, should be dismissed for carelessness, but in the other case he is subject to a penalty of $1,000 or imprisonment for not more than one year, or both.

Mr. GALLINGER. I will not move to amend the bill in that particular, then.

Mr. McCUMBER. Mr. President, why should the inspector be excused for carelessness? I should like the Senator to explain under what theory a party can excuse himself for what would amount really to criminal negligence by merely asserting that he was careless in his work.

Mr. STERLING. Mr. President, I hardly think that a man should be adjudged guilty of an infamous crime, as this would make him, for an act of mere carelessness. This act, as I say, makes the penalty for carelessness a fine of not more than a thousand dollars, or imprisonment for not more than a year, or both such fine and imprisonment. I think the intent of the party ought to govern and determine as to whether or not he has committed a crime. Independently of any intent to commit a crime, and for merely acting without due care, he is made and can be adjudged guilty of a crime. I hardly think that is right, and I think the provision is too drastic.

Mr. McCUMBER. Mr. President, I assume that the law would be enforced by judges who would have some humanity in their make-up; and as the fine or imprisonment may be just as little as a judge might be inclined to impose, and the maximum is fixed, without any minimum, I do not think there is any danger in this respect.

But let me give a little illustration of some work that was done, according to the testimony, in one of the great cities, where a single inspector, in a single day, certified the grades of 250 cars. Now, every one of those cars was sold upon a guess. The work necessarily was carelessly done, because no one could grade that many cars in a day. It would necessitate over 5 miles of travel, in addition to opening the car and making the test on both sides of the car with the usual tester. In certifying those grades this one inspector, while he earned for his employer somewhere, I think, over $65 that day for the fees charged, necessarily made a careless, and therefore an unjust, certification of every one of those cars. Now, why should he be excused? The owner of a car may have gained or he may have lost two or three grades on that car.

Mr. STERLING. The Senator from North Dakota, I think, states an extreme case—a case that is not likely to happen—and further, while a court may impose the smallest penalty allowed under this statute, it may impose the limit of a thousand dollars, and the imprisonment for a year as well, or both. It is not just what the court may do, but what the court could do under the law, that makes a provision like this objectionable. I am rather opposed on principle to making that a crime where the intent to commit a crime is lacking, especially when there are such heavy penalties as are imposed here.

If the Senator will have in mind the provision to which his attention was called by the Senator from New Hampshire, I think he will find that the careless act of the inspector is guarded against. He is subject to dismissal for carelessly grading grain; and I think the criminal part of it should be confined to an act where there is the intent.

Mr. McCUMBER. It seems to me, Mr. President, that the Senator is more fearful of an injustice being perpetrated under the provision of the law by the judge, by imposing an extreme penalty where justice would not demand it. It seems to me that if that is the case it ought to be met by reducing the maximum penalty, rather than by allowing any party to excuse himself wholly on the ground of carelessness. If the Senator thinks that too heavy, why not move, then, to reduce the maximum penalty? But I insist that there should be some punishment other than mere dismissal for careless failure to perform a duty imposed by law.

Mr. STERLING. Mr. President, I should like to have the Senator from North Dakota explain what difference there is between the two acts—the inspecting or grading of the grain in the first instance and the certifying to the grade thereafter. We have amended the act already so as to strike out the words "or carelessly," as they apply to the grading or inspecting of the grain. Why retain the words "or carelessly" with respect to the issuance of the certificate? I see no reason why they should not be stricken out there as well as in the other place.

Mr. McCUMBER. I do not think they should be stricken out in either place. By the amendment which I offered, the one which is practically adopted, I retain them. I think the words should be retained.

Mr. SMITH of Georgia. Let the amendment be read. We have not been able for some time to hear what is going on on the other side.

Mr. STERLING. I will state to the Senator from Georgia it is the amendment to strike out the words "or carelessly." I will say further they have already been stricken out with reference to the grading and inspecting. I am simply asking to have them stricken out with reference to the certificate.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 106, line 22, after the word "knowingly," strike out the words "or carelessly."

The amendment was rejected.

Mr. SMOOT. I intended to offer an amendment to the bill to provide a proportionate share of the amount required for the construction of an interstate wagon road through the Mukuntuweap National Monument, Utah, $15,000. I offered it as in Committee of the Whole. I intended to reserve the right to offer it in the Senate. I expected an estimate from the department for the amount. If it does not arrive by the time the bill gets into the Senate, I shall not offer it, because I am quite sure that the amendment, like every other one I have offered, would go out on a point of order.

The VICE PRESIDENT. The bill is still as in Committee of the Whole and open to amendment. If there be no further amendments, as in Committee of the Whole, the bill will be reported to the Senate.

The bill was reported to the Senate as amended.

The VICE PRESIDENT. The question is on concurring in all the amendments, save those which have been reserved for a separate vote.

The amendments were concurred in.

Mr. CATRON. There was an amendment put on the bill at page 78, line 17.

The VICE PRESIDENT. The amendments on which separate votes were demanded will be taken up in their order.

Mr. STERLING. I should like to understand the situation in regard to the amendment I moved a while ago. I understand that the Secretary in referring to it referred to it as amendment offered on line 22, page 126. That is not the amendment I offered. The amendment I offered was on line 15, on page 107.

The VICE PRESIDENT. The amendment at line 15, page 107, was agreed to some time ago.

The VICE PRESIDENT. The first reserved amendment will be stated.

The SECRETARY. The amendment reserved by the Senator from Texas [Mr. SHEPPARD] appears on page 57, line 3, where after the word "demonstrations" the words were inserted "upon the lands of the United States," and as amended it reads:

For investigating the food habits of North American birds and mammals in relation to agriculture, horticulture, and forestry, including experiments and demonstrations upon the lands of the United States in destroying wolves, coyotes, prairie dogs, and other animals injurious to agriculture and animal husbandry, and so forth.

The VICE PRESIDENT. The question is on concurring in the amendment made as in the Committee of the Whole.

Mr. SHEPPARD. Mr. President, I wish to say that I do not think it advisable to confine experiments in, and demonstra-

tion of, methods of destroying wolves, coyotes, and other predatory animals to public lands alone. We might as well confine the demonstration work of the department in all its other phases to public lands. I do not think it is proper or advantageous. The various States should have the benefit of this demonstration work within their borders when particular conditions demand it. Therefore I appeal to the Senate not to confirm its action in adopting the amendment as in Committee of the Whole.

Besides, Mr. President, the adoption of this amendment will interfere with the demonstration work of the department under the Smith-Lever Act. Under that act the department undertakes demonstrational work in the several States, showing the results of its efforts along all lines. In the State of Texas valuable work has been done by the Biological Bureau in the matter of demonstrating the best method of destroying predatory animals.

It is true Texas has no public land, but it is one of the great western range States. It adjoins several of the public-land States. Predatory animals, driven from the public lands of some of those States, will come into the State of Texas and other States adjoining the public-land States.

Therefore I appeal to the Senate to reverse its action in Committee of the Whole.

Mr. SHAFROTH. Mr. President, I wish to say relative to this matter I do not see why this appropriation should be confined to the public-lands States. It is the General Treasury of the United States that is being appropriated from, and while these conditions to an alarming extent do exist on the public lands of the United States, I do not see why, if the same conditions exist in other States, the Department of Agriculture should be limited in the expenditures to public lands only.

For that reason I heartily concur in the vote which the Senator from Texas is asking.

Mr. WADSWORTH. Mr. President, the amendment to which the Senator from Texas refers was one offered by myself in Committee of the Whole. The Senate will undoubtedly remember that the debate which took place was largely in connection with the very desirable destruction of predatory animals which are spreading rabies in certain portions of the Northwestern States, and also the very desirable destruction of those same animals, whether they have rabies or not, on the ground that being bred on the public lands of the United States they emerge from those lands and do damage to the herds and flocks of settlers upon privately owned land.

Mr. SHEPPARD. That is not the only reason which prompts us to ask that this demonstration work be carried on, and that it be done in other States besides public-land States.

Mr. WADSWORTH. I was about to cover that point. At the time the amendment was adopted I expressed my sympathy with those who contended that the United States should take care of pests originating on its own land, particularly when those pests become affected with rabies and threatened the health and security of the flocks and herds, and even of human beings living next to the national domain, whether it be national forest or public lands. But I did utter a protest against the United States Government going into the business of demonstrating and experimenting with the work of killing predatory animals, including wolves, coyotes, and prairie dogs. I think it is utterly absurd for any Government agent or Government employee to go, we will say, to a ranchman in Texas and presume to tell him how to trap a coyote or how to poison a prairie dog. They have known how to do it for generations, and it is being done there and has been done for many years past. Coyotes are trapped by the hundreds and thousands, and also are shot, and I myself have had them trapped at 20 cents a head by boys 12 years of age.

Mr. SHEPPARD. Ranchmen of Texas have expressed themselves as being highly pleased with this demonstration work on the part of the Government. They welcome the work and say that it has been a tremendous benefit to them; that the Government experts have taught them methods with which they had been unfamiliar.

Mr. WADSWORTH. Mr. President, I have no doubt that the ranchmen of Texas in meeting the Senator in convention assembled are entirely willing to adopt a resolution requesting the Federal Government to give aid for this work, but no individual ranchman in Texas has ever told me, and I have been a member of its executive committee for some time, that they needed the Federal Government to teach them how to kill prairie dogs or coyotes or how to shoot wolves. They recognize perfectly well that those animals do damage, but they are entirely competent to take care of them. It is only a matter of having a man shoot straight to get a wolf. You can not trap him, I will admit; he is too cunning. The ranchmen who are interested in eradicating the wolf from the ranges of the country have been doing it upon their own account and as individuals. I have never heard that they needed the assistance of the Government of the United States any more than the farmers in other sections of the country need the assistance of the Government of the United States to help kill a woodchuck, or chipmunk, or any animal that under the terms of this bill can be termed a predatory animal.

So it goes with prairie dogs and the coyotes. There is nothing you can teach those people in the way of killing or shooting or trapping or poisoning those animals. I think it is unwarranted and paternalism run rampant for the Senate of the United States to direct the Department of Agriculture to go on the privately owned property of any ranchman and presume to tell him by demonstration and experiment how to poison a prairie dog.

Mr. LODGE. Mr. President——

Mr. WADSWORTH. I yield to the Senator from Massachusetts.

Mr. LODGE. Of course, the argument that this money shall be spent on States having public lands is unanswerable, for the United States should be responsible for its own lands and for the pests that may be engendered there or emerge from the lands. But the Senator from New York overlooks a very important point. Here is some money to be spent out of the United States Treasury. Why should it be confined to the regions where it ought to be spent? Why should it not be distributed, like the gentle dew from heaven, to every place beneath everywhere in all the States? Why should not my State get some? We have no wolves and no coyotes and no prairie dogs that I am aware of, but we might have our farm boys taught how to kill them.

Mr. THOMAS. Has not the Senator a few Bull Moose in his State?

Mr. LODGE. Very few, I think, now; not enough to require a demonstrator. But why should not all the States where they have these pests get their share of this Government money that is to be spent?

Mr. GALLINGER. Mr. President——

Mr. WADSWORTH. I yield to the Senator from New Hampshire.

Mr. GALLINGER. If the Senator from New York will permit me I think I missed an opportunity when the bill was in Committee of the Whole. In the State of New Hampshire we have so many woodchucks that the legislature passed a law paying a bounty for their capture. They are very destructive to agriculture in New Hampshire. Our gardens are invaded by these mischievous animals. Of course we have dogs that capture a good many of them, but I really think that if this is going to be spread over the country the woodchucks ought to be taken care of as much as the prairie dogs, and if it is in order at the proper time I will offer an amendment including woodchucks.

Mr. WADSWORTH. May I suggest to the Senator from New Hampshire that under a liberal construction of this language woodchucks may be hunted by the Federal Government?

Mr. GALLINGER. Yes; all predatory animals.

Mr. WADSWORTH. And all animals injurious to agriculture.

Mr. GALLINGER. But it would be better to have it specifically stated, so that they would come north and do a little of this work in New England.

Mr. WADSWORTH. I am inclined to agree with the Senator from New Hampshire that we should be specific in our legislation; and woodchucks should be named in the bill also, and——

Mr. THOMAS. Perhaps the Senator from New York overlooked also the element of preparedness in this appropriation. If these animals can be swept out of existence, their predatory effect on the meat production of the country will disappear and we will be better prepared to meet an enemy.

Mr. WADSWORTH. Mr. President, I do not care to take the time of the Senate more. I think the matter is perfectly clear.

Mr. SHEPPARD. Mr. President, the State of Texas has expended $200,000 out of its own treasury in the effort to destroy these predatory animals, and many other States of the Union have expended as much or more. The task of exterminating predatory animals is a scientific matter, one requiring expert knowledge, accurate training, and one in which the demonstration work of the department will be of great value.

There is just as much reason for the department to aid and assist in the extermination of wolves and other predatory animals as it is for the department to assist in the extermination of the gypsy moth in the State of the Senator from Massachusetts and in the State of the Senator from New York, or in

exterminating cattle tick in other States of the Union. It is not a matter to be laughed down.

The records show that the loss inflicted by these predatory animals amounts to $15,000,000 every year in the United States. Many countries have been struggling with them and trying to exterminate them for centuries. The ordinary methods have failed. It is a matter which requires constant study and effort on the part of experts.

Mr. WADSWORTH. Will the Senator from Texas yield for a question?

Mr. SHEPPARD. Certainly.

Mr. WADSWORTH. Does the Senator from Texas contend that the cattlemen of Texas are incompetent to exterminate prairie dogs, and that they need some scientific expert to go there and teach them?

Mr. SHEPPARD. That is not the question at all. I resent the insinuation the Senator attempts to convey. Prairie dogs represent a very small part of the work.

Mr. WADSWORTH. I am defending them from the imputation.

Mr. SHEPPARD. It is a defense they will not appreciate and have not sought at the hands of the Senator from New York.

Mr. PITTMAN. Mr. President, this matter was discussed fully before and I have nothing more to add to what I said on a former occasion, except that while I am deeply interested in the protection of the great food products of the country and while I believe it is required by the extermination of predatory animals just as much as any other means of protection of food products, I think that the greatest question in connection with the extermination of the rabid coyotes is to prevent the further extending of this dread disease. As I stated the other day, there have been 30 human beings, some of them children, treated at the University of Nevada by the Pasteur treatment. That disease is spreading. It has already spread from Oregon clear to the northern borders of Arizona and to the Sierra Nevada Mountains and Utah. They are doing everything they can locally to fight it. The State has appropriated money, the various counties have appropriated money, the cattle men have put up $100,000 toward it. It seems to me a further discussion of this matter should not be required.

The VICE PRESIDENT. The question is on concurring to the amendment made as in Committee of the Whole.

Mr. CATRON. I should like to have the amendment read.

The SECRETARY. On page 57, line 3, after the word "demonstrations," the words "upon the lands of the United States" were inserted, so as to read:

For investigating the food habits of North American birds and mammals in relation to agriculture, horticulture, and forestry, including experiments, and upon the lands of the United States in destroying wolves, coyotes, prairie dogs, and other animals injurious to agriculture and animal husbandry, etc.

Mr. CATRON. Mr. President, just one word. I was informed that the amendment was intended to apply to the public-lands States, but I see that it only applies to the public lands of the United States. In every State where there are public lands of the United States there are a lot of private lands, and if it is not made to apply to them all predatory animals will be driven from the public lands by these Government men hunting them and it will impose upon the settlers ten times as much labor to kill those animals or protect against them as would be the case otherwise. It should not be fixed so that the agents of the Government will drive these predatory animals on private property and cause damage to it when they can not go on the private property under this law and protect it.

The VICE PRESIDENT. The question is on concurring in the amendment made as in Committee of the Whole. [Putting the question.] The ayes seem to have it.

Mr. SMOOT. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CATRON (when his name was called). I am paired with the Senator from Oklahoma [Mr. OWEN] generally, and in his absence I withhold my vote. I should vote "nay" if I were not paired.

Mr. CLAPP (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS]. He is absent. I do not know what his views are on this subject. I withhold my vote for the present.

Mr. GRONNA (when his name was called). I have a general pair with the senior Senator from Maine [Mr. JOHNSON]. I do not know how he would vote, and I will therefore withhold my vote.

Mr. SHERMAN (when his name was called). I am paired with the senior Senator from New Jersey [Mr. MARTINE] and withhold my vote. I will let this announcement stand until further notice.

Mr. WADSWORTH (when his name was called). Has the junior Senator from New Hampshire [Mr. HOLLIS] voted?

The VICE PRESIDENT. He has not.

Mr. WADSWORTH. I have a general pair with that Senator and withhold my vote.

The roll call was concluded.

Mr. CURTIS. I was requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Maryland [Mr. SMITH];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS];

The Senator from Vermont [Mr. PAGE] with the Senator from Indiana [Mr. TAGGART]; and

The Senator from Michigan [Mr. SMITH] with the Senator from Missouri [Mr. REED].

Mr. TILLMAN. I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "yea."

Mr. CHILTON. I transfer my pair with the Senator from New Mexico [Mr. FALL] to the Senator from Oklahoma [Mr. GORE] and vote "yea."

Mr. CLARK of Wyoming. I ask if the senior Senator from Missouri [Mr. STONE] has voted.

The VICE PRESIDENT. He has not.

Mr. CLARK of Wyoming. I have a general pair with that Senator and withhold my vote.

Mr. WALSH. I wish to announce that my colleague [Mr. MYERS] is absent on account of illness. As has been stated, he is paired with the Senator from Connecticut [Mr. MCLEAN].

The result was announced—yeas 36, nays 28, as follows:

YEAS—36.

Bankhead	Harding	Lodge	Sterling
Beckham	Hardwick	McCumber	Swanson
Borah	James	Oliver	Thomas
Brandegee	Kenyon	Overman	Tillman
Broussard	Kern	Phelan	Townsend
Chilton	La Follette	Pomerene	Underwood
Cummins	Lane	Ransdell	Weeks
Curtis	Lee, Md.	Smith, Ariz.	Williams
Gallinger	Lippitt	Smith, Ga.	Works

NAYS—28.

Ashurst	Fletcher	Norris	Smith, S. C.
Brady	Hughes	O'Gorman	Smoot
Catron	Husting	Pittman	Sutherland
Chamberlain	Jones	Poindexter	Thompson
Clarke, Ark.	Martin, Va.	Shafroth	Vardaman
Culberson	Nelson	Sheppard	Walsh
du Pont	Newlands	Shields	Warren

NOT VOTING—31.

Bryan	Gronna	Martine, N. J.	Sherman
Clapp	Hitchcock	Myers	Simmons
Clark, Wyo.	Hollis	Owen	Smith, Md.
Colt	Johnson, Me.	Page	Smith, Mich.
Dillingham	Johnson, S. Dak.	Penrose	Stone
Fall	Lea, Tenn.	Reed	Taggart
Goff	Lewis	Robinson	Wadsworth
Gore	McLean	Saulsbury	

So the amendment was concurred in.

The SECRETARY. The only other amendment reserved for a separate vote in the Senate is the amendment reserved by the Senator from New Mexico [Mr. CATRON], on page 78.

Mr. CATRON. Mr. President, I gave notice that I would raise the point of order in the Senate on the amendment which was offered by the Senator from Arkansas [Mr. CLARKE] and placed on the amendment which had been offered by the Senator from Oklahoma [Mr. GORE]. I now make the point of order, first, against the portion of that amendment which was interposed by the Senator from Arkansas, which is a provision that cattle from South and Central America, Mexico, and the Caribbean islands may be introduced into the southern quarantine zones. I raise the point of order that it is general legislation.

Mr. UNDERWOOD. I should like to ask the Senator from New Mexico as to the exact language to which he raises the point of order?

Mr. CATRON. I gave notice that I would raise the point of order against that particular portion of the amendment; and that if the point of order was not sustained I would raise it against the whole amendment as it stood when that amendment was added to the amendment proposed by the Senator from Oklahoma.

I first raised the point of order against the portion of the amendment which was introduced as an amendment to the amendment of the Senator from Oklahoma, and then I reserved the right to also make the point of order against the entire amendment. I want a ruling on my point of order

whether or not I can raise the point of order as to the part of the amendment that was put onto the original amendment.

The VICE PRESIDENT. The Chair is of the opinion that the amendment was amended as in Committee of the Whole, and that the amendment as amended was agreed to in Committee of the Whole, and that therefore the point of order must go to the entire amendment.

Mr. CATRON. Then I raise the point of order against the entire amendment that it is general legislation.

Mr. GALLINGER. Mr. President, let the amendment as to which the point of order is raised be stated.

The VICE PRESIDENT. The Secretary will state the amendment.

The SECRETARY. On page 78, after line 17, the following was inserted as in Committee of the Whole:

That section 8 of the act approved August 20, 1912 (37 Stat. L., p. 315), entitled "An act to regulate the importation of nursery stock and other plants and plant products; to enable the Secretary of Agriculture to establish and maintain quarantine districts for plant diseases and insect pests; to permit and regulate the movement of fruits, plants, and vegetables therefrom, and for other purposes," be, and the same hereby is, amended so as to read as follows:

"SEC. 8. That hereafter the Secretary of Agriculture is authorized and directed to quarantine any State, Territory, or District of the United States, or any portion thereof, when he shall determine the fact that a dangerous plant disease or insect infestation, new to or not theretofore widely prevalent or distributed within and throughout the United States, exists in such State or Territory or District; and the Secretary of Agriculture is directed to give notice of the establishment of such quarantine to common carriers doing business in or through such quarantined area, and shall publish in such newspapers in the quarantined area as he shall select notice of the establishment of quarantine. That no person shall ship or offer for shipment to any common carrier, nor shall any common carrier receive for transportation or transport, nor shall any person carry or transport from any quarantined State or Territory or District of the United States, or from any quarantined portion thereof, into or through any other State or Territory or District, any class of nursery stock or any other class of plants, fruits, vegetables, roots, bulbs, seeds, or other plant products, or any class of stone or quarry products, or any other article of any character whatsoever capable of carrying any dangerous plant disease or insect infestation specified in the notice of quarantine except as hereinafter provided. That it shall be unlawful to move, or allow to be moved, any class of nursery stock or any other class of plants, fruits, vegetables, roots, bulbs, seeds, or other plant products, or any class of stone or quarry products, or any other article of any character whatsoever capable of carrying any dangerous plant disease or insect infestation specified in the notice of quarantine hereinbefore provided and regardless of the use for which the same is intended from any quarantined State or Territory or District of the United States or quarantined portion thereof into or through any other State or Territory or District in manner or method or under conditions other than those prescribed by the Secretary or Agriculture. That it shall be the duty of the Secretary of Agriculture, when the public interests will permit, to make and promulgate rules and regulations which shall permit and govern the inspection, disinfection, certification, and method and manner of delivery and shipment of the class of nursery stock, bulbs, seeds, or other plant products, or any class of stone or quarry products, or any other article of any character whatsoever capable of carrying any dangerous plant disease or insect infestation specified in the notice of quarantine hereinbefore provided and regardless of the use for which the same is intended from a quarantined State or Territory or District of the United States or quarantined portion thereof into or through any other State or Territory or District; and the Secretary of Agriculture shall give notice of such rules and regulations as hereinbefore provided in this section for the notice of the establishment of quarantine: *Provided*, That before the Secretary of Agriculture shall promulgate his determination that it is necessary to quarantine any State, Territory, or District of the United States, or portion thereof, under the authority given in this section he shall, after due notice to interested parties, give a public hearing under such rules and regulations as he shall prescribe, at which hearing any interested party may appear and be heard, either in person or by attorney."

That the act of August 30, 1890, entitled "An act providing for an inspection of meats for exportation, prohibiting the importation of adulterated articles of food or drink, and authorizing the President to make proclamation in certain cases, and for other purposes" (26 Stat. L., p. 414), is hereby amended so as to authorize the Secretary of Agriculture, within his discretion and under such joint regulations as may be prescribed by the Secretary of Agriculture and the Secretary of the Treasury, to permit the admission of tick-infested cattle from Mexico, South and Central America, the islands of the Gulf of Mexico, and the Caribbean Sea into those parts of the United States below the southern cattle quarantine line at such ports of entry as may be designated by said joint regulations and also subject to the provisions of sections 7, 8, 9, and 10 of said act of August 20, 1890.

That all such cattle, when entered, shall be subject to the regulations governing the handling and transportation of cattle from the districts infected with the southern, Texas, or splenetic fever.

Mr. UNDERWOOD. Mr. President, I assume that the point of order made by the Senator from New Mexico [Mr. CATRON] to the amendment offered by the Senator from Oklahoma [Mr. GORE] as amended, is that the amendment is in violation of clause 3 of Rule XVI, which prohibits legislation on an appropriation bill.

Mr. President, the purpose of that rule is to prevent a deluge of legislation on appropriation bills; but it is optional with the Senate as to whether or not it will legislate on appropriation bills. It is customary to pass a great deal of legislation on appropriation bills. It is true that one Senator at the appropriate time fixed by the rules may raise an objection to legislation on an appropriation bill, and if the Chair sustains the point of order the legislation can not be enacted; but if no Senator objects or if, when the proper time comes, Senators who might object neglect to do so, the legislation comes before the Senate for consideration.

Mr. President, I recognize the fact that there are two sets of rulings on this question. It has been held that even if objection is not made as in Committee of the Whole, and the bill is reported to the Senate, a point of order can be made in the Senate, and will be good; but, on the other hand, it has been held by the present occupant of the chair that, if objection be not made as in Committee of the Whole and the legislation be passed without objection and come to the Senate, then the point of order will come too late.

Mr. President, I propose to direct my remarks to the question as to which position in parliamentary law is the better for the expedition of business and for the logical and safe consideration of legislation. I desire, first, to read the decision of the present occupant of the chair on this question. I read from Gilfry's Precedents—Decisions on Points of Order in the United States Senate 1913–1915, page 185:

The Agricultural appropriation bill having been reported to the Senate from the Committee of the Whole—

The Senator from Colorado [Mr. THOMAS] said:

Mr. President, an amendment has been adopted, as in Committee of the Whole, on page 83, at the end of the printed bill, offered by the Senator from Kansas [Mr. Bristow] making an appropriation of $500,000 for the building of lakes and reservoirs in the West. I wish to make a point of order against that appropriation that it has not been estimated for and that it is a new item of appropriation added to the bill.

Mr. SMOOT. Has the bill been reported to the Senate, Mr. President?

The VICE PRESIDENT (Mr. MARSHALL). It has been.

Mr. CATRON. Mr. President, will the Senator please give me the page of the book of precedents from which he is reading?

Mr. UNDERWOOD. I am reading from page 185 from Precedents, 1913–1915, second edition, volume 2. I will resume the reading:

The VICE PRESIDENT (Mr. MARSHALL). It has been. The Chair is of the opinion that unless the point of order was made as in Committee of the Whole it can not be made when the bill is in the Senate.

Mr. THOMAS. If that is the ruling of the Chair I accede to it.

Mr. President, there is no question that the present occupant of the chair has decided this question in a ruling that is on all fours with the question now pending before the Senate. Of course, I concede that there have been decisions the other way.

The question before the Senate is whether the precedent that was made by the present occupant of the chair is the wise decision for the Senate to follow.

Mr. GALLINGER. Mr. President, will the Senator from Alabama permit me to interrupt him?

Mr. UNDERWOOD. I will.

Mr. GALLINGER. The present President of the Senate seemed to base his ruling upon a decision made in 1877 by Mr. Ferry, who was then President pro tempore of the Senate; but will the Senator from Alabama read what the Vice President subsequently said, beginning on page 185 and going on to the next page, where the Chair seemed to entertain some doubt?

Mr. UNDERWOOD. Mr. President, I stated in the beginning that the question had been decided both ways.

Mr. GALLINGER. But I wanted the Senator from Alabama to know what the present occupant of the chair stated subsequently to the ruling which has been read.

Mr. UNDERWOOD. I will continue the reading:

Mr. LODGE. Mr. President, I think there can be no doubt that a point of order can be made both as in Committee of the Whole and in the Senate, unless there is some new rule to the contrary.

The VICE PRESIDENT. It has been decided a number of times otherwise. A separate vote on the question can be had in the Senate if it is desired.

Mr. GALLINGER. It is not that language of the Vice President to which I referred. Will the Senator from Alabama kindly go down to the paragraph, beginning "The Vice President subsequently said"?

Mr. UNDERWOOD. Mr. President, I will ask the Senator from New Hampshire to read in my time the language to which he refers.

Mr. GALLINGER. I am sorry to disturb the Senator from Alabama, but it is the language of the Vice President to which I referred. It is as follows:

The VICE PRESIDENT subsequently said: The Chair wishes that the reporter would go back to the place where the Chair ruled on the point of order, and let it be stated that the decision of the Chair was based on the ruling of President Pro Tempore Ferry, but that the Chair will not be bound by it in the future, unless convinced that the ruling of the President pro tempore at that time was correct.

The Chair seemed to have some doubt in his mind after making the ruling; that was all.

Mr. UNDERWOOD. Mr. President, as I stated in the beginning, I concede the fact that this question has been decided both ways. The present occupant of the chair has held that it is too late to raise a point of order after a bill reaches the Senate. The question that I bring before the Senate is as to whether we shall abandon the precedent established by the present occupant of the chair or maintain it, and as to which is better for the orderly conduct of the business of the Senate.

I think that if there is one criticism of this body that can be made—and justly made—it is that the Senate of the United States practically runs without rules. We are often incapable of doing business in this body because there are no practical rules for the government of the body that can be lived up to and maintained. I am not criticizing anybody in the Senate to-day or anybody in the past for that condition. It is a condition that grew up when the Senate of the United States was organized. Originally there were less than 13 States represented in the Senate—I believe 11 States, although the other two came in subsequently—and there were 22 Senators when the rules were originally adopted. Down to the time of the Civil War there were in the neighborhood of 40 Senators. To-day we have 96 Senators—practicaly a working legislative body of a hundred men. The whole question of rules is not as to their application to one set of men or another set of men but the whole question in a legislative body as to rules that are needed to govern that body is a question of numbers. If the Senate were composed of 10 men or 22 men, the number under which the Senate originally organized, it could practically run without rules; no rules would be needed except to provide for the election of a presiding officer. It would be like a lot of directors sitting around a table. But if you have a legislative body of a thousand men you must have the most drastic rules or you will transact no business whatever. Now, what I contend is that the rules which we have in the Senate we inherited from a period when the Senate was composed of very few men. The rules, which were perfectly good in their application at the time when they were formulated, are absolutely out of date to-day.

I am one of those Members of the Senate who would readily and cheerfully vote for a reasonable cloture rule in this body, and for a redrafting of the rules along a parliamentary plan under which the Senate could transact business in an orderly way; but it does not seem probable that such a revision can be adopted. When, however, we reach a question of this kind, the Senate can certainly determine whether it will move toward a set of rules or precedents that will aid in the orderly and expeditious transaction of business or whether it is going to keep the gates wide open for delay and continued confusion in legislative enactment. That is the situation that we are facing on this amendment.

In the House of Representatives they have a rule prohibiting legislation on appropriation bills; but if an amendment which is out of order is offered, some Member must rise in his seat and make the point of order before the amendment is taken under consideration. Why is that? For a very sane and logical reason. Why should the time of the House or the time of the Senate be taken up with unnecessary debate and unnecessary consideration of a question when subsequently it can go out on a point of order? We are supposed to be here attending to the public business; it costs the people of the United States money to keep this body in session, and why should we stand for a rule—the House of Representatives does not—which says that a Senator may sit quiescent in his seat, allow debate to go on for hours and days concerning a question that is subject to a point of order and, after it has been debated without limit, considered, and voted upon, then at a subsequent period come before the Senate, raise a point of order, and say that the entire time occupied by the Senate in the consideration of the question was a nullity and of no value? On the other hand, a Member of this body is supposed to be diligent; he is supposed to guard his rights and the rights of his constituents. If in the Senate legislation is offered to a bill being considered as in Committee of the Whole, he has ample opportunity certainly under the rules, which do not limit him as the rules of the House do the Members of that body, by requiring a point of order to be made the minute the amendment is offered, at any time when the subject is under consideration as in Committee of the Whole to get up and make a point of order.

If I could make the precedent, I would follow the rule of the House and say that a point of order must be made when an amendment is offered and before it is considered; but I certainly think it would be a futile ruling for the Vice President to abandon the position he has already taken in this matter, which would be equivalent to saying that when a Senator has had full opportunity, as in Committee of the Whole, before an amendment has been adopted to make a point of order, then, after the bill goes into the Senate, one Senator alone can undo the work of hours or days of the entire Senate by getting up and making a point of order.

In the other House, as I have indicated, after debate and amendment, the point of order comes too late; and it certainly ought to come too late in the Senate, for the very logical and sane reason that we are not here to trifle away our time and are not here to delay public business.

Of course if an amendment is subject to a point of order upon the objection of one Senator, I do not criticize him at all for making it; that is his right; but I do criticize the legislative body that will let a Senator sit quiescent for days and days, and then at any time before the bill is finally disposed of to come in and wipe out the consideration that this legislative body has given to a subject. I say it is the duty of that Senator—and the precedent established by the Vice President should be sustained to that end—to be diligent and not ask his colleagues to waste their time in the consideration of a question if he proposes to kill it by the power that one man can exercise.

Mr. President, I do not desire to unduly occupy the time of the Senate on this question. I think it is not only an important question in reference to this amendment, but in reference to all amendments. For instance, the amendment to which the Senator from New Mexico happens to object was adopted as an amendment to an amendment which the Senator from Oklahoma [Mr. GORE] offered, and to which no Senator had any objection, so far as I know. The Senator from Oklahoma is not here. He was here when the amendment was adopted, and left the Chamber with the idea that his amendment was in the bill, and now to say that we will extend our rules so far that two or three days after that happens one member of this body can go back and shoot that entire thing out of the bill is not a logical position to take.

Mr. President, in view of the fact that this question has been decided one way and then decided another, I wish to ask the Chair to submit——

Mr. NORRIS. Mr. President, I should like to ask the Senator a question on that point, if he will permit me.

Mr. UNDERWOOD. I yield.

Mr. NORRIS. While it is true that, if this point of order is sustained, it would throw out of the bill the entire amendment, including that portion of it which the Senator says was offered by the Senator from Oklahoma [Mr. GORE] and to which, so far as I know, there was no objection, it would be in order immediately afterwards to offer to the bill in the Senate the same amendment that was offered by the Senator from Oklahoma.

Mr. UNDERWOOD. Undoubtedly; but in this case the Senator from Oklahoma does not happen to be here. Some other Senator may offer it. Some other Senator may be able, or may not be able—I do not know—to protect his rights; but I was not considering the question of whether the amendment of the Senator from Oklahoma ought to stay in or ought to go out. I was discussing the absurd position the Senate of the United States puts itself in under its rules when it says that we can debate for days a vital proposition before the Senate, and yet, after the debate is over and the vote is taken, one man who has not acted up to that time can throw out all the work of the Senate.

I think there is ample opportunity to protect appropriation bills against legislation. That ought to be done when the amendments are offered. Senators who are primarily supposed to do that are the chairmen of the committees and the Senators on the committees, who are always in the Chamber, and they know whether they want to act or not. They can raise the point of order at the appropriate time, and thus the time of the Senate is not wasted, but for the Senate to adopt a ruling that, after a bill has passed from the Committee of the Whole into the Senate, a point of order can be made, and, if sustained, the item be thrown out, would simply be putting itself on record as continuing to be in favor of the endless delay and the endless debate, without limitation, that is a just charge against the procedure of the Senate to-day.

Mr. CLARKE of Arkansas. Mr. President, may I interrupt the Senator from Alabama while I make an announcement?

Mr. UNDERWOOD. Certainly.

Mr. CLARKE of Arkansas. I gave notice that at 2 o'clock I would ask the Senate to consider the conference report on the river and harbor bill. The matter under consideration is one of great importance; and I ask now that I may be permitted to call up the conference report on the river and harbor bill when this matter has been discussed and decided.

Mr. UNDERWOOD. I thank the Senator for allowing us to proceed.

I think I have stated the case as I understand it. In view of the fact that this precedent ought to be firmly established one way or the other—and that can only be done by the Senate

itself, because in the final analysis the Senate is the judge of its own rules and its own precedents—I desire to ask the President of the Senate, as it is his right to do if he desires to do so, to submit this question for the decision of the Senate itself.

Mr. GALLINGER. Mr. President, just a word.

It is undoubtedly true that this question has been decided both ways, for the reason that the present President of the Senate and the present President pro tempore of the Senate have ruled differently. The senior Senator from Arkansas [Mr. CLARKE], President pro tempore of the Senate, made this observation:

> If the question shall arise during my brief occupancy of the chair, I shall not hesitate to hold that a point of order can be presented in the Senate, even though it may not have been urged in the Committee of the Whole.

Aside from these two differing views, my recollection is that it has been almost universally held in the Senate that a point of order could be made in the Senate, even though it might not have been made in the Committee of the Whole. A Senator may be absent when an amendment is attached to a bill in Commitee of the Whole. He is present when it comes to the Senate, and he exercises his right, as we have almost invariably held, to make his point of order in the Senate.

The Senator from Alabama seems anxious that we should adopt the rules of the House in certain particulars. I am not at all anxious that we should do that. I think our own rules are infinitely better than those of the House of Representatives, because we have an opportunity to discuss questions here, to debate them on their merits, and to decide them after they have been fully considered. So I do not agree with the Senator from Alabama that we ought to adopt any of the rules of the House of Representatives that are in conflict with our present code of rules.

Very likely our rules might be revised and modernized. I agree to that myself. But as they stand to-day they are the rules governing this body, and they seem to answer their purpose remarkably well. We are getting along with legislation rather slowly this session, but we will get along with it more rapidly after a while, and in due time we will get through with our arduous labors for this session. That time can not come any too soon to suit me.

In the discussion of the bill under consideration I have felt, as other Senators have felt, that a great deal of time has been occupied; but it has been occupied by Senators on both sides of the Chamber, and I have sometimes wondered whether the Senators on the Democratic side were not filibustering against the bill, they having occupied so much time.

Mr. President, of course I will yield to the decision of the Chair on this matter; but I join with the Senator from Alabama in the request that the Chair—as it is his privilege to do under the rules—submit this matter to the Senate. I think the Senate ought to be given an opportunity to decide whether a point of order can be made in the Senate, it having been neglected or overlooked when the bill was in the Committee of the Whole, and that the decision of the Senate ought—at least for the present—to govern the action of the body in that regard.

I will say, frankly, Mr. President, that if it was my privilege to be in the chair when this question was raised I should rule that the point of order could be made in the Senate. But I am not in the chair and do not expect to be. I have great regard for the fairness of the present President of the Senate, and have, I believe, on only one occasion taken an appeal from his ruling and was then voted down. I know that the present occupant of the chair, even though he has ruled in one direction on this question—suggesting subsequently that possibly he would revise his ruling, it having been based upon a decision made 39 years ago or thereabouts—would rule conscientiously on the matter. But, after all, is it not better, inasmuch as there is a conflict between the Vice President and the President pro tempore of the Senate on this question, to submit it to the Senate for its wise consideration?

I join with the Senator from Alabama in that request.

Mr. CATRON. Mr. President——

The VICE PRESIDENT. The present Presiding Officer has listened to this discussion in violation of the plain rule of the Senate which provides that a question of order, unless submitted to the Senate, shall be decided by the Presiding Officer without debate. The present occupant of the chair has listened to this discussion in the hope of getting some light upon the question. He is now requested by two Senators to submit this question to the Senate of the United States for decision.

The Senate itself is the final arbiter in this matter. At the time the Chair made the ruling and based it upon the opinion of President pro tempore Ferry, and reserved the right to reverse the decision if convinced that it was wrong, the Chair's attention had not been called to the very clear exposition of the rules of the Senate by the President pro tempore of the Senate; and the Chair now believes that the President pro tempore was right, and the Vice President was wrong. But, in accordance with the request of the Senators, the point of order is submitted to the Senate; and the question is, Is the point of order well taken?

Mr. UNDERWOOD. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. CATRON and Mr. CLARKE of Arkansas addressed the Chair.

The VICE PRESIDENT. The Senator from New Mexico.

Mr. CATRON. I suppose this matter is debatable?

The VICE PRESIDENT. Yes; it is now open for debate.

Mr. CATRON. Mr. President, the Senator from Alabama has given his idea as to why this rule was made; that is, that it was intended to prevent obstructing or filling up these appropriation bills with all kinds of matter. This rule was made, in my judgment, for the express purpose of preventing certain measures from being incorporated in a general appropriation act which could not be passed as separate acts, or action on them had, outside of it. It was really for the purpose of preventing them from being brought in, but compelling them to remain outside and take their chances otherwise. This is one of them that ought to be kept outside and take its chances. That is the reason why that rule was made, and nothing else, if I can understand it correctly.

Mr. ASHURST. Mr. President, will the Senator yield to me for a moment?

The PRESIDING OFFICER (Mr. POMERENE in the chair). Does the Senator from New Mexico yield to the Senator from Arizona?

Mr. CATRON. Certainly.

Mr. ASHURST. I think it would be a very good plan just now for the Senator from New Mexico to clear up what appears to be a discrepancy. The distinguished Senator from Alabama made a very able and forceful argument to the effect that laches or delay occurred in making the point of order. Why, Mr. President, just so soon as the amendment was offered, the Senator from New Mexico was on his feet to make the point of order. Just so soon as he could learn what the amendment was, just so soon as he could understand what it was to have it read, he made the point of order. I call attention to page 10497 of the RECORD. I think the Senator ought to state that he made the point of order at the first opportunity he had to make it.

Mr. UNDERWOOD. In order that the Senate may not be misled, the Senator did not make the point of order until after the amendment had been agreed to. It may have been the first opportunity he had.

Mr. ASHURST. It was agreed to about as quickly as anything that ever happened in this body.

Mr. GALLINGER. Mr. President, will the Senator permit me one word?

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from New Hampshire?

Mr. CATRON. Yes.

Mr. GALLINGER. The fact is now before us that both the Vice President, who is President of the Senate, and the senior Senator from Arkansas, who is President pro tempore of the Senate, have come to the conclusion that a point of order can be made in the Senate even though it may not have been made in the Committee of the Whole, the Vice President having stated that he is satisfied that the former ruling he made was erroneous, so I hardly think it needs great discussion. The Senate, I think, will stand by its President and its President pro tempore on a point of order.

Mr. CATRON. Mr. President, it has been urged here that I have stood by and allowed this amendment to be agreed to without raising the point of order. In a certain measure that is true, but it is not true as a substantial fact. This amendment—the portion of it to which I am raising the point of order—was introduced independently of being attached to the amendment of the Senator from Oklahoma, and I made the point of order against it, and the Chair ruled that the point of order was well taken. Immediately after that I turned my back. I was over about the center of the aisle, and was coming around toward my seat. There was considerable confusion in the Chamber. The senior Senator from Arkansas [Mr. CLARKE], when the amendment which was offered by the Senator from Oklahoma was called up, made a motion to amend that amendment, so the RECORD shows, by adding the original amendment which had been ruled out on the point of order.

Mr. ASHURST. Mr. President, will the Senator from New Mexico permit me to observe that that amendment was not read and not sufficiently identified to disclose to anybody what it was?

Mr. CATRON. I will state that fact. I think I know that. He made that motion without having the amendment read, but simply made the motion that the amendment which had been previously proposed be added to that amendment. It was done very quickly and while there was confusion, and I did not hear what took place. As soon as I reached my seat my associate on might right here, the Senator from Nebraska [Mr. NORRIS], called my attention to what had been done, and I immediately rose and gave notice that I would reserve the right to raise a point of order against this amendment when it came into the Senate, stating that I had raised it against the amendment as it was originally offered, and that I would make it to the amendment to the amendment, and to the entire amendment if that was not sustained.

That is the exact situation as to this amendment. I was here; I was attending to my business, and this matter was put in without having the amendment read at all. If it had been read, as it should have been read, instead of saying "I propose an amendment which has heretofore been offered," thus alluding to it, and if the language itself had been specific, the situation would have been different. To say that I stood by and slept on my rights is entirely unjustified. That idea is one that prevails in courts, but it does not prevail in bodies like this, a deliberative body. Besides, this matter had been ruled on by the presiding officers of the Senate, not only on that particular occasion as to the particular matter, but it had been ruled that such questions could be raised in the Senate proper. I wish to call attention now to Rule XV, which I think has some bearing on this proposition:

> All bills and joint resolutions which shall have received two readings shall first be considered by the Senate as in Committee of the Whole, after which they shall be reported to the Senate; and any amendments made in Committee of the Whole shall again be considered by the Senate, after which further amendments may be proposed.

Now, if amendments which are made in Committee of the Whole are to be considered, are they to be considered partially? Are they to be considered in a single way only, or with reference to all the rights that you had in Committee of the Whole? It seems to me that no other construction can be put upon that than that when it comes into the Senate you have the same right to act with reference to it as you had in Committee of the whole.

Mr. ASHURST. Mr. President, before the Senate decides whether or not the amendment is subject to a point of order, I deem it expedient, for two or three minutes only, to state what the amendment is.

The amendment will be found on page 12078 of the RECORD. It was first proposed by the Senator from Louisiana [Mr. BROUSSARD], as the Senator from New Mexico stated, and it provides:

> That the act of August 30, 1890, entitled "An act providing for an inspection of meats for exportation, prohibiting the importation of adulterated articles of food or drink, and authorizing the President to make proclamation in certain cases, and for other purposes" (26 Stat. L., 414), is hereby amended so as to authorize the Secretary of Agriculture, within his discretion and under such joint regulations as may be prescribed by the Secretary of Agriculture and the Secretary of the Treasury, to permit the admission of tick-infested cattle from Mexico, South and Central America, the islands of the Gulf of Mexico and the Caribbean Sea into those parts of the United States below the southern cattle-quarantine line at such ports of entry as may be designated by said joint regulations, and also subject to the provisions of sections 7, 8, 9, and 10 of said act of August 30, 1890. That all such cattle, when entered, shall be subject to the regulations governing the handling and transportation of cattle from the districts infected with the southern, Texas, or splenetic fever.

In other words, Mr. President, the amendment sets out in haec verba that cattle that are tick infested may be imported into the United States—one of the most bizarre (and I say it with respect) amendments I have ever read.

Coming from a State and a section of our country which has a great deal of live stock, coming from a State where we have spent many thousands of dollars and even millions of dollars to eradicate and keep out cattle infested with ticks, splenetic or Spanish fever—and right here I want to correct a wide misapprehension about the Texas fever; it ought not to be called Texas fever; it is the Spanish fever—I think it would be a very improper thing now to admit, under any circumstances, cattle infested with this tick or with any kind of fever.

Mr. BROUSSARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Louisiana?

Mr. ASHURST. Certainly; I cheerfully yield.

Mr. BROUSSARD. I know the Senator does not want to misconstrue the wording of the amendment.

Mr. ASHURST. I do not.

Mr. BROUSSARD. The amendment does not authorize or permit the importation of a solitary head of cattle into any port of the United States with a single tick upon it, nor does it contemplate nor permit the importation of any cattle at all with any other kind of communicable disease.

Mr. ASHURST. Then I have misread the amendment.

Mr. BROUSSARD. The term "tick-infested" is a technical term which has been affixed to that class of cattle by the Department of Agriculture, and it is well understood in all quarantine regulations enacted by the Department of Agriculture. Its meaning is that an animal that is in a tick-infested country and which has been cleaned of ticks according to methods pursued under the direction of the Department of Agriculture, so that it is entirely devoid of ticks and not susceptible of transmitting one tick from the area from which it comes to the area to which it is to be shipped, may be permitted to be imported under those conditions.

Mr. ASHURST. I thank the Senator. If that is the meaning of the amendment, I submit that the amendment ought to say that. The amendment says that under certain restrictions, and so forth, the admission of tick-infested cattle shall be permitted.

The amendment ought to be redrafted and recast, so that it will say that cattle may be imported from a country that is or may be infested with the tick, provided the cattle so imported are themselves clean and free from any tick or fever. The amendment ought to read in that way.

Mr. BROUSSARD. Mr. President, the amendment does read in that way. The amendment says that no cattle shall be imported unless they are imported by the joint action and proclamation issued by the Secretary of the Treasury and the Secretary of Agriculture applying in every way all of the regulations now applicable to the importation of cattle from tick-infested sections of the United States into sections not infested with ticks, and that they shall be subject to all of the rules and regulations now applicable by which cattle may be shipped from Texas, which is tick infested, or Louisiana, which is tick infested, into any State north of the quarantine line. So that the very thought which the Senator is discussing now is embodied specifically, and in so many words, in the amendment which the Senator has read to the Senate.

Mr. ASHURST. Mr. President, if that be the purpose of the amendment, I could not have any objection to it; but, frankly, I fear that——

Mr. BROUSSARD. Will the Senator permit just one observation, by way of illustration of what I have said?

Mr. ASHURST. Certainly.

Mr. BROUSSARD. Last summer, exercising that discretion which I hope is included in the act of 1890, as well as in the Underwood tariff law, which contained a similar provision to this act, the Secretary of Agriculture permitted the importation of cattle from the Republic of Guatemala into the port of New Orleans, having received the assurance that there were sections of Guatemala where ticks did not abound. With that understanding the Secretary of Agriculture permitted the importation of these cattle through the port of New Orleans for shipment directly to East St. Louis, north of the quarantine line.

Under this permission granted by the Secretary of Agriculture there were shipped through the port of New Orleans from the Republic of Guatemala to the stockyards at East St. Louis 2,100 head of steers. In the last shipment which arrived at the port of New Orleans inspection was made of these cattle, as it was as to the first and all shipments, by the inspection force of the Department of Agriculture. All previous shiploads that had landed at the port of New Orleans were found devoid of ticks. They had been cleaned in Guatemala, because Guatemala is a universally tick-infested country. The last shipload contained some ticks upon some of the animals imported, and immediately the Secretary of Agriculture revoked the permit and closed the port to Guatemala cattle.

The proposition now before the Senate is a proposition to require that these cattle coming from any of the countries mentioned in the amendment shall be first dipped, under the direction and supervision of the Department of Agriculture of the United States, at the port of departure and again dipped at the point of arrival, at whichever port they may be landed. So that the regulations would effectually prevent the importation of cattle infected with disease that they might communicate to other herds. But when they are free of such disease—not only free of ticks, but having gone through the process of cleaning which is pursued in this country in order to clear a territory where the department and the State want to give instructions in cleaning—there can be no danger at all; and the instant an animal is brought into a port under this amendment conveying any ticks at all it is the duty of the Secretary of Agriculture to peremptorily close that port to the further entry of cattle.

Mr. ASHURST. If the Senator will pardon me, I am very certain the Senator could enlist more support for his amendment if it could be redrafted so that it would not set out that these tick-infested cattle could be sent in.

Mr. BROUSSARD. I am perfectly willing that the word "tick-infested" shall be taken out. The fact is that it was put in the amendment by the Department of Agriculture, because that is a technical term well understood by the department, and has been interpreted in the application of the quarantine laws and in the traffic in cattle between the States from tick-infested sections of the Union to noninfested sections of the Union. I do not think this question is entirely understood by the Senate, because heretofore the discussion of this question has been with regard to the efforts being made by other States, and the fact that States other than Texas in the tick area are demanding the same treatment which Texas is now receiving.

Mr. SMOOT. Mr. President, I simply wish to suggest to the Senator from Arizona that the question before the Senate is as to whether or not the point of order shall be sustained. The amendment is not now before the Senate in any way.

Mr. ASHURST. The Senator is correct; but when the Senate votes as to whether or not the amendment is in order, it ought to know what the amendment is. Surely the Senate does not want to do something when it does not know what it is doing. It is wise and expedient to know what the amendment is first. There is a difference among Senators as to what it means.

Mr. SMOOT. The only question that I would consider is whether this is legislation on an appropriation bill. If it is, the point of order should be sustained. If it is not, it should not be sustained. Now, that is the question.

Mr. BROUSSARD. I agree with the Senator from Utah. My idea was——

Mr. ASHURST. Well, if the Senator will pardon me, all I care to know is, Is the subject debatable?

SEVERAL SENATORS. Yes.

Mr. ASHURST. Then that is all I wish.

Mr. BROUSSARD. I quite agree with the Senator from Utah; but I wanted to enlighten, if I could, the Senator from Arizona with regard to the proper interpretation of the amendment.

Mr. ASHURST. I want to hear the Senator.

Mr. BROUSSARD. I have no objection at all, so far as I may consent to it, to having the words "tick-infested cattle" stricken from the amendment, and the words "cattle from tick-infested countries" substituted. In my judgment, and in the nonscientific opinion of those who are to enforce the law, the two terms are similar; and in the application of this amendment, if it should become law, the same construction will be placed upon the wording one way or the other. So I have no objection to the words "tick-infested cattle"—which is a repulsive term to me, as well as it is to the Senator—being stricken out. It is not a very elegant term. That a country should be infested with ticks, and, the country remaining where it is, clean cattle should cross the border, does not strike one with repugnance.

The thought is at once conveyed to the mind of those uninformed, when the statement is made, that these are tick-infested cattle. I think the amendment would be much more popular if everyday language were used to designate what is actually intended, to wit, that these cattle coming from tick-infested countries shall be cleaned of ticks before they are permitted to enter our ports; and if the Senator should offer an amendment of that character, I shall gladly accept the new wording.

Mr ASHURST. In conclusion, Mr. President, I thank the Senator from Louisiana for his interruption. It has been, I think, gratifying, and has given me some information I did not possess. I wish, however, to state that the American National Live Stock Association, which is composed of all the cattlemen and a large number of sheepmen in the States of Texas, New Mexico, Oklahoma, Colorado, Kansas, North and South Dakota, Wyoming, Idaho, Montana, Utah, Nevada, California, Arizona, and possibly Oregon and Washington, have discussed this subject and given it consideration. I have here a letter from the secretary of the American National Live Stock Association, dated July 8, in which he says, after acknowledging the receipt of my communication:

The last time I was in Washington I made some inquiry regarding this Broussard bill—

I might say that the Broussard bill, I think, is similar to the amendment offered by the Senator from Louisiana [Mr. BROUSSARD]—

which has been introduced in other sessions of Congress, and, from the information I obtained, concluded there was not much prospect of its passing, especially as the Department of Agriculture opposed it. I presume that you are aware that Mr. BROUSSARD introduced a bill in the Senate for substantially the same purpose, known as Senate bill 3351, introduced January 10, 1916.

He concludes by saying the American National Live Stock Association is opposed to any such amendment. I ask leave, therefore, to have read at the desk a telegram from the secretary, Mr. Tomlinson, whose office is in Denver, Colo.

Mr. LANE. I should like to ask the Senator from Arizona if this appropriation will apply to a certain tick which has its habitat partly in Texas and partly in eastern Washington and northern Oregon and Idaho, which infests sheep and from sheep gets on human beings and produces death?

Mr. ASHURST. I take it that is a different kind of tick. In addition to that it does not call for an appropriation; it is simply changing the existing law on the subject.

Mr. GALLINGER. Let the telegram be read.

Mr. LANE. There will be nothing done for the eradication of that tick?

Mr. ASHURST. Except that the Secretary of Agriculture and the Secretary of the Treasury are required under the law to use great discretion and rigid inspection to see that the infested cattle are not brought in; that is all.

The PRESIDING OFFICER. The telegram will be read.

The Secretary read as follows:

DENVER, COLO., *July 8, 1916.*

Hon. HENRY F. ASHURST,
United States Senate, Washington, D. C.:

Your wire of 7th. American National Live Stock Association opposes Broussard amendment to Agricultural appropriation bill permitting importation of live stock from disease-infected countries. We also oppose Broussard bill (S. 3351), containing same provision. This country has enough animal disease to eradicate without importing others. Am writing.

T. W. TOMLINSON.

Mr. SMOOT. I want to call attention to Rule XX, which says:

A question of order may be raised at any stage of the proceedings, except when the Senate is dividing, and, unless submitted to the Senate, shall be decided by the Presiding Officer without debate, subject to an appeal to the Senate.

So under the rule, Mr. President, not only can a point of order be raised as in Committee of the Whole, but it can be raised in the Senate without a doubt. If we now vote that it can not be done under the rule, it will simply be a vote upon the amendment, whether it shall go into the bill or whether it shall not, and that is a very dangerous precedent to establish in this body.

Mr. CLARKE of Arkansas. Mr. President, it seems that reference has been made to what took place in the Senate on a former occasion when I expressed an opinion on the question supposed to be pending here. In so far as what is recorded of what took place then I have no desire to change it. It is my opinion that our rules do provide that when a bill has been considered in Committee of the Whole and subsequently reported to the Senate all amendments proposed may be again considered. The logic of that is to afford the Senate the same opportunity, the same freedom of thought to deal with the particular amendments in the Senate that it possessed in Committee of the Whole. I stand by that proposition. As I said, I have no desire to modify it.

But the question presented here to-day is not exactly that question. The question here to decide is whether or not the Senator from New Mexico could have made a point of order against the amendment in the Senate after he had permitted an amendment to be adopted to the proposition. He had his opportunity to present it when the original amendment was presented. He did not see proper to avail himself of the opportunity; he permitted the Senate to proceed to its consideration to the extent of adding an amendment, and when he found an amendment had been attached to it that dissatisfied him, he did not then undertake to make a point of order in Committee of the Whole as against the whole amendment, nor did he move to reconsider it, but he permitted the matter to stand.

I say the situation thus created is entirely different from the naked proposition of the right to interpose a point of order against an unamended amendment after it has reached the Senate. I think that anything which has been done in Committee of the Whole could be done in the Senate after the bill reaches the Senate. But I am not entirely satisfied that the Senator from New Mexico could have interposed a point of order in the Senate to the amended amendment after he permitted the Senate to take jurisdiction of the matter up to that point.

It is a harsh rule at best. It is putting considerable power in the hands of any one Senator. In fact, he is vested with an authority that the other 95 Senators could not overrule. It is harsh in its application and it vests an individual Senator with a discretion that ought to be hedged about with all reasonable safeguards.

I think one of those safeguards consists in the fact that when he permits an amendment to be considered, and expresses no dissatisfaction with it in the form it has been presented, after it has been subsequently amended in other respects he can

not avail himself of a right which he surrendered when he permitted the original amendment to become the property of the Senate. That is the question here. I think that the Senator from New Mexico could have made a point of order against the unamended amendment in Committee of the Whole and could make it in the Senate. I am not satisfied that he could make it against an amended amendment in Committee of the Whole.

Then, if this rule of exclusion is worth anything, it is because its text says that no amendment which proposes general legislation shall be admitted to an appropriation bill. This bill came to us with 50 pages of general legislation on it, embracing three distinct propositions of legislation that have been seriously discussed separately in the Senate. It is not an appropriation bill in the strict sense of the rule. It is a composite bill; it is just as much a legislative bill as it is an appropriation bill. It does not fall within the description laid down in the rule. We have just as much right to say it is not an appropriation bill as to say it is not a legislative bill. It possesses the character of both. The rule is directed against the exclusion of all legislation. The term of the rule is that no legislation shall be put on an appropriation bill.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from Idaho?

Mr. CLARKE of Arkansas. I am glad to yield to the Senator from Idaho, because I am sure he agrees with me.

Mr. BORAH. I was wondering when an appropriation bill would ever reach the Senate. If this is an appropriation bill, it carries an interminable amount of legislation.

Mr. CLARKE of Arkansas. When they have legislation on them, they do not reach it, so as to be vulnerable to the objection provided for by the rule.

Mr. BORAH. As a matter of fact, under our present rules we have no appropriation bills at all.

Mr. CLARKE of Arkansas. In the sense of the rule not to allow legislation to go on an appropriation bill, I do not think we have.

Mr. SMOOT. Under the rule the Senator must admit that legislation can go on appropriation bills by unanimous consent, but only by unanimous consent.

Mr. CLARKE of Arkansas. The rule does not make any provision for that. It says no legislation shall go on an appropriation bill.

Mr. SMOOT. Unless by unanimous consent.

Mr. CLARKE of Arkansas. It does not say so.

Mr. SMOOT. Let us see if it does not say that.

Mr. CLARKE of Arkansas. It is the third subdivision of Rule XVI. You can suspend any rule except one by unanimous consent, but you must suspend it before you violate it.

The principal point I desire to present to the Senate—and I am not absolutely precluded from having some opinion upon it from what I said on a former occasion——

Mr. CATRON. Is there any provision in the rule which says that you can not raise the point of order when a bill comes into the Senate?

Mr. CLARKE of Arkansas. I say you can raise it when it comes into the Senate. I am insisting that to the extent that you can raise it in Committee of the Whole you have the right, but by permitting the amendment——

Mr. CATRON. Is there any rule which says if you do not raise the point of order in Committee of the Whole you can not raise it in the Senate?

Mr. CLARKE of Arkansas. There is not; but there is a principle of general law and fairness which says that after giving the Senate jurisdiction of an amendment for the purpose of considering it and it is amended, to satisfy some individual Senator, he has not a right to go back and have the whole thing thrown out.

Mr. BORAH. I understand the Senator admits that it could be raised now if it could have been raised then?

Mr. CLARKE of Arkansas. Yes, sir.

Mr. BORAH. So the Senator is not contending against the right to raise the point of order in the Senate, but simply that the Senator from New Mexico lost his right to raise it in Committee of the Whole?

Mr. CLARKE of Arkansas. Yes. He could not have raised it in Committee of the Whole after it had been amended, because he permitted the amendment which he now seeks to exclude. After such consideration as the Senate saw proper to give it, when the Senate saw proper to add an amendment, he lost his opportunity to raise the point of order. That is all I have to say about it.

The PRESIDING OFFICER. The question is, Is the point of order raised by the Senator from New Mexico [Mr. CATRON] well taken? The yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. BECKHAM (when his name was called). I am paired with the Senator from Delaware [Mr. DU PONT]. He is not here, and I withhold my vote.

Mr. SHEPPARD. Mr. President, a parliamentary inquiry.

Mr. GALLINGER. A response has been made to the call, and I raise the point of order that the roll call can not be interrupted.

The PRESIDING OFFICER. A response has been made, as the Senator from New Hampshire has suggested. The Secretary will resume the call of the roll.

Mr. UNDERWOOD. May I ask the Chair to state the point of order again.

The PRESIDING OFFICER. As stated before, the question is, Is the point of order raised by the Senator from New Mexico well taken?

Mr. UNDERWOOD. A vote "yea" will sustain the point of order and a vote "nay" will sustain the former ruling of the Vice President.

The PRESIDING OFFICER. As the Chair has stated.

The Secretary resumed the call of the roll.

Mr. CATRON (when his name was called). I am paired with the Senator from Oklahoma [Mr. OWEN]. In his absence I withhold my vote. If I were not paired I would vote "yea."

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE], who is absent. In the absence of that Senator I withhold my vote. If at liberty to vote, I would vote "yea."

Mr. GRONNA (when his name was called). I have a general pair with the senior Senator from Maine [Mr. JOHNSON]. Not knowing how he would vote, I withhold my vote.

Mr. SHERMAN (when his name was called). I am paired with the Senator from New Jersey [Mr. MARTINE], and therefore withhold my vote.

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "nay."

Mr. UNDERWOOD (when his name was called). I have a general pair with the Senator from Ohio [Mr. HARDING]. I transfer that pair to the Senator from Indiana [Mr. KERN] and vote "nay."

Mr. WADSWORTH (when his name was called). I have a general pair with the junior Senator from New Hampshire [Mr. HOLLIS]. Otherwise I would vote in the affirmative.

The roll call was concluded.

Mr. DILLINGHAM. I inquire if the senior Senator from Maryland [Mr. SMITH] has voted?

The PRESIDING OFFICER. He has not.

Mr. DILLINGHAM. Then I withhold my vote. If permitted to vote, I would vote "yea."

Mr. CATRON. I transfer my pair with the Senator from Oklahoma [Mr. OWEN] to the junior Senator from Idaho [Mr. BRADY] and vote "yea."

Mr. WADSWORTH. I transfer my pair with the Senator from New Hampshire [Mr. HOLLIS] to the Senator from South Dakota [Mr. STERLING] and vote "yea."

Mr. WALSH. I transfer my pair with the Senator from Rhode Island [Mr. LIPPITT] to the Senator from Illinois [Mr. LEWIS] and vote "nay."

Mr. CHILTON. I transfer my pair with the Senator from New Mexico [Mr. FALL] as on the former vote and vote "yea."

Mr. CURTIS. I was requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS];

The Senator from Vermont [Mr. PAGE] with the Senator from Indiana [Mr. TAGGART]; and

The Senator from Michigan [Mr. SMITH] with the Senator from Missouri [Mr. REED].

The result was announced—yeas 31, nays 27, as follows:

YEAS—31.

Ashurst	Cummins	Norris	Sutherland
Borah	Curtis	Oliver	Thomas
Brandegee	Gallinger	Poindexter	Thompson
Bryan	Jones	Pomerene	Townsend
Catron	Kenyon	Shafroth	Wadsworth
Chilton	Lodge	Sheppard	Warren
Clapp	McCumber	Smith, Ga.	Works
Culberson	Nelson	Smoot	

NAYS—27.

Bankhead	Hughes	Overman	Swanson
Broussard	Husting	Phelan	Tillman
Chamberlain	James	Ransdell	Underwood
Clarke, Ark.	Johnson, S. Dak.	Shields	Vardaman
Fletcher	Lane	Simmons	Walsh
Hardwick	Lee, Md.	Smith, Ariz.	Williams
Hitchcock	Martin, Va.	Smith, S. C.	

NOT VOTING—37.

Beckham	Harding	Myers	Sherman
Brady	Hollis	Newlands	Smith, Md.
Clark, Wyo.	Johnson, Me.	O'Gorman	Smith, Mich.
Colt	Kern	Owen	Sterling
Dillingham	La Follette	Page	Stone
du Pont	Lea, Tenn.	Penrose	Taggart
Fall	Lewis	Pittman,	Weeks
Goff	Lippitt	Reed	
Gore	McLean	Robinson	
Gronna	Martine, N. J.	Saulsbury	

The PRESIDING OFFICER. So the point of order is sustained, and the amendment is ruled out.

Mr. UNDERWOOD. It now seems to be in order to call up the motion I made to suspend the rules.

Mr. CLARKE of Arkansas. The matter pending will not be the only one that will be controverted before the final passage of the bill, and I believe I am justified in asking the Senate now to proceed to the consideration of the conference report on the river and harbor bill. I understand there are other provisions in the bill which will likely be contested, and in that event it will take the balance of the afternoon.

Mr. UNDERWOOD. I merely desire to call up and have pending my motion to suspend the rules, and then I will yield. I have a motion before the Senate to suspend the rules and pass an amendment that has been in controversy known as the amendment of the Senator from Louisiana [Mr. BROUSSARD]. I ask that that be laid before the Senate and then I will yield to the Senator from Arkansas.

The PRESIDING OFFICER (Mr. WALSH in the chair). The Secretary will read the notice of the Senator from Alabama to move to suspend the rules.

The Secretary read as follows:

I hereby give notice that at the expiration of one day hereafter, or so soon thereafter as I can obtain the attention of the Senate, I will move to suspend clause 3 of Rule XVI for the purpose of submitting to House bill 12717, making appropriations, etc., the following amendment to said bill on page 78, after line 17:

"That the act of August 30, 1890, entitled 'An act providing for an inspection of meats for exportation, prohibiting the importation of adulterated articles of food or drink, and authorizing the President to make proclamation in certain cases, and for other purposes' (26 Stat. L., 414), is hereby amended so as to authorize the Secretary of Agriculture, within his discretion and under such joint regulations as may be prescribed by the Secretary of Agriculture and the Secretary of the Treasury, to permit the admission of cattle from tick-infested territory of Mexico, South and Central America, the islands of the Gulf of Mexico and the Caribbean Sea into those parts of the United States below the southern cattle quarantine line at such ports of entry as may be designated by said joint regulations and also subject to the provisions of sections 7, 8, 9, and 10 of said act of August 30, 1890.

"That all such cattle, when entered, shall be subject to the regulations governing the handling and transportation of cattle from the districts infected with the southern, Texas, or splenetic fever."

O. W. UNDERWOOD.

RIVER AND HARBOR APPROPRIATIONS.

Mr. CLARKE of Arkansas. I move that the Senate proceed to the consideration of the conference report on the river and harbor bill.

Mr. SMITH of Georgia. Before the vote is had on taking up that measure I wish to say that it is hoped that the conference report on the river and harbor bill can be disposed of in the course of an hour, and later on in the afternoon we hope to call up the Agricultural appropriation bill and complete it. We trust that none who are interested in that bill will be absent upon the theory that it will not be again called up this afternoon.

The PRESIDING OFFICER. The Senator from Arkansas moves that the Senate proceed to the consideration of the conference report on House bill 12193.

The motion was agreed to; and the Senate proceeded to the consideration of the report of the committee of conference on the disagreeing votes of the two Houses upon the amendments of the Senate to the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The PRESIDING OFFICER. The report has been printed in document form and also appears in the RECORD.

Mr. KENYON. Mr. President, I should like to inquire of the chairman of the committee if there is to be an explanation of any of the changes that have been made, and I particularly inquire of him as to the item on page 8, providing for an appropriation of $100,000 for Vermillion, Clay County, S. Dak. I note that the action taken was modified and that the House receded. Will the Senator state what that modification was?

Mr. CLARKE of Arkansas. After the reading of the report, unless it be dispensed with by formal action of the Senate, I shall be very glad to explain any item.

Mr. KENYON. I understood the reading of the report was to be dispensed with.

Mr. CLARKE of Arkansas. That may be done. That will shorten time somewhat. I ask unanimous consent that the formal reading of the report may be dispensed with.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Mr. CLARKE of Arkansas. Now, what is the inquiry of the Senator from Iowa?

Mr. KENYON. The inquiry is, What action was taken concerning the item for Vermillion, Clay County, S. Dak.?

Mr. CLARKE of Arkansas. On what page?

Mr. KENYON. On page 8 of the report.

Mr. CLARKE of Arkansas. What is the number of the amendment?

Mr. KENYON. No. 45, page 40 of the bill, page 8 of the report.

Mr. CLARKE of Arkansas. The Senate conferees receded partially in that respect on that item. The original amount was $100,000. It was reduced to $75,000. The showing that justified such action on the part of the House conferees was that the local community was willing to contribute a very large share of the necessary expense in making that improvement.

Mr. KENYON. As the matter stands now, the sum appropriated is $25,000?

Mr. CLARKE of Arkansas. The sum appropriated is $75,000, one-third of which the local interest pays.

Mr. KENYON. One-third of the $75,000?

Mr. CLARKE of Arkansas. Yes, sir.

Mr. KENYON. I think that is all I desire to ask the Senator.

I will say just a word, Mr. President. I realize that it is a perfectly useless proposition to try to do something that is impossible; and one of the impossible things is to defeat the river and harbor bill at this session. If there were a sufficient number of Senators who would join in the fight on this conference report, so far as I am concerned I should have been delighted to have stayed here all summer and fought it and defeated it; but there are not sufficient Senators who are willing to do that. So I content myself with not occupying any particular time of the Senate, but I shall merely ask for a record vote on the conference report in order that Senators may have a renewed opportunity to go on record either for or against this method of disposing of the public funds.

I think it is almost a breach of senatorial courtesy to take up the bill in the absence of the senior Senator from Michigan [Mr. SMITH], in view of the fact that he has labored here long and strenuously for Arcadia and secured an appropriation of $25,000, which I understand has fallen by the way. I am going to inquire of the Senator from Arkansas if that outrage has been committed?

Mr. CLARKE of Arkansas. The item providing for the improvement of the harbor at Arcadia was omitted.

Mr. KENYON. It was omitted; and there is no one here now, apparently, to mourn for Arcadia after all the years that the fight has gone on for that wonderful community.

The conference committee's report does not make the bill any worse. Of course it is impossible to make a thing which is as bad as it can be any worse, and this bill, in my judgment, could not be made any worse.

There were 143 votes in the other House against the river and harbor bill; there were 32 votes in the Senate against it. The amendment proposed by the Senator from Utah [Mr. SMOOT] to reduce the amount of the bill to $30,000,000 was defeated in the Senate by but one vote. I am in hopes that the constituencies of certain Senators who by their one vote made possible that situation, and whose one vote, in order in some instances to hold a little appropriation in their own State, cost the people of this country $13,000,000—I am in hopes that their constituencies will view with care that vote which was cast.

Mr. President, it is perhaps fortunate that neither political party, as I have read their platforms, has declared in favor of economy. I think they do suggest a budget system. We have had the farce of political parties in the past declaring in their platforms in favor of economy, and then spending money in the way it is spent in this river and harbor bill and in the pending Agricultural appropriation bill, which is almost as bad; but at least now the political parties are consistent in not telling the people that they are going to be economical in the expenditure of their money.

I feel when another year comes, when new faces are here, that, instead of a river and harbor bill of this character being passed by three votes in the Senate, it will be overwhelmingly defeated. All I desire is to ask for a yea-and-nay vote on the proposition of concurring in the conference report.

Mr. CLARKE of Arkansas. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. HUSTING. Mr. President, before the vote is taken I should like to make a few observations on this bill.

This bill was fought out when it was before the Senate the first time, and upon the final vote came within two votes of being

defeated, which shows that there is a very strong sentiment against this bill in the Senate. That fact encourages me to make one more attempt to prevent what I think would be a great mistake on the part of Congress, and particularly on the part of the majority in Congress, at this time.

While partisanship need not necessarily enter into the consideration of this bill, yet in a way the majority of the Senate is responsible for the financial policy, responsible for the amount of the appropriations, and will either be given credit for wise and prudent legislation or receive the inevitable criticism and condemnation of the people.

In the discussion of this bill and its various details, I think it must be apparent to every member of the Senate that it contains many items, many expenditures that can not be justified by the facts presented to the Senate. I think I could go a little further and say that there are a great many projects in this bill—at least there are in my judgment—that do not deserve the appropriation obtained in the bill, or, in fact, any appropriation whatever. There is, however, no need of going into the discussion of these details again, for they have been thoroughly discussed, and any Senator who has sat in this Chamber and listened to the analysis of this bill who is not convinced that the bill contains many items of very little or no merit certainly will not be convinced at this late stage of the proceedings. But, taking the bill as it is, carrying something like $40,000,000, the question is whether it is wise to pass the bill at this time.

We are going before the country with appropriations aggregating a most stupendous sum. A great proportion of that sum is to be applied to preparedness. The people of this country, in my judgment, want adequate preparedness. They favor increases in the Army, they favor increases in the Navy, and they favor increases in every arm of the service. I think there is little, if any, difference of opinion among the great mass of the people in this respect, and yet the amounts of the increases, running up into the hundreds of millions of dollars, are going to add to a financial burden which will be staggering in its totals when presented to the people. In making these appropriations and all appropriations for things that are necessary or for things that must be done at once I do not think the size alone will in any wise meet the disapproval of the people, although, for that reason, they will more carefully scrutinize these appropriation measures to see whether things have been put into them that should have been entirely eliminated or postponed until some proper time. They know that when they want battleships, when they want troops, and when they want other things, they have to pay for them; and yet we know that the size of the appropriation will be one of the targets for the attack on this administration when we go before the people in the coming campaign. There is no question about it. We shall be called upon to defend these enormous appropriations.

I, for one, have no hesitation in saying that I believe these expenditures, with very few exceptions, can be defended; and not only that but can be successfully defended. I, for one, do not think we need to hesitate to go before the people and say to them in regard to the preparedness program: "Here is what you wanted; here is what we have given you; this is what it cost," and, if I understand the spirit of American citizens correctly, there will be no grumbling, there will be no disappointment, and there will be no criticism. They are willing to pay the bills, and they are willing to spend the money, provided it is not unnecessarily spent or unnecessarily squandered, and provided that for every dollar spent they get a dollar's value.

An incident happened not long ago which shows the idea of the people on this question, at least in my State. The city of Ripon, in Wisconsin, recognized the situation as it exists. I mention it because it is worthy of mention. This little city of 4,000 inhabitants—a thriving, bustling, enterprising city—was given an appropriation of $75,000 for a post-office building, which they need, but which they can get along without, if necessary. They saw that enormous expenditures were necessary; and in a patriotic spirit, fully appreciating the situation, they requested me to introduce a bill here repealing the bill providing for a $75,000 post-office building, and to also introduce a bill repealing the appropriation that had already been made for a site for that building of something like $10,400. This incident has been given wide publicity. Why? I presume because of its unique character. We did not know, or at least some of us did not know, that any group of citizens of the United States could so far forget their own narrow, selfish interests as to turn back into the Treasury $75,000 and ask the Congress of the United States to apply it where it is most needed.

Why should we be astonished at that, and why should this incident have been given such great and wide publicity? Because Congress, in the eyes of the people as a whole, is an institution composed of Members who are anxious and determined to get anything and everything they can out of the Treasury, and then to come back to their respective constituents and lay down at their feet their game or booty, and say, "Here is what I went out and got for you. I got you more than Senator So-and-so; I got you more than Representative So-and-so. I am a good provider, and you ought to send me back to the Senate or you ought to send me back to the House of Representatives because I have been successful in copping off three or four or five hundred thousand dollars out of the Treasury, and I have gotten more for you than my neighbor did because I am more popular, because I have more influence in the Congress of the United States than the other fellow has."

So I say when the citizens of the little city of Ripon, in a spirit of patriotism, aroused by the exigencies of the period, and yet game to the core and persevering in their determination to set a needed example to the country, insisted that a bill be introduced here repealing their appropriation and insisted on turning over that appropriation to the Government for the purpose of adding to the aviation fund, no wonder that it excited surprise and was given such widespread publicity. They have swallowed their desire for a new building which they need and which would have been an ornament to the town, something they have longed for and, no doubt, striven for, and forgetful of their local interests, in a spirit of self-denial, they have waived their opportunity and dedicated their ornament to the common defense and common welfare.

That incident of itself might not mean so much, except that I think it illustrates the real sentiment of the people of this country—the people who are proud of their Government, who take pride in their beautiful buildings and in their improvements, who take pride in their Army and their Navy, and who are willing to pay the debt, no matter what it is, but who want appropriations stopped that should be stopped, and want the Members of the Congress of the United States to forget local interests and bend their attention to the common welfare and use the resources of the Government for the common good.

Of course we can go ahead and issue bonds because of these extraordinary increases and expenditures if we want to do so, and we would even be justified in that, if necessary, but when we do so we have to show to the people of the country that it is necessary—not only that it is good, but that it is necessary, and immediately necessary.

All that I care to talk about in the few minutes that I am going to take of the time of the Senate is to point out that, whether these appropriations are good, bad, or indifferent, not a dollar ought to be spent at this time, at this session of Congress, in my humble judgment, that is not immediately and absolutely necessary. So I say, take this $40,000,000, and at least twenty millions of that could be well stricken from the bill on the ground alone that, even if the projects were meritorious—which they are not—even if they were meritorious, it is not necessary that they be now executed any more than it is absolutely necessary to have a post office at Ripon at once. This is the lesson that Ripon teaches to us and to the country. These things can be deferred until some other time. They can be deferred to a year from now or later, until we have taken care of important matters which loudly call for immediate action. These less necessary matters can be deferred until three years from now, until we get through with our naval and military program. Then we can go along and vote this money for projects which are meritorious but which are not now immediately necessary when we get the money to do it. No one would say to a manufacturer that he should treble and quadruple his plant and spend his money far above his income in improvements and a lot of unnecessary propositions all in one year. Neither is it necessary for the United States in one year to spend all the money that it can possibly raise by any manner of taxation and embark in questionable projects, to say the least, which are not now needed and which help to carry us far beyond our income.

I say, again, "Rome was not built in a day"; the United States can not be developed in one year. There is a time for everything. The time may perhaps come when it will be necessary to improve these little creeks and rivers, but, in my judgment, the time is not here now when we can spend twenty or thirty or forty million dollars in so-called improvements which nobody wants and nobody thinks of except those who get themselves a direct slice out of the appropriations, and which upon their face are not only unnecessary but which appear to be bad and for which we are spending millions, like a fool in his folly.

I mean to say that the Nation as a whole is not clamoring for the improvement of some of the waterways or watercourses for which appropriations have been made by the river and harbor bill, watercourses that most of us never knew were on the

map and that the people as a whole do not know now are on the map. In other words, we are spending sometimes three hundred or four hundred thousand dollars to improve a watercourse which many of us never knew existed. However, it is idle to argue that matter. We know, and everyone else knows, that a great percentage of the money carried by the river and harbor bill is expended for items that the people do not care anything about, do not know anything about, do not want, and for which they would not let the money be spent if they could stop it and knew just exactly what was going on.

I say we can go before the people and we can defend the appropriations made during this session, no matter how staggering or huge their sum may be, if we can show where the appropriations went and show the people that the money was needed and that it had to be spent at this time; but I do not believe that anybody can go before the country and justify the $40,000,000 now being appropriated in the river and harbor bill, at least $20,000,000 of which is being uselessly and unnecessarily expended, or, at any rate, untimely expended.

The river and harbor bill is not referred to in any party platform. The political parties recently made platforms, one at St. Louis and two at Chicago. They did not include any demand that Congress appropriate $40,000,000 a year for the improvement of rivers and creeks. Nobody is enthusiastic about the river and harbor appropriations which have been made in the past. As the record of the past shows, I think that we have spent something like a total of $800,000,000 on this work. Our Republican friends have never boasted about it, and we have never boasted either about what they have done, but we have criticized them year after year, and they are turning around now and criticizing us for following their bad example.

It does seem to me that it would be good policy, prudent and good business, and wise legislation to pare these appropriation bills to the bone, except as to such amounts as are necessary in order to carry on the business of the Government. I think we ought to be able to go out in the next campaign and show the people that nothing has been appropriated or spent unless it was urgently needed and demanded by the people of the country. I say this river and harbor bill is one bill that I do not think anyone can go upon the platform and defend, and if anyone attempts to do so I think he will not be successful, because I do not think there is any line of legislation that is so offensive to the nostrils of the citizens of the United States as the river and harbor bills which have been enacted in the past, and of which this is a fair sample.

With an appropriation total far exceeding anything heretofore enacted by any Congress and which will be most closely scrutinized by the people and the necessity for which expenditures they will ask to be shown, we are going to have enough to do without apologizing for unnecessary and unwise and untimely legislation. Out in the country where I live we will have to go before the people and show them that their money has been wisely and prudently expended. It will not be sufficient to say that we have not squandered it, but we will have to do more and show that only such money was voted as was urgently necessary and that we did not go beyond the demands or the exigencies of the time.

We are proud of our administration and we are all proud of the record made by the last Congress. In the last campaign we went before the people and sounded the praises of the administration and of the Sixty-third Congress, and we pointed with pride to a record excelling that of any other administration and Congress of the last generation at least. With such a good record why should we spoil it now by enacting a bill of this character? Why enact this sort of a bill, which is indefensible, in my judgment, and which, in the main, has not in fact been defended by any Senator on this floor? While this bill was attacked vigorously in a struggle that waged for weeks on the part of objectors to the bill, it passed the Senate with scarcely any of the items therein being explained or defended by any Senator. So bad was this bill that it narrowly escaped defeat—a change of two votes would have changed the result. Why should we burden ourselves now on the eve of a campaign with this Old Man of the Sea astride our necks. Why should we mar and spoil an otherwise good record with a piece of folly like this—worse than folly, I should say, because we will have to lay a tax of $20,000,000 more of the people's money to pay for something that does the country no good. For this reason I say that this conference report should be defeated and the bill should be sent back to conference for the purpose of recommending a bill to appropriate moneys absolutely necessary for the continuance of worthy projects and such new ones as are imperatively necessary.

I repeat there must be a limit to what we ought to do in one year. It does seem to me that the limit has been reached in the appropriation bills which have been and are yet to come before the Senate. I will say, in my own justification at least, that I have voted for preparedness measures, notwithstanding the amount of the appropriations involved, because I believed them necessary, and I believed the people wanted them; but, by the same token, I do not want to vote for, and I am going to oppose, at least with all the power I possess, the expenditure of this vast sum of money at the present, an expenditure, which I believe to be unwise, unnecessary, and untimely, and which will provoke a storm of resentment and criticism all over the country. I would rather show the public a clean bill, a clean record, so that the party in power, our party, that is responsible for the total appropriations, may say, "Here is a clean, large record of expenditures, it is true, but such as none of you would cut, at least not to any extent. We want to show you that we have steadfastly opposed and cut out everything that did not look good to us, and that could not stand the scrutiny and light of criticism and analysis; that we have pursued not a niggardly policy but a policy of wisdom and prudence, which although necessitating the expenditure of large sums of money on the one hand, cut out all the deadwood, all the unthrifty stuff, and that we have not squandered any part of your money." If we go before the country with that kind of a record, I do not care how high the appropriations may be or what the sum total may be, we can justify ourselves before the people, who only demand that their money be expended wisely and prudently, and that they get a dollar in value for every dollar expended. If we do that, we will have the kind of record which will be in keeping with the record that we have made in all other lines of our legislation.

The PRESIDING OFFICER. The question is on agreeing to the conference report, on which the yeas and nays have been ordered.

Mr. KENYON. Mr. President, the Senator from Utah [Mr. SMOOT] expected to submit some observations on the conference report. I notice he is not in the Chamber, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	du Pont	La Follette	Shafroth
Beckham	Fletcher	Lane	Sheppard
Brady	Gallinger	Lee, Md.	Simmons
Brandegee	Gronna	Lewis	Smith, S. C.
Broussard	Harding	Lodge	Sterling
Bryan	Hardwick	McCumber	Swanson
Catron	Hitchcock	Martin, Va.	Thomas
Chamberlain	Hollis	Nelson	Thompson
Clapp	Hughes	Norris	Underwood
Clark, Wyo.	Husting	Oliver	Vardaman
Clarke, Ark.	James	Overman	Wadsworth
Culberson	Johnson, S. Dak.	Phelan	Walsh
Cummins	Jones	Pittman	Warren
Curtis	Kenyon	Ransdell	Weeks
Dillingham	Kern	Saulsbury	Williams

Mr. VARDAMAN. I am requested to announce the absence of the junior Senator from Tennessee [Mr. SHIELDS] on important business. I will ask that this announcement stand for the remainder of the afternoon.

The PRESIDING OFFICER. Sixty Senators have answered to their names. There is a quorum present. The question is on agreeing to the conference report, upon which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). Making the same announcement as to my pair and its transfer that I made on the former vote, I vote "yea."

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE]. In the absence of that Senator I withhold my vote.

Mr. GRONNA (when his name was called). I have a general pair with the senior Senator from Maine [Mr. JOHNSON]. In his absence I withhold my vote.

Mr. SAULSBURY (when his name was called). I have a pair with the junior Senator from Rhode Island [Mr. COLT], which I transfer to the senior Senator from Nevada [Mr. NEWLANDS] and will vote. I vote "yea."

Mr. TILLMAN (when his name was called). Announcing the same transfer as before, I vote "nay."

The PRESIDING OFFICER (when Mr. WALSH's name was called). I have a general pair with the senior Senator from Rhode Island [Mr. LIPPITT]. In his absence I withhold my vote.

The roll call was concluded.

Mr. O'GORMAN. I have a general pair with the senior Senator from New Hampshire [Mr. GALLINGER]. In his absence, I withhold my vote.

Mr. CLARKE of Arkansas (after having voted in the affirmative). I inquire whether or not the junior Senator from Utah [Mr. SUTHERLAND] has voted?

The PRESIDING OFFICER. He has not.

Mr. CLARKE of Arkansas. Then I transfer the pair I have with that Senator to my colleague [Mr. ROBINSON] and will allow my vote to stand.

Mr. CLARK of Wyoming. I transfer the pair which I have with the senior Senator from Missouri [Mr. STONE] to the senior Senator from Idaho [Mr. BORAH] and will vote. I vote "nay."

Mr. KERN. I wish to announce that my colleague [Mr. TAGGART] is paired with the junior Senator from Vermont [Mr. PAGE].

Mr. HARDWICK (after having voted in the affirmative). Has the junior Senator from Kansas [Mr. CURTIS] voted?

The PRESIDING OFFICER. He has not.

Mr. HARDWICK. I have a pair with that Senator, which I transfer to the junior Senator from New Jersey [Mr. HUGHES] and will allow my vote to stand.

Mr. WILLIAMS (after having voted in the affirmative). I voted a moment ago under a previous announcement of the transfer of my pair with the Senator from Pennsylvania [Mr. PENROSE] to the Senator from Arkansas [Mr. ROBINSON]. I have since learned that the Senator from Pennsylvania, if present, would have voted as I did, to wit, "yea." So I change the announcement, but will let my vote stand.

Mr. KERN. I have been requested to announce the following pairs:

The Senator from Montana [Mr. MYERS] with the Senator from Connecticut [Mr. MCLEAN];

The Senator from Missouri [Mr. REED] with the Senator from Michigan [Mr. SMITH]; and

The Senator from New Jersey [Mr. MARTINE] with the Senator from Illinois [Mr. SHERMAN].

The result was announced—yeas, 47, nays 19, as follows:

YEAS—47.

Ashurst	Dillingham	Martin, Va.	Simmons
Bankhead	du Pont	Nelson	Smith, Ariz.
Beckham	Fletcher	Oliver	Smith, Ga.
Brandegee	Hardwick	Overman	Smith, Md.
Broussard	James	Owen	Smith, S. C.
Bryan	Jones	Phelan	Sterling
Catron	Kern	Pittman	Swanson
Chamberlain	Lane	Poindexter	Underwood
Chilton	Lee, Md.	Ransdell	Vardaman
Clapp	Lewis	Saulsbury	Weeks
Clarke, Ark.	Lodge	Sheppard	Williams
Culberson	McCumber	Shields	

NAYS—19.

Brady	Hollis	Norris	Tillman
Clark, Wyo.	Husting	Shafroth	Townsend
Cummins	Johnson, S. Dak.	Smoot	Wadsworth
Harding	Kenyon	Thomas	Warren
Hitchcock	La Follette	Thompson	

NOT VOTING—29.

Borah	Hughes	O'Gorman	Stone
Colt	Johnson, Me.	Page	Sutherland
Curtis	Lea, Tenn.	Penrose	Taggart
Fall	Lippitt	Pomerene	Walsh
Gallinger	McLean	Reed	Works
Goff	Martine, N. J.	Robinson	
Gore	Myers	Sherman	
Gronna	Newlands	Smith, Mich.	

So the conference report was agreed to.

RELIEF OF DESTITUTE AMERICANS IN MEXICO.

Mr. MARTIN of Virginia. From the Committee on Appropriations, I report back favorably without amendment the bill (H. R. 16911) making an appropriation for the relief and transportation of destitute American citizens in Mexico, and I ask unanimous consent for its present consideration.

The PRESIDING OFFICER. The Senator from Virginia submits a report from the Committee on Appropriations and asks unanimous consent for its present consideration. The bill will be read.

The Secretary read the bill, as follows:

Be it enacted, etc., That for the relief of destitute American citizens in Mexico, including transportation to their homes in the United States, there is appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $300,000, to be expended under the direction and within the discretion of the Secretary of State, and to be available for the fiscal years 1916 and 1917: *Provided*, That American citizens to whom relief is extended or transportation is furnished hereunder shall pay to or reimburse the United States all reasonable expenses so incurred, respectively, on their account, if financially able to do so.

Mr. MARTIN of Virginia. Mr. President, I shall not consume any of the time of the Senate in explaining this matter. The reading of the bill explains itself. I have, however, a very urgent letter from the Secretary of State on the subject. I will simply say that it seems there are now 5,000 American citizens in Mexico in a destitute condition, and their lives are imperiled. This is a very great emergency, and I hope the Senate will agree to the present consideration of the bill and then pass it.

Mr. SMITH of Georgia. Mr. President, I understand that if we consider the bill by unanimous consent it will not displace the Agricultural appropriation bill?

The PRESIDING OFFICER. It will not.

Mr. SMITH of Georgia. The appropriation bill is simply temporarily laid aside.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

AGRICULTURAL DEPARTMENT APPROPRIATIONS.

The Senate resumed the consideration of the bill (H. R. 12717) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes.

Mr. UNDERWOOD. Mr. President, I believe the pending question is my motion to suspend the rules?

The PRESIDING OFFICER. The pending question is the motion of the Senator from Alabama to suspend the rules.

Mr. UNDERWOOD. Mr. President, I desire to amend the motion to suspend the rules by transposing some of the language. There seems to be a misapprehension in the way the original amendment was offered by the Senator from Louisiana [Mr. BROUSSARD]. The amendment would have allowed to be imported into this country tick-infested cattle. I am satisfied in my own mind that there was no such purpose, and that the Agricultural Department would not have agreed to a provision of that kind. To relieve any doubt on that subject, however, I desire to amend the amendment by transposing the words "tick-infested cattle" from where they appear in the present amendment and inserting them immediately before the word "Mexico," so that that part of the amendment will read as follows:

To permit the admission of cattle from tick-infested Mexico, South and Central America, and the islands of the Gulf of Mexico.

So that it will indicate that the words "tick-infested" apply clearly to the country from which the cattle come, and not to the cattle themselves.

I understand that I have a right to amend without——

Mr. SHEPPARD. Mr. President——

The PRESIDING OFFICER. The amendment proposed by the Senator will be considered as having been amended as proposed by him.

Mr. BROUSSARD and Mr. OLIVER addressed the Chair.

Mr. SHEPPARD. I rise to a point of order.

Mr. BROUSSARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Louisiana?

Mr. UNDERWOOD. I do.

Mr. BROUSSARD. I suggest to the Senator from Alabama, instead of saying "tick-infested Mexico," that he insert the words "territory of" after "tick-infested." It does not sound very well to say "tick-infested Mexico."

Mr. UNDERWOOD. I insert, then, after the words "tick-infested," the words "territory of," so that it will read "tick-infested territory of Mexico."

Mr. SHEPPARD. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator from Texas will state the point of order.

Mr. SREPPARD. It is that the change can not be made at this time. The Senator from Alabama gave notice that he would move to suspend the rules in order to propose a certain amendment. He can not now change that amendment, because another day's notice would be required. He has to give notice in writing of the exact matter that he desires to offer as an amendment.

Mr. UNDERWOOD. Mr. President, as I understand the rules, the notice I am required to give and particularize about is the particular section of the rule which I propose to introduce an amendment in contravention of; and it does not apply to an amendment, provided the amendment is germane to the original amendment which I offered. I do not think there can be any question about that.

The PRESIDING OFFICER. The Chair is of the opinion that the Senator giving the notice to suspend the rules in order to present for the consideration of the Senate a certain amendment is at liberty to amend his notice by an appropriate and germane change in the amendment which he proposes. The Chair accordingly overrules the point of order.

Mr. SHEPPARD. Mr. President, permit me to suggest that it may be proper for the Senator to amend his notice, but the notice of the amendment should lie over one day.

The PRESIDING OFFICER. The Chair is of the opinion that that point is not well founded.

Mr. UNDERWOOD. Mr. President, this amendment is really the amendment of the Senator from Louisiana [Mr. BROUSSARD]; and as it is his amendment, I think it would be proper that he should make the opening statement on it. I therefore yield the floor to him.

Mr. BROUSSARD. Mr. President, the amendment which has been suggested by the Senator from Alabama is important only to the extent that it removes an expression in the amendment which does not seem to be entirely understood, I may say, by the layman who has not consulted the Department of Agriculture.

Mr. VARDAMAN. Mr. President, this is a matter of very great importance, and I ask for order so that we may hear the Senator from Louisiana discuss it.

Mr. BROUSSARD. So far as the enforcement of this amendment by the Secretary of Agriculture is concerned, should this amendment become law, it makes no difference whether the words "tick-infested cattle" are included in it, or "cattle from tick-infested sections of other countries." Heretofore, in the discussion that has taken place with regard to this amendment, we have treated the subject purely from the standpoint of the effect of extending the amendment to the appropriation bill of 1911, opening the ports of Texas to the importation of cattle from Mexico, to the other States south of the quarantine line whose ports are not now open under that amendment. In other words, the purpose of this amendment is not to inaugurate a new policy with regard to the importation of cattle into the United States, both below the quarantine line and their shipment above the line, but it is the intention of this amendment to establish that equality among the ports of the country which is provided for by the Constitution.

The amendment of 1911 is clearly a violation of the Constitution requiring the equal treatment of the ports of the country. The amendment was placed in that bill on the final day of the session of Congress of 1911—on the 4th of March—at a time when, as everybody knows, a great deal of haste prevails with the legislation that congests the dockets at both ends of the Capitol.

There is no question that had the same policy been pursued by the people of the other States south of the quarantine line that is now being pursued by the people of Texas, who for the last five years have enjoyed the privilege of having their ports open to these cattle, the courts would have held that that amendment, because of its limitation to the ports of Texas, was stricken with constitutional nullity. But no one has sought to visit that narrow construction of the law upon the people of Texas.

Originally the intent of that amendment was to permit the people of Texas to send their herds into Mexico to graze and to be enabled to bring them back into Texas. Then, after the amendment was adopted, they secured a construction of that amendment which permitted them to take cattle from Mexico—Mexican cattle—and carry them across the border; and when these cattle reached Texas they were shipped everywhere in the United States. They were sold upon the market at the stockyards; they were sold upon the market to feeders in the West; and they have gone everywhere and entered into the commerce of the country just as cattle raised in Texas and Louisiana and other sections of the territory. Of course, the moment they entered Texas they became subject to the same quarantine rules that prevailed with regard to tick cattle in the tick area of the country when they are shipped north of the quarantine line.

But statements have been made with regard to the operation of this amendment that it is well for the Senate to look into. After the construction had been had that it was permissible under that amendment to let Mexican cattle into Texas, the Texas importers of these cattle undertook to extend the line, and so we see that in the year immediately after the passage of the Underwood tariff act, which placed cattle upon the free list, a great impetus was given to the importation of cattle, under this section of the appropriation act of 1911, into the State of Texas. For the period of two and a half or three and a half months, or less than that, following the enactment of the Underwood tariff act placing cattle upon the free list, the importers in Texas insisted on securing the opening of practically every port upon the border, and from the 3d of October until the 22d day of January, 1914—a period of three months—there were imported into Texas, of Mexican cattle, 145,000 head.

These cattle were not all imported as provided for in this amendment to the act of 1911. Nay; a large proportion of them were imported in violation of that provision of the act of 1911, because in the figures furnished me by the Department of Agriculture, showing this importation during that period of time, the first port referred to is the port of El Paso, which is north of the quarantine line, and at that port during that period of time 69,782 head of cattle were brought into Texas.

I understand that now they are not permitted to enter at the port of El Paso. But an amendment to an appropriation bill which originally was intended to let Texas cattle go into Mexico for grazing purposes alone and to return to the United States has been construed so as to permit the importation of cattle into 20 different ports in the State of Texas, one of which, and the main one of which, was north of the quarantine line, when the provision of that amendment was that they should be imported only below the quarantine line.

Immediately after this large importation of cattle from Mexico occurred, and when this business had been well established, the revolution then prevailing and still prevailing in Mexico, one of the insurgent or revolutionary armies got control of the northern part of Mexico, from which all these cattle came into Texas, and, seeing these cattle going across the border, attached an export tax of $20 a head, Mexican money, upon the exportation of these cattle; and that had a tendency to stop the importation of cattle into Texas under the act of 1911.

What happened then? Immediately the people in Texas who were engaged in that business undertook to place another and an additional construction upon this provision by having the construction placed upon it under our treaties which would enable them to go into Central America and secure cattle there under an act which permitted the importation of cattle only from Mexico. I find that the Galveston Commercial Association addressed a letter to Hon. MORRIS SHEPPARD, which reads as follows:

> Referring to your letter of December 1, inclosing one from the Chief of the Bureau of Animal Industry, Department of Agriculture (his file 9527), we are fully aware of the conditions which the chief of the bureau recites. However, Galveston people are now engaged in handling cattle from Honduras and Venezuela, and we know that outside of ticks there is no objectionable feature to be found attached to them.
>
> I understand that it may be necessary for the Department of Agriculture, through the Bureau of Animal Industry, to investigate the conditions in Honduras and Venezuela with respect to the importing of cattle before Congress passes the necessary legislation, or at least before cattle can be imported into the United States; and I would thank you to present this matter to the department at your earliest convenience, with the suggestion that the matter should be given earnest and immediate attention, and I hope you will confer with Representative GREGG and arrange that the necessary legislation be introduced into Congress and acted upon at the earliest moment.
>
> GALVESTON COMMERCIAL ASSOCIATION.

I do not know what the Senator may have done with regard to this request of the association at Galveston; but we find that shortly after the receipt of this letter by the Senator who now objects to extending this same privilege to other States north of the line, all the ports of Texas were opened to all cattle coming from everywhere in the Tropics, and that privilege was denied every other port in the South Atlantic States, south of the line, and every other port on the Gulf coast.

So that Texas has enjoyed a monopoly by virtue of an amendment to an appropriation bill intended merely to permit their grazing their cattle across the line. They have now brought within the purview of the operations of that law all of the cattle in Mexico; and when deprived of an opportunity of getting further cattle from Mexico, they have invoked the aid of the Department of Agriculture.

They have solicited, through that department, the opinion of the Attorney General; and the Attorney General has held that under the "most-favored-nation" clause of our treaties with Guatemala, Honduras, Venezuela, and all of these countries, they enjoy the same privilege with regard to the exportation of their cattle to Texas ports that Mexico enjoyed under the act of 1911. Thus we see that Texas to-day is opposing the extension of that privilege, and it is now enjoying the privilege which we seek to confer upon other ports south of the quarantine line situated exactly as are the ports of Texas.

Mr. KENYON. Mr. President——

Mr. BROUSSARD. Twenty of these ports are now open, and cattle are coming into them freely—not only Texas cattle fed in Mexico—which is a privilege that the State of the Senator who addressed the Senate awhile ago is not permitted to enjoy. They will not permit—I have investigated that question—a man in Arizona whose cattle graze in Sonora, across the international line, marked only every league by a white marble post, to indicate where that line goes, to return his cattle to Arizona. They can compel them to stay in Sonora; and yet in Texas, north of the quarantine line, where there is no sanction of law at all to warrant it, either in fact or by construction, they permit these same cattle to enter Texas through the port of El Paso.

Mr. SHEPPARD. Mr. President——

Mr. BROUSSARD. I yield to the Senator.

Mr. SHEPPARD. Does the Senator mean to say that under no circumstances are cattle permitted to come into New Orleans from any Spanish-American country?

Mr. BROUSSARD. Under no circumstances. Now, I may say this to the Senator. I have already stated to-day——

Mr. SHEPPARD. Is that by reason of a law or a regulation of the department?

Mr. BROUSSARD. It is by reason of the construction by the department of the law in which Texas cattle are admitted from those same countries.

Mr. SHEPPARD. What law?

Mr. BROUSSARD. By virtue of the construction reached by the department on the appropriation act of 1911.

Mr. SHEPPARD. The amendment of March 4, 1911, applied only to Texas.

Mr. BROUSSARD. I know it applies to Texas, and it applies to Mexico. You get cattle into Texas from Guatemala and from Honduras. You get them from British Honduras. You get them from everywhere. You get them from Colombia and from Venezuela. You have your ports wide open, and Louisiana and Alabama and Georgia and Florida and North Carolina and South Carolina, you say, shall not enjoy the privileges the State of Texas enjoys in regard to this matter.

Mr. SHEPPARD. Under the law of 1890, cattle may be admitted into Texas or any other port provided they are not infected with disease or have not been exposed to disease within 60 days. That is the universal law as it applies to all ports of the United States. If cattle are not admitted at the port of New Orleans, it is for some other reason than the enactment of the law of 1911.

Mr. BROUSSARD. I have studied this for six or eight years. I have followed it both in this country and abroad. I will say to the Senator the people of Texas secured a construction of the act of 1911 by which they prevented us from receiving these cattle. There is no question at all that under the act of 1890 it is competent for the Secretary of Agriculture and the Secretary of the Treasury to open all these ports. There is not any question at all that under the wording of the tariff act of 1913, the Underwood-Simmons Act, it is competent for the Secretary of the Treasury and the Secretary of Agriculture to open all these ports. That is discretionary with them. That discretion has been in the past exercised, but in 1911 the people of Texas who wanted these cattle from Mexico invoked that discretion vested in the Secretary of the Treasury or the Secretary of Agriculture, and an amendment on the last day of Congress was attached to an appropriation bill giving that privilege to Texas and the department——

Mr. SHEPPARD. Mr. President——

Mr. BROUSSARD. Pardon me. And the Department of Agriculture has construed that if these acts intended, as the Senator says, to confer that discretion upon them, that discretion was taken away from them by Congress when Congress specifically legislated that these cattle should not enter the ports of Texas. That is the construction provoked by the action of the Senator himself, which he now invokes to prevent other States from enjoying the same privilege which the people of his State now enjoy in regard to this matter.

Mr. SHEPPARD. The Senator has given the Senate the impression that all cattle, whether tick infested or not, would be prohibited by the amendment of the Agricultural appropriation act of 1911, now under debate, from admission to other than Texas ports.

Mr. BROUSSARD. I know the Senator does not give any such impression.

Mr. SHEPPARD. I say that is the impression made upon the Senate by the Senator.

Mr. BROUSSARD. I will say, however, to the Senator from Texas that the cattle which have been imported into Texas are not safeguarded, and unless the amendment which is now pending is adopted there is no way to safeguard the herds in Texas and elsewhere from infection, because the regulations require the dipping of these cattle at the port of departure, and they are not dipped now. These cattle come undipped, and the only right they have to come in is because the inspector passes them under this provision.

Mr. SHEPPARD. The law does not say that they must be admitted undipped.

Mr. BROUSSARD. I know the act does not, but the Senator knows that the regulation adopted by the Department of Agriculture under which this act was put in operation does. It is not self-operative.

Mr. SHEPPARD. Mr. President——

Mr. BROUSSARD. The Senator will permit me to answer the question before he undertakes to propound another. The Senator knows as well as I do that the act of 1911 invested discretion which, in my judgment, already existed in law for the Secretary of Agriculture to permit the entrance of these cattle into the ports of Texas and to enter upon such regulations as may be fixed by the Department of Agriculture. The Senator must know that in the enforcement of those regulations the entrance of cattle into Texas has not been subject to dipping in the port of exit, the port of departure, and that there are no dipping vats on the Mexican side of Rio Grande through which the cattle may be run before they enter into Texas.

There are none at El Paso, where 69,000 cattle were put through in less than three months. We propose under this amendment not only to permit the opening of these other ports, but we propose to regulate the entry of these cattle into Texas and compel the owners of cattle in Texas to do the same thing. We propose to dip the cattle on the Mexican side and then redip them on the Texas side before they are permitted to mix with the native herds. It is really safeguarding the herds of the United States, which the act of 1911 does not do. The very thing which is complained of by the Senator from Texas as being dangerous to these herds is what we are trying to remedy now, because Texas imports cattle from Mexico now and takes them to Louisiana, and we have no way of protecting ourselves except by local quarantine, since Louisiana has made it compulsory to eradicate ticks in that State.

Mr. SHEPPARD. Will the Senator permit me? I understand that Texas people can not ship cattle to Louisiana unless the Louisiana authorities consent.

Mr. BROUSSARD. Yes; that is very true, but they were shipped because the Louisiana authorities had not undertaken the eradication of the tick in the State. It has done so now, and now they can not be shipped. They have been shipped in the last four years.

Mr. ASHURST. Will the Senator yield to me for a question? I believe that the provision in the Agricultural appropriation act of 1911 grants a special privilege to the State of Texas.

Mr. BROUSSARD. There is no question about that.

Mr. ASHURST. I also believe that that should be repealed, and I know the Senator is right in trying to repeal any special act about ticks. Would not the repeal of the provision of the Agricultural act of 1911 accomplish the result the Senator desires?

Mr. BROUSSARD. No, sir; it would not. There is this about it, if the Senator will let me proceed. The Senator's State is north of the quarantine line and he is naturally interested in keeping the ticks out of his part of the country.

The Senator is for a quarantine regulation which now prevails to keep Texas cattle below the line from being shipped into Arizona, but when cattle from the State of Arizona are shipped to some packing plant, say, at Fort Worth or Kansas City or East St. Louis or Chicago, or any of the packing points, if there are no cattle from tick-infested Texas or Louisiana or Alabama, the cattle shipped from Arizona get the benefit of the highest market prevailing on that day. But if it so happens that on that particular day there should come a carload of cattle from Texas or from Louisiana to enter the same packing house to which the Senator had shipped from Arizona, because of the quarantine regulation which requires the slaughter of the tick-infested cattle within 24 hours or a reshipment to the point of departure, at once his cattle are discarded from the market, and not one of them is purchased by the packer until the entire herd shipped from the tick-infested cattle has been consumed by the packing plant. Is not that the fact? We both lose under those conditions. We lose below the quarantine line because we are compelled to dispose of the cattle inside of 24 hours, and the packers give us any price they please, and the gentleman from Arizona loses because he is in competition with a lot of cattle that must be immediately slaughtered, and his can wait. So they make him wait. He loses in the weight of the cattle; he loses in the price of the cattle; the market is disturbed; he does not secure the value for his cattle on that occasion that he would have secured if he had reached the packing plant when there were no cattle from the tick country. That is a fact.

Now, what I am trying to do is to compel the establishment of a packing plant south of the quarantine line. What I am trying to do is to insure a visible supply of cattle south of the quarantine line to warrant the establishment of a packing plant in the South. When we accomplish that, then what happens? The gentleman from Arizona will continue to ship to Kansas City, Fort Worth, or East St. Louis, or Chicago without the fear of having to compete with Louisiana cattle, without the fear of having to compete with Texas cattle; and Texas will ship her cattle to the plant south of the quarantine line. So there will

be two markets where there is one to-day, and competition both to the seller of the stock and the purchaser of the meat on the market.

Let me tell the Senator, it is as much in the interest of Arizona and Iowa as it is in the interest of Louisiana or Alabama. There is no question that if you show a visible supply which is in existence at this moment in Guatemala and Honduras—and I have gone over that country studying those questions—if you show there is a visible supply, the moment this bill is passed there will be established at New Orleans, at Mobile, and probable at some other point—probably Galveston—a packing plant in the tick territory, and then competition will cease between tick cattle and nontick cattle, to the advantage of the producers of both the tick and the nontick cattle.

Mr. FLETCHER. Mr. President——

Mr. BROUSSARD. I yield to the Senator from Florida.

Mr. FLETCHER. I ask the Senator this question. Suppose we do not want any tick cattle from that region?

Mr. BROUSSARD. I tell the Senator I do not want tick cattle, either, but it is made obligatory in the State of Louisiana, and last week a jail sentence was attached if cattle are not dipped in 21 days. I have gone into the business myself. I received my certificate last week that my small place is clean of ticks, and I can ship from tick territory to Chicago or anywhere else cattle that will pass muster and go into competition with cattle from the State of Arizona or any State north of the line. We do not want tick cattle. What we want is a packing plant in Florida.

I can tell the Senator—I know he knows, but I will state for the information of the Senate—that the herds of Florida have been practically bought up in the last 24 months and shipped to East St. Louis to supply that market. They have decimated the herds of Florida. What is the result? Let me tell the Senator: The result is that the very gentlemen who are protesting in the Senate against the passage of this bill—the National Cattle Association—at this moment at the other end of the Capitol are demanding an investigation of the Beef Trust because they do not get enough for their cattle. So they appear in this rôle at the other end of the Capitol: They want to stop the meat packers from paying them too little for their cattle when their cattle are thrown into competition with tick-infested cattle at Chicago, in every packing plant; and at this end of the Capitol they are protesting that there should not be any additional man to compete with these men who are robbing them of an opportunity to buy their cattle. That is their attitude.

Mr. FLETCHER. If the Senator will allow me, I will ask him this question. In the first place I will admit that it would be to the interests of Florida cattle people to have packing houses in Florida, and I want to do what I can in promoting the cattle industry in Florida. It is becoming more and more extensive, by the way, every day. Many people have gone from other States into Florida in recent years and bought large tracts of land for the purpose of raising cattle. Those men interested in the raising of cattle are not particularly desirous that cattle from Venezuela, Colombia, and British Honduras, and these other countries, should come through their ports.

Mr. BROUSSARD. I say to the Senator that there is not a visible supply of cattle in the South to warrant the establishment of packing plants in the South. The fact stares the Senator in the face that there were more cattle last year than there are this year in Florida, and still more cattle the year before last than there are now in Florida. Those are the facts in regard to the Senator's State. I will tell the Senator why he has never had a packing plant and no prospect of one. With all the cattle in Texas south of the quarantine line and packing plants north of the line at El Paso and Forth Worth, with Mississippi now producing cattle that have taken prizes everywhere in this country at fairs, the fact remains that there are no packing plants in Mississippi or Louisiana. Going into the cattle industry on a large scale, freeing itself of ticks just as Mississippi is doing in a systematic way, in 24 months we do not expect to find a single inch of ground in Louisiana tick infested, and with all that there is no packing plant there. We do this absurd and uneconomical thing. We persist in taking cattle off the range in Texas and Louisiana and shipping them all the way to Chicago or Kansas or East St. Louis, there put them into packages to be reshipped, and pay freight to the seaboard in order to reach the foreign trade and compete with the foreign producer of meats in Argentina. The packing plant should be on the seaboard. That is its place. We ship cattle from the Southwest clean up to Chicago and pay freight on it. We incur the loss naturally following such a long shipment. We pack that stuff into cans and packages and seal it and prepare it for market, and then we pay the freight from Chicago to New York that we may compete in the world's market with that meat. Is there any economy in that?

Mr. SHEPPARD. No; but——

Mr. BROUSSARD. Pardon me. Let me finish the idea, please. Why have we not undertaken to develop this industry in the South? The South has produced more cattle now, and has practically every year, than there are north of the line. We have not been kept out of the market because of the tick; we get rid of that. We get good cattle in the South, and it is about time for us to ship our cattle, not solely as a southern proposition but as a big, broad proposition, operating in every direction to the advantage of every man, woman, and child of this Republic and to the commerce of the country, so far as our meat exportation is concerned.

In the first place, if you had your packing plants on the seaboard south of the quarantine line, every bit of salted meat, every bit of cured meat, every bit of canned meat would be put up on the seaboard, where you would save double the cost. You would ship no more north of the line and reship back south of the line to the seaboard. What would result from that? The result would be that there would be no competition between cattle grown south of the quarantine line and cattle grown north of the quarantine line. It would result in competition in the purchase of the cattle beneficial both to the sections free of ticks and to the sections yet not free of ticks. What else would follow? There would follow the saving of all the transportation cost of the cattle and meat, so that in entering the foreign market we would go with that advantage in favor of American meat against competing meat from Australia and from Argentina.

What else would follow? It would follow that there would be the same competition in disposing of this meat in the market that there would be in the purchase of the steer upon the market, resulting in giving an advantage to the consumer and compelling the packer to pack his stuff on a closer margin of profit than he now does.

Everybody is benefited. You get the advantage in your trade competition with foreign countries and you get the advantage in competition as to purchasers and you get the competition of your markets for the American consumer of the meat. Is there any reason why this proposition should not pass? Does it endanger anything? Read the letter of the Secretary of Agriculture. Every safeguard is thrown around it, every opportunity is given for protest of anyone or the showing of anyone regarding the healthfulness of cattle brought for inspection at the port of departure, dipping at the port of departure, inspection at the port of entry, dipping at the port of entry, inspection of the animals before slaughter, and the inspection of the meat after slaughter. Can you provide any greater safeguard than we contemplate in this provision, bringing this additional meat in and keeping Mexican infested cattle out of our country in order to divide our market along natural lines, forcing the packer to go on both sides of the line, keeping those south of the line and those north of the line for their market, permitting the entire output to compete in order that the consumer may not have to pay what he has to pay now for the price of meat?

Let me tell the Senator of one experience which I have had. It has been my misfortune to engage in mining in Sonora. I have lived quite a long time at periods at the nice little city of Douglas, in the southern part of the Senator's State. From there I built a road up thirty-odd miles through the big mountains near Cabuille. Up to the time my people and myself were driven out of there I had a contract with a man named G. L. Andrews, of Douglas, whom possibly the Senator knows—I know the colleague of the Senator from Arizona knows him well—under which he furnished me half a steer three times a week. I did not have enough men engaged in the prospecting which I was doing to consume more than that quantity. I paid 6½ cents a pound for this meat, which was first-class meat. The other half of the steer he had to dispose of. There was no neighbor within 30 miles of me; I think my nearest neighbor was Gen. Elias Calles, who owns a big ranch up beyond Cabuille.

The other half he brought to Douglas. He could not take the steer across the line, because Sonora was a tick-infested country, but he could take the half of the steer, or the whole of the steer, after he was killed; he could take the hoofs and the horns and he could take the hides and the ticks across the line. They permitted him to go across. So he gave me my half steer at six and a half cents a pound, and took the other half, together with the hide and the ticks and everything else that belonged to that steer, and went through the customhouse at Douglas, paid his duty—that was prior to 1914—on the meat and hide, and disposed of it for some 20 or 22 cents a pound in competition with local butchers at Douglas. Subsequently he

was called down. His ranch running up to the international line—and all of this is set out in his own statement in the hearing before the Committee on Agriculture of the other House, his report being included in this document—he secured authority to drive his cattle from his ranch into a pen on the Mexican side of the line, and into a slaughterhouse on the Mexican side, right beyond and immediately adjoining the line, and after the steer was slaughtered, the meat, the hide, and the whole thing were passed through to the American side and disposed of in Douglas, Bisbee, Courtland, and towns surrounding Douglas. He could not take one of these cattle across the line, but he killed it near the line, and then brought it over. We have that to contend with all the time with regard to our meat supply, because we have pursued the erroneous policy of not making an effort to establish packing plants in those sections to take care of the cattle south of the line. So the suggestion made by the Senator from Arizona would not relieve this situation. What the Senator from Arizona really needs is a packing plant in New Orleans, one in Mobile, one in Galveston, and possibly one in Florida. If he could get that, the competition of the tick-infected cattle would never interfere with his price when he ships to Kansas City or to East St. Louis or to Chicago. Would not that be an advantage to the Arizona man? Would it not be an advantage to the New Mexican stockman? Would it not be of advantage, also, to the Texas stockman, both north and south of the quarantine line? I do not think there is any question about it. It certainly would be to the advantage of the man growing cattle in this country, whether he raised the cattle north or south.

I have been at work on this thing for eight years, and I have investigated these herds personally. I have gone there with experts appointed by the department. I was surprised to hear my friend from Texas [Mr. SHEPPARD] speak of the foot-and-mouth disease being prevalent in Central America. There is no such thing there, and no man has ever heard of it being there; they do not know what it is; and the report made by the Department of Agriculture—and that report is also included here—is to the effect that there never was such a disease there. It is an unknown disease in that section of the world. Those herds are as healthy as any herds of cattle anywhere.

What do they sell for there? Of course, their selling price was stated, as I stated it to cattlemen in my own State, and they said that the price would be ruinous to them, and it would be ruinous if that price continued to prevail; but locally there is no demand for these cattle; they are permitted to die of old age. There is no market for them there. They go wild; a great many of them are unbranded. There are great herds of them in the mesquite country along the Petucha River and the Segovia River, and nobody cares for them, because there is no market for them. They sell a steer weighing 1,200 pounds for $10 in that country. You can buy a calf or a yearling or a 2-year old for a dollar. There is no market for them. With that supply right at our doors, why not have packing plants in the South where I can go, despite the fact that my farm is free of ticks?

Mr. ASHURST. Mr. President, will the Senator yield to me at that point?

Mr. BROUSSARD. Yes, sir.

Mr. ASHURST. The Senator from Louisiana is making a very illuminating argument, and I personally thank him for it. I am willing now to join with the Senator in any movement which will tend to relieve the cattle growers of the South and the Southwest, as well as those of other portions of the country, from the exactions of the packing houses and from the unjust—I think I am warranted in using that term—extortions of the packing houses.

Mr. BROUSSARD. I think the Senator from Arizona will accomplish that with this resolution. Let me tell him what has occurred recently. I have insisted, both at the Treasury Department and the Agricultural Department, that the port of New Orleans should be opened; that the discretion which is evidently invested in them to open the port of New Orleans should be exercised; I have asked the Secretary to impose all the restrictions he thought necessary, and I informed him that the people of New Orleans are prepared to construct at once quarantine pens, feeding places, places of landing, and everything else, all under the supervision of the department, so as to safeguard absolutely the cattle which are being raised in Texas. Last summer the Secretary of Agriculture undertook to experiment with this proposition. He sent men into Guatemala; they found some ranches that were clean of ticks; and he authorized the opening of the port of New Orleans. Twenty-one hundred head of cattle were brought through the port of New Orleans on their way to the packing plants at East St. Louis. With the last shipment were some cattle that had ticks. Immediately upon the discovery that they had ticks, the doors were closed, and, of course, the cattle were not further permitted to come in. I join in lauding the desire to keep ticks out of the country. We do not want them.

The Secretary suggested that if the plan now proposed were adopted he would undertake to regulate this matter by establishing inspection at the ports of departure in Honduras and Guatemala and Venezuela and by establishing inspection at the ports of entry where the cattle would not only be inspected but would be redipped in case any ticks had escaped the first dipping, so that when these cattle emerged from the quarantine, whether at Mobile or at New Orleans or wherever they may have landed, they would be sure to be as clean of ticks and as free from disease as any cattle anywhere. Of course the process of dipping and shipping over water and dipping again and shipping over land has a tendency to depreciate the value of the cattle for immediate slaughter.

I am told the scarcity of feeders is troubling the small farmers throughout the West. I have talked with them about it, and men who are in the business in a practical way, Members of the House of Representatives who are in the business out in the West, tell me that the cost of feeders to them is so high that they do not make, and do not expect to make, any profit out of the meat, but expect to make their profit out of the benefit derived to the farm where they feed these cattle. The fertilization of the farm and the continuation of its fertility seems to be the only object now. On account of the high price of the feeder, because of its scarcity and the depressed prices of the market, because the Packing Trust has made it so the farmer does not any more expect to make any money out of feeding and fattening cattle on his farm. He only expects to get such benefit as accrues to the farm itself by maintaining its fertility and increasing its production. That situation should be relieved. These cattle would open up an avenue for the consumption of the grain and hay that now goes into the market, instead of remaining on the farm and multiplying the production of the farm. So from that viewpoint benefit can be derived.

It does not make much difference, Mr. President, what view may be taken of this question; every solitary individual in this country is interested in this proposition. The man who is engaged in producing stock is interested in the matter, no matter in what section of the country he may live. The man who consumes meat at home is interested in this proposition; the man who sells stock on the market is interested in it; the man who exports meat in competition with foreign meat to the foreign market is interested in this proposition; the man who is located south of the quarantine line and who has seen a loss on every head of cattle raised by him for many years—oh, I can not say how many, but as far back as I can remember—and who has been taxed because of the tick from one to five dollars for every head of cattle he has shipped to market, is clearly interested in this proposition; the man north of the line who has to compete with this dipped, tick-infested cattle is clearly interested in it; the farmer who can not get a feeder now is clearly interested in it. Will any Senator point out anybody else who is not benefited by this provision? There is nobody but the packer himself who is interested in keeping these cattle out.

Mr. ASHURST. Mr. President——

Mr. BROUSSARD. I yield to the Senator.

Mr. ASHURST. Before the amendment is finally voted on I would suggest to the Senator to redraft the amendment. It may be that I am unduly meticulous and alarmed over the verbiage, but I would suggest to the Senator to modify it so that it will read "permit the admission of cattle from tick-infested countries," rather than "permit the admission of tick-infested cattle."

Mr. BROUSSARD. That has been done, I will state to the Senator, on the motion of the Senator from Alabama [Mr. UNDERWOOD]; and I am glad it has been done, because, before it was amended, it was likely to create a prejudice at first blush against the proposition.

Mr. ASHURST. It would compel everyone to explore the decisions and constructions of the department, and I think at least the provision ought not to contain the direct language that tick-infested cattle may come in.

Mr. BROUSSARD. Mr. President, I do not desire to detain the Senate longer with regard to this matter. It is one in which the entire country is interested. It is not purely a controversy between Texas and other Southern States; it is a matter in which everybody in this country is interested, and vitally interested. Every meat consumer and every cattle raiser in the country is interested in it; and I hope the Senate will see its

way clear to adopt the resolution of the Senator from Alabama and permit the incorporation of this amendment in the bill in order that the existing situation may be relieved.

The VICE PRESIDENT. The question is, Will the Senate suspend clause 3 of Rule XVI for the purpose of permitting the Senator from Alabama to present the amendment?

Mr. UNDERWOOD. On that I ask for the yeas and nays.

Mr. CATRON. Mr. President, before the yeas and nays are taken I desire to say a word. I have listened to the argument of the Senator from Louisiana [Mr. BROUSSARD], and from his standpoint doubtless it may be a very good thing to adopt this amendment; but the amendment now has been so enlarged that it is a thousand times more dangerous than it previously was. Instead of permitting the importation of tick-infested cattle, it now permits the importation of cattle afflicted with any disease on the face of the earth, provided the cattle come from tick-infected districts. Under that provision there can be brought into this country cattle afflicted with the foot-and-mouth disease, cattle afflicted with tuberculosis, or cattle afflicted with any other disease to which they are subject, provided they come from a tick-infected district. This provision will enable every known cattle disease to be scattered throughout the country.

We do not want the tick-infested cattle to be brought into the country, for the simple reason that, if what the Senator from Louisiana says he expects to be done is done in his section with the cattle which he says can be purchased for $10 a head, and they are brought into the market, although subject to whatever regulations the Department of Agriculture may establish, they may be sent throughout the United States, slaughtered, and made into meat or meat products either in Louisiana or in some other State. When meat of that character is sent out, what kind of meat are you going to get?

It is not certain that the cattle which are infected with ticks are the ones that have the Mexican fever. That is the general idea of the Department of Agriculture, but there are many scientific men, many men who have given great attention to the disease called Spanish fever or Texas cattle fever, who say that it is not the ticks that cause the disease, but something else that gets in the blood of the animal, goes through him, and makes him a diseased animal. Yet they propose to put that meat on the market and sell it to the people of the United States, and put it in competition with meat from cattle grown in Arizona, New Mexico, Colorado, and the entire western section of the country. If you can do what the Senator says can be done, our cattle will be reduced in market value more than 50 per cent a head. That will be accomplishing what the Democratic Party startd out to accomplish when they passed the Underwood bill; that is, it will be reducing the high cost of living, but it will not do very much toward increasing the health of the individual American citizen.

Mr. SHEPPARD. Mr. President, I ask the Secretary to read from the document I send to the desk the resolution passed by the Cattle Raisers' Association of Texas at its last annual meeting at Houston.

The VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

Be it resolved by the Cattle Raisers' Association of Texas, in annual convention assembled at Houston, Tex., March 21, 22, and 23, 1916:

(1) That this association protests against any extension of the present laws and regulations of the Department of Agriculture for the admission of cattle through any other ports than they are now admitted and against the admission of cattle from any country where there exists any contagious or infectious disease; the existence or nonexistence of such disease shall be ascertained by the Bureau of Animal Industry, and that no cattle which have been exposed or which are infected with any infectious, contagious, or communicable disease shall be admitted.

(2) We protest specially against the passage of the bill known as the Broussard bill, now pending in the Senate.

(3) We protest against admitting any live stock, hides, meat or products therefrom except under rigorous inspection and the ascertainment by the Department of Agriculture that these products of live stock and the live stock themselves are not capable of communicating any contagious or infectious disease: And, further,

(4) That the mere affidavit of the shipper shall not be considered as sufficient evidence of the fact that such animals or products are free from the contagious or infectious disease or that such animals have not been exposed to the same.

Mr. SHEPPARD. Mr. President, I wish to impress upon the Senate the fact that it is not alone the amendment to the Agricultural appropriation bill of March 4, 1911, that Senators desire to repeal, but it is the beneficent law of 1890, making it a crime to bring into the United States diseased cattle or cattle that have been exposed to infection within 60 days from the time of shipment.

The main objection to the amendment suggested by the Senator from Louisiana lies in the fact that mere regulation and inspection are not sufficient to keep out diseased cattle from the United States. It was on that basis that the law of 1890 was enacted. Let me direct the attention of the Senate to that law:

SEC. 6. That the importation of neat cattle, sheep, and other ruminants, and swine which are diseased or infected with any disease, or which shall have been exposed to such infection within 60 days next before their exportation, is hereby prohibited; and any person who shall knowingly violate the foregoing provision shall be deemed guilty of a misdemeanor, and shall, on conviction, be punished by a fine not exceeding $5,000, or by imprisonment not exceeding three years; and any vessel or vehicle used in such unlawful importation with the knowledge of the master or owner of said vessel or vehicle that such importation is diseased or has been exposed to infection, as herein described, shall be forfeited to the United States.

The effect of the amendment proposed by the Senator from Louisiana is largely to nullify that law. Enact that amendment, and it is no longer necessarily a crime to bring diseased or exposed cattle into the United States. If men are skillful enough to evade the spirit of regulations while complying with the letter, if dishonest employees may be found to connive at the importation of diseased cattle or of exposed cattle, they may be admitted to the ports of this country.

The Senator says that his amendment requires cattle to be dipped at the port of departure. Dipped by whom? By the authorities of other countries? What assurance have we that the regulations imposed by other countries will be sufficient? What assurance have we that the cupidity of some men will not bring about the corruption of employees, either of our own department or of some other? And if rules are so enforced as to admit just one head of cattle with foot-and-mouth disease the entire cattle industry of the United States will be imperiled.

Let me direct your attention to the fact that these gentlemen have enlarged the amendment so that it applies not only to tick-infested cattle but to all cattle from tick-infested countries. The law preventing the admission of diseased or exposed cattle from any country was a valuable law. Congress had in mind the temptations to which our inspectors, our employees, and other employees would be subjected when they passed a law of this kind. Congress felt that regulation alone would not suffice.

It is true that on March 4 an amendment was adopted to the Agricultural appropriation bill permitting the admission of tick-infested cattle from Mexico into that part of Texas below the southern quarantine line, under such regulations as the Secretary of Agriculture and the Secretary of the Treasury might prescribe. It was due to a purely local situation. The ranchmen on the Rio Grande, on the Texas side, owned large tracts of land across the river, and it was found onerous and almost impracticable to enforce the law in the case of every animal that would be driven from one side of the river to the other.

But I do not stand here in defense of any privilege which the State of Texas may enjoy to-day. The amendment which exempted Texas ought to be repealed if it affects in any substantial way the proper enforcement of this beneficent law making the transfer of diseased or exposed cattle into this country a crime.

Let me say further that in this Agricultural appropriation bill the Government is providing $750,000 to be expended this year in eradicating the cattle tick; and yet in this same bill Senators desire to provide for the admission of cattle from tick-infested countries, subject only to regulations by the Department of Agriculture and the Department of the Treasury. Such a provision will necessitate a larger appropriation for the purpose of combating the cattle tick. The Senator from Louisiana has said that to increase the number of ticky cattle in the United States will help to eradicate the cattle tick—an apparent contradiction. Let us not substitue departmental regulations for a penal law that has stood the test of over a quarter of a century. I do not believe the Senate is ready to take such a step.

If anything should be done, let us repeal any exemption enjoyed by Texas or any other State. The moment the cattle tick shall have been eradicated from the South, it will become the ideal cattle section of the earth. So let us devote every effort and every energy to the eradication of tick fever and other diseases of cattle, rather than to the impairment of laws which are monumental safeguards against the admission of diseased or exposed cattle from other countries. One head of cattle with foot-and-mouth disease admitted into this country will imperil all the cattle in the United States.

I ask the Senate to consider these facts before it takes the momentous step proposed in all good faith, I cheerfully admit, by the Senator from Louisiana [Mr. BROUSSARD] and the Senator from Alabama [Mr. UNDERWOOD].

Mr. DU PONT. Mr. President, I should like to ask the Senator from Louisiana whether his proposed amendment has the sanction of the Secretary of Agriculture and is recommended by him?

Mr. BROUSSARD. The Secretary of Agriculture has not only recommended the amendment I proposed but it was written by the Secretary and forwarded to the committee.

Mr. CATRON. I should like to have that recommendation read, if the Senator has it.

Mr. UNDERWOOD. I have it here.

Mr. BROUSSARD. It is in the RECORD already. I will say to the Senator from New Mexico that I placed it in the RECORD the other day. It was published last Friday, I think.

Mr. UNDERWOOD. Mr. President, I am surprised at the argument we have listened to with reference to this amendment endangering the health of American cattle.

In answer to the question just propounded by the Senator from New Mexico [Mr. CATRON] I desire to call to his attention, on page 12081 of the RECORD of July 6, 1916, a letter written by the Secretary of Agriculture to the Senator from Oklahoma [Mr. GORE], the chairman of the Committee on Agriculture and Forestry, favoring the pending amendment. I will not take the time to read the entire letter, which explains the working of the amendment, but I will read the concluding sentence:

> It is the opinion of the department that there is no controlling reason why tick-infested cattle from Mexico, South and Central America may not be admitted into any parts of the United States, as well in as outside of the cattle-quarantine area, provided the department be authorized to designate the ports of entry and make rules and regulations prescribing the conditions under which they may be admitted. This suggestion is offered in order that the committee may consider whether it cares to recommend the amendment of the bill so that it will admit tick-infested cattle into parts of the United States within as well as outside the cattle-quarantine area.

Mr. WORKS. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from California?

Mr. UNDERWOOD. I yield.

Mr. WORKS. I should like to ask the Senator from Alabama whether this fever itself is regarded as a transmissible disease?

Mr. UNDERWOOD. It is not. It can not be transmitted in any way except by the tick.

Mr. WORKS. That seemed to me to be a very important matter, and I desired to understand what the fact was about it.

Mr. UNDERWOOD. The simple proposition is that the cattle tick, when it bites the cattle, gives them the fever. That fever is very detrimental to the growth and development and fattening of cattle, but it does not make the milk of the cattle unhealthy. It does not make the meat of the cattle unhealthy. In the tick-infested districts of this country—which at one time extended far north, and are gradually being worked out—those cattle are being eaten all the time. They are now, and it is only a question of bringing in the tick, not the cattle.

Mr. WORKS. I was just going to ask the Senator about that—whether the probable effect of that is to increase the number of ticks and transfer them from one head of cattle to another?

Mr. UNDERWOOD. It would if they brought in the tick; but the pending motion is to adopt an amendment to this bill that has been prepared by the Secretary of Agriculture, that meets with his approval in a letter which you will find on the page of the RECORD I indicated a moment ago, that prescribes that before these cattle coming from tick-infested countries are admitted they must be dipped in the country of departure, there must be an intervening time of five days, and then they must be dipped again; and from long experience the Agricultural Department has held that then they are absolutely free of ticks.

That is the regulation that exists to-day in the United States. If you desire to carry cattle from a tick-infested portion of the United States to a point above the quarantine line, if you dip them, under the regulations of the Agricultural Department, wait five days and dip again, you can carry them into any tick-free territory. Now, why should the rule be different in regard to bringing them from tick-infested countries outside of the United States? The Secretary of Agriculture says there is no reason.

Mr. WORKS. As I understand the language of the amendment, it admits tick-infested cattle.

Mr. UNDERWOOD. No; the original amendment, as prepared by the Secretary of Agriculture, following the precedents in the laws, read as follows:

It authorized the Secretary of Agriculture and the Secretary of the Treasury to—

> permit the admission of tick-infested cattle from Mexico, South and Central America, the islands of the Gulf of Mexico—

And so forth, under certain terms.

Mr. WORKS. That is what I was referring to, if the Senator will allow me.

Mr. UNDERWOOD. Certainly; but the Senator was not in the Chamber when I amended my amendment. I have amended the amendment so that it reads as follows:

> To permit the admission of cattle from tick-infested territory of Mexico, South and Central America—

And so forth.

So that the proposition before the Senate does not apply to tick-infested cattle, though it does not make any difference, because, as a matter of fact, the Secretary of Agriculture did not contemplate the admission of tick-infested cattle. But in order that there may be no question about it, I have amended the amendment so that it does not say "tick-infested cattle"; it says "cattle from tick-infested territory of Mexico," and so forth.

Mr. WORKS. Mr. President, it may be that that amendment will satisfy Senators; but it seems to me that there ought to be some provision there that the ticks should be exterminated before the cattle are admitted into this country. If there are regulations, and they are being admitted under those conditions now, of course that would be unnecessary.

Mr. UNDERWOOD. They are. They are prescribed here. Under this amendment, if it is agreed to, before any cattle can come into the United States they must be dipped in the country of embarkation and prevented from getting on tick-infested soil until they are embarked. When they arrive in this country they must be retained five days and dipped again. Then they are free of ticks. So there is not a particle of opportunity for the ticks to come in here or for cattle with ticks on them to come in here.

As to the argument of the Senator from Texas [Mr. SHEPPARD], that this changes the general law that would keep out foot-and-mouth disease and other communicable diseases, there is not one word in this amendment, and there never has been, that would authorize any such thing as that. There is no law relating to diseased cattle that is repealed, either directly or indirectly, by this amendment. Why, I say to the Senator from Texas that it is an imputation against the Agricultural Department of this Nation to say that they would stand for an amendment to any law that would admit from any country diseased cattle for which they are asking to-day an appropriation of $750,000 to stamp out in this country. Why, it is an absurd proposition. It only grows out of the fevered imagination of gentlemen who do not want any competition in the markets of this country with the cattle that they own. That is the whole proposition. This is a question of having an opportunity to put other States of the Union on the same basis as the State of Texas, which is enjoying this privilege to-day, and which does not have to dip its cattle coming in under the present law before they are imported into the United States. It can bring them over the border with the ticks on them. If this amendment becomes a law, Texas will have to dip the cattle on the other side of the line before it can bring them in from Mexico, and Texas is unwilling to give up the privilege that it is now enjoying. That is the whole proposition.

Mr. WORKS. What connection is there between the tick and the foot-and-mouth disease?

Mr. UNDERWOOD. None whatever.

Mr. WORKS. Does the Senator know that it is very generally believed, and I think has been attested by scientific men, that the foot-and-mouth disease was largely the result of the use of hog-cholera serum? Has that ever been brought to his attention?

Mr. UNDERWOOD. It had not.

Mr. WORKS. I understand that to be so.

Mr. UNDERWOOD. As a matter of fact, these cattle are coming from Central America. The Senator from Louisiana a day or two ago read into the RECORD a report from our Agricultural Department showing that there was no foot-and-mouth disease in that country.

Mr. President, I am not going to detain the Senate with a further discussion of this question. With the price of meat soaring beyond bounds; with the fixed policy of the United States written on the statute books that there should be free importation of cattle into this country for the purpose of feeding, within reasonable limits, the American people; with the fact that since that law has been on the statute books, instead of depressing the price of cattle, the price has soared and soared and soared until the poor to-day can hardly have meat on their table, this amendment, if adopted, would admit to the United States a small number of cattle. Why should we close the door? The policy of our Government has been declared otherwise. Why should we give to the State of Texas alone this privilege and deny it to your constituency and my constituency?

I hope the Senate will agree to the motion to suspend the rules in order that we may vote on the amendment, and on the motion to suspend the rules I ask for the yeas and nays.

Mr. GALLINGER. Mr. President, before the Senator takes his seat may I ask him a question?

Mr. UNDERWOOD. Certainly.

Mr. GALLINGER. Did I understand the Senator to say that the ticks attack cattle, in some way developing a fever, but that that fever does not affect the milk of the cattle?

Mr. UNDERWOOD. It does not. Of course, the fever passes off in a day or two if it does not kill them. It affects the amount of milk they give, the growth of the cattle, and the weight of the cattle, but——

Mr. GALLINGER. And is the milk from cattle affected in that way sold in the markets where these cattle exist?

Mr. UNDERWOOD. Oh, absolutely. It has been for years. As a matter of fact, as the Senator probably knows, from nearly as far north, I think, as the State of Ohio—I am not sure about that—and all the way from Kentucky on down through the Southern States, and, I think, extending up into the Middle West, for many years that whole country was covered with ticks; and all the cattle we had were tick cattle, and we ate the meat and drank the milk.

Mr. GALLINGER. I am merely asking for information. It seems to me rather remarkable that a cow could develop a fever and that fever would not affect the milk. But that may be so. I have no information on that point.

Mr. UNDERWOOD. The fever lasts only a short time.

Mr. SMITH of South Carolina. Mr. President, if the Senator from Alabama will allow me, in answer to that question I will say that it has been found out by experiment that a calf taken from an immune zone and carried into a tick-infested zone may develop the fever, but it is rarely fatal to the calf. It is fatal to a grown cow, but those that are born within the infested region are immune from the fever. The danger is when you take a cow from the infested region and carry her into an immune region she herself does not develop any fever, but the ticks she has get on the cattle that were raised in an immune zone and kill them.

Mr. SHEPPARD. Mr. President, I would not detain the Senate further but for the fact that the Senator from Alabama charges that my statement that this amendment nullifies the spirit of the law of 1890 emanates from a fevered imagination. I express the hope that it is not the tick fever that has seized my imagination. The tick-fever imagination may flourish in the minds of other Senators who seem to be so desirous of admitting the cattle tick, but not in mine.

I wish to say this: The Senator from Alabama states that the tick fever is not a communicable disease, and yet we have a quarantine line stretching from the Atlantic to the Rio Grande in order to keep the tick fever within the larger portion of the South. Let me say to the Senators from the North that cattle grown in the North and transported to the South can not live six months on account of the infection due to the presence of the cattle tick. Cattle from the tick-infested regions can not enter the North except for immediate slaughter. Thus the interchange and intermingling of breeds so necessary to the cattle industries of both sections are seriously handicapped.

It has been estimated that the cattle tick causes a loss of from sixty million to one hundred million dollars to the cattle industry of the South every year.

The Senator from Alabama said that the law of 1890 was not affected. His amendment specifically states that the law——

Mr. UNDERWOOD. I said the law of 1890 was not affected so far as it was a communicable disease. Of course, it is affected so far as the 30 days' quarantine on tick-infested cattle is concerned.

Mr. SHEPPARD. I want to make it plain that the Broussard amendment practically nullifies the effect the law of 1890 was intended to have.

Mr. UNDERWOOD. Does the Senator really and earnestly believe that the Agricultural Department will recommend a statute here that would open to the importation into this country of foot-and-mouth disease from other countries? Does he really believe that the letter recommending this bill coming from the Secretary of Agriculture intended that the amendment of the law would open the country to foot-and-mouth disease when it clearly says that it is purely relating to tick-infested cattle and no other cattle? You make a charge against the Secretary of Agriculture, if your statement was true, that would warrant the President in asking for his resignation.

Mr. SHEPPARD. I am making a charge against nobody. I think the Secretary of Agriculture wrote the letter in good faith, but the Secretary of Agriculture is not infallible. I am not willing to base a vote repealing the law of 1890 on his judgment or that or anybody else. The law of August 30, 1890, says:

> The importation of neat cattle, sheep, and other ruminants, and swine which are diseased or infected with any disease, or which shall have been exposed to such infection within 60 days next before their exportation, is hereby prohibited; and any person who shall knowingly violate the foregoing provision shall be deemed guilty of a misdemeanor, and shall, on conviction, be punished by a fine not exceeding $5,000 or by imprisonment not exceeding three years—

And so forth.

The effect of this amendment is to nullify the penalty clause of that law. If this amendment is adopted, it is no longer a punishable offense knowingly to bring diseased cattle into this country, if they are brought under regulations. The strictest regulations sometimes fail and the best of inspectors are sometimes deceived. If Senators want to take the responsibility of enacting an amendment of that kind, they are welcome to it.

Mr. POMERENE. May I ask the Senator a question?

Mr. SHEPPARD. Certainly.

Mr. POMERENE. Am I right in assuming that the amendment proposed by the Senator from Alabama places all the ports in the South—for instance, in Louisiana, Mississippi, New Mexico, and Arizona—on the same footing as ports of entry in Texas?

Mr. SHEPPARD. It makes the conditions of entry more liberal, both as to Texas and the rest of the South. Not only does it put them on an equality but it modifies the restrictions on the admission of cattle into Texas, as well as to the other ports of the South.

Mr. POMERENE. These ports are not on an equality now, as I understand it.

Mr. SHEPPARD. That is true, if you call it equality for one State to have diseased cattle admitted while others can not. I say, that if anything is done, let any existing special privilege be repealed. Do not extend it.

Mr. POMERENE. I understood from what the Senator from Alabama said that the restrictions proposed in his amendment are more drastic than those that are now imposed, so far as Texas is concerned.

Mr. UNDERWOOD. If the Senator will allow me, unquestionably to this extent. Tick-infested cattle can be admitted into Texas without being dipped on the other side of the border today. If this amendment is passed they will be dipped before they are brought across the line.

Mr. SHEPPARD. The Senator does not state the case entirely. This amendment applies not only to tick-infested cattle but to cattle of all kinds, not alone to cattle from Mexico and all other Spanish-American countries. In that way the restrictions are made vastly more liberal.

Mr. UNDERWOOD. If the Senator will allow me, that is merely an interpretation of the statute that he makes, in which the Secretary of Agriculture does not agree with him.

Mr. SHEPPARD. The Secretary of Agriculture does not say anything about the effect of this amendment on the law of 1890.

Mr. POMERENE. Let me ask this question further, and I ask it for information. If the amendment proposed by the Senator from Alabama becomes a law and is vigorously enforced, can these tick-infested cattle be introduced in this country so as to prejudice the other stock?

Mr. SHEPPARD. Exactly. Not only tick-infested cattle, but any other cattle that may get in under the regulations.

Mr. POMERENE. In what respect is the danger greater to the other stock than it would be if we left the law in the shape it now is?

Mr. SHEPPARD. Because the penalty no longer exists in the same degree as is now the case. That is why the menace is greater.

Mr. POMERENE. Do I understand that the penalty is repealed also?

Mr. SHEPPARD. It is repealed to the extent that regulations by departments are substituted for direct provisions of law.

Mr. UNDERWOOD. I will say to the Senator, if he will read the amendment—I do not want to contradict his statement——

Mr. SHEPPARD. In what respect is the law of 1890 amended by your amendment?

Mr. UNDERWOOD. Here is where it is amended, very plainly amended, in but one respect. I have said time and again that this amendment was prepared in the Agricultural Department. The Secretary of Agriculture stated in his letter what he intended by it. The law now would admit cattle in any port of the United States if they were dipped and then kept out for 30 days and dipped again. They could come now if they had the intervening space of 30 days.

Mr. SHEPPARD. The law of 1890 says nothing about 30 days. It says nothing about dipping. The Senator has in mind the regulation of the department.

Mr. UNDERWOOD. I am talking about the regulation under the law.

Mr. SHEPPARD. The Senator is talking about one thing and I about another.

Mr. UNDERWOOD. I understand; but what the Secretary is trying to change is to get it so construed that he can, through an act here that we pass, make a regulation that will allow the cattle to be dipped and wait five days and dip them again and bring them into the country, which is a commercial possibility. That is all the requirement when we carry cattle from the tick-infested portion of the United States into the quarantine portion. The proposition about the law repealing the penalty of 90 days is simply an idle dream. There is not a word of authority in it.

Mr. SHEPPARD. Then why do you refer to the act of 1890 in your amendment?

Mr. UNDERWOOD. The Secretary refers to it for the purpose of changing the regulation in reference to the admission of cattle that have had ticks on them and where these ticks have been removed. That is all there is to it.

Mr. SHEPPARD. There is no reference to ticks whatever in the law of 1890.

Mr. UNDERWOOD. But it is the regulation of it.

Mr. SHEPPARD. Oh, no.

Mr. UNDERWOOD. And there is no other purpose.

Mr. POMERENE. I should like to ask the Senator from Texas another question for information. If the law is permitted to remain as it now is, will the Texas cattle raisers and importers be benefited thereby as compared with other cattle importers and raisers in other States?

Mr. SHEPPARD. Yes; to the extent that anybody who takes the tick-infested cattle into the United States from Mexico is not subject to the penalty of the law of 1890.

Mr. POMERENE. So, looking at it from their standpoint they are largely controlled by selfish interests.

Mr. SHEPPARD. Let me say to the Senator that a large section of Texas has been cleaned up and is no longer within the quarantine line. Into that section tick-infested cattle can not be brought now. That section of Texas is on the same plane with the rest of the country above quarantine. The Texas catttle raisers say that whatever exceptions exist as to the quarantined part of Texas should not be extended. I do not stand here in the interest of any privilege or exemption, and I believe this to be the attitude of Texas cattlemen. I say it is dangerous to weaken the penalty clause of the law of 1890.

At the risk of tiring the Senate I want to read the terms of that law once more and then this amendment.

Mr. POMERENE. May I make a suggestion? If I understand the Senator from Texas and the Senator from Alabama, the Senator from Alabama says that these penalties are not repealed; the Senator from Texas seems to think that they are.

Mr. SHEPPARD. I am willing to read the law and the proposed amendment to the Senator and leave the matter to his judgment, inasmuch as he is one of the ablest lawyers in this body.

Mr. POMERENE. I thank the Senator for the compliment, but let me make this suggestion: If this language is not perfectly clear upon that subject, it seems to me the Senator from Alabama and the Senator from Texas could get together and make it so clear that he who runs might read.

Mr. UNDERWOOD. I will state to the Senator from Texas if the Senate suspends the rule and agrees to pass this amendment, and desires to put in a clause expressly stating that the penalty clause of the act of 1890 is not repealed, I will consent to it.

Mr. POMERENE. Why will not that settle it between the two distinguished Senators?

Mr. UNDERWOOD. It would. I know the Secretary of Agriculture has not sent a bill here repealing that penalty clause; but if the Senator from Texas wants to be safe about it, I will consent and agree to an amendment stating that the penalty clause is expressly not repealed.

Mr. POMERENE. I suggest, then, in the interest of time, that the Senator from Alabama amend his amendment so as to have that express provision in it.

Mr. UNDERWOOD. I will agree to any amendment the Senator from Texas desires to propose.

Mr. VARDAMAN. But until the rule has been suspended nothing can be done.

Mr. SHEPPARD. Such an amendment would make the Senator's amendment absolutely meaningless.

I wish further to call the attention of the Senate to the fact that the Secretary of Agriculture based his recommendation on the proposition that tick-infested cattle would be allowed not only to come into the United States by way of ports below the quarantine line, but above the quarantine line as well. The Secretary of Agriculture wants to put all the ports of the country on an equal basis. I do not believe the Senators from the Northern States would consent to the enlargement of the law so as to include their ports for a moment. Let me read the last sentence of his letter.

> This suggestion is offered in order that the committee may consider whether it cares to recommend the amendment of the bill so that it will admit tick-infested cattle into parts of the United States within as well as outside the cattle-quarantine area.

Senators will see that the Secretary of Agriculture bases his recommendation of this law on an entirely different theory from that advanced by the Senator from Alabama and the Senator from Louisiana.

Furthermore, they have offered a new amendment to the original which changes the original fundamentally from what it was when the Secretary of Agriculture recommended it. The Secretary of Agriculture recommended a law applying only to tick-infested cattle. These gentlemen have amended it so as to apply to cattle from all tick-infested countries. The fact that foot-and-mouth disease has not been found in a country does not mean that it may not be found at any moment. Let me tell the Senate it is attempting a dangerous thing when it tampers with a law that makes it a crime knowingly to bring any cattle that are diseased——

Mr. BROUSSARD. Will the Senator from Texas yield?

Mr. SHEPPARD. I yield.

Mr. BROUSSARD. I understand the Senator states now that the Secretary of Agriculture recommended the admission of cattle south of the line.

Mr. SHEPPARD. Yes; and above also.

Mr. BROUSSARD. Will the Senator answer this: Are you trying to carry out the letter of the Secretary with an amendment that says that no cattle shall enter above the quarantine line?

Mr. SHEPPARD. The Senator emphasized the letter so strongly that I felt justified in calling the attention of the Senate to its exact text.

Mr. BROUSSARD. Unquestionably the Senator from Alabama and myself submitted this bill, and the Secretary amended it to suit himself.

Mr. SHEPPARD. The Secretary contemplated the admission of cattle above the quarantine line as well as below it, and that is not your law.

Mr. BROUSSARD. But the Senator knows that the amendment says the cattle shall enter only below the quarantine line.

Mr. SHEPPARD. That is not the law recommended by the Secretary of Agriculture.

Mr. BROUSSARD. It is the law recommended in his letter.

Mr. SHEPPARD. I have read the concluding language of his letter to the Senate, and it shows that the Senator is mistaken.

Mr. SHAFROTH. I should like to ask the Senator from Texas a question. The Senator said that he is perfectly willing that the law which gives the exemption to the State of Texas should be repealed, and he has recommended that instead of a provision admitting infected cattle from other ports of the United States. If the rule is not suspended, is the Senator willing to propose that the law as to Texas, giving it a special privilege, shall be repealed?

Mr. SHEPPARD. I am. It will not be necessary for me to propose it, however, as the Senator from New Mexico [Mr. CATRON] has an amendment pending to that effect. All these charges about anybody in Texas desiring a monopoly are entirely unfounded.

Mr. SMITH of South Carolina. Let us have a vote now.

Mr. CATRON. I should like to say to the Senator from Colorado that I have already introduced an amendment repealing that law, which I will ask the Senate to put in the bill.

Mr. SHAFROTH. It is now pending?

Mr. CATRON. It is now pending, and it has been printed.

Mr. TOWNSEND. Mr. President, I do not know much about this cattle-tick pest, but I have been listening to its discussion here for several days and I have been impressed with the fact that it must be something terrible. The pending bill carries an appropriation of $750,000 for the purpose of exterminating it in the United States. As I understand the amendment of the Senator from Alabama it is to admit cattle from Mexico and Central America, as is the wording of the amendment, which are "tick infested."

Mr. UNDERWOOD. Will the Senator allow me to interrupt him? The amendment read originally "tick-infested cattle,"

because it was a technical term, but the amendment that it is proposed to vote on, as introduced by myself, says "cattle from tick-infested country."

Mr. TOWNSEND. I am basing my statement on the letter of the Secretary of Agriculture which has been offered by the Senator in support of his proposition. The Secretary, if he advises anything, advises that this shall apply to tick-infested cattle, a disease that we have been appropriating hundreds of thousands of dollars to eradicate.

Mr. WILLIAMS. I will say the amendment provides that treatment shall be given to the cattle before they come in.

Mr. TOWNSEND. I understand, and I have given due consideration to the fact that the amendment provides that some treatment shall be given to the cattle before they are admitted. But the real fact is, the cattle to be imported are either tick infested or else have been infected, and, at any rate, come from districts in foreign countries where the tick is prevalent. In other words, it is proposed to admit into our country for food purposes cattle which either have been recently or are at the time of importation sick with the tick fever; and in this very bill you are taking out of the people's Treasury three-quarters of a million dollars with which to eradicate this pest from our domestic herds.

This is such an anomalous proposition that I have been wondering what is the real reason back of it all. I know there have been so many amendments put on to this bill that provide for special interests and special localities that I perhaps ought not to look for any public good as the moving object, and yet somehow I am a little curious about this particular amendment.

The Agricultural bill has come to be quite like the river and harbor bill, so that it is now largely for local interests; ostensibly it is for the good of the farmer, but really it is more for political revenue than agricultural benefit. But the answer by the Senator from Alabama as to the object of this provision is that it will admit a few cattle—and he used the adjective "few"—a few cattle, and the cost of living will thereby be reduced.

Is it worth while, Mr. President and Senators, for us to take any chances on this disease, hoping thereby that we shall get a few cattle into the United States from some southern country? I have been almost compelled to rely upon the evidence of Senators who seem to be well informed about conditions in their localities as to national diseases or pests which infect live stock. While I have had some doubts, and while I have not approved of all of these extravagant appropriations, I have uttered no protest, satisfying my conscience as best I could that the object stated, namely, an effort to produce more healthful and abundant food was a worthy one. But I do protest, Mr. President, against adopting a provision which will permit the importation of foreign cattle about which there can be any question as to their health; and especially am I opposed to the admission of animals which recently have been afflicted and which possibly may now be sick with a communicable disease or just to exterminate which from our domestic cattle we are spending hundreds of thousands of dollars.

The Senator says that these ticks cause a fever which emaciates the animal and which, if unchecked, will cause its death, and yet he also states that the milk from a cow affected with this disease is all right for children; that the flesh of these cattle which have been reduced by the fever is fit for food.

Senators may haggle over this, yet the inference is irresistible that some locality expects to profit by the importation of a few cattle from a country where this disease exists.

Mr. President, I do not understand how we can be so inconsistent as to do a thing which might destroy or, at any rate, make more difficult the efforts of the Government to eradicate this cattle tick. When we have cured the disease at home, shall we continue to import it from abroad and thus make annual appropriations perpetual? I have read the statement of the Secretary of Agriculture. I read it quite differently from what has been suggested by the Senator from Alabama. This particular proposition has never been presented to the Secretary. He concludes that if it is thought best to adopt the amendment submitted to him, then some kind of protection should be thrown around it. Will the Senate conclude it is best for the purpose of benefiting a few cattle raisers in the South to subject the whole United States to the possibility of an added terror in the form of the cattle tick? Would it do this even if the Secretary of Agriculture had approved it?

Mr. SMITH of Georgia. Mr. President, I do not believe this will help any cattle raisers in the South.

Mr. TOWNSEND. I agree with the Senator from Georgia. Growers of domestic cattle could not favor it, but somebody expects to profit by the provision—shall I say cattle speculators? Possibly that expression would be better. At any rate the rules should not be suspended for the purpose of adopting this doubtful provision.

Mr. JONES. Mr. President, I have not been disposed to assist in the filibuster that is being carried on on the other side of the Chamber on the Agricultural appropriation bill. Almost every day I have been hoping that it would wear itself out and would cease, but there seems to be no indication of that at all, and so I think I shall take a little time to suggest one or two things.

Mr. President, this is a proposition to suspend the rules of the Senate—a stupendous proposition—to relieve an appropriation bill from that rule of the Senate which prohibits putting upon it general legislation. A few days ago a proposition of that sort was presented to the Senate. Some of the Senators expressed their horror that we should attempt to suspend the rules in order to attach to an appropriation bill general legislation. The proposition which we had at that time was one with which every Senator is perfectly familiar and the facts of which every Senator knows. It was a proposition to protect the States in the enforcement of laws which they had passed for their own protection and for the protection of their people and their homes. It was a proposition to prevent sending through the mails liquor advertisements into a State where such advertisements were prohibited by State law. There were some Senators who did not think that that was a matter of sufficient importance to warrant the suspension of the rules in order to put it upon an appropriation bill. There were some Senators who seemed to think that was a proposition that ought to be allowed to take its regular course, to be gotten up in the best way we could; and so it was voted down. Some expressed themselves as being in favor of the proposition, but they thought it was a horrible thing to try to suspend the rules so that we might put such legislation upon an appropriation bill, when such bills are generally composed of legislation, whether originating here or in some other body.

Mr. President, in connection with the proposition which was presented the other day, I have some material here which I want to put into the RECORD. I am not going to take time to read it. I received a very interesting letter from Judge Weakley, of Alabama, which gives some very valuable information and gives the number and the names of the States which have passed laws prohibiting the advertising of liquors. I want to put this letter into the RECORD, and I especially invite the attention of the members of the Post Office Committee to it.

The VICE PRESIDENT. In the absence of objection, permission to print the letter in the RECORD will be granted.

The letter referred to is as follows:

BIRMINGHAM, ALA., *July 7, 1916.*

Senator WESLEY L. JONES,
Washington, D. C.

DEAR SENATOR: I heard you speak at Indianapolis and was sorry I did not have an opportunity of meeting you there. Had I known you would return to Washington so soon, I would have sought you out; particularly would I have done this had I known it was your purpose on your return to undertake to secure the passage, as an amendment to the Post Office appropriation bill, of a bill forbidding the use of the mails to liquor circulars and advertisements when addressed into dry territory where it is unlawful to solicit orders or to advertise liquors. My interest in the matter arises out of the following facts: The Alabama Legislature, at a session in 1915, by a joint resolution, with the approval of the governor, memoralized Congress to enact legislation of this character, and appointed a commission of five citizens to go to Washington and present the matter to the authorities. I was named as one of the commission, and was elected by my associates as the chairman thereof. We went to Washington in the spring of 1915, appeared before the Alabama delegation, and at their request I drafted the bill which was introduced by Senator BANKHEAD in the Senate and by Mr. ABERCROMBIE in the House. In February, this year, the commissioners went to Washington again, and we appeared before the Senate and House Committees on Post Offices and Post Roads and had a hearing on the bill. I discussed the matter quite at length before both committees along the lines of your argument before the Senate, the principle involved being that the Federal Government ought not to lend its assistance to people outside of a State engaged in the liquor business in sending liquor advertisements into the State contrary to its laws.

Of course I would have been very delighted if you had succeeded with your splendid effort, but I do not think that the effort was amiss, inasmuch as it developed how the Senate stood on the matter, and, I think, showed that when the bill is reported from the committees and is regularly before the Senate it will pass. I have read the debate in the Senate with interest, and the prohibitionists of Alabama feel greatly indebted to you for your strong championship of the cause. I hope that the result will be that the Senate committee will report the bill quite soon. I have read the last two or three days that Senator SMITH of Georgia had introduced a similar bill, and you will have his assistance in contending for this legislation. I regret that Senator HARDWICK, of Georgia, which State has a similar law to ours, is opposing the bill. I do not see how anyone can contend that the Government should use its instrumentality for breaking down the valid laws of a State.

It is true that a good many newspapers formerly carrying liquor advertisements and circulating in this State have either cut them out entirely or are preparing special editions for prohibition States, which issues do not contain any liquor advertising. I inclose for your information and use a letter which I received last January from the magazine called Judge.

About that time the manager of Puck wrote me that his paper would soon send into Alabama and other prohibition States a special edition containing no liquor advertisements. I called the matter to the attention of Judge and asked that paper to do the same thing; hence the letter of January 25 to me. Ever since both Puck and Judge have both been sending the papers into Alabama, leaving blank white spaces where the regular edition contains liquor advertising. The pictorial paper Life also omits liquor advertisements and inserts on the corresponding spaces a statement something like this: "We can not tell you what appears in the regular edition in this space, but if you want to know send in your subscription, and we will send you the regular edition by mail. We are still on good terms with Uncle Sam." I will cut out and send you one of the statements from this paper. You will see the paper boasts of its ability to circumvent our law by the use of the Federal mails. I inclose you also a clipping from the Atlanta Constitution, in the form of a letter written by Miss Wingo, general secretary of the Young Women's Christian Association, protesting against the use of the mails to defeat the Georgia law.

The Alabama antiadvertising law has been sustained by our supreme court, as you will see from the opinions inclosed. I also inclose a copy of the law, which, you will see, is very stringent. It took effect on February 8, 1915. Immediately after its passage the Memphis Commercial Appeal and the Chattanooga Times, which circulate in this State and are sold on trains here, at once cut out all their liquor advertising, and the Atlanta Constitution and Atlanta Journal prepared special Alabama editions free of such objectionable matter. The Alabama statute has been since copied in Georgia and also in Mississippi, the Georgia law taking effect May 1, 1916, and the Mississippi law May 16, 1916. The act is also incorporated in the general Virginia State-wide law, effective November 1, 1916. Other States that have laws against liquor advertising are the following: North Dakota, Washington, Oregon, Colorado, Kansas, Arkansas, Oklahoma, and Maine. The Maine statute has been sustained in State of Maine *v.* Bass Publishing Co., 20 L. R. A. (NS), 495. Other authorities are cited in the opinion of the Supreme Court of Alabama in the case of State of Alabama *v.* W. C. Delaye, officially reported in 68 So. Rep., 993. The right of a State to prohibit liquor advertising, although the liquor is to be shipped from another State, is supported by the decision of Chief Justice White, in Delamater *v.* South Dakota, 205 U. S., 93, which, you will see, is fully considered and referred to in the Alabama case.

The wholesale liquor dealers at Chattanooga, Tenn., and Pensacola, Fla., send such circulars into Alabama by the thousands. I am inclosing you a few of the many that have come into my hands. You will notice the picture on one envelope of a fishing party; this is used to induce people to open the envelope.

I also inclose you a certified copy of a resolution adopted by the House of Representatives of the Mississippi Legislature indorsing the Bankhead-Abercrombie bill and urging the Senators and Representatives in Congress from that State to support the bill and aid in securing its enactment. The National Women's Christian Temperance Union and the Women's Christian Temperance Union of Mississippi, Alabama, and Georgia have all indorsed this bill and are urging its passage. The prohibition States of the South will feel deeply grateful to you and other Senators when we secure the enactment of the law protecting dry territory from the solicitations of orders by outside liquor dealers that flood the mails, particularly about Christmas time.

With regards and best wishes,

Yours, very truly,

SAM'L D. WEAKLEY,
Former Chief Justice of Alabama.

P. S.: I have drafted all of the Alabama prohibition laws, 1907–1915; also recent laws of Georgia and Mississippi.

S. D. W.

Mr. JONES. I also desire to place in the RECORD printed extracts from the Atlanta Constitution; also a letter from the representative of the Judge magazine, with which we are all familiar; also a copy of the Alabama law, which is short; and also a memorial from the Legislature of the State of Mississippi, which is likewise short. I ask that these papers may be inserted in the RECORD without reading.

The VICE PRESIDENT. Without objection, it is so ordered. The papers referred to are as follows:

[Atlanta Constitution, May 4, 1916.]

PROTESTS AGAINST USING MAILS TO DEFEAT LAW.

EDITOR CONSTITUTION: This morning I turned from the reading of your strong and stirring editorial on the use of the United States mails for advertising adjudged illegal, to open my mail and found May 1 whisky ad. addressed to "Occupant of 54 Houston Street."

Not only is every resource of directories and mailing lists being exhausted, but that no one may escape, this matter is being sent to "occupants" of houses formerly vacant.

As you say, this method of publicity is much more effective than that of the press, and after the newspapers have thrown their influence upon the side of absolute enforcement of law, to have the very object of the whole thing defeated by this more intimate and individual form of advertising, which, like the vermin in the plagues of Egypt, creeps "into our bed chambers and our kneading troughs," is too much to be endured.

Your promptness in registering your protest makes many of us hope that you will go on "overturning and overturning" until that which can not be endured will be cured.

Very cordially, yours,

ALICE LOGAN WINGO,
General Secretary Y. W. C. A.

MAY 2, 1916.

JUDGE ADVERTISING DEPARTMENT,
New York, January 25, 1916.

Mr. SAMUEL D. WEAKLEY,
Jefferson County Bank Building, Birmingham, Ala.

DEAR SIR: Replying to your letter of January 19 relative recent legislation made by the State of Alabama excluding liquor advertising.

As you will note from the attached proof of the Judge page, we are having all such advertisements excluded from the pages of issues that are being forwarded to prohibition States. Possibly, through an oversight, in handling the bulk of copies shipped your State one or two copies containing liquor advertisements were included and reached you.

You may be sure that we wish to uphold the laws of your State, and take this opportunity to thank you for your interest in the matter in calling this error to our attention.

Yours, very truly,

EDWARD V. HEVEY, *For Judge.*

An act (S. 56) to further promote temperance and suppress the evils of intemperance; to prevent the advertisement of or solicitation of orders for alcoholic, spirituous, vinous, or malt liquors, such as brandy, whisky, wine, rum, gin, beer, and other intoxicating liquors, and beverages, and other liquids, liquors, and beverages prohibited by the laws of Alabama to be manufactured, sold, or otherwise disposed of in this State; to provide for the removal of such advertisements in defined cases, and to provide for the prevention of the continuation and repetition of the acts hereby made unlawful; and to prescribe remedies, procedure, penalties, and punishment.

Be it enacted by the Legislature of Alabama:

SECTION 1. Whereas it is the public policy of this State to discourage the use and consumption of prohibited liquors and beverages, and to secure the strict enforcement of the law against the manufacture, sale, keeping for sale, or other disposition thereof within this State; that is to say, alcoholic, spirituous, vinous, or malt liquors, such as brandy, whisky, rum, gin, and beer, and other intoxicating liquors and beverages, and all other liquors, liquids, and beverages prohibited by the laws of Alabama to be manufactured, sold, or otherwise disposed of in the State: Therefore it is hereby made unlawful (1) to advertise upon any street car, railroad car, or other vehicle of transportation, or at any public place or resort, or upon any sign or billboard, or by circulars, posters, price lists, newspapers, periodicals, or otherwise within this State, said liquors and beverages, or any of them, or to advertise the manufacture, sale, keeping for sale, or furnishing of any of them, or the person from whom or the firm or corporation from which, or the place where, or the price at which, or the method by which the same or any of them may be obtained; (2) to circulate or publish any newspapers, periodical, or other written or printed matter in which any advertisement in this section specified shall appear, or to permit any sign or billboard containing such advertisement to remain upon one's premises; or to circulate any price lists, order blanks, or other matter for the purpose of inducing or securing orders for such liquors, liquids, and beverages, or any of them, no matter where located. Any sheriff, constable, or police officer is authorized to remove any such advertisement from any sign, billboard, or other public place when it comes to his notice, and shall do so upon demand of any citizen.

SEC. 2. That any advertisement or notice containing the picture of a brewery, distillery, bottle, keg, barrel, or box, or other receptacle represented as containing any of said liquors or beverages, or designed to serve as an advertisement thereof, shall be within the inhibition of section 1.

SEC. 3. That where and when any violation of any of the provisions of section 1 of this act shall have occurred the continuation or repetition of the unlawful act or any of like kind by the offending person, firm, or corporation may be prevented by a writ of injunction issued out of a court of equity upon a bill filed in the name of the State of Alabama by the State attorney general, or by any solicitor or prosecuting attorney in the county, or by any citizen or citizens of the county in which the offense has been committed; and all rules of evidence, practice, and procedure that pertain to courts of equity generally in this State may be invoked and applied, as well as the rules and practice prescribed for bills in equity to abate liquor nuisances, as far as the same are adaptable. All persons, whether agents, servants, or officers of corporations, or agents or servants of individuals aiding or abetting in the commission of the offense, may be made parties defendant to such bills.

SEC. 4. That any violation of any provision of section 1 of this act shall be punishable by a fine of not less than $50 nor more than $500, to which may be added in the discretion of the court or judge trying the case imprisonment in the county jail or at hard labor for the county for not more than six months.

SEC. 4½. That since this act has a broader field of operation than section 3 of an act approved August 25, 1909, to further suppress the evils of intemperance, and for other purposes, known as the Fuller bill, and also than the corresponding section of a similar act enacted at this session and approved January 23, 1915, to take effect June 30, 1915, said two sections of said two acts are hereby expressly repealed.

SEC. 5. That this act shall take effect from and after its final passage and enactment into law, the public welfare requiring it.

Passed by the senate and house February 19, 1915.

Whereas, upon a memorial to Congress from the Legislature of Alabama, the Hon. JOHN H. BANKHEAD, United States Senator, and the Hon. JOHN W. ABERCROMBIE, Congressman at large from that State, have introduced into the Federal Senate and House of Representatives, respectively, a bill to exclude liquor circulars and liquor advertising from the mails where addressed into prohibition territory or into territory where it is unlawful to advertise or solicit orders for liquors; now, therefore, be it

Resolved by the House of Representatives of the State of Mississippi (the Senate concurring). That we indorse said Abercrombie-Bankhead bill and urge upon the Senators and Representatives in Congress from Mississippi that they support said bill and use their best endeavors to secure its passage.

Resolved further, That they be furnished with a copy of this resolution.

The foregoing is a correct copy of House Concurrent Resolution No. 39, as the same passed the House of Representatives on January 27, 1916.

GEORGE B. POWER,
Clerk of the House.

Mr. JONES. Mr. President, I merely wish to call attention, in connection with this matter, to a sort of advertisement which is now being sent out. I have here an envelope, which has on it a very beautiful picture; it is very attractive at this time, at any rate. It represents a fishing party of a half dozen gentlemen, very nicely dressed for purposes of that kind, and they have also in their possession a fish apparently about 15 feet long. [Laughter.] That is all there is on the outside to indicate what it is, but inside is the advertisement of liquor. I

suppose they would consider that as bait. This was sent to a citizen of Alabama.

Mr. President, the pending proposition is a motion to suspend the rules of the Senate in order that we may put upon an appropriation bill some general legislation about the effect and advantage of which the Senators who are especially interested and whose States are especially interested, are very much divided. While I do not think that appropriation bills are sacred, for I think we should be justified in putting general legislation upon them quite frequently under a suspension of the rules, I must say that I can not see anything in the pending proposition to justify us in voting to suspend the rules.

I do not know very much about this proposition. I have listened to the debate and tried to get some idea of it, but I must say that I do not know what the effect would be if we should put this amendment on the bill. So it seems to me that this is one case where we ought to await the report of a committee. No committee of the Senate, as I understand, has submitted any report upon this proposed amendment or upon this legislation. We are going to have a morning hour, as I understand, twice a week. Why can not this matter be considered by a committee of the Senate and reported out here as they think it ought to be reported, and be then taken up? If that should be done, I venture to say there would be no trouble in passing it, if it is supported by the favorable report of a committee. So far as I am concerned, I do not think enough has been shown to warrant me in voting to suspend the rules of the Senate on this proposition.

Mr. SMOOT. Mr. President, I presume every Member of the Senate knows how I stand in regard to voting on motions involving the suspension of the rules. I do not care what the subject is, whether it is prohibition or any other question, I have never yet voted to suspend the rules of the Senate for the purpose of putting general legislation on an appropriation bill. I shall not do so now, and I shall never do so unless it is a question which is of vital interest to the Government of the United States and of pressing necessity. That is all I care to say about the matter.

SEVERAL SENATORS. Vote!

The VICE PRESIDENT. The question is on the motion of the Senator from Alabama to suspend clause 3 of Rule XVI.

Mr. SHEPPARD. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLAPP (when his name was called). Having a general pair with the senior Senator from North Carolina [Mr. SIMMONS] and observing his absence, I withhold my vote. If at liberty to vote, I should vote "nay."

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE]. In the absence of that Senator I withhold my vote.

Mr. CLARKE of Arkansas (when his name was called). I have a pair with the junior Senator from Utah [Mr. SUTHERLAND]. I do not see him in the Chamber at this time. I transfer that pair to my colleague [Mr. ROBINSON] and vote "yea."

Mr. DU PONT (when his name was called). I inquire whether the junior Senator from Kentucky [Mr. BECKHAM] has voted?

The VICE PRESIDENT. He has not.

Mr. DU PONT. Then I withhold my vote, as I have a general pair with that Senator.

Mr. SHERMAN (when his name was called). I have a pair with the senior Senator from New Jersey [Mr. MARTINE], and therefore withhold my vote.

Mr. WILLIAMS (when his name was called). I transfer my general pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the Senator from New Jersey [Mr. HUGHES] and vote "yea."

The roll call was concluded.

Mr. CURTIS (after having voted in the negative). I transfer my general pair with the Senator from Georgia [Mr. HARDWICK] to the senior Senator from California [Mr. WORKS] and will let my vote stand.

Mr. BECKHAM. I transfer my pair with the Senator from Delaware [Mr. DU PONT] to the senior Senator from Nevada [Mr. NEWLANDS] and vote "yea."

Mr. CHILTON. I announce my pair and its transfer as before, and vote "nay."

Mr. DILLINGHAM (after having voted in the negative). I observe that the Senator from Maryland [Mr. SMITH] has not voted. I therefore withdraw my vote, having a general pair with him.

Mr. GRONNA. I have a general paid with the Senator from Maine [Mr. JOHNSON]. In his absence I withhold my vote. If permitted to vote, I should vote "nay."

Mr. SIMMONS. I wish to inquire whether the Senator from Minnesota [Mr. CLAPP] has voted?

The VICE PRESIDENT. He has not.

Mr. SIMMONS. I have a pair with that Senator. I transfer that pair to the Senator from Maryland [Mr. LEE] and vote "yea."

Mr. KERN. I desire again to announce the unavoidable absence of my colleague [Mr. TAGGART], who is paired with the junior Senator from Vermont [Mr. PAGE].

Mr. CURTIS. Mr. President, I have been requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from New Mexico [Mr. FALL] with the Senator from West Virginia [Mr. CHILTON];

The Senator from West Virginia [Mr. GOFF] with the Senator from South Carolina [Mr. TILLMAN];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS]; and

The Senator from Michigan [Mr. SMITH] with the Senator from Missouri [Mr. REED].

Mr. GRONNA. I transfer my pair with the Senator from Maine [Mr. JOHNSON] to the senior Senator from Idaho [Mr. BORAH] and vote "nay."

The result was announced—yeas 18, nays 44, as follows:

YEAS—18.

Bankhead	Fletcher	Owen	Underwood
Beckham	Husting	Ransdell	Vardaman
Broussard	Johnson, S. Dak.	Simmons	Williams
Chamberlain	Lewis	Smith, S. C.	
Clarke, Ark.	Norris	Thomas	

NAYS—44.

Ashurst	Hitchcock	Martin, Va.	Shields
Brady	Hollis	Nelson	Smith, Ariz.
Brandegee	James	O'Gorman	Smoot
Bryan	Jones	Oliver	Sterling
Catron	Kenyon	Overman	Swanson
Chilton	Kern	Phelan	Thompson
Culberson	La Follette	Pittman	Townsend
Cummins	Lane	Poindexter	Wadsworth
Curtis	Lippitt	Pomerene	Walsh
Gallinger	Lodge	Shafroth	Warren
Gronna	McCumber	Sheppard	Weeks

NOT VOTING—33.

Borah	Harding	Newlands	Smith, Mich.
Clapp	Hardwick	Page	Stone
Clark, Wyo.	Hughes	Penrose	Sutherland
Colt	Johnson, Me.	Reed	Taggart
Dillingham	Lea, Tenn.	Robinson	Tillman
du Pont	Lee, Md.	Saulsbury	Works
Fall	McLean	Sherman	
Goff	Martine, N. J.	Smith, Ga.	
Gore	Myers	Smith, Md.	

So the motion to suspend the rules was rejected.

Mr. UNDERWOOD. Mr. President, I desire to offer an amendment to the pending bill, which I send to the desk and ask to have inserted at the end of line 9 on page 25 of the bill.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 25, at the end of line 9, it is proposed to insert:

For the purchase and distribution of seeds, under the direction of the Commissioner of Agriculture, to the people in storm and overflowed localities in Alabama and Mississippi who are made destitute by the recent storms and floods in those States, $10,000.

Mr. UNDERWOOD. Mr. President, I shall not detain the Senate with any extended statement about this proposition. In connection with the tropical storm that recently swept over the Gulf States an unprecedented fall of rain has taken place. In one portion of Alabama, I see from the weather reports, there was approximately 9 inches of rainfall in 12 hours, and it rained continuously for several days, with the result that the rivers of Alabama and Mississippi have had a flood that was unknown before. A large portion of the farming lands has been overflowed and the crops wiped out entirely. Among a great many very poor people there is great destitution and want.

There are many precedents for the proposition that I have offered. In the Forty-seventh Congress an act appropriating $20,000 for the purchase and distribution of seeds was passed for the overflowed lands of the Mississippi. In 1882 an appropriation of $20,000 was made to furnish seeds following a pest of grasshoppers that swept through the West. In June, 1878, a bill was passed for the purchase of garden and field seed for distribution to land in the West that was ravaged by grasshoppers. Only recently we made a large appropriation of several hundred thousand dollars for the relief of sufferers from fire

conditions in New England, and later there have been appropriations for the relief of sufferers from flood conditions in Ohio and the Middle West. The flood conditions here are not in the cities, but largely in the country, where the streams overflowed and brought great distress to thousands of very poor people.

I would not offer this amendment if it had not been customary. There is no question about the condition and the destitution that has been brought about by this unusual and devastating flood.

Mr. SHEPPARD. Mr. President, I think the resolution said "the Commissioner of Agriculture." Should it not be "the Secretary of Agriculture"?

Mr. UNDERWOOD. It should be "the Secretary of Agriculture." I thank the Senator.

Mr. SHEPPARD. I am very heartily in favor of the amendment.

The VICE PRESIDENT. The Secretary will correct the amendment as suggested.

Mr. VARDAMAN. Mr. President, I have no definite information from Mississippi as to the extent of the devastation of the recent flood. I have, however, learned from the newspapers and by personal correspondence that the disaster was very widespread. A Member of Congress from a southern district of the State said to me a moment ago that more than $15,000,000 worth of property was destroyed by the storm and the flood in his district alone.

As to the necessity for this appropriation, I can not speak advisedly. No request or suggestion has come to me from my constituents for governmental aid, but I am sure great suffering from the flood will result and that any help from the Government of the United States will be acceptable. The rainfall has been enormous. The crops have been destroyed, and the damage to every branch of industry is very great; and if the matter is left to the discretion of the Secretary of Agriculture I am very sure that the money that may be appropriated by Congress will be prudently and properly expended. For those in my State who may be unable to buy seeds to replant their crops of course I shall be very grateful to the Senate if it passes this amendment and makes provision for this emergency. It will be an act of generosity on the part of the Congress which the people of Mississippi and Alabama will most gratefully esteem.

I have nothing further to say.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CATRON. Mr. President, I present an amendment which repeals the provision of the law which allows cattle to be introduced into Texas from Mexico.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 78, line 17, it is proposed to insert:

That portion of the act of March 4, 1911, entitled "An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1912," which reads as follows: "The act of August 30, 1890, is hereby amended so as to authorize the Secretary of Agriculture, within his discretion and under such joint regulations as may be prescribed by the Secretary of Agriculture and the Secretary of the Treasury, to permit the admission of tick-infested cattle from Mexico into that part of Texas below the southern cattle quarantine line," be, and the same is hereby, repealed.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SMITH of Georgia. Mr. President, on page 125, lines 4 and 5, is the provision of the bill making an appropriation for the purchase and operation of automobiles owned by the Government. The Secretary of Agriculture has called our attention to the fact that a great quantity of his work is performed away from depot stations and that it is impossible for his agents to do their work on foot and that under "general transportation expenses" they spend a considerable sum to hire vehicles to get around over the country. He has also called attention to the fact that under language just similar to that which we used in this bill the Comptroller of the Treasury has ruled that no vehicles can be hired; and I suggest that this provision be qualified so as not to prevent the ordinary hiring of vehicles by agents of the department.

In compliance with his request, I offer the following amendment:

Strike out the period after the "year," on line 11, page 125, and insert a colon and the following:

Provided further, That nothing in this paragraph shall be construed to prohibit the hire of motor-propelled and horse-drawn passenger-carrying vehicles and motor boats necessary in the conduct of the field work of the department, or the maintenance, repair, or operation of vehicles so hired.

The Secretary sent letters to each member of our committee to-day, and personal representatives, urging us to put a qualification to this provision, as otherwise the service will be seriously handicapped under the construction of the Comptroller. I do not see how that construction could have been placed upon the language; but in deference to the views of the Secretary, before the matter passes from the Senate, I ask that that amendment may be made. I shall, however, wish to look into it a little further, because I think such a construction of such language very strained.

Mr. SMOOT. Mr. President, would it not be better to have the amendment refer specifically to section 5 of the legislative, executive, and judicial appropriation act approved July 16, 1914? When that bill passed we had particular reference to stopping an evil that was then existing.

Mr. SMITH of Georgia. I am perfectly willing to make that change. I did not draw it in that way because I thought it might be subject to a point of order if drawn in that way, and I knew it was not as I presented it.

Mr. SMOOT. Yes, Mr. President; I think it is subject to a point of order when drawn in this way, because it is changing existing law.

Mr. SMITH of Georgia. No; it does not undertake to change existing law. It prevents this paragraph from changing existing law.

Mr. SMOOT. This paragraph has reference to a general law that was passed in the legislative, executive, and judicial appropriation bill.

Mr. SMITH of Georgia. I am perfectly willing to accept the other language.

Mr. SMOOT. I will say to the Senator that I have no intention whatever of making a point of order on it, because I think that under the construction which has been placed upon it by the Comptroller of the Treasury we ought to adopt this amendment.

Mr. SMITH of Georgia. We simply must do it. Nobody ever contemplated so limiting the service.

Mr. SMOOT. But I, like the Senator, can not conceive on what ground such a construction was arrived at.

Mr. SMITH of South Carolina. The Secretary has explained it.

Mr. SMITH of Georgia. I accept the suggestion of the Senator from Utah, and modify the language in that way.

Mr. SMOOT. I do not want it understood that it applies to any other of the departments of our Government.

The VICE PRESIDENT. Will the Senator from Georgia modify it so that the Secretary can get it?

Mr. SMITH of Georgia. You have the exact language there.

Mr. SMOOT. I will hand the language to the Secretary.

The SECRETARY. On page 125, line 11, after the word "year" and before the period, it is proposed to insert a colon and the following words:

Provided, That hereafter section 5 of the legislative, executive, and judicial appropriation act approved July 16, 1914 (38 Stat., p. 508), shall not be construed to apply to the hire of motor-propelled and horse-drawn passenger-carrying vehicles and motor boats necessary in the conduct of the field work of the department, or to the maintenance, repair, or operation of vehicles so hired.

The VICE PRESIDENT. The question is on agreeing to the amendment as modified.

The amendment was agreed to.

Mr. PITTMAN. Mr. President, I offer an amendment similar to the one that I offered in Committee of the Whole, to which the point of order was raised by the Senator from North Dakota. I have modified that amendment in a manner that I believe will not be objectionable to the Senator nor to the committee. I therefore submit it. It has already been debated at length.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 14, line 16, it is proposed to insert the following:

That the sum of $125,000 is hereby appropriated for the fiscal year ending June 30, 1917, out of any money in the United States Treasury not otherwise appropriated, for the purchase and maintenance of stallions for the upbreeding of horses suitable for agricultural and military purposes; such stallions shall be available for the use by and for the benefit of horse raisers in every section of the United States: *Provided*, That all expenditures authorized under this act shall be made by the Bureau of Animal Industry, Department of Agriculture.

Mr. SMITH of South Carolina. Mr. President, I think that that amendment is subject to a point of order. I make the point of order against it.

The VICE PRESIDENT. The point of order is sustained.

Mr. SHAFROTH. Mr. President, a suggestion has been made that in section 6 of the grain-grading act one point is not covered, which is probably an oversight. There is a provision on page 9, in lines 4, 5, and 6, that reads as follows:

Whenever an appeal shall be taken or a dispute referred to the Secretary of Agriculture under this act, he shall charge and assess, and cause to be collected, a reasonable fee in amount to be fixed by him, which fee, in case of an appeal, shall be refunded if the appeal is sustained.

There is no provision as to who shall pay the fee in that case, and it is customary that the person who is the loser in the matter of the appeal shall pay under those circumstances. So I move that at the end of the word "sustained," in line 7, on page 9, of the print of the grain-grading section, the following words be inserted:

And in that case the fee for appeal shall be paid by the shipper who has shipped the grain of the wrong grade.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. In the bill, on page 105, line 16, after the word "sustained," it is proposed to insert:

and in that case the fee for appeal shall be paid by the shipper who has shipped the grain of the wrong grade.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SHEPPARD. Mr. President, I offer the following amendment to come in after line 12, on page 79.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 79, after line 12, it is proposed to insert:

That the Secretary of the Interior be, and is hereby, authorized and directed to make, or cause to be made, further investigation and survey of the Pecos River and Valley in Texas and New Mexico, with the view of determining the feasibility and cost of constructing a reservoir at Red Bluff for irrigation purposes, and to report his conclusions thereon to Congress, and the sum of $10,000, or so much thereof as may be necessary, is hereby appropriated for that purpose.

Mr. SMITH of Georgia. I make a point of order against the amendment.

Mr. SHEPPARD. I will say to the Senator that the Senator from Idaho [Mr. BORAH] was permitted to insert a similar provision a few days ago and the chairman of the committee did not make a point of order against it.

Mr. SMITH of Georgia. I was not aware of that.

The VICE PRESIDENT. The point of order is sustained.

Mr. LA FOLLETTE. I offer the amendment which I send to the desk to be added on page 104. It comes in after line 11, on page 7 of the grain-grading reprint, at the end of section 4.

The VICE PRESIDENT. The amendment will be read.

The SECRETARY. After the amendment already adopted at that place, submitted by Mr. MCCUMBER, insert at the end of section 4, page 104:

Provided further, That the Secretary of Agriculture shall require said supervisors to ascertain and report the number of bushels of grain and the grades of the same, in each of said terminal elevators on the 1st day of September, 1916, and the number of bushels of grain and the grades of the same received, and the number of bushels of grain and the grades of the same shipped out of each of said elevators, each month during each and every year thereafter. And the Secretary of Agriculture shall, on the 1st day of January and the 1st day of July of each year, transmit to Congress a summary of such reports showing the number of bushels of grain and the grades of the same received, and the number of bushels of grain and the grades of the same shipped out of each of said terminal elevators each month of the biennial period covered by such report.

Mr. SMITH of South Carolina. I accept that.

The amendment was agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

NAVAL APPROPRIATIONS.

Mr. SWANSON. I move that the Senate proceed to the consideration of House bill 15947, the naval appropriation bill.

The VICE PRESIDENT. The question is on the motion of the Senator from Virginia.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes, which had been reported from the Committee on Naval Affairs with amendments.

Mr. SWANSON. I ask unanimous consent that the formal reading of the bill be dispensed with and that it be read for action on the committee amendments.

The VICE PRESIDENT. The committee amendments to be first considered. Is there objection?

Mr. SMOOT. I understand that that is all the Senator wants to do to-day.

Mr. SWANSON. Yes; I will yield for an executive session.

The VICE PRESIDENT. Is there objection to the request of the Senator from Virginia? The Chair hears none, and it is so ordered.

TARGET PRACTICE IN THE NAVY (S. DOC. NO. 496).

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of the Navy, transmitting in further response to a resolution of June 30, 1916, information relative to the target practice of battleships in the Navy. The communication and accompanying papers will lie on the table and be printed, and also be printed in the RECORD.

The communication is as follows:

THE SECRETARY OF THE NAVY,
Washington, July 11, 1916.

SIR: Some days ago, in response to a resolution of the Senate with reference to the target practice of battleships in the Navy, I transmitted a brief preliminary statement showing the standing of the ships upon a new plan adopted by Admiral Mayo. At my request, Capt. C. P. Plunkett, director of gunnery exercises and engineering performances, has made a comparative statement for several years, based on the scale adopted by Admiral Mayo and first used last year. This statement by Capt. Plunkett, as summarized, is as follows:

Vessels scoring—	1910	1912	1913	1914	1915–16
Excellent	1	0	1	3	5
Good	2	3	1	2	4
Fair	5	1	0	2	2
Poor	6	5	2	4	4
Unsatisfactory	12	17	20	14	3

His full and comprehensive statement is appended:

In the hearings before the House Naval Affairs Committee, when asked about target practice, Admiral Fletcher, then commander in chief of the Atlantic fleet, said:

"The scores recorded are higher than ever before made in the open sea, and show not only an increase in accuracy of pointing but in rapidity of fire as well."

In his hearings before the Naval Affairs Committee, Capt. William S. Sims, who was at one time director of target practice and who was a pioneer in gunnery in the modern Navy, testified that "our target practice was high until 1900, when it again declined," because the department then abandoned short-range individual practice. In 1912 the individual practice was restored, but the damage had been done. In 1914 boards of inspection were appointed, "when," Capt. Sims states further, "the target practice came up about 40 per cent."

After the receipt of the resolution adopted by the Senate on the 30th of June, 1916, in order to give the Senate the full information relating to target practice I addressed letters to Rear Admiral Fletcher, Admiral Mayo, and Capt. Sims, requesting statements giving important facts concerning gunnery, such as comparison of ranges at which firing was held, changes in conditions under which practices were held, methods adopted to improve gunnery, and the like. I append the answers received because they show the conditions under which the practice has been held, and will convey better than any mere table a clear understanding of the marked improvement in gunnery practice and the long-range firing which Admiral Fletcher states has recorded higher scores than ever before.

Very truly, yours, JOSEPHUS DANIELS.

The PRESIDENT OF THE UNITED STATES SENATE.

STATEMENT BY ADMIRAL MAYO.

UNITED STATES ATLANTIC FLEET,
U. S. S. WYOMING (FLAGSHIP),
Newport, R. I., July 9, 1916.

MY DEAR MR. SECRETARY: Your letter inclosing an extract from the Washington Post of July 8, 1916, referring to "Bad gunnery by the fleet," has just been received, and the facts which are presented herein should remove any misunderstanding as to the great progress made in gunnery during the past year and should give a clearer understanding of the comparisons which were made for the last elementary practice.

The report of ratings, to which reference is made in the extract from the Washington Post, was made on completion of elementary target practice in the fall of 1915, and referred only to that practice. On the completion of that practice it was apparent that very great improvement had been made over the records of the similar practice of the preceding year, this increase in efficiency averaging about 40 per cent for all battleships that had fired. In order to counteract any feeling of complacency among officers and men which might arise from their self-congratulation over their increase in efficiency, the report referred to was prepared, as it was believed that a standard which it was possible for battleships to attain had by no means been reached. For this reason the ratings shown in the report were made and sent out to the vessels of the battleship squadrons and to the commander in chief. To the best of information, no similar report was ever made, though the system used in determining the ratings was a development of that used by the Navy Department as early as 1905, and further developed by the Navy Department in 1908. On page 6 of the Report of the Annual Record of Target Practice, 1908, the following statement appears:

"Star ships are those that attain at least 85 per cent of the final merit of the trophy winners of their respective classes."

There were no other ratings. In rating the ships of the battleship squardons on the elementary practice of last fall, the above system was used, being developed and extended to all ships. For instance, ships receiving 85 per cent of the final merit of the highest ship were rated as excellent; those receiving between 75 and 85 per cent were rated as good; those receiving between 60 and 75 per cent were rated as fair; those receiving between 50 and 60 per cent were rated as poor; and less than 50 per cent as unsatisfactory.

Briefly, the development of the elementary practice has been as follows: A short-range practice has been held since about 1902, except during the year 1911, when it was omitted. The name of this short-range practice has been changed several times since that time, which marked a revival of gunnery in our service. It was first known as record practice. In 1910, the name of the record practice was changed to elementary practice; this year it has been changed to gunnery exercises, short-range battle practice. Although the name of the practice has been changed several times, the ranges and sizes of the targets have remained practically the same. In fact, for battleships, there has been no change in either range or size of target since 1910. There have been changes in the methods of conducting the practice, all with a view to making this short-range practice, under absolutely known conditions, a thorough preparation for the battle-target practice and for battle. Being conducted under known conditions, it is the practice which ap-

peals most strongly to the various units of the ship; that is, to the guns' and turrets' crews and division officers, as it is possible to determine exactly their performances and make comparisons with other units. Prior to 1913, guns' crews were permitted to fire at will on this practice, which contributed largely to the interest in it, though it was somewhat artificial for actual battle. In 1913, due to natural progress, the guns' crews were required to fire on this practice as they would do in battle, and this progress has been continued up to the present time, slight changes being made to eliminate artificialities in so far as possible. It is believed that this change, i. e., requiring guns' crews to fire as in battle, was a very radical one, and when made its importance was not fully appreciated by the service. I believe that the present short-range practice retains all the basic principles necessary to train and develop the ships' batteries for battle, as well as to retain the interest of the individual units in the results. In 1911, no elementary practice was held, that is, no practice at a short range. This practice was omitted because many officers thought it was a waste of ammunition to fire at such ranges. It is believed that they failed to appreciate fully the fact that guns' crews must be trained and tested at ranges where all the conditions are known before any practical results may be expected at long ranges. The effect of the omission of the short-range practice for the year was noted at once and the practice resumed in 1912.

The Navy Department has recently issued orders for the coming short-range practice, heretofore known as elementary practice, which embodies practically all the developments of the past three years, and which produced fairly satisfactory results at battle ranges of 6 to 9 miles held in Cuban waters the past winter. In this connection the cooperation between the director of gunnery exercises of the Office of the Chief of Naval Operations and the fleet is all that could be desired, and it is firmly believed that the coming short-range practice will show continued improvement.

It is noted that the resolution of Senator LODGE called for a report regarding elementary target practice of 1915–16, for which the above comparison was made, and not for a report of target practice for the full gunnery year. It may be proper to state here briefly that the results of the long-range practice held in Cuban waters during the past winter under the direction of Admiral Fletcher, who was then commander in chief, while in no sense phenomenal or resulting in a great number of actual hits on the target screen, did demonstrate that our ships could hit at long range, and the result of the target practice imparted to officers and men a feeling of confidence in their ability to do good work on actual ships at long ranges, which feeling I consider to be a most valuable asset to the fleet. These practices were conducted at ranges from 2 to 3 miles greater than the practices of any previous year.

A confidential circular recently issued by the Navy Department to the fleet gives the hits made by the battleships firing at long ranges in Cuban waters. This circular shows a condition of affairs with regard to gunnery that is satisfactory, although greater improvement can be made, principally in rapidity of fire, but also in accuracy. It is further felt that the shooting in Cuban waters is superior to that which has been done in the battles of the present European war, though it must be realized that there is very little data available on which to base the above statement.

The fairly satisfactory results attained on the long-range practices was due to a continuation of the methods used in preparing for and conducting the elementary practice.

Referring to the question of what has been done since I joined the fleet as a rear admiral: I joined the fleet as commander of the fourth division in December, 1913, in Mexican waters, where I remained until October, 1914. In the fall of 1914 I returned north and was given command of the first division, and conducted the division practice of the ships comprising that division. I continued in command of the first division until July, 1915, when I was given command of the battleship squadron, which was then organized for the first time.

During my tour of duty in Mexican waters I noted that there was not the interest in gunnery matters that there had been during my service as executive officer of the battleship *Wisconsin* and later in command afloat on the west coast. This subject was often discussed with my aids, two very capable young officers who had excellent records in gunnery on this coast, with a view to determining the reasons for this apparent lack of interest. Generally speaking, the lack of interest was said to be due to, first, omitting the short-range practice for the year 1911, and second, the lack of proper preparation. I definitely concluded during this period that the lack of interest in gunnery was not only apparent but real; and that regardless of the reasons therefor, something had to be done to revive the interest in gunnery if there was to be a satisfactory degree of gunnery efficiency in all ships. Upon taking command of the first division in the fall of 1914, on my return from Mexican waters, I was impressed by the report of the elementary practice of the *North Dakota*, under the command of Capt. C. P. Plunkett, which was forwarded to the Navy Department through the division commander. The system and methods employed appeared to be extremely thorough and of very great value, and the results had been demonstrated by the excellent target practices of the ship. Capt. Plunkett's report and the description of methods used was sent to each ship of the first division, and at the same time a circular letter to the division was issued, calling attention to the lack of interest in gunnery and directing that every effort be made to improve conditions as regards gunnery.

The report above referred to included a description of a system for locating errors made in practice and determining, with reasonable certainty, the causes of practically all misses. This system, first initiated under Admiral Badger, had been thoroughly developed on the *North Dakota* in 1913–14.

Admiral Fletcher continued this work by ordering its application at once to ships whose elementary practice had been delayed, and appointing a board of specially selected officers to determine errors for three ships whose practices had been delayed. Later the system of having boards of observers for each ship firing was, by direction of Admiral Fletcher, extended to each division of the battleship squadrons, and by his direction divisional gunnery boards were appointed to examine and report on methods of training used, with a view to eliminating any existing defects; the reports of these boards proved to be of very great value.

I have every reason to believe that in all his efforts to increase the battle efficiency of the fleet under his command, Admiral Fletcher had the hearty support of the Navy Department, and it is believed that the dissemination of gunnery knowledge in the fleet during the past year has been greater than during any similar period in recent years.

I believe the above shows what has been accomplished recently under the direction of Admirals Badger and Fletcher, with the full cooperation of the Navy Department, and also, at least by inference, conveys the effect that there now exists in the fleet an excellent gunnery spirit and a thorough interest in the attainment of battle efficiency, which can not fail to bring about a further improvement in the hitting ability of the fleet.

Sincerely and respectfully,

H. T. MAYO.

The SECRETARY OF THE NAVY,
Navy Department, Washington, D. C.

STATEMENT BY REAR ADMIRAL FLETCHER.

LAKE PLACID CLUB,
Essex County, N. Y., July 9, 1916.

MY DEAR MR. DANIELS: Referring to criticism of the gunnery practice of the Atlantic Fleet, implying that there has been a deterioration in efficiency during the last three or four years, you will find that any such criticism is not justified by the records of target practice on file in the department or by reports from the fleet.

A careful record of the results of target practice has been compiled, covering a period of five or six years up to the present time, and it shows that the average efficiency of the ships of the fleet has been maintained and that their performance at the present time is quite as good as at any time in the past. This standard has been maintained in spite of the fact that each year the conditions have been made more difficult in order to simulate the exacting requirements of battle. Where formerly we fired at ranges of 7,000 to 8,000 yards, these ranges have been gradually increased until this last year our practice was conducted at the extreme range of 18,000 yards, where the difficulty of making hits on a small target is enormously increased, and yet the results were far better than anyone could have anticipated.

The introduction of salvo firing, independent fire control of turrets, double-barrel firing, and other requirements call for greater training and greater skill in all the details of materiél and of fire control, and these new demands have been met without any falling off in efficiency.

Each year has added some improvement in our methods of training. The records and experience and opinions of all gunnery officers are fully embodied in reports after each practice in order that we may reap the full benefits. Based upon these voluminous reports, the target office has compiled the Book of Gunnery Instructions, which gives in detail how the best results can be obtained.

More recently boards of expert observers have been appointed to record all errors at target practice and investigate the cause of misses. Also boards of officers were appointed to report upon the methods of training on the various ships and to see if the gunnery instructions were properly complied with. It is believed that the work of these boards had much to do with the improvement in our last elementary practice, which obtained results better than any practice ever before obtained at sea.

As a result of my four years' experience in the Atlantic Fleet I can state with confidence there has been no falling off in the efficiency of our target practice.

For a time previous to the summer of 1914 some of our battleships were unavoidably retained on the coast of Mexico owing to our lack of cruisers for that service. It was stated as a criticism that owing to this fact our battleship force was not kept together for fleet maneuvers, and, as a consequence, there was a falling off in target practice. This is not borne out by the facts. Our daily training and drilling for target practice at dotter practice, check telescope, or subcaliber, was kept up on all ships, whether in Mexico or with the fleet. I have not the records with me, but I think you will find that the ships which came up from Mexico for target practice made as good records as those that remained with the fleet. The lack of maneuvers of the fleet, owing to the Mexican situation, had little or no influence upon the efficiency of target practice.

In regard to the ratings assigned various vessels of the fleet by Admiral Mayo I have no knowledge of such assignment. In any event such an assignment is solely for the purpose of comparison, and a similar assignment for previous years will reveal about the same comparative results between the efficient and the less efficient ships.

Very sincerely, yours,

F. F. FLETCHER.

Hon. JOSEPHUS DANIELS,
Secretary of the Navy.

STATEMENT BY CAPT. WILLIAM S. SIMS.

U. S. S. NEVADA, *Newport, R. I., July 9, 1916.*

MY DEAR MR. SECRETARY: I beg to acknowledge receipt of your letter of July 8, 1916, inclosing a clipping from the Washington Post with regard to relative standing assigned certain vessels of the fleet by Admiral Mayo, and requesting me to make a statement giving important facts regarding the matter, particularly a brief statement of the important facts regarding gunnery during recent years, including changes which have been made in increased ranges, etc., also a comparison of the present shooting with that of previous years, and a statement as to what our present gunners can do under the former conditions.

In order to understand the difficulties we have had with target practice during the last few years, it is necessary to go back a number of years and explain the circumstances which led up to a decrease in our efficiency.

In about 1902 and 1903 our Navy took up the system of training which was inaugurated by Capt. Percy Scott, of the British Navy. We were immediately successful in this. At that time our shooting was confined to short-range practice, that is, the training of the gun pointer and the gun crew. The same was true in the British Navy. Neither in our Navy nor in any other had any considerable progress been made at that time in firing at long ranges. We were using at that time a range of about 1 mile, and it was the opinion in practically all navies that battles would be fought at distances not greater than 2 miles. Within the last few years two or three of the most prominent officers of the British Navy stated in publications that training people to shoot at the "enormous ranges of 7,000 yards" was absurd.

As our Navy increased in efficiency in the short-range practice, both as regards accuracy and rapidity of fire, and as our gun gear also improved in efficiency, we began to take up the subject of long-range fire. We began experimental shooting at 4,000 yards with the ship at anchor and the target moored. We went from this to 6,000 and 7,000 yards with the target underway, and achieved a notable success. We were gradually increasing the ranges of battle practice and were making satisfactory progress in all respects. The enthusiasm for target practice was everything that could be desired. In familiar parlance—that every officer and man concerned studied to

receive a bouquet or a black eye as the result of every particular target practice.

This competitive feature was solely due to the fact that in addition to the long-range battle practice we always held a short-range practice at which the guns fired singly. This enabled us to compare the efficiency of each gun crew, including pointers, with every other gun in the Navy of a similar class. That is the reason that everybody understood that the result of target practice would show up absolutely the efficiency of all the personnel concerned.

Unfortunately, about 1909 a serious fundamental mistake was made in the Navy Department in abolishing the short-range practice and carrying out only long-range practices at increased ranges. At long-range practices all guns fired at the same time by salvos. The record of long-range practice shows what a ship is capable of doing under these conditions, but as all shots strike at about the same time it is wholly impossible to tell what shots hit and what ones missed. Needless to say, this wholly removes the competition between individual gun pointers, individual gun crews, and the officers commanding divisions of guns.

Under this system each man and officer concerned could say to himself, "There is no use of my breaking my neck training for the target practice because they can not tell whether I do well or not." It is necessary to explain further that under this system the individual enthusiasm for target practice must necessarily decline, and it did decline steadily from this time, about 1909, until the short-range practice was resumed, about 1912. At the first short-range practice that took place at this latter date the damage done by the abolition of the short-range practice was immediately apparent. Responsible officers, including Admiral Winslow, stated in their official reports that our efficiency had dropped back to about what it had been 10 years before. Moreover, when the short-range practice was abolished in 1909, the gunnery instructions then in use, which contained the details of all our experience in training were withdrawn and destroyed and new instructions were not reissued until 1913. So the Navy was, therefore, about four years without the incentive of individual competition and without the gunnery instructions that were necessary to train the young officers. Under these conditions it was, in my opinion, wholly impossible to maintain any adequate enthusiasm for target practice or to make any adequate progress in shooting. If there were any other influences which tended in the same direction they must have been, in comparison with these, almost negligible.

I wish to make it entirely clear that the fundamental mistake of abolishing the short-range practice was due exclusively to naval officers. It had nothing to do with the administration of the Navy Department at that time. The Navy Department acted upon the advice of a limited number of officers, and these officers made the mistake above referred to.

When the gunnery instructions were reissued in 1913 and the short-range practice was resumed the Navy became aware of its relative inefficiency in shooting and the revival in target practice naturally began. Necessarily, it was unhill work, as four years had gone by practically without adequate instruction of the commissioned and enlisted personnel, due to the fact that there was no textbook extant at that time. While it is doubtless true that the necessities for employing the fleet in such manner as to restrict to a certain extent its full period of training has had some influence upon the rapidity with which our gunnery was improved after 1913, still I wish particularly to accentuate the fact that the damage was done about 1909 when the short-range practice was abolished. Since that time our shooting has greatly improved, particularly within the last two or three years. As an example of this, it may be stated that the improvement in last year's shooting at elementary practice for that and the year before was not less than 40 per cent, thus showing that the curve of improvement was rapidly ascending. This is referred to in Admiral Mayo's report of the latter date.

Leaving now the question of short-range practice, the question of long-range practice presents considerable difficulties to the understanding of the untechnical. For example, it seems to be currently assumed that if at a very long range a ship makes but 15 or 20 per cent of hits that she has not been successful, though she may have made as many hits as are mathematically possible at such a range. This erroneous assumption is based upon the apparent belief that if a gun is accurately aimed at a target at whatever range, and if the sights of the gun are accurately set, that the gun will make a hit. It is necessary to explain, briefly, that this is wholly in error.

No gun that can be built is entirely accurate. The word "gun" in this sense refers not only to the gun itself, but to the powder, the projectile, etc. To illustrate the point in question, it may be stated that if a gun is placed on shore and a target anchored at sea at a distance of, say, 18,000 yards, and a number of shots are fired at the target with the gun aimed with perfect accuracy, the shots will fall within a space of about 200 yards short of the target and about 200 yards over; that is to say, the best of which the gun is capable will not bring the dispersion of the shots within less than about 400 yards. As the target is about 30 feet high, and as the projectiles descend at 18,000 yards at an angle of about 17°, it becomes at once apparent that it is wholly impossible to make more than a certain percentage of hits with that gun against that target and at that long range.

No two guns will perform exactly alike; and though none of the guns of a ship have a dispersion of more than 400 yards, the inequality between the individual guns may readily cause the dispersion of all guns when fired together to be considerably greater than 400 yards. Assuming this dispersion to be 600 yards, it will readily be seen that when a ship fires salvos at a target under the above-described conditions her possible percentage of hits will be less than that when firing a single gun. Add to the above the human element, the unavoidable, though small, inaccuracy of the instruments and of the aiming, and we have a further reduction of the possible percentage of hits. Add again to this the fact that the target is being towed at an unknown speed, that the ship is approaching on a course inclined toward the target, that in consequence the range is constantly changing, and that this range must be kept as well as is possible by the fire-control officers who control the whole battery, and we have a still further diminution of the probable percentage of hits. All this to illustrate the many difficulties that stand in the way of making a considerable percentage of hits at long ranges under battle conditions.

Our recent long-range battle practices have been based as nearly as practicable upon the conditions that would pertain in battle as nearly as we can realize them; that is to say, we have introduced into the firing all difficulties which we believe we would have to encounter in an actual engagement.

I am informed that an analysis of the experimental long-range shooting carried out in the West Indies last winter and based upon photographic reproduction of the splashes of shots showed that a very encouraging percentage of hits would have been made on the hull of an enemy battleship, though of course a much less percentage of hits was made on the relatively very small target used.

It is also particularly worthy of note that all these records of long-range shooting are made with the further disadvantage of having very few shots to fire. Only seven shots per gun are allowed. As the determination of the range of the target depends chiefly upon the observation of the fall of the first few shots fired, these shots necessarily seldom hit, and thus decrease the apparent efficiency of the guns. If a great number of shots were allowed, the loss of the first few shots would necessarily influence the scores very much less. Moreover, in firing the first few shots some vessels have the good luck to "get on" the target almost immediately, while others have to feel their way toward the target by the fall of the shots.

Concerning the statements that have been made as to the relative efficiency of our shooting now at long ranges and that of a few years ago, it should be noted that in the latter case not only were the ranges very much less, about half as great, but the conditions of the firing were much easier.

While it is not claimed, I believe, that, though our target practice is rapidly improving, it has yet reached the maximum possible, still I do not hesitate to state that if our fleet should be put up against the conditions of target practice that pertained at the long ranges a number of years ago, they would do better now than they did then. I believe this will be additionally illustrated in future practices. I feel entirely confident in assuming that the elementary practice of the coming autumn will show an encouraging improvement over that of last year. In addition to the above, there has been a continuous improvement in the design of gun gear and various appliances for controlling fire at long ranges.

In conclusion I wish to make it entirely clear that, in my opinion, the condition of our target practices at all times has been the result of actions taken by naval officers. The subject is necessarily a very technical one. Experience has shown that extended study is necessary to have a firm grasp of the underlying principles. This is shown by the fact that even at the present time there are officers who advocate the abolition of all competitive short-range practices; that is, a return to the conditions which obtained between 1909 and 1913.

This subject has, however, been under such earnest discussion during the past two or three years that there seems no longer any danger of any fundamental mistakes being made. For this reason as well as for those given above, particularly in reference to the steadily rising curve of improvement, I believe we may look forward in the future to the greatly increased efficiency of our fleet under battle conditions.

I am, sir,

Very respectfully,

WM. S. SIMS,
Captain, United States Navy.

The SECRETARY OF THE NAVY,
Navy Department, Washington, D. C.

STATEMENT BY CAPT. C. P. PLUNKETT.

JULY 10, 1916.

From: Director of gunnery exercises and engineering performances.
To: Secretary of the Navy.
Via: Chief of Naval Operations.
Subject: Gunnery exercises.

1. The commander in chief, Atlantic Fleet, in 1908 issued a special order to the fleet, as follows:

After having closely watched the progress of gunnery in late years, I am compelled to come to the conclusion that poor shooting may be attributed more to the officers' bad training and bad organization of men than to any other causes. In fact the primary cause of all bad shooting may be traced to carelessness and inattention on the part of the officers.

The best trained and the best prepared ship in gunnery will invariably be the best shooting ship. To insure success it is necessary to have among officers and men a "ship's spirit" directed to gunnery channels. The commanding officer must take a keen personal interest in what is going on, the executive officer must help the work along, the navigator and engineer officer should render such assistance as lies within their power, the ordnance officer must be ceaseless in his efforts, and the battery officers tireless in the performance of their duties. Hard work and harmony among all will produce an efficient ship.

2. This condition prevailed for a long time in spite of its seriousness. So changed are the conditions to-day in our fleet that the issuance of such an order would be wholly unnecessary. However, the truth of this statement that poor gunnery work can be directly charged to the officers and men of the Navy is as incontestable to-day as ever, and the efforts of those responsible for the efficiency of the fleet are mainly concerned with fixing the individual responsibility for unsatisfactory performances.

3. Previous to 1909 elementary target practice was held in smooth water on a measured range, and remarkable scores for rapidity of hitting were made by the various ships. Since 1909 the practices have been conducted in the open sea, under varying conditions, firing at a moving target, the practice itself simulating, as far as possible, the conditions of actual battle.

4. The method of firing the guns was also changed in 1913. Each time that a change has been introduced, bringing the conditions more nearly to resemble those of actual battle, the scores made have suffered by comparison with those made in previous years. The orders for gunnery exercises to-day require the firing of the battery under actual battle conditions and the merits of the ships as tabulated above show that, in spite of harder conditions, fewer vessels are reported as unsatisfactory than ever before.

5. The tables of elementary practice inclosed herewith present in their true light the history of our fleet in the last five years. This form of practice is the most difficult of all, as it requires a thorough mastery of the infinite detail, success in which is essential to future progress in gunnery and accuracy of fire at long ranges. It will be noted that a very large number of ships were not properly prepared and the personnel insufficiently drilled. Nothing more than a light effort was made to determine and fix the responsibility for the cause of these poor performances. It will be noted that in the year 1911 this form of practice was abandoned, it being considered by the majority of the officers of the Navy that there was no relation between the elementary practice and the battle practice. They had many instances of ships which did poorly on the elementary practice, which were given high scores on the battle practices.

6. The development and use of the camera completely wrecked this false assumption, as it showed up in the form of photographs the actual fall of every shot that was fired. Where previous target practices showed the target screens badly wrecked, for which ships had received varying numbers of hits, we now know as a result of our camera ob-

servations that they were probably due to the enormous volume of water caused by a few shots striking short of the target, sweeping everything before them.

7. The damage had already been done, however, and it has taken the last four years to repair it, but not without considerable opposition in many quarters of high responsibility. The tendency of officers and men to attempt to walk before they can crawl was just as strong in the officers of the American Navy as in any other path of life, and in spite of their superior education there were many who believed that there was a short road to successful gunnery avoiding months of preparation and drudgery. This lesson has been learned by the officers of the Navy and is to-day the cause of the improvement in our gunnery.

8. It is extremely doubtful whether the records of the long-range practice of our fleet previous to 1912 have any value for comparison purposes whatever. By comparing the results since the introduction of more accurate methods of recording and taking into consideration only the percentages of hits actually made the records show that our long-range firing was practically at a standstill between 1911 and 1915. Beginning with the spring of 1916, in spite of the greatly increased range, the percentages of hits have been maintained. This is directly due to greater effort on the part of the personnel and improvements in material. The training has been standardized and more time devoted to it. The results are most gratifying, and as present methods will be continued throughout the year, and with greater effort than ever made, it can reasonaly be expected that the results will show a general improvement over last year. Firing at extreme ranges under as close a simulation to actual battle conditions as safety of vessels involved will permit will be continued. The photographs showing the records of the fall of every shot from every ship at battle practice this year are complete to the smallest detail, and it is proposed in the coming year to carry this form of recording the work of the fleet to the limit of the capacity of the art of photography.

9. Year after year the department has published to the service, in large type and underscored, the following:

"The measure of the battle efficiency of any vessel is her ability to deliver the greatest number of hits in the shortest possible time after the enemy is sighted and with the least expenditure of ammunition."

"Every detail of training that does not tend to prepare the personnel for actual battle conditions and any part of the material that can not be used in action must be eliminated."

10. The department's activities, as bearing on successful gunnery, are limited to one of supply, involving personnel and material. Insufficiency in the supply of either bears directly upon gunnery. Of these an inadequate or constantly changing personnel produce the most serious results. Recently the question of detail of personnel has been given serious consideration, and the active fleet is now more fully officered and manned than previously, and the policy of making changes in the personnel not more than once a year has been established.

11. Successful gunnery, like success in any other human endeavor, is very largely a question of personnel, and the human element is probably more in control of the output than in any other form of activity. It calls for calmness and quick decision, not from one man but from a very large number of men, and it is the purpose of all training to prepare the officers and crew to do things, and the correct things, automatically. This is accomplished through a rigid discipline, adherence to sound principles, standardization of methods, clean life, development of character, and immediate seizing of every opportunity which may be turned to an advantage.

12. While it is true that in years gone by a rigid investigation of the condition of our fleet would have brought out many features demanding immediate correction, it can be definitely stated that to-day the majority of these conditions have been removed, and that the progress is not only satisfactory, but we are in a position, through the increase of both personnel and material and the improvement in these two factors, to feel assured that we are getting a full measure of return for the money and effort expended. The pressure at this time for improvement is as great as if actual war existed and anything standing in the way of progress receives immediate attention, in order that the speed of preparation may not only be maintained but increased to the limit of the capacity of our officers and men. Bad conditions have existed, but they are things of the past, and what was regarded as satisfactory years ago would not be tolerated to-day, and anything which borders on the unsatisfactory is the subject of most rigid investigation and action suitable to the gravity of the situation.

13. In order to determine whether proper methods of training are being strictly carried out on every ship in the fleet, whatever her type, a system of rigid inspection, tracing the firing of every shot of every caliber has been instituted, and from the information thus obtained the cause of every failure of the personnel and of the material may be definitely fixed and the responsibility therefor becomes plainly evident. Negligence or culpable inefficiency in either high or low places can not escape this inspection.

14. This is the work of 60,000 officers and men charged with the preparation of the fleet and its readiness for war. It can only be accomplished through the most active cooperation between the military and the civil branches backed by the united support of the American people.

15. Attached hereto is a list of vessels with the character of their performances at elementary target practice based on the scale adopted by Admiral Mayo and first used last year.

DESTRUCTION OF GOVERNMENT PROPERTY AT SEATTLE, WASH. (S. DOC. NO. 495).

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of War, transmitting, in response to a resolution of the 5th instant, certain information relative to the destruction of Government property on Pier 11 at Seattle, Wash. The communication will be printed and also printed in the RECORD and referred to the Committee on Military Affairs.

The communication is as follows:

WAR DEPARTMENT,
Washington, July 7, 1916.

The PRESIDENT OF THE SENATE,
Washington, D. C.

MY DEAR SIR: 1. In connection with Senate resolution of July 5, 1916, covering the destruction of Government property on Pier 11 at Seattle, Wash., June 30, 1916, you are informed as follows:

April 23, 1910, the depot quartermaster, Seattle, Wash., submitted abstract and one copy of each bid received in response to advertisement for dock accommodations at Seattle during fiscal year 1911. These bids were carefully considered, and upon recommendation the bid of the United Warehouse Co., for Pier 11, at $9,600 per annum, was approved by the Secretary of War, the same giving the most tonnage at the cheapest rate, and being otherwise desirable. The depot quartermaster was therefore directed to enter into lease for this dock during fiscal year 1911.

2. January 9, 1914, the Quartermaster General addressed the following letter to the Chief of Staff, for consideration of the Secretary of War, on the subject of docking facilities, at Seattle, Wash.:

"It appears from information received that the port commission in Seattle, Wash., contemplates the construction of certain piers in Smiths Cove, Puget Sound, for various purposes, and makes the following proposition to the Government:

"First. To construct piers in Smiths Cove, over which the Government would have exclusive use and control of approximately 425 feet of said piers, subject to common use of wagon roadway along the center of pier, and including additional berthing space necessary for a vessel of the dimensions of the transport *Dix;* also for the use of the cable ship *Burnside,* or any other similar cable ship.

"Second. The Signal Corps to have the privilege of installing a cable tank not to exceed 50 feet in diameter in such position as shall be convenient to the cable ship. Tank to be installed and maintained at the expense of the Government.

"Third, fourth, fifth, and sixth. * * *

"Seventh. The pier being now in process of construction, the port commission will undertake to adapt the structure as far as possible to the needs of the Government.

"Eighth. * * *

"Ninth. The Government to pay for the foregoing privileges the sum of $650 per month.

"Tenth. The port commission also agrees to provide facilities at its Central Waterfront Pier, now in process of construction, and well under way, for the landing of small boats such as pertain to the various fortifications in the sound, at an approximate rental of $100 per month.

"It is contemplated that the structures and pier will be completed on or about June 30, 1914, and the premises above outlined will be ready for occupancy at that time.

"This matter has been carefully taken up and considered by the depot quartermaster at Seattle and, in answer to letter from the Quartermaster General, he recommends as follows:

"It is believed it would be advisable to let matters remain as they are for the present, for the following reasons—

"First. It is understood that negotiations are under way for the transfer of the Washington-Alaska Military Cable & Telegraph System to the Post Office Department. This would eliminate from consideration the arrangements necessary for berthing the *Burnside* and providing a cable tank. The recommendation of this office that the port commission's proposition be accepted was in a great measure influenced by the conveniences offered for berthing the *Burnside* and locating the cable tank.

"Second. There are other large projects under way by the port commission, some of which when completed might afford even more advantageous sites for Government purposes than those offered.

"Third. When all these projects are completed, or sufficiently advanced to permit of best conclusions, a careful study of the entire situation can be made and the most convenient and advantageous arrangements made for the Government.

"This office concurs in the recommendations of the depot quartermaster, Seattle, and in view of the fact that other departments and various bureaus of the Government are more or less interested in the docking facilities at Seattle, it is recommended that a board of officers be convened for the purpose of carefully investigating, reporting on, and making recommendations relative to the project submitted by the Port Commission of Seattle."

The above recommendation was approved by order of the Secretary of War.

3. The report of the board of officers, dated May 14, 1914, was received in the War Department and the following is abstracted therefrom:

"After careful consideration of all the accompanying papers and investigation by members of the board, the board reaches the following conclusions:

"First. In view of the possible transfer of the Alaska cable system to the Post Office Department, the construction of a cable tank at the Smiths Cove Pier by the War Department should be held in abeyance until the question of the transfer is settled one way or the other. It would probably cost $10,000 to construct the cable tank. The one at Tacoma is now available, and it is not believed it would be economical for the War Department to abandon that tank and put $10,000 in a new one at the present time.

"This matter also would materially affect the amount of space the War Department would require for the transaction of its business, and until this amount of space is definitely known it would appear to be inadvisable to proceed further.

"Second. The Government owns a site for a dock on Salmon Bay. The construction of the Lake Washington Canal, which is now under way, will afford access to this dock site, but unless rail facilities were available this site would not be suitable. The question of constructing tracks to this site was taken up by the president of the board with the officials of the Oregon-Washington Railroad, whose right of way is convenient, but no assurance could be obtained that tracks would be constructed within the next few years. This site, with rail facilities, would probably be the one the War Department would select, on account of its belonging to the Government and its convenience to Fort Lawton.

"Third. The port commission plans are not as yet far enough advanced toward completion to enable the board to conclude exactly what the conditions will be.

"In view of the above facts, the board recommends that matters be left as they are for at least another year. By that time the question of the transfer of the cable system to the Post Office Department will probably be determined. The port-commission projects will have been completed or advanced far enough to permit of a clear understanding of the situation. The Lake Washington Canal will probably be completed, and definite understanding can be had with the railroad company as to the possibilities of rail facilities at the Salmon Bay site."

4. The above-mentioned proceedings of board of officers, after careful consideration by all bureaus concerned, were approved by the Secretary of War. The papers were later transmitted to the depot quartermaster, Seattle, Wash., by the Quartermaster General, recommending that the president, Port of Seattle commission, be advised of action taken.

5. January 27, 1916, the Quartermaster General, in letter to the depot quartermaster, Seattle, Wash., on the subject of cable tank and dock facilities at Seattle, remarked that his office had listed for consideration in connection with the 1918 estimates to Congress a project for the construction of a Signal Corps cable tank and dock at Salmon Bay, near Fort Lawton Reservation, and that in order to estimate for the dock and cable tank it was desired the depot quartermaster take the matter up as soon as practicable, confer with all the military authorities interested at Seattle, and forward estimates, together with remarks as to advisability of the Government constructing such a dock at that time.

6. The depot quartermaster, Seattle, Wash., reported on June 6, 1916, that he estimates the cost of the dock and warehouse would be $65,644, and dredging of site $7,260, the cost of cable tank being estimated at $7,000. This matter will be considered in connection with the next estimates to be submitted to Congress.

7. During the progress of the investigation of dock and cable tank facilities at Seattle, Wash., set forth in report herewith, it has been necessary for the depot quartermaster, Seattle, Wash., to renew the lease on Pier 11, Oriental Dock, each year, at the same rate as when first leased.

8. It was considered that suitable and adequate fire protection existed at this wharf, the following apparatus being on hand on May 31, 1916: Twelve hand grenades on walls in various parts of dock; 42 fire buckets in racks in various parts of dock; 6 fire plugs at various parts of the pier, thread couplings same as city plugs. Pier 11 also had the protection of the city fire departments.

9. The Government supplies stored on this dock were principally clothing and subsistence, small arms, ammunition, and miscellaneous supplies, being loaded on transport and awaiting shipment to posts in Alaska; also powder and cannon ammunition for Puget Sound Coast Artillery posts. Information has been received in the department to the effect that approximately $15,000 worth of Signal Corps material and $70,000 of all other supplies on this dock have been destroyed, or a total loss of approximately $85,000. The figure in foregoing resolution ($40,000,000) is therefore thought to be an error.

Very respectfully,

NEWTON D. BAKER,
Secretary of War.

PETITIONS AND MEMORIALS.

Mr. NELSON presented telegrams in the nature of petitions from the Minnesota Employers' Association, of St. Paul; from M. C. Tifft, general counsel, Minnesota Employees' Mutual Liability Insurance Co., of Minneapolis; and from B. F. Nelson, of Minneapolis, all in the State of Minnesota, praying that policies of mutual liability insurance companies be exempted from taxation under the proposed revenue law, which were referred to the Committee on Finance.

Mr. PHELAN presented a memorial of the Board of Supervisors of Contra Costa County, State of California, remonstrating against the proposed inheritance tax, which was referred to the Committee on Finance.

He also presented a petition of the Chamber of Commerce of Corona, Cal., praying for an appropriation for the construction of a roadway from the Atlantic to the Pacific Oceans, which was referred to the Committee on Military Affairs.

Mr. THOMPSON presented a petition of 100 inmates of the Kansas State Soldiers' Home, Fort Dodge, Kans., praying for the enactment of legislation to provide that widows of veterans of the Civil War who were married after the year 1895 be granted pensions, which was referred to the Committee on Pensions.

Mr. WARREN. I present a telegram in the nature of a memorial from the Wyoming Bankers' Association, remonstrating against the insertion of a banker's special tax provision in the revenue bill. I move that the telegram be printed in the RECORD and referred to the Committee on Finance.

There being no objection, the telegram was referred to the Committee on Finance and ordered to be printed in the RECORD as follows:

CHEYENNE, WYO., *July 11, 1916.*

F. E. WARREN,
United States Senate, Washington, D. C.:

We are advised bankers' special tax was stricken from the omnibus revenue bill before being passed by the House. Please use your best efforts to prevent its being inserted in the bill in your House. Your good offices for such further relief from income tax as may be possible will be appreciated.

WYOMING BANKERS' ASSOCIATION,
HARRY B. HENDERSON, *Secretary.*

REPORTS OF COMMITTEES.

Mr. CLAPP, from the Committee on Indian Affairs, to which was referred the bill (H. R. 8492) to restore homestead rights in certain cases, asked to be discharged from its further consideration and that it be referred to the Committee on Public Lands, which was agreed to.

Mr. THOMAS, from the Committee on Public Lands, to which was referred the bill (S. 6331) authorizing the Secretary of the Interior to issue patent to William H. Ingle for homestead entry in Colorado, reported it with an amendment and submitted a report (No. 657) thereon.

He also, from the same committee, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

H. R. 11162. An act to amend an act entitled "An act to authorize entry of the public lands by incorporated cities and towns for cemetery and park purposes," approved September 30, 1890, and for other purposes (Rept. No. 659); and

H. R. 20. An act authorizing the county of Gunnison, Colo., to purchase certain public lands for public-park purposes (Rept. No. 658).

Mr. CHAMBERLAIN, from the Committee on Public Lands, to which was referred the bill (H. R. 14868) to accept the cession by the State of Oregon of exclusive jurisdiction over the lands embraced within the Crater Lake National Park, and for other purposes, reported it without amendment and submitted a report (No. 656) thereon.

Mr. SHIELDS, from the Committee on the Judiciary, to which was referred the bill (H. R. 12541) authorizing insurance companies and fraternal beneficiary societies to file bills of interpleader reported it with amendments and submitted a report (No. 660) thereon.

Mr. SMOOT, from the Committee on Public Lands, to which was referred the bill (H. R. 7419) granting a patent to a certain strip of land to Elisha A. Crandall, reported it without amendment and submitted a report (No. 661) thereon.

He also, from the same committee, to which was referred the bill (H. R. 15522) to establish a national park service, and for other purposes, reported it with an amendment and submitted a report (No. 662) thereon.

Mr. BECKHAM, from the Committee on Claims, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

H. R. 6758. An act for the relief of the legal heirs of Hector M. McDonald, deceased (Rept. No. 664);

H. R. 11262. An act for the relief of Mrs. C. D. Corbin (Rept. No. 665); and

H. R. 12248. An act for the relief of the estate of Mary H. S. Robertson, deceased (Rept. No. 663).

Mr. BECKHAM, from the Committee on Claims, to which was referred the bill (H. R. 7417) for the relief of Lawrence J. Kessinger, asked to be discharged from its further consideration and that it be referred to the Committee on Post Offices and Post Roads, which was agreed to.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CATRON:

A bill (S. 6612) for the relief of Bertram C. Gilbert; to the Committee on Military Affairs.

By Mr. SMITH of Maryland:

A bill (S. 6613) to protect the health of the residents of the District of Columbia and the employees of the United States Government residing in Maryland near the District of Columbia boundary; to the Committee on the District of Columbia.

By Mr. CHAMBERLAIN (for Mr. REED):

A bill (S. 6614) granting a pension to Lotta K. Boyd, widow of the late Capt. Charles T. Boyd, and to Eliza and Klem, his children; and

A bill (S. 6615) granting an increase of pension to Annie E. Adams (with accompanying papers); to the Committee on Pensions.

THE REVENUE.

Mr. BROUSSARD submitted an amendment intended to be proposed by him in the bill (H. R. 16763) to increase the revenue, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

SUPPLIES TO PEOPLE OF POLAND (S. DOC. NO. 494).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed:

To the Senate:

In response to the resolution adopted by the Senate on May 31 (calendar day, June 1), 1916, requesting the President to furnish information relative to the transportation of relief supplies to Poland, if the furnishing of such information is not incompatible with the public interest, I transmit herewith a report by the Secretary of State on this subject.

The report of the Secretary of State has my approval.

WOODROW WILSON.

THE WHITE HOUSE,
Washington, July 12, 1916.

EXECUTIVE SESSION.

Mr. BANKHEAD. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened and (at 6.10 p. m., Wednesday, July 12, 1916) the Senate took a recess until tomorrow, Thursday, July 13, 1916, at 10 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate July 12 (legislative day of July 7), 1916.

POSTMASTERS.

CALIFORNIA.

Robert E. Walsh to be postmaster at Angels Camp, Cal., in place of F. J. Grillo. Incumbent's commission expires July 18, 1916.

FLORIDA.

W. L. Straub to be postmaster at St. Petersburg, Fla., in place of R. S. Hanna. Incumbent's commission expired June 5, 1916.

ILLINOIS.

Ray Raridon to be postmaster at Morrison, Ill., in place of John Grierson, deceased.

KANSAS.

Robert Shouse to be postmaster at Ellinwood, Kans., in place of Theodore Iten, jr. Incumbent's commission expires August 22, 1916.

KENTUCKY.

Francis B. Brown to be postmaster at Morganfield, Ky., in place of R. L. Jones. Incumbent's commission expires July 18, 1916.

MASSACHUSETTS.

Frederick M. Fowler to be postmaster at Foxboro, Mass., in place of Edward W. Welch, removed.

James M. Perley to be postmaster at Rowley, Mass., in place of J. A. Marshall. Incumbent's commission expired January 15, 1916.

MINNESOTA.

Charles A. Allen to be postmaster at Milaca, Minn., in place of Fay Cravens. Incumbent's commission expired January 15, 1916.

MISSISSIPPI.

Iona G. Chapman to be postmaster at Utica, Miss., in place of E. S. Chapman, removed.

NEBRASKA.

Charles S. Anderson to be postmaster at Fullerton, Nebr., in place of J. A. Storch. Incumbent's commission expires July 16, 1916.

Patrick F. Leonard to be postmaster at Anselmo, Nebr., in place of J. F. Brechbuhl. Incumbent's commission expires August 8, 1916.

C. B. Nichols to be postmaster at Valley, Nebr., in place of F. H. Whitmore. Incumbent's commission expires August 8, 1916.

NORTH DAKOTA.

Henry E. Brown to be postmaster at Buffalo, N. Dak., in place of Ingvold Berg. Office became presidential July 1, 1916.

PENNSYLVANIA.

Hugh A. Brown to be postmaster at Leetsdale, Pa., in place of R. R. Groetsinger. Incumbent's commission expires July 13, 1916.

Frank W. McCall to be postmaster at Morton, Pa., in place of A. A. Benkert. Incumbent's commission expired May 10, 1916.

TEXAS.

Kenneth T. Biggs to be postmaster at Sabinal, Tex., in place of A. P. McCauley. Incumbent's commission expires August 23, 1916.

J. G. Lewis to be postmaster at Walnut Springs, Tex., in place of Effie Walton. Incumbent's commission expires August 23, 1916.

George D. Staton to be postmaster at Grand Saline, Tex., in place of D. E. Walshe. Incumbent's commission expires August 23, 1916.

VIRGINIA.

John D. Shepperson to be postmaster at Charlotte Court House, Va., in place of J. W. Ingram. Incumbent's commission expires July 24, 1916.

WASHINGTON.

William F. Brown to be postmaster at Renton, Wash., in place of Thomas Harries. Incumbent's commission expired May 8, 1916.

Clarence A. Morgan to be postmaster at Hoquiam, Wash., in place of R. L. Philbrick. Incumbent's commission expired February 13, 1916.

Mabel Murphy to be postmaster at Marysville, Wash., in place of H. A. Rathvon. Incumbent's commission expired March 21, 1916.

WEST VIRGINIA.

Walter S. Bambrick to be postmaster at Weirton, W. Va., in place of Louis Lowmiller. Incumbent's commission expires August 23, 1916.

WISCONSIN.

Henry Fleishbein to be postmaster at Glidden, Wis., in place of Mary A. McAskill. Incumbent's commission expired May 1, 1916.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 12 (legislative day of July 7), 1916.

CONSULS.

CLASS 2.

John P. Bray to be a consul of class 2.

CLASS 3.

Robert Frazer, jr., to be a consul of class 3.
John F. Jewell to be a consul of class 3.

CLASS 4.

Charles K. Moser to be a consul of class 4.
William J. Pike to be a consul of class 4.

CLASS 5.

Gebhard Willrich to be a consul of class 5.

CLASS 6.

Wilbur T. Gracey to be a consul of class 6.
Ralph C. Busser to be a consul of class 6.
Jesse B. Jackson to be a consul of class 6.

CLASS 7.

John R. Silliman to be a consul of class 7.
Henry P. Starrett to be a consul of class 7.
Graham H. Kemper to be a consul of class 7.

CLASS 8.

William E. Chapman to be a consul of class 8.
Louis G. Dreyfus, jr., to be a consul of class 8.
Charles C. Broy to be a consul of class 8.
Ripley Wilson to be a consul of class 8.
De Witt C. Poole, jr., to be a consul of class 8.
John W. Dye to be a consul of class 8.

CLASS 9.

Charles H. Albrecht to be a consul of class 9.

CONSUL GENERAL.

CLASS 3.

Edwin N. Gunsaulus to be a consul general of class 3.

ASSISTANT TREASURER.

Robert I. Hunt to be Assistant Treasurer of the United States at Chicago, Ill.

PUBLIC HEALTH SERVICE.

Dr. William D. Heaton to be assistant surgeon.

PROMOTIONS AND APPOINTMENT IN THE NAVY.

Commander William D. MacDougall to be a captain.

Francis B. Brown, Morganfield.

NEW YORK.

William H. Campbell, Warsaw.
W. F. Keating, Victor.
George M. Lamb, Coxsackie.
Daniel W. Quinn, Valhalla.
C. M. Stearne, Sacket Harbor.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *July 12, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Lord God, Father of all souls, we lift up our hearts to Thee in fervent prayer for the little children who, in many sections throughout the length and breadth of our land, especially in Greater New York, are sorely afflicted by a fatal disease which seems to baffle the skill of our physicians. Guide them, we beseech Thee, to a speedy solution of the cause and a remedy which shall remove it, and spare to the loving hearts of the parents and to the world the little children. This we ask in the name of Him who said, "Suffer the little children to come unto Me and forbid them not." And He took them up in His arms, put His hands upon them, and blessed them as precious gifts of heaven. Amen.

The Journal of the proceedings of yesterday was read and approved.

PUBLICITY OF CAMPAIGN CONTRIBUTIONS.

Mr. RUCKER. Mr. Speaker, I ask unanimous consent that consideration of the bill H. R. 15842, known as the campaign publicity bill, be made the special order for to-morrow, Thursday, immediately after the reading of the Journal, not to interfere with conference reports.

Mr. MANN. Mr. Speaker, I suggest that another bill is pending as a special order.

Mr. ADAMSON. The general dam bill is pending, but it will not take very long.

Mr. MANN. I suggest that the gentleman ask that the bill referred to be given a privileged status.

Mr. RUCKER. Very well, Mr. Speaker, I ask that the bill be given a privileged status, to be taken up after the consideration of the bill now pending.

The SPEAKER. The gentleman from Missouri asks unanimous consent that the bill H. R. 15842, respecting the publicity of campaign contributions, be given a privileged status. Is there objection?

There was no objection, and it was so ordered.

COMPENSATION FOR INJURIES TO FEDERAL EMPLOYEES.

The SPEAKER. This is Calendar Wednesday, and the House will automatically resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 15316) to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes, and the gentleman from Tennessee, Mr. SIMS, will take the chair.

Mr. MOON. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman's point comes too late.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15316, with Mr. SIMS in the chair.

Mr. MOON. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Tennessee makes the point of order that there is no quorum present. Evidently there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Allen	Fairchild	Kahn	Patten
Anthony	Farley	Kearns	Peters
Austin	Farr	Keating	Phelan
Bacharach	Fields	Kennedy, Iowa	Porter
Bailey	Finley	Kent	Pou
Barchfeld	Fitzgerald	Key, Ohio	Powers
Barnhart	Fordney	Kiess, Pa.	Pratt
Beakes	Freeman	Lafean	Price
Beales	Gallagher	Lenroot	Rayburn
Black	Gallivan	Liebel	Riordan
Burgess	Garland	Linthicum	Roberts, Mass.
Byrns, Tenn.	Garrett	Littlepage	Rogers
Caldwell	Gillett	Lobeck	Rowland
Callaway	Glass	Loft	Saunders
Cantrill	Graham	McAndrews	Scott, Pa.
Capstick	Gray, N. J.	McDermott	Shackleford
Carlin	Gregg	McFadden	Sherwood
Casey	Griest	McKellar	Slayden
Charles	Guernsey	McKinley	Smith, Tex.
Church	Hamill	Madden	Snyder
Cline	Hart	Maher	Stedman
Coady	Hawley	Miller, Minn.	Steele, Iowa
Connelly	Hay	Miller, Pa.	Stephens, Nebr.
Copley	Heaton	Morgan, La.	Sumners
Costello	Heflin	Moss, Ind.	Tague
Crago	Helgesen	Moss, W. Va.	Talbott
Crosser	Henry	Murray	Tilson
Davenport	Hensley	Nelson	Treadway
Dempsey	Hill	Nichols, Mich.	Venable
Dewalt	Hinds	Nolan	Ward
Doremus	Houston	North	Williams, Ohio
Driscoll	Howell	Oakey	Wilson, Fla.
Eagan	Husted	Oglesby	Wilson, Ill.
Eagle	Hutchinson	Oldfield	Winslow
Emerson	Johnson, S. Dak.	O'Shaunessy	Wood, Ind.
Esch	Jones	Parker, N. Y.	

The committee rose; and the Speaker having resumed the chair, Mr. SIMS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having under consideration the bill H. R. 15316, and finding itself without a quorum, he caused the roll to be called, when 289 Members answered to their names, a quorum, and he presented the names of the absentees for printing in the Journal.

The committee resumed its sitting.

Mr. WEBB. Mr. Chairman, I yield such time as he may desire to the gentleman from Indiana [Mr. ADAIR].

Mr. ADAIR. Mr. Chairman, the pending bill, which, if enacted into law, will provide compensation for employees of the Government suffering injuries in the course of their employment, meets with my hearty approval, and I shall gladly give it my support. I favor this bill because it is in the interest of labor and because I believe it is in the interest of the Government. The gentleman from Ohio [Mr. GARD] in reporting this bill has well said that the protection of the life and health of employees against injury sustained while in the performance of duties is to-day recognized as one of the very vital principles in the scheme of government. So large have become the works of industry, so great has been their development through improved machinery and appliances, so numerous have become employees required to carry on these great works that the necessity of safeguarding them has long been manifest. It should be the purpose of all employers of labor to give to their employees the most complete protection possible against injuries resulting from their employment and from diseases having their origin in improper working surroundings. But despite the best efforts to protect employees against injury, accidents will occur, and the trend of the best thought of the country is to afford relief to the victims of such accidents, their families, and those dependent upon them, from the dire results of misfortune.

The human right is ascendant, and the life, health, and happiness of their people is held in sacred trust by the most enlightened governments. The unit of all civilization is the home, and that this may not be broken up through occupational injury, but may be continued despite it, is the ultimate object of all workmen's compensation laws. Many of the States of this Union have such compensation laws which are working with most excellent results, and now it is proposed that the United States shall have a compensation law for the protection of all its employees, and thus give relief from the cumbrous and inefficient system of presenting private claims to Congress for its action, often delayed and many times insufficient, and to give its sanction to this great principle of humanity.

Mr. Chairman, my own State of Indiana recently passed a workman's compensation law which is working a great benefit to both the employer and the employee. During the past year under that law more than 4,000 cases have been compromised, and injured employees are now receiving over $8,000 per week. The law is a success from every standpoint, and there are no reasons why Government employees should not have the same protection.

Mr. Chairman, during the 10 years I have occupied a seat upon the floor of this House I have not lost a single opportunity to use my voice and vote in support of all legislation helpful to labor. I claim the right to speak for the plain people of our country without my motives being questioned, for I was born and reared among them, in the atmosphere of poverty, and the interest I have in their welfare comes from my association with them and my knowledge of their needs and condition. For three years of my life I worked in the factory, side by side with those who earn their bread by the sweat of their faces. It was in this way I earned the money to finish my education. I am glad I have had that experience. I learned then, and I know now, how to sympathize with labor, and I know how to legislate for them.

Mr. Chairman, the Republican Party was in control of this Government for 16 years, and during all of that time labor was ignored and the petitions of the working people denied. When I came to Congress 10 years ago I saw piled upon the Speaker's desk petitions said to have been signed by more than a million workingmen, pleading and begging for legislation in their behalf. I saw the party in power turn a deaf ear to their appeal and give no consideration to their demands. Session after session they tried in vain to secure justice, but the party in power was too busy legislating for a favored few to give any attention to the demands of labor. Finally the working people saw it was impossible to secure justice at the hands of the Republican Party, and at the ballot box in 1910 and 1912 they turned to the Democratic Party and gave us control of the Government. Just as soon as we were given the power we heard their appeals and recognized their rights by enacting legislation which has, and will, greatly improve labor conditions and raise the standard of living. We took up and enacted into law more than 20 bills directly in the interest of labor, giving to the working people of the country all the legislation they were asking for—legislation they could not get under Republican rule.

Mr. Chairman, since you have occupied that chair and presided over a Democratic House, the following bills advocated by labor have been enacted into law:

First. The eight-hour bill, extending the operations of the eight-hour law to work done for the Government as well as work done by the Government.

Second. The Children's Bureau bill, to promote the welfare of children and to devise means whereby the necessities of the parents can not be used to retard the development of the children who are the citizens of to-morrow.

Third. The anti-injunction bill, to protect workingmen during the period of trade disputes and to give to them the same protection in the courts that other men enjoy. For more than 30 years there has been a tendency on the part of the equity courts to assume legislative power and to declare by injunction certain acts to be criminal during labor disputes that are not criminal at other times, and then try men for committing these crimes without the protection of a trial by jury. That is contrary to the spirit of democracy, and this House has put its stamp of disapproval on such usurpation on the part of the courts by the passage of the anti-injunction bill.

Fourth. The contempt bill, to provide a trial by jury in the cases of indirect contempt when the acts alleged to have been committed in violation of the orders of the court are of a criminal character, which would otherwise be tried by a judge and jury in our law courts.

Fifth. The Department of Labor bill, creating a department, with a Secretary who shall be a member of the President's Cabinet and who shall have the power of mediation in trade disputes and the right to appoint conciliators in such cases when, in his judgment, it is wise to do so; and while his good offices may be used for the purpose of bringing the contending parties together, he shall have no power to enforce his own views upon either of them.

Sixth. The Industrial Commission bill, to investigate the entire subject of industrial relations between employer and employee, with a view of ascertaining the best methods of dealing with industrial disputes so as to protect the rights of all persons directly or indirectly interested.

Seventh. The investigation of the Taylor and other systems of so-called scientific shop management in order that the workingman might be protected against speeding up beyond his normal power.

Eighth. The seaman's bill to give freedom to the seaman, provide a standard of skill for seamanship, promote safety of travel at sea, and equalize the operating expenses of foreign vessels with American vessels, so as to build up an American merchant marine without resorting to subsidies.

Ninth. The convict-labor bill requiring the sale of convict-made goods to conform to the laws relative to convict-made goods in the States in which they are sold.
